

Ruth Ridder And Loren Gast Married New Year's Night

FIRST WEDDING TO TAKE PLACE IN LIBERTY TOWNSHIP CHURCH

Liberty Township Couple Will Reside At Sioux City, Iowa

A beautiful candlelight ceremony Friday evening, January 1st, at 8:00 o'clock, Miss Ruth L. Ridder, only daughter of Mr. and Mrs. F. Ben Ridder, of Liberty Township, and Loren C. Gast, the youngest son of Mr. and Mrs. Herschel E. Gast, also of Liberty Township, were united in marriage at the Liberty Methodist Church, with the double ring ceremony.

The bride was given in marriage to her father.

This was the first wedding ever solemnized in the 58-year-old church.

The bride was attired in a white floor-length dress trimmed with silver spangles. Her finger-tip of French net lace was held in place with a beaded halo. She carried a bouquet of peach and white roses tied with a white satin ribbon with peach streamers. Her accessories were a bracelet, which was a gift from the groom, and two rings which were worn by her grandmother Nesbit.

The bridesmaid, Miss Lola Gast, sister of the groom, wore a floor-length dress of peach net and carried an arm bouquet of mixed flowers.

The groom and best man, Mr. F. Ben Ridder, brother of the bride, wore dark blue suits with white boutonnières.

The usherette, Miss Lois Gast, sister of the groom, wore a white floor-length dress, and the usher, Le Roy Bredlow, cousin of the groom, wore a brown suit with a chrysanthemum boutonniere.

Miss Lois Reimer, cousin of the bride, played a piano prelude of "Wedding" and the recessional by "The Wedding March." She also accompanied Miss Elsie Ward, cousin of the bride, who sang, "Perfect Love," before the ceremony. During the ceremony while the bride and groom knelt at the altar, Miss Ward sang "Have Thine Way."

The reception, which was attended by about ninety guests, was held in the church parlors, with Le Roy Bredlow as master of ceremonies.

The room was decorated in peach and white, and a two-course lunch was served. The four-tier wedding cake, which was baked and decorated by Miss Lois Gast, served as a centerpiece on the bride's table.

A white bell hanging above the table was the same that the parents were married by. The dishes which the bride and groom used were those used by the bride's great-grandparents at her wedding 75 years ago in Canada and were again used by her parents at their wedding 46 years ago.

A short program was given between the courses. Rev. Harvey sang, "Love You Truly," and "Under the Lilac Tree." A short sketch of the bride's life was given by Mr. F. Ben Ridder, and a short sketch of the groom's life was given by Mr. Emil Beier. The wedding was given by Mr. F. Ben Ridder, and a short sketch of the groom's life was given by Mr. Emil Beier.

The wedding was given by Mr. F. Ben Ridder, and a short sketch of the groom's life was given by Mr. Emil Beier. The wedding was given by Mr. F. Ben Ridder, and a short sketch of the groom's life was given by Mr. Emil Beier.

Period 2 coupons (10 gal. ea.) good until Jan. 27.
Period 3 coupons (11 gal. ea.) good until February 22.

WILL DISTRIBUTE RATION BOOKS NO. 2 IN COUNTY

Hancock County rationing officials have appointed County Supt. of Schools, Chas. Whitney as chairman, and Dale Bardo as a special committee to supervise the distribution of ration book No. 2.

CHAMBERS BEGINS 3-YEAR TERM AS SUPERVISOR

Only One Other Change In Court House Personnel

The beginning of 1943 saw only two changes in the court house personnel as John A. Chambers of Twin Lake township began a three-year term as county supervisor, succeeding Mr. G. E. Klipping, who had held the position for the past twelve years.

The other new face in the court house is Miss Myrtle White of Ellington township, new clerk in the county auditor's office, who succeeded Miss Lorraine Hanson who resigned to become secretary for Representative W. S. Pritchard who goes to Des Moines January 8 to take over legislative duties.

The Board approved raises in salaries of deputies, road employees and assessors ranging from 10 to 20 per cent.

William Henschen was appointed county engineer to succeed Charles Morton, who was called to active service as a major in the U. S. Army.

County Director of Relief, H. H. Mullin was re-appointed.

HANCOCK COUNTY FARMERS URGED TO GROW HEMP

"Grow Hemp for Uncle Sam," is the war cry in Hancock County. Township committeemen have contracts and the necessary information on the growing of this crop.

Growing hemp will help provide the great amount of rope needed for the war effort. Hemp will help prevent a shortage of binder twine as it will take the place of the fiber that is used in rope-making, thus releasing the rope fiber which will be used for binder twine.

See your township AAA Committeemen, or the County Extension Director at once if you want more information on hemp.

A new bulletin entitled "Hemp A War Crop for Iowa," is now available at the County Extension Director's office and the AAA office.

The Klemme high school in 1939 and the Art School of Minneapolis. Mr. Gast graduated from Klemme high school in 1935 and has since been working in partnership with his father on the farm, until last fall when he enlisted in the Army Reserve and has been attending Morningside College at Sioux City, where the couple will make their home.

Klemme Civic Club Sponsors Play To Sell War Stamps

ED. THOMPSON ELECTED PRESIDENT OF KLEMMME CIVIC CLUB FOR 1943

At a meeting of the Klemme Civic Club held Monday evening Ed Thompson was named President for the coming year, succeeding C. C. Kilgore. W. C. Keraus was elected Vice-President, and Walter Lemke, Secretary and Treasurer for the coming year.

Membership Revised

The past year the Club decided to try operating on a "voting and a social membership" program, but this has proven unsatisfactory, and the club will again in the future operate on the basis of having all members on an equal basis, with all dues again the same.

Will Sell Bonds And Stamps

As the first project of the year, the club is sponsoring a home talent play as a means of selling stamps and bonds.

The play, which is now in the hands of a special committee, will be an all-male, negro comedy.

The admission will be, in a way, free. Admission to the show can only be gained by buying a war stamp. A 10 cent stamp admits a child, a 25 cent stamp admits an adult, or a bond of any size will admit the whole family. In other words, it is free, as you buy stamps or bond, keep them and walk in. Everything is donated, and the object is to sell a lot of stamps and bonds and everybody have a lot of fun.

Watch for the date.

BOARD INVOICES COUNTY FARM AND HOME

The board of supervisors report that they have taken the annual inventory at the county home and have placed the value of the institution at \$66,275.75, about \$2,000 more than the 1941 figure.

Mr. and Mrs. Wilbur Hanson are the proud parents of a baby boy born to them on Thursday, December 31, at the Mercy Hospital at Mason City. They have named the new arrival Gary Lee.

Mr. and Mrs. Fred Jahnke of Garner, are the proud parents of a 6 1/2 pound baby girl born Sunday, December 27, 1942. She has been named Judy Kay. They have one other child, Ronnie Gene.

P. W. JOHNSON FAMILY WILL MOVE TO HUMBOLDT

Mr and Mrs P. W. Johnson and children, Barbara, Peter and Nancy, will move to Humboldt in a couple of weeks, where Mr. Johnson is employed as a salesman for the Curtis Candy Company.

Mr Johnson has been employed at the C A Larson food store for twenty years. He left Sunday for Humboldt and began his new work Monday.

Mr. and Mrs. Johnson have both been active in community work and devoted their talents to work in the American Legion and Auxiliary, Boy and Girl Scout work, and were always ready to help with school and church affairs.

Mrs. Johnson is a talented singer and has sung many solos at community gatherings, often being called upon to lead in community singing. Both Mrs. Johnson and her daughter, Barbara, sang in the Methodist Choir.

The Johnsons have four children Shirley, who works in Des Moines, Barbara in high school, and Peter and Nancy, twins, in the grades. All were born in Klemme, except Shirley, who was born at Spencer.

The Johnson family will be greatly missed in our community, but their many friends wish them a lot of happiness and success in their new work and new home.

Please phone 12 or send in your news items. Thank you.

What You Buy With WAR BONDS

At Midway, in the Coral Sea and from General MacArthur's headquarters in Australia, the Navy patrol bombers are searching out enemy bases, ships and transports and "completing their mission." The Navy Patrol Bomber costs about \$750,000.

Our factories are turning out hundreds of these bombing ships. Yet it is only through your investment in War Bonds and Stamps you can do your share to help provide patrol bombers for our rapidly increasing air force. Invest at least ten percent of your income every payday in these Government securities and do your bit to win and shorten the war. Our airmen are depending on your help.

U. S. Treasury Department

All Records Broken In County Tax Collections For 1942

FARM MOBILIZATION DAY, JANUARY 12

President Roosevelt has issued a proclamation asking all farmers gather for a meeting on January 12.

Food is one of our most powerful weapons. The more food we produce, the more we are contributing to the winning of the war.

The year's program of work should be planned with the idea of successfully completing the maximum food production.

Farmers should breed sows now, or buy the necessary bred sows.

Machinery should be checked and repairs ordered at once. Ordering repairs early not only will help the farmers, but it also gives the W.P.B. an idea of how much metal to allocate for repairs. All broken parts of machinery should be welded, if possible. If it is impossible to weld the parts they should be turned in for scrap.

Hemp and other war crops should be grown.

Provide your township AAA committeeman with information on your plans for 1943. It will help in the tremendous job of supplying our armed forces with food.

FILED \$16,000 DAMAGE SUIT IN HANCOCK CO. COURT

Adolph J. Brandemuehl seeks to collect \$16,439.50 damages in a suit filed in the Hancock County District Court, against H. J. Will and Fred A. Fassler. The suit is the result of a car accident which occurred on June 2, 1942, on Highway 18 west of Garner. Brandemuehl in his petition states that his car collided with a heavily loaded truck driven by Fassler, with the permission of Will, the owner. Plaintiff charges negligence caused the accident.

Brandemuehl asks \$16,439.50 as damages, interest and cost of suit. He claims \$344.50 damage to his car, \$1,095 for doctor and hospital bills as a result of injuries suffered, and \$15,000 damages due to injuries received.

IOWA TRAPPING SEASON CLOSES JANUARY 10

Professional Trapper With Three Nights' Catch Of 450 Muskrats And 5 Mink

Trapping that in the past few years has netted Iowa trappers almost a million dollars in furs annually appears to be heading for a low during the 1942 season. The explanation for the apparent drop in the number of animals taken is that many trappers are in the armed forces; and the lateness of the muskrat season has made stream trapping for this popular furbearer difficult. Because of the abnormal number of late born young muskrats this all, the trapping season was set later than in other years to allow the kits to reach maturity. Early cold weather froze up many of the best muskrat streams and has resulted in a lower catch. Although the number of animals taken is less, the value of individual furs appears to be increasing as the season advances.

The value of the 1941 crop of furs was \$903,874.09.

The Year in Review

DEBUT

The year began with these important events:

- January
- 1-OPM bans retail sale of new cars, trucks.
 - 2-Manila and Cavite naval bases fall to Japs.
 - 6-In message to Congress, President Roosevelt orders 60,000 planes, 45,000 tanks in victory program.
 - 11-Japs invade Netherlands East Indies
 - 26-AEF lands in North Ireland.

THE WAR

- January
- 1-Hitler takes command of retreating Nazi army on Moscow front.
 - 2-Manila falls to Japs.
 - 12-Dutch East Indies invaded by Japanese; MacArthur's men again hurl enemies back on Luzon.
 - 19-Japs take Burma port, Taouay.
 - 25-Australia calls on U. S. for help.

SPORTS

January

- 1-Football results: Rose Bowl, Durham, N. C.—Oregon State 20, Duke 16, Sugar Bowl, New Orleans—Fordham 2, Missouri 0, New York—Chicago Bears 35, National Football League All-Stars 24.
- 7-Heavyweight champ Joe Louis knocks out Buddy Baer, first round, Madison Square Garden.
- 14-Joe DiMaggio, Yankee outfielder, named "player of the year" for 1941 baseball season.
- 23-Wille Hoppe wins third straight world chess championship, defeating West-Indian, beating Welker Cochran 50-31 in 36 innings.

February

- 5-Pole vaulter Cornelius Warmerdam sets record 15 feet 3½ inches, Madison Square Garden.
- 27-Gregory Rice of New York A. C. sets new world indoor three-mile record at National A. A. U. meet with time of 13:45.7.

March

- 15-New York Rangers win National Hockey league championship.
- 18-Eastern Intercollegiate Basketball league championship won by Dartmouth, defeating Princeton 46-38 in play-off match at Philadelphia.
- 25-West Virginia wins National Invitation basketball tournament, defeating West Kentucky, State, 47-45, Madison Square Garden.

April

- 4-Yale wins National A. A. U. swimming championship at Yale pool, New Haven, with 59 points.
- 12-Baseball season opens. Dodgers beat Giants, 7-5; Yankees defeat Senators, 7-0.
- 24-"Silver Shirt" William Dudley Pelley indicted by Indianapolis, Ind., grand jury.
- 24-Blackburn, 53, Negro, dies after apparent recovery from pneumonia.

May

- 2-Shut Out, Wayne Wright up, wins 68th Kentucky Derby. Wins largest purse in history of the race: \$64,225.
- 18-All New York city night baseball banned for duration by New York police commissioner. Sky glow endangers shipping.

June

- 20-New York Athletic club wins National A. A. U. track and field championships with 127 points.
- 27-National intercollegiate tennis singles championship won by Ted Schroeder, Stanford university, beating team-mate, Lee Dee, 6-3, 6-6, 6-2, 6-3, at New Orleans.

July

- 6-National League All-Stars, Leo Durocher, manager, defeated by American League All-Stars, Joe McCarthy, manager, 3-1, New York.
- 11-Bob Falkenberg, 16, Hollywood, wins National U. S. School tennis championship.
- 22-Byron Nelson, Toledo, Ohio, wins Tam O'Shanter Open golf tournament in Chicago with a 5 under par 72; \$2,500 first prize.

August

- 9-With a perfect 250, Dr. Leroy W. Childs, Lake Kerr, Fla., wins 12-gauge national amateur skeet title at Syracuse, N. Y., 100 yards.
- 23-Breaking his own record for 2,000-meter run in Stockholm, Gunder Haegg, Swedish track star, makes new time of 5:11.8.
- 23-Professional football champions, Chicago Bears, defeat College All-Stars, 21-0, before 101,200 fans at Soldier Field, Chicago.

September

- 6-Women's National Tennis crown won by Pauline Betz, Los Angeles, when she defeats Louise Brough, Beverly Hills, 4-6, 6-1, 6-4.
- 20-Final standings in minor league baseball. International league: Newark, W. 92, L. 81. American association: Kansas City, W. 84, L. 69. Eastern league: Albany, W. 84, L. 69. Southern association: Little Rock, W. 87, L. 59. Texas league: Beaumont, W. 89, L. 58. Pacific coast league: Sacramento, W. 105, L. 73.
- 23-Leland Stange, former Leland Stange, president, general manager of Brooklyn Dodgers, continuing as a director.

October

- 5-Cardinals beat Yankees, 4-2, at New York, to win their fourth straight victory and the World Series title; 69,052 fans at Chicago.
- 24-Wilbur wins Washington Handicap at Laurel, Md. Earnings now total \$528,335.
- 27-Morton Cecil Cooper, St. Louis Cardinal pitcher, voted National League's most valuable player for 1942 by Baseball Writers Association.
- 29-Branch Rickey, 62, former business manager of St. Louis Cardinals, named president and general manager of Brooklyn Dodgers succeeding Larry MacPhail.

November

- 3-Baseball Writers association committee names Joe Gordon, Yankee second baseman, as American league's most valuable player.
- 19-Louis Cardinals signs contract with Branch Rickey, Brooklyn Baseball club president, to manage Dodgers for fifth year.
- 21-Ohio State wins Western conference football championship.
- 28-Steve O'Neill, Cleveland manager, named manager of Detroit Tigers.

December

- 5-American Bowling Congress tournament opens at Chicago.
- 13-Connie Schwoeizer wins national bowling championship crown, dethroning Ned Day.
- 17-Louis Cardinals named "outstanding team of the year."

DIARY

January

- 16-Carole Lombard screen actress, her mother and 10 others killed in transport plane crash near Las Vegas, Nev., 15.
- 25-Columbia worst coal mine disaster in 25 years occurred at Mount Harris when 34 miners lives.

February

- 6-Tornadoes in Arkansas, Mississippi, Alabama Tennessee, Georgia kill 18 persons, four persons killed when flood and major avalanches roll down in northern California.

March

- 4-Burlington, Iowa, ordnance plant explosion kills 16, injures 51. Explosion here Dec. 12 1941 killed 13.
- 16-Tornadoes again sweep southern and central states killing 150 persons and causing \$3,000,000 damage. Ten army fliers killed when bomber crashes into mountain peak near Pendleton, Ore. Four others killed near Boise, Idaho.

April

- 12-Near Livermore, Calif., 14 fliers killed when two navy bombers crash.
- 26-High speed Hudson & Manhattan railroad train wrecked in tube at Jersey City, N. J. Five killed, 222 injured.
- 27-Tornadoes roar through Oklahoma, Minnesota, killing 80-100, \$1,000,000 damage.

May

- 1-C-47 bound airplane crashes into mountain peak near Salt Lake City, Utah, during rain storm, 17 killed. During past eight years 61 persons killed in air.
- 2-More tornadoes sweep Midwest, 22 dead and 100 injured near Missouri, Kansas, W. Va., traps 24. Twenty three killed.

SECOND FRONT

23-"Flash floods" in eastern and central Pennsylvania kill or drown 32 persons. Honesdale-Hawley region, with 24 dead, hit hardest.

June

- 9-While on hazardous, experimental mission, two U. S. blimps crash off New Jersey coast; 12 dead, including five civilian scientists and technicians. Only one survivor.
- 12-Oklahoma City struck by tornado; 29 dead, more than 50 injured.

July

- 1-Army air crashes near Welch, W. Va., and March Field, Calif., kill 30 army men.
- 4-Independence day traffic accidents claim 144 lives, drowning 80 more; 1941 total, 623.
- 24-Army observation plane crash near Waynesboro, Tenn., kills Maj. Gen. Frank Mahin, 64, commanding officer of 3rd Army, Camp Forrest, Tenn., and two army fliers.

August

- 14-Army plane crashes into Berkshire Hills near Pittsfield, Mass., killing 17 of 20 in crew. Nine more die in army bomber crash near Hastings, Mich.

September

- 24-Twenty dead as two Washington-bound B. & O. passenger trains smash, involving freight train on adjoining track, near Dickerson, Md.

October

- 1-U. S. army transport plane crashes in interior of Puerto Rico with 22 deaths.
- 4-American plane carrying 37 passengers crashes near Botwood, Newfoundland, killing 11, injuring eight.
- 23-American Airline plane collides with army bomber near Palm Springs, Calif.; 12 die. Bomber pilot charged by army with manslaughter.
- 28-Sixteen are killed, more than score injured when Detroit bus jammed with school children and war-workers struck by speeding passenger train.

November

- 29-Five hundred die when Boston, Mass., night club burns. Fire started when bus boy strikes match to replace ceiling electric bulb removed by prankster.

December

- 1-Suffolk county grand jury convenes to investigate Boston's Coconut Grove night club disaster.
- 13-Fire takes 110 lives in St. Johns, Newfoundland, dance hall. Many service men present.
- 17-Eight soldiers lose lives when army bomber crashes, explodes at Blythe, Calif. air base.

DEATHS

January

- 4-Dean of American stage, Otis Skinner 83.
- 9-Judge Joseph Franklin Rutherford, 72, founder and head of Jehovah's Witness since 1919.
- 22-Dr. William Dick Cutter, 63, educator and secretary of Hospital of American Medical Association.

February

- 1-Marion Sayle Taylor, 53, "Voice of Experience" radio adviser.
- 8-Composer of song, "Back Home in Indiana," James F. Hanley, 49.
- 12-Famous Midwestern artist, Grant Wood, on eve of 50th birthday.
- 17-Frank Lucius Packard, 65, author of "Jimmie Dale" stories.
- 23-Douglas Ziegler, 60, world-famous Austrian-born author, and wife, Elizabeth, 30, of Stefan, Petropolis, Brazil.

March

- 4-Dr. George Washington Kirchwey, 87, dean of Columbia law school, 1901-1940, warden of Sing Sing (1915-1918), criminologist, lawyer.
- 16-Francis Irene Du Pont, 68, research chemist on smokeless powder.

April

- 12-Dr. John Elliott, 73, advocate of better housing and public health.
- 15-Hugh S. Johnson, 59, NRA administrator during 1933-34.
- 17-Dr. Alfred Hertz, 69, conductor of San Francisco symphony orchestra from 1915-1929.

May

- 9-Graham McNamee, 53, NBC's famous news anchor and commercial anchor.
- 10-Member of the classic Dutch stage comedy twosome, Joseph M. ("Joe") Weber, 74.
- 26-Dr. John R. Brinkley, 56, widely known "goat gland" specialist.
- 29-Radio, stage and screen star, John Blythe Barrymore, 60, Greatest performance in role of Hamlet from '22 to '29.

June

- 8-Brian Bell, 52, head of Associated Press Washington bureau for three years.
- 22-Actress Anne Sutherland, 75.

July

- 2-Moses L. Annenberg, 64, publisher of Philadelphia Inquirer and former holder of monopoly in race horse information.
- 25-George John Murdoch, 84, inventor of World War I self-sealing gas tank.

August

- 4-Veteran screen director, James Cruze 48, famous for such as "The Covered Wagon," "Old Tomatoes." Real name was James Cruze Bosen.
- 6-Dr. J. H. Tufts, 80, American philosopher, president of University of Chicago in '25.
- 20-Alice Dyer Miller, 68, author of "The White Cliffs."

September

- 1-Baron Alphonse de Rothschild, 64, at Bar Harbor, Maine.
- 3-Cowboy artist and writer William Rodrick (Will) James, 50.
- 5-Mrs. Myra Edith B. Lewis, 62, wife of John L. Lewis, president of United Mine Workers.
- 16-Father of blind flying "Col. William C. Ocker, 66, U. S. A. inventor and aviator. Snatched plane, 64, actor, poet, packer kidnapped in 1933 for \$100,000 ransom.

WOMEN IN WAR

SABOTAGE

U. S. Farmers With Less Labor, Supplies, Machinery, Must Double the Production Shown in World War I

Herculean Task Requires Advance Painstaking Plans

Before they win 1943's global battle for food, farmers of this country must solve a double-barreled problem.

They must produce record highs of foods and fibers with less machinery, equipment, supplies and labor. Enough food and fiber not only for civilians of this country, but for those of the United Nations, for our fighting men and those of our Allies.

That's a task a Hercules might shy from; a job which demands painstaking advance planning.

To this end, the department of agriculture has again established food and fiber goals for the nation, as it did in 1942. (See accompanying diagrams.) These goals have been broken down into state goals, which in turn are being broken down into goals for each of the 3,090 counties of the United States.

Throughout the nation, America's 6,330,000 farmers are now talking over the goals with neighbors who are Agricultural Adjustment Agency (AAA) farmer-committeemen. Eventually, goals will be set for each farm, with the producer signing a voluntary "production contract." A contract which, in effect, is a pledge to the nation that he'll keep food and fiber rolling to all fronts, at home and abroad.

Broadly, food and fiber goals in 1943 call for the same over-all production total that farmers achieved this year when their efforts resulted in an all-time production high—12 per cent greater than that of any previous year in American history! Just what does that 12 per cent gain represent?

It represents a gain in production which is more than twice that achieved during the five-year period covering World War I.

It is by far the greatest production gain that has ever been made in a single year by American agriculture.

That gives one a rough idea of what America's farmers are up against in 1943. Besides wartime obstacles which will grow to ever-greater proportions, farmers must assume that they're going to have normal weather next year, another way of saying "bad weather" compared with this year when growing conditions were better than they've been in years.

That means lower yields. The difference will have to be made up by more efficient farming, by more intensive farming, by planting crops where they'll grow best, by vigorous, unremitting effort on the part of all civilians to help farmers get labor, equipment and materials.

Waste Must Go.
The farmer's objective in the Battle for Food, 1943, will be to reach each goal without wasting an ounce of effort, a minute of time, an acre of land, or a sliver of material and machinery.

Only by doing this can he reach one goal without jeopardizing his chances of reaching another.

He must face the fact that there aren't enough land resources in America for much acreage expansion. He must apply the principle of selective service to his acres.

For example, he knows that only about seven million acres of land can be added to the 1942 figure of 340 million acres put to row crops, small grains and hay crops.

But he also knows that he can make that added acreage count for more by putting it to war crops which bring higher yields than crops he would normally plant.

By wise expansion of this sort, by shifting other acres to crops that

For 1943 Mr. Farmer must see to it that there is a great increase in all meats and corn. (But there will be a reduction in canning vegetables, fresh fruits).

count most, it will be possible to get as great a production in 1943 as in 1942 of the things for which we have the most critical need. In some cases, production may be greater.

Thus, the farmer is out to get more meat, dairy and poultry products, hides and by-products.

About the same production of fresh vegetables for consumption and processing, of dry beans and dry peas and potatoes, sugar and rice.

Almost the same feed-grain production, pasture and forage crops.

More fiber flax, hemp, long staple cotton and about the same production of other cotton and tobacco.

To get more of these all-important crops, the farmer knows that he must plant less of others. Wheat is an outstanding example. We have enough on hand to take care of normal needs for two years without raising another grain. It would be virtual sabotage to put more land

Mr. American Farmer
He will do the job . . .

to wheat in 1943. Consequently, the goal for wheat has been lowered.

Demand for dairy products in 1943 will exceed supply, but bread grains will be abundant. Although meat production reached a record high this year, and will probably be higher next, rationing is necessary because of unprecedented demand. However, the ration will allow the average consumer about as much meat as usual.

The man who has devoured a large T-bone or two each day will have to change his habits. It may be good for him, nutritionally speaking.

The 1943 goals are closely linked to the nation's dietary needs. For the number of planes and tanks and

Vitamins and Victory

During the dark days of 1940 in England, British doctors noticed that superficial scratches which should have healed in a day or two were taking two weeks to heal. They found that a lack of vitamins in people's blood was the cause. There's a direct connection between vitamins and victory.

ships and guns turned out by workers is determined largely by the kind and quantity of food they eat.

Take the figures on comparative days lost by strikes and sickness in 1941. About 20 times as many man-days were lost by sickness as by strikes in that year. And the most prevalent illness was the common cold which, doctors say, can be best prevented by a good diet.

Good food is the equivalent of millions of laborers. The British, for example, have pointed out that production is 15 to 20 per cent greater when their workers are eating as they should.

Vitamin B curbs nervousness and digestive troubles; vitamin C wards off scurvy, bad teeth and many similar ailments. Scurvy was an important factor in the internal breakdown in Germany in 1918. That Hitler knows this is only too evident from the way he is bleeding the occupied countries of Europe. Scurvy has been responsible for more deaths than all the weapons of war combined.

Food for good diets is not the only thing the farmer is after as he sets out to meet 1943 goals.

He wants fibers and oils and other crops which are vital to the maintenance of our war industries.

In 1942 farmers raised enough soybeans, flaxseed, peanuts and cottonseed to produce 530 million gallons of vegetable oil—54 per cent more than in 1941. Our Allies are asking for five times as much vegetable oil as we normally export to all nations.

Next year's vegetable oil goal calls for about as much as the record 1942 production. If farmers meet the test, the resulting geysers will literally drown the Axis. For vegetable oils are the source of glycerine used in explosives; they are used in protective paints for battleships, planes and other war machines; and they have a thousand industrial uses—to say nothing of their use in foods and cooking.

Success to say the farm job in 1943 is all-important, to farmers and civilians alike. Perhaps the greatest obstacle will be lack of help on the farm.

Fortunately, it is in overcoming this obstacle that civilians can do most to help the farmer.

This year, townspeople, school children, professional men and women, college youth and men from army camps achieved miracles on harvest fields throughout the nation. Even British sailors pitched in to help harvest our bountiful food and fiber supplies.

Next year the job will be much tougher. The department of agriculture estimates that the nation could use 1½ million more full-time workers than there are in sight to do the job.

The department has thrown every one of its agencies into the farm labor fight, and it is receiving valuable assistance from other agencies of the government.

However, it is going to take the continuing efforts of civilians and others to fill the gap.

Through such co-operation—and sheer hard work on his part—the farmer will get his job done.

WALTER WINCHELL is on a tour of duty outside Continental U. S. During his absence, contributors will substitute.

LEATHERNECK LEGENDS

(By a U. S. Marine.)

Marine slang is colorful: You can SNOW the waiter in your favorite CHOW HOUSE by ordering JO AND SIDE ARMS, coffee with cream and sugar. And your favorite cook probably never heard of dishing up COLLISION MATS, pancakes to you. Shop talk to Leathernecks is SCUT-TLEBUTT. GIZMO is a word to use when you can't think of a better one—it's a whatsit, a you-know-whatchamacallit. Overseas caps are GO-TO-HELL CAPS to the soldiers of the sea, and his HOUSEWIFE's his sewing kit. There's nothing to keep up a Marine's morale like a SUGAR REPORT . . . not a statement on staples, but a dispatch from his dolly. Slow thinker is a KNUCKLEHEAD, and with him things are seldom DING HAU, or O. K. SLOPCHUTE is any place that serves drinks. SEA DUST is salt, and tapioca is named FISH EYES.

You call them Leathernecks, not because they're tanned and tough, but because they wore a leather stock as a collar in the days of John Paul Jones. Favorite Marine expression: "Some Joe never gets the word," originated on the Bon Homme Richard when Marine sharpshooters in the rigging marveled at Jones' coolness in fighting the Serapis. He refused to surrender when the cause looked hopeless, so the Leathernecks gave the sailors a lift by dropping grenades down the open hatches of the English man-of-war, putting the clincher on that party.

Corps' officers have a knack of saying as well as doing the right thing at the right time: Capt. Lloyd Williams' words at Belleau Wood will live as long as the Leatherneck Corps. When retreating French ordered him to retreat before a Boche Blitz, he answered "Retreat, hell! We just got here." Forthwith launched an attack, and helped turn the tide. Col. James Devereaux's inspiring last message from Wake Island, "Send us more Japs," is likely to be as famous in years to come. Richard Harding Davis is credited with originating the phrase, "The Marines have landed and the situation is well in hand."

Lieut.-Col. H. E. Rosecrans, former editor of the Leatherneck, Marines' own magazine, led one of the amphibious battalions ashore at Tulagi. Surprised in a night attack by Japs, his unit broke camp on two minutes notice without loss of life! During training, the famed Raider outfits spend their "spare" time wrestling and throwing knives at targets.

Famous Firsts: First American troops to land in Japan, 1853, with Commodore Perry. Their drill and precision greatly impressed the Emperor . . . betting is 100 to 1 they'll impress Hirohito more next time they call. First shot of World War I was fired by a Leatherneck, in Guam harbor across the bow of a German cutter. First time the flag was raised on the banks of the Rhine was by Capt. Gaines Mosely of the Fifth Marines. First Distinguished Service Cross was awarded to General C. A. Doyen for forming the Fourth Brigade of undying glory. First Commando raid was staged by Marines led by Lieut. Stephen Decatur in North Africa, 138 years ago! First time Old Glory fluttered to an old war breeze was at Derne, Tripoli, captured by Marines in 1805. First military band in the U. S. was Marine Band, organized 1789 as President's official band.

Horse Marines were actually in service. The Legation Guard at Peiping, China, was a mounted detachment and disbanded only four years ago. News River, N. C., advanced combat base of the Fleet Marine Force, bids fair to become the largest military reservation in the country. Marines never know how, when or where they'll be asked to fight, so they become experts with all kinds of weapons. Terrific accuracy of fire-power helped small force of Devil Dogs to hold on in the Solomons. Respect for his rifle is carried to the nth degree . . . if he dro; . . . or inadvertently calls it a gun, your Marine sleeps with it . . . sometimes hits the sack with as many as 20 rifles for company. While in training Marines work in the "butts" on the rifle range, marking targets, getting used to the sound of .30 calibre slugs whining overhead. It's tradition in the Corps that every man's a fighting man.

So that sure-shot Marine riflemen in the riggings wouldn't pop off their own officers in sea-fights, the Corps' officers devised a braided knot to be worn on their hats to identify them from aloft . . . wear them still today. Neatness of appearance is a cardinal virtue in this he-man outfit . . . enlisted men have no hip pockets, carry no junk in other pockets. A Marine would just as soon go on liberty without his trousers as without his battle-bar (collar pin) . . . and field scarfs (ties) are never worn tucked in shirts.

ON THE HOME FRONT

With RUTH WYETH SPEARS

BOTTOM OF SPRINGS SEWN TO WEBBING WITH FLAX UPHOLSTERY TWINE

HEAVY HEMP TWINE TIES TOPS FROM BACK TO FRONT THEN FROM SIDE TO SIDE

SPRINGS in need of repair should be removed and new webbing stretched across the bottom of the chair seat. The springs are then replaced and the bottoms sewn to the webbing.

Next comes the tying. Cut a generous length of cord and tack it to the back of the seat frame. Using the knot sketched, tie to the back and then the front of the first spring. Continue across the

row, finishing in the front, as shown. In the best furniture, springs are tied in this manner from back to front; side to side and diagonally across rows. About four ounces of the sewing twine and eight of tying twine will do an average chair.

NOTE: If you have springs to repair, be sure to clip and save this article as it is not in any of the homemaking booklets which Mrs. Spears has prepared for our readers. Booklets are numbered from one to eight and No. 5 and 6 contain directions for remodeling old rockers and other out-of-date chairs. Copies are 10 cents each postpaid. Order direct from

ASK ME ANOTHER?

A General Quiz

The Questions

1. In the navy, which hours of watch are called the dog watch?
2. What state has the most populous capital city?
3. Who was the only woman ever to receive two Nobel prizes?
4. Where is the body of John Paul Jones buried?
5. What is the largest state east of the Mississippi river?
6. Who gave the Pacific ocean its name?
7. A pleasure-seeking person is sometimes called what?
8. Achilles, the hero of Homer's "Iliad," was mortally wounded in what part of the body?
9. Of the three most common surnames in America, Smith, Brown and Johnson, in what order do they rank?
10. Was there ever a Deadwood Dick?

The Answers

1. Four to six p. m.
2. Massachusetts (Boston).
3. Marie Curie (one in chemistry and one in physics).
4. Naval academy, Annapolis.
5. Georgia.
6. Magellan.
7. A hedonist.
8. The heel, supposedly the only vulnerable spot on his body.
9. Smith first, Johnson second and Brown third.
10. Early white settlers in America took and gave nicknames of every kind. There may have been many Deadwood Dicks, but there is no historical character upon whom "western" stories are based.

Christening Gift

When an American battleship is named after a state, the state presents the vessel with a gift, usually a silverware service, one on record costing as much as \$30,000.

Recruit Certainly Was Considerate of Horses

The recruit was on night guard in the horse lines. At midnight the sergeant went round to see if all was well, but could see nothing of the guard.

"Hey," lustily shouted the sergeant, "who's on guard here?"

A sleepy-looking creature crept silently from behind some corn-sacks.

"What are you doing?" asked the sergeant.

"Marching around," said the recruit.

"What, without boots!" demanded the sergeant.

"I took 'em off so I shouldn't wake the horses."

THE
POWER
OF THE PRESS

• Manufacturers and merchants sense the power of the press. Early they began using it to carry their advertising facts and ideas into homes. And they found it a most profitable way in which to tell their story to buyers. And the buyers in turn found it profitable to deal with those who were willing to state in print the values and services they offered.

Cotton, Wool, Hemp All Playing Part in Winning War

Wool from the farmers' sheep goes into uniforms for soldiers and clothes for civilians. Aviators' jackets, pants and helmets and boots are lined with shearing sheep skins. The average soldier uses 100 pounds of wool a year, against an average of 2½ pounds for civilians.

And there is hemp. War has cut off most of the nation's usual fiber sources. For a time, the navy faced serious shortages in cables, cordage, hawsers and the like. Fiber

was also essential to the home front, and badly needed by the army, maritime commission, and for lend-lease.

The result? Farmers have revived a hemp fiber industry that had all but disappeared. It has taken a year—this year—to get under way because we had no seed. However, farmers have exceeded their 1942 goal of 350,000 bushels of hemp seed.

The seed acquired, emphasis in 1943 will turn to production of actu-

al hemp fiber. It is estimated that total production of fiber will be 30 times that of 1942. Most of the fiber will be planted in four states—Wisconsin, Minnesota, Illinois and Kentucky.

Cotton has thousands of war uses. One type of army plane has in its wings, tail and fuselage some 650 square feet of cotton linen. The list could be extended indefinitely, not only for cotton but for many other farm crops.

There must be more hogs, more milk, more lard, more and still more beef cattle. But not as much cotton, or barley, or oats.

SMALL CHANGE
A burglar gained entrance to the
Franklin county court house, and
attempted to rob the county audi-
tor's office. He forced the cash
drawer open, but did not take the
only money in it, a penny.

FIRST ROBIN
Ed Simmons of near Marengo
says this year was the first time
he had seen a robin on his place
at Christmas time. He reports that
he saw the bird on December 22,
in a cherry tree.

WHITE ANIMAL
A rare specimen, a white oppo-
sum was found by John Popson, of
near Albia.

ANNUAL GIFT
The Christmas turkey for the
dinner table of Mr. and Mrs. Otis
Morris of Guthrie Center has been
furnished by the son, Howard
Morris and family for nine years.
This year, the fowl weighed four-
teen pounds. The Howard Mor-
ris family now resides at Tacoma,
Washington.

GOOD DOG
While crossing an icy street one
night recently, Mr. E. W. Hamner
of Ames fell and broke her right
arm. Her dog gathered up for her
the scattered pieces of mail and
carried them into the post office.

HEMP GROWER
The important crop, hemp, will
be grown by Father Lee Entringer
of Grundy Center this year. He
has signed up for forty acres. He
will rent the land to plant in
hemp and members of his congre-
gation and himself will see that it
is planted and cared for.

NO NEW RUG
Silk and nylon hose that had
been saved over a period of many
years by Mrs. W. R. Rock and her
daughter, Marjorie of Osceola,
were donated in the silk and nylon
savage drive. They gave 250
pairs of silk hose, the largest num-
ber turned in by individuals. They
had been saving the hose with the
intention of making a rug.

FROM BAD TO WORSE
Jimmie Thompson of Emmets-
burg was recovering from a broken
arm, when he found it necessary
to lay low again. This time it was
the mumps.

NEW DIRECTOR
The absence of a faculty band
director does not keep the Lake
Mills band from taking its usual
part in school activities. Allen
Sheimo, a senior student is now di-
recting the band and is doing well
with his work. Allen has planned
to continue with music and band
directing after high school days
are over.

PENNY DRIVE
Harry L. Gange, principal of
the Indian high school, has an-
nounced that he hopes Indianola
high school students will locate
10,000 pennies. One thousand pen-
nies were collected in one week by
the students and the money went
into war stamps.

NATIONALLY KNOWN
Emil F. Runft, of Reinbeck, has
become nationally known as a deal-
er of dogs, especially English Shep-
herd dogs. One day recently he
shipped 28 English Shepherd pups
to that many buyers in 14 states.
During one week, he shipped more
than 50 dogs to many states.

STILL GOING STRONG
The sewing machine owned by
Mrs. Jasper Wilson of Traer was
reported by Elizabeth Peterson, of
Iowa State College, who has been
conducting training schools on the
cleaning and repairing of sewing
machines, as the oldest machine
repaired in her schools. The sew-
ing machine has been used since
1837, the only repair was one new
shuttle. After being cleaned, oiled
and adjusted, the 55-year-old ma-
chine did excellent work, those at-
tending the school reported.

ACCIDENTS HELPFUL
Many residents of a section of

Cedar Rapids thought that the
traffic lights had been altered by
those in charge so that the red and
green lights overlapped for a few
moments at the time of change
with the yellow light entirely.
However, the officials had an ex-
planation, they did not do it, but
lightning knocked the connections
off their regular channels. Most
drivers reported that it was an im-
provement over the old type of
lighting system.

LEGAL FOLLOWERS
The entrance of William C. Stur-
art of Chariton into the legal pro-
fession brings the fourth genera-
tion of the Stuart family into law
practice. William was admitted to
the bar several weeks ago, and
graduated from the State Univer-
sity of Iowa recently. He will not
start practice immediately, howev-
er, as he had enlisted in the naval
air corps.

LONG TIME SERVICE
The Saturday before Christmas
this year was the 24th time that J.
W. Gethmann of Gladbrook had
gladdened young and old of that
community by playing the role of
Santa Claus. After the children
were given an opportunity to visit
with him in Main Street, Santa
Claus visited all the shut-ins and
presented gifts donated by the
business men.

PAPER DELIVERED
The Le Mars Globe-Post report-
ed two of their carrier boys used
their skates in delivering papers
following a recent storm that cov-
ered the entire ground with ice.

TWO CELEBRATIONS
Mr. and Mrs. C. M. Homick of
Wapella were married on Christ-
mas day, 1917. On the date of their
25th wedding anniversary, Decem-
ber 25, 1942, their son David Ed-
win, was married to Annabelle
Huddle.

FROM "FIRST LADY"
A letter addressed to Mrs. Betty
Paton of Winterset from Mrs.
Franklin D. Roosevelt, made Mrs.
Paton very happy. Mr. Roosevelt
had visited Richard Paton in an
English hospital on her recent vis-
it there. Mrs. Roosevelt stated that
"Dick" was all right and in "good
pinks."

**AUXILIARY LADIES HAD
FAREWELL PARTY**

The Auxiliary Ladies met at the
hall Tuesday evening for their regu-
lar meeting. They enjoyed read-
ing many letters received from the
men in service who had received a
Christmas package from the Auxil-
iary.

A farewell party was held for
Mr. and Mrs. P. W. John on and
they were presented with a gift.
Mr. and Mrs. Frank Schulz were
presented with a gift in remem-
brance of their 25th wedding anni-
versary recently celebrated.
Lunch was served by the ladies.

**ONE HUNDRED OVERSEAS
KITS COMPLETED BY
LOCAL RED CROSS**

Mrs. Sumner Trumbull, chair-
man of the Klemme Red Cross,
called the workers together Satur-
day to finish up the year's work.
The Klemme chapter has complet-
ed its full quota of work for the
year.

Overseas Kits Filled

The Klemme ladies made up 100
overseas kits and these were filled
Tuesday with the items specified
by the army and navy. Besides
making the kits, the ladies also
made oilcloth soap containers and
a "housewife" to go into each kit.
The "housewife" contains such
items as thread, needles, buttons,
thimble, safety-pins, pins, etc.

The money used to purchase the
many things for the kits was con-
tributed by the residents of Klem-
me and community some time ago.

Each man going overseas, is pro-
vided with a kit as part of his regu-
lar equipment.

**Sneeze by Stroboscope
Studied by Scientists**
That respiratory diseases may be
spread through the expulsion of
germs in a sneeze or cough is fairly
generally known. With the aid of a
comparatively new photographic
process, which can take 600 pictures
a second, an investigation was un-
derway to determine how widely
and rapidly the droplets in a sneeze
spread. The investigators hoped
their findings would be of some help
in the battle against respiratory dis-
eases.

The photographic process used
was that invented by Dr. Harold
Edgerton of the Massachusetts In-
stitute of Technology. Called strobo-
scopic photography, the process
differs from ordinary photography
in that the camera shutter is left
open and the light (supplied by a
gas-filled tube, or stroboscope) is
broken into 36,000 flashes a minute.
Impressions are left on the photo-
graphic plate each time the light
flashes; in ordinary photog-
raphy the light remains constant
and the camera shutter opens and
closes.

Heading the research into the
common sneeze was one of Dr. Ed-
gerton's colleagues at M. I. T., Prof.
Marshall W. Jennison of the depart-
ment of biology and public health.
Using Edgerton's technique, Pro-
fessor Jennison made several photo-
graphs of the effect of a sneeze.
Among his early findings:

Near the end of a sneeze, the
mouth closes involuntarily and prop-
els at high speed (two miles a min-
ute) a great number of droplets
through the restricted opening.

In a single spasm, thousands of
droplets ranging down to one two-
hundred-and-fiftieth of an inch in
diameter are expelled.

The smallest of these drops evap-
orate but others are left floating in
the air. These particles may be
distributed to other persons.

Compared with the number of
drops issuing from the mouth, those
coming from the nose are insignif-
icant.

In general, coughing gives forth
fewer but larger droplets than
sneezing.

**Summers Getting Hotter,
Claims Weather Bureau**

Many of us incline to grin indul-
gently when the old folks dash the
perspiration from their brows and
grumblingly assert that when they
were young the weather was pleas-
ant in the summertime and not tor-
rid as it is today. We wink and,
like as not, say to ourselves that
distant things seem pleasantest, and
the only reason why Dad and Grand-
dad imagine those long-gone sum-
mers to have been more mild is be-
cause they are victims of the very
human tendency to forget the un-
pleasant and recall only the serene
and balmy days.

However, we are wrong and the
old folks are right. The summers
are hotter now than they were when
the horseless buggy was an object
at which to gape. And if you have
any doubt about it, there are the
statistics of the weather bureau as
ineluctable proof of the fact.

According to the bureau's charts
the average summer temperature
has jumped by at least three de-
grees during the last 20 years. This
is really a phenomenal advance,
and a rise of an average of three
degrees means but one thing—that
there have been a good many
scorching hot days.

The weather bureau is quite frank
in admitting that it does not know
how to account for this rise in gen-
eral summer temperature.

How President Resigns

A President or vice president of
the United States may resign by
signing a written statement of resig-
nation and forwarding it to the de-
partment of state—not to the legis-
lative or judicial branch of the gov-
ernment. This procedure is set
forth in a federal law adopted in
1792 and still in effect. The law says
in part: "A resignation of the of-
fice of President or Vice President
shall be an instrument in writing
declaring the same . . . and deliv-
ered into the office of the Secre-
tary of State." No President has
ever resigned, but one vice presi-
dent has—John C. Calhoun of South
Carolina. He quit the vice presi-
dency in 1832 in order to become a
senator.

Sizing for Rugs

Rugs in constant use frequently
lose their shape and just won't
lay down because the sizing on the
under side has deteriorated. Ac-
cording to the extension service of
the University of Nebraska agricul-
ture college, the life of such rugs
may be prolonged by resizing them.
First thoroughly clean the rug by
shampooing and let it dry. Then
tack it napside down on the floor
and apply a solution of one part
glue (one-fourth pound) and eight
parts water (two quarts). If the
rug is light weight, be sure not to
put on so much glue that it pene-
trates to the right side. After ap-
plication of the sizing, let the rug
dry for 24 hours before relaying.

Accidental Burns

Accidental burns, exclusive of
conflagrations, are the only type of
home accidents in which more wom-
en than men are injured fatally.
Fatal burns in the home occur about
twice as frequently among women
as men.

**Keep Horse in Best of
Health for Good Work**
During the present emergency
farmers will find it even more im-
portant to keep their horses in good
condition. The control of parasites
has a great deal to do with the di-
gestion efficiency of the horses, and,
consequently, with the ability of the
horse to do heavy work. During
the winter months the horse owner
should have the teeth of each horse
examined so that necessary dental
work can be done prior to condition
for heavy spring work.

It is also advisable to have the
horses treated for bots. Bot control
campaigns have proved very satis-
factory in the past. Several horse
owners who have had their animals
treated have reported that their
horses suffered from fewer attacks
of colic the following year, and
seemed to be able to do better work.
By treating horses for bots during
the winter months the expelled lar-
vae are killed by the freezing
weather. The saving on colic
medicine, feed and working days
lost will more than pay for the ne-
cessary veterinarian's fees for treat-
ing the horses and examining their
teeth.—Glenn M. Holm, Veterinari-
an, Agricultural Experiment Station.

**Cotton Is Best for Slip
Covers, Says Specialist**

Well-fitting slip covers have
magical properties in brightening up
a room, says Anne Biebricher, home
furnishings specialist, Ohio State
university, who adds that, in gen-
eral, cotton is one of the best mate-
rials for making slip covers.

Cottons are durable, easy to laun-
der, they come in many attractive
designs and colors, and have a wide
price range. Color fastness, shrink-
age control, and crease resistance
make them even more satisfactory.
Some of the most serviceable cotton
materials are cretonne, crash, den-
im, lightweight tapestries, French
ticking, drapery saten, and damask.
Lighter weight cottons, such as ging-
ham, hincz, or percale may be
used but they are not as satisfac-
tory.

Good slip cover material should
be firmly and closely woven so it
will keep its shape and prevent dust
from sifting through onto the furni-
ture underneath. Do not buy a
material that will shrink more than
three-quarters of an inch a yard at
the most. If the selvedge is marked
"residual shrinkage not more than
1 per cent," washing will not alter
the fit of the cover.

Widespread U. S. Malnutrition

"The evidence at our disposal
warrants the conclusion that dietary
inadequacies and malnutrition of
varying degrees are of frequent oc-
currence in the United States and
that the nutritional status of an ap-
preciable part of the population can
be distinctly improved," Norman
Jolliffe, M.D., New York; James S.
McLester, M.D., Birmingham, Ala.;
and H. C. Sherman, Ph.D., Sc.D.,
New York, declare in summarizing
a paper on "The Prevalence of Mal-
nutrition," published in The Journal
of the American Medical Association.

"If optimal nutrition is sought,
not mere adequacy, widespread im-
provement is possible," they add.

"Nutritional failure" exists as
soon as adequate amounts of an es-
sential nutritional factor or factors
fail to reach the desired state.

"Dietary inadequacy" means the
failure to ingest an essential nutri-
tional factor or factors in amounts
sufficient to meet the existing re-
quirement of the body.

Gay Floor Finish

Sometimes an old floor can be
improved immeasurably and made
really gay with paint. Naturally the
colors selected should harmonize
well with your decorations. In Co-
lonial interiors, for instance, spatter-
dash makes an effective finish.
Before the work is begun, protect
the lower two feet of the walls with
newspapers. Then the ground color
can be applied. Black, gray, blue,
green or violet are all good ground
colors to be spatter-dashed in white.
Or pumpkin-yellow, spattered in
brown, may appeal. After the first
coat is dry, apply a second coating
on a section of the floor about four
feet square. When this has dried
until it is just "tacky"—or sticky—
it is time to begin spattering. This
is done with a very coarse paint
brush or a long handled whisk
broom. Dip the brush into the paint,
making sure it is not so heavily la-
den with paint as to drip. Then,
holding a stick firmly in one hand
about two feet from the floor, tap
the brush smartly against it. Move
along the floor and repeat. A dado
can be very easily spattered in the
same way.

Famous for Its Beauty

Capital of Uruguay, Montevideo,
is one of the great cities of South
America and has a population of
two-thirds of a million. It takes its
name from the cerro behind it.
A sailor who espied it in 1726 cried
out: "Montevideo!" (I see a moun-
tain).

It is one of the most beautiful
capitals in the Western hemisphere,
a popular resort in summer and a
center of art and culture in winter.
It is a city of wealth. There are
no signs of poverty anywhere.

Montevideo is at its best during
the warm season, which is at its
height during February and March.

SNAPPY FACT
ABOUT
RUBBER

Why wheel alignment is a "must"
rubber conservation. When a wheel
only 1/2-inch out of alignment the car
is being dragged sideways 87 feet
in every mile. That's tire scuffing
at its worst.

Transportation in private auto
mobiles in 1947 totaled 501
million passenger miles, compared
with about 29 1/2 billion in rail
roads, about 27 1/2 billion in electric
railways, 2 1/2 billion in bus
and 1,370,000 passenger miles
on domestic airlines. Six million
buses, all, but they show more
transportation on to be six times
greater than all other forms
combined.

It has been estimated that the
United States military service will
require 325,000 long tons of rubber
in 1943.

Overloading a truck tire 10 per cent
will cause a decrease of 18 per cent
the mileage; 50 per cent overload of
mileage 60 per cent.

Great Small
Great men never feel great; small men never feel small.—Chinese Proverb.

Kidneys Must Work Well—

For You To Feel Well
24 hours every day, 7 days every week, never stopping, the kidneys filter waste matter from the blood. If more people were aware of how the kidneys must constantly remove surplus fluid, excess acids and other waste matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly. Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer a nagging backache, headaches, dizziness, rheumatic pains, getting up at night, swelling. Why not try Doan's Pills? You will be using a medicine recommended the country over. Doan's stimulate the function of the kidneys and help them to flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

GERMAN DEATH RATE

Diplomatic dispatches from Europe report that the German death rate is going up and the birth rate is going down.

Also the number of German soldiers killed or permanently disabled since the war began now totals 1,900,000. This estimate made before the Russian counteroffensive began, and before the British turned back Rommel in Egypt. Obviously, therefore, the total is now well above 2,000,000.

This does not include prisoners nor men suffering minor wounds. If these were included, the total casualty figure would be, according to accepted military ratios, more than twice the basic figure, or approximately 5,000,000.

Meanwhile, exact figures on the German birth rate have been received. These indicate the usual wartime downward trend of births, despite Hitler's frantic efforts to make procreation popular.

The birth rate was 20.5 in 1939 per thousand, 20.4 in 1940, 18.3 in 1941, but for the first three months of 1942 took a drop to only 15.8.

Neutrality diplomatic sources report that business men in Germany are beginning to foresee defeat. But the people as a whole will not be aware of approaching defeat, and their morale will not crack, until the German army suffers a major military reverse. The heavy casualties, now comparable to the total suffered in the First World war, are not enough in themselves to cause popular revolt, as long as the German armies successfully dominate Europe.

But when Rommel is cleaned out of Africa, and when that news seeps into the German consciousness, we can look for popular discontent, plus burning distrust of the Nazi military machine.

ITALIAN UNREST

Those who expect the bombing of Italy to cause a revolt of the people are badly mistaken. The bombing may knock out her industrial productivity and cripple her fleet and shipping, but will not cause a popular revolt.

Reasons for this are two: 1. Nazi troops have such a stranglehold on Italy that no revolt could gain headway; 2. There are no leaders left to head a revolt.

Italo Balbo was an opponent of collaboration with Germany. He led a spectacular flight of planes to the United States, and was an admirer of this country. But he differed with Mussolini on African policy, contending that Libya could not be defended. Balbo died in what was officially reported as an airplane "accident."

Pietro Badoglio was skeptical about the Greek campaign, told Mussolini he wouldn't undertake it without ten divisions and four months preparation. Mussolini ordered him to take one month and four divisions. Badoglio is popular among the Italian people, but too old to lead.

Rodolfo Graziani was also skeptical about the defense of Libya, though largely responsible for preparing its defenses. Much younger, he has broken with Mussolini and is under surveillance, possibly under arrest.

People Hate Mussolini.

Yet the sentiment of the people, especially in southern Italy, is such that they would welcome deliverance from Mussolini and Hitler. U. S. diplomats, waiting for release from internment after Pearl Harbor were told secretly by Italians: "We will not forget!"

There are many things they will not forget, including the ludicrous behavior of Mussolini, who conceals his baldness and his wen by never removing his hat before a camera; the wild behavior of his daughter, Edda Ciano; and the lavish entertaining of Count Ciano, who serves soup-to-nuts banquets while the people eat a few ounces of rationed bread.

As yet there has been no bombing of Rome, but some indication of what might happen was given early in the war when the French sent planes over Rome for four nights. The people poured out of the city on everything that had wheels, including push carts, bicycles and baby carriages. Yet the French had dropped nothing more harmful than leaflets.

It is reported that when Allied bombers come over the city, the people kneel at the altar of their patron saint, San Gennaro, and with Mussolini in mind, say: "Dear San Gennaro, tell them he's not here—he's in Rome!"

LET THE NAZIS KNOW

Many an army official is over-cautious about speaking for publication these days, but not Lieut. Gen. "Hap" Arnold, commander of the army air forces.

Disclosing that U. S. fliers are being turned out of preflight schools at the rate of 40,000 a year, Arnold was asked if the figures could be quoted.

"Why not?" he chuckled. "It won't do any harm. Might do a lot of good. It'll show the Germans how many we've got!"

The Once Over
by H.I. Phillips

SEA HERO

The waves they placed him gently up on the sandy beach, The terns went suddenly quiet and a sunbeam tried to reach His burned and shell-torn body and his fair and blistered head; There, as the Huns had left him, a Merchant Marine lay dead.

There was no blare from the trumpets and the drums were silent, too; The papers made no mention and the public never knew . . .

Just the slow, soft toll of a bell buoy and the long, long roll of the sea— They were his only requiem as the waves brought him back to me.

—GEORGE L. ROHDENBURG.

THE FLORIDA WINTER SEASON

Miami Beach is so militant this season that the coconuts now bear fuses.

The palms waving in the breeze beat time to the "Star-Spangled Banner," the oleander bushes sprout red, white and blue flowers and the pelicans, which used to attack only fish, now attack fishing boats, if any.

Bathing beauties operate only under "A" cards: three to a pageant. The lifeguards have whiskers and all answer to the name of "Pop." And if you yell "Fore" on a golf course and anybody looks back at you it is the Army and Navy.

There is talk of renaming Lincoln Road "Eisenhower Plaza."

The first thought of a Miami Beach visitor is to develop a tanned, healthy, rugged look. But this year if he looks healthier than the armed forces he feels embarrassed.

And if he looks as rugged he gets drafted.

So many hotels are in the hands of the Army, Navy and air force that if you take a room you take it "when, as and if." A hotel reservation is merely something you make by telephone, obtain by luck and keep by prayer.

Any bookings can be canceled by bugle.

The first thing you do when you unpack your small bags is to phone to the desk and see if you are still a guest. You don't dare unpack the big ones.

Soldiers, sailors and air cadets now have the \$30 a day de luxe rooms that the filthy rich used to control outright, many a night club is a military classroom and no apartment house owner can call his building his own.

They even say the orange groves have become warlike, and that the reason there was no hurricane this year was that the orange trees had grown too tough.

CO-OPERATION

Ima Dodo says she realizes perfectly the need to save butter and is giving up buttered popcorn for the duration.

THE GOOD OLD DAYS

Carl Broome, editor of the Brantley Enterprise, down in Georgia, gave a swell outline of the duties of editorship outside the big cities. In response to a questionnaire as to his duties he replied that he set type, wrote the editorials, covered stories, wrote copy, read proof, solicited ads, collected bills, etc. And we remember back on our home-town newspaper when this was all so true.

Everybody on the staff doubled in brass. Dell Dewey, the telegraph editor, had to edit all the country correspondence; Frank Smith, the sports editor, thought nothing of being put on a news story and asked to help read proof. Tom Keenan, the financial editor, did obits, and fraternal news, and Bill Hadden, now lieutenant governor of Connecticut, used to report and file cuts in the "morgue." Ogden White was literary editor, courts reporter, exchange editor and responsible for all Yale college coverage, and Ben Tousey, now a noted hotel man, insists that, when he was police reporter, utility proof reader and railroad writer we, as managing editor, once assigned him to beat a rug.

As for us, we still claim a record. We were managing editor for six years, did cartoons and a humorous column, and took news photographs on the side, to say nothing of helping to wrap and deliver papers in piches. Them was the days.

SHIRT TAILS FOR VICTOR

Shorten up my shirt tails— Clip 'em more and more! I'm not one for squawking In an all-out war.

Cut it three full inches— I won't cry or pout Helping whip Der Fuehre With my shirt tail out!

If my shirt feels shorter— Seems to lack expanse Help yourself, dear Leon— Even to my pants!

JESUS INSTRUCTS A GREAT TEACHER

LESSON TEXT—John 3 1-16.
GOLDEN TEXT—For God so loved the world, that he gave his only begotten Son, that whosoever believeth on him should not perish, but have everlasting life—John 3 16.

Nicodemus came to our Lord when He was in Jerusalem for the Passover. Jesus had chosen six of His disciples, had performed His first miracle at Cana, and had made a brief visit to Capernaum, after which He came to Jerusalem for the feast.

In high and holy indignation He had driven the money changers out of the temple. The Pharisees who looked for the coming of the Messiah as a secular conqueror wondered at this new spiritual leader. It was probably as much on their behalf as his own that Nicodemus came to inquire of Jesus.

In answering his questions Jesus reveals the necessity, the nature, and the method of regeneration. The only entrance into the Christian life is by the door of the new birth. Regeneration is the act of God whereby the divine nature is imparted to the believing sinner and he becomes the child of God. He who has not entered by this way has not entered at all. He is still dead in trespasses and sins, without God and without hope (Eph. 2 1, 12).

Men seek to enter the household of God by almost any other means—culture, reform, character building—and neglect or reject God's way.

I. The Necessity of Regeneration (vv. 1-7).

Jesus was not unduly impressed by the dignity and high station of his visitor, nor by the visitor's courteous acknowledgment of His own position as a great teacher. With incisive boldness Jesus declared that this man, a cultured and distinguished ruler of the Jews, must be born again if he is to see the kingdom of God.

God is no respecter of persons. This "doctor of divinity" must be born again, just as was the illiterate fisherman. The requirements are the same for all, and the necessity as great in one level of society as in another.

The surprising thing is that this teacher of theology could be so ignorant of the one essential element of a real spiritual experience. He evidently thought he could bring his soul to eternal life by his own works, when in fact he was not able to give himself physical—let alone spiritual—life.

Two reasons are given by our Lord for the "must" of verse 7: (1) The kingdom of God is a spiritual kingdom, and cannot be entered by way of our human nature; and (2) "that which is born of the flesh is flesh" and is radically and essentially bad. To learn why the flesh is bad read Jeremiah 13.23 and Galatians 5:19-21. Scripture on this point is diametrically opposed to the teaching of unbelieving men. When such a difference arises be sure of this—God's Word is right. Follow it!

II. The Nature of Regeneration (vv. 8-13).

The new birth is a divine mystery, not fathomable by human reason. Those who insist that all spiritual truth be put through the little norm of their intelligence will never understand it or receive its blessing. The striking illustration of the life-giving and energizing wind used by our Lord is most illuminating. Wind is unseen, but the results of its movement are evident. Even so the spiritual rebirth of men is an enigma to the worldly man, but even he can see its results in godly living.

Observe the clarity and simplicity of our Lord's teaching on what is undoubtedly the most profound subject in all the world. Let us follow His example and always "make the message clear and plain, Christ receive with sinners."

III. The Method of Regeneration (vv. 14-16).

Many there are who ask Nicodemus' question, "How can these things be?" (v. 9). The answer is clear—"Only by faith in the Son of God, our Saviour."

Just as there was healing and life in a look at the uplifted serpent (Num. 21 8), so there is life for a look at the Crucified One. Faith receives God's perfect provision for sin.

John 3 16 may well be regarded as the greatest sentence in the greatest Book in the world. It presents the whole plan of salvation—its source, its ground, its recipients, its condition, and its result. It also reveals God's love—its "object, character, manifestation, purpose, and the result" (John W. Bradbury).

This glorious salvation is for all men—"whosoever"—but some reject it. Notice that God does not condemn them. Their own evil works and desires condemn them (vv. 17-20). God in His grace is ready and willing to save, but men love "darkness rather than light," for their works are evil.

Nicodemus came to Jesus by night—but he came. Have you come? Will you come now?

PATTERNS
SEWING CIRCLE

Enchanting Set.
ENCHANTING is the word for this fragile, feminine gown and jacket, yet you make the set with the utmost economy of material and sewing energy. The angelically shaped top of the gown is fitted with a few darts, the waistline is controlled with ribbon! Finish both the gown and the becoming jacket with lace.

Barbara Bell Pattern No. 1703-B is designed for sizes 12, 14, 16, 18, 20 and 40. Corresponding bust measurements 30, 32, 34, 36, 38 and 40. Size 14 (32) gown and jacket require 5 1/4 yards 35 or 39-inch material, 5 yards ribbon.

Soft Suit Frock.
WHEN you want to look your very prettiest for him . . . rely on this soft suit! The jacket, tying at the waist magically pro-

Better Impersonations

In China, some actors, specializing in female impersonation, and some actresses, specializing in male impersonation, are so excellent in their roles that they are often engaged to play opposite each other in dramas, says Collier's. Incidentally, when such an actor takes the part of the heroine and such an actress that of the hero, the play is usually very successful.

duces graceful curves at this point, the dickey fills in the neckline with flattering white, and the skirt flares gently.

Barbara Bell Pattern No. 1690-B is designed for sizes 11, 13, 15, 17, 19. Corresponding bust measurements 29, 31, 33, 35, 37. Size 13 (31) jacket with 3/4 sleeve requires 1 1/4 yards 39-inch material, skirt and trim for jacket 2 yards, dickey, 5/8 yard.

CONRAD QUANDT, PROP.

The past week or more had been rather damp and frosty in North Iowa, with no sunshine. However, Monday the sun came out bright, but the temperature dropped to around 8 degrees below zero. It was again around 5 to 6 below on Tuesday morning, but clear Roads have been covered with ice for the past two weeks and driving has been hazardous in most parts of the state.

The New Year's Eve party held at the Klemme Methodist Church Thursday evening was attended by a large crowd from Liberty and Klemme. Games and stunts were in charge of the Misses Chambers and Bredbenner and a play was given by the Klemme young people. The Liberty Choir, directed by Cecil Pethick provided several excellent choir numbers, as well as special numbers. Refreshments were served just before midnight.

Sgt. Asa Gibbs arrived in Klemme on New Year's day to spend his fifteen day furlough visiting with his parents, Mr. and Mrs. Harry R. Gibbs and family, and many other relatives and friends in the community. Sgt. Gibbs had a hand in constructing the "Alaskan" highway which was completed this fall and is regarded as one of the greatest of engineering fetes ever undertaken. The highway runs from Canada up into Alaska and is important for rapid movement of military supplies from the U. S. to Alaska.

FORMER KLEMMER MAN DIED

Charles Gruetzmacher, a former Klemme resident and business man died at his home in Minneapolis a short time before Christmas.

He was a brother of the late Frank Gruetzmacher, long time resident and business man of Klemme. Charles was the last survivor of the Gruetzmacher brothers.

Start the New Year right by paying your subscription. Thanks!

Phone 12 or mail in your news items to The Klemme Times.

Mrs. Ben Coobs and Peggy were New Year dinner guests at the Ira Overholt home.

Mrs. Emil Patet has been on the sick list for a few days this past week.

Eunice Larsen is working at the Klemme Food Market after school afternoons and on Saturdays.

Mrs. Basil Dickenson of Gifford, Iowa, visited with Mrs. C. A. Larsen Tuesday afternoon.

Mr. and Mrs. Fred Greiman of near Garner entertained a number of relatives from around Klemme at a dinner Sunday noon.

Ben Reemstma, of Garner, was in Klemme and vicinity on business Thursday and was a caller at The Times Office.

Dale Conklin, U. S. Navy, while on a furlough visiting in Goodell, also visited here at the Summer Trumbull home.

Mrs. Harold Ridder of Nora Springs spent the week end here visiting with her parents, Mr. and Mrs. Edward Schaefer.

Erick Josten returned home last week from the Mercy hospital at Mason City where he had been for a couple of weeks for treatment.

Earl Josten of West Des Moines drove up last Wednesday and visited over night with his father, John Josten, and uncle, Erick Josten.

Elwood, son of Rev. and Mrs. H. E. Harvey was sick with the flu the first of the week and confined to his bed.

Mrs. Harvey Hubbard taught in the rural school northeast of Klemme Monday and Tuesday for Mrs. Lyle Wilcox.

Mr. and Mrs. C. G. Waterman and Mrs. Lyle Wilcox took Sgt. Wilcox to Mason City Tuesday to get a train for Kansas City.

Harold Jost started back for Toledo, Ohio, Sunday, after spending a week visiting in Klemme with his father, Henry F. Jost and family.

Miss Elsie Ward returned to her studies at the State University at Iowa City, Tuesday, after visiting over the holidays with her parents, Mr. and Mrs. Frank Ward.

Rev. and Mrs. C. P. Hughes and daughter, Jean, of Prairie City, came Thursday and visited until Friday at the home of Rev. and Mrs. Herschel E. Harvey.

Mr. and Mrs. Fred Becker and daughter Irene, entertained to dinner Saturday evening the Misses Gertrude Grosshuesch and Marie Backhaus of Marshalltown.

Mr. and Mrs. Loren Gast, who were married Jan. 1st, have gone to Sioux City and live at 3632 Vine Avenue. Mr. Gast is attending Morningside College.

Walter Yahnke of Elmore, Minnesota, came Monday for a few days visit with his brother-in-law and sister, Mr. and Mrs. C. A. Larsen and family.

Mrs. Melvin Olson and two children moved into one of Leppo Wessels' houses, near the depot, Saturday. The place has been improved as Mr. Wessels built a garage there last week.

Mr. and Mrs. Fred Becker and daughter Irene, entertained to dinner Sunday noon Mr. and Mrs. George Thiemann and daughter, Stella; Mr. and Mrs. Maurice Murray of Britt; and Cecil Katter, of Garner.

Sgt. and Mrs. Lyle Wilcox returned Saturday from several days visit with his father and relatives in Minneapolis, and with friends at Mason City. Sgt. Wilcox left Tuesday for Ft. Belvoir, Virginia, to begin a course in officers training. Upon graduation he will receive a commission of Second Lieutenant.

Mr. and Mrs. Lyle Liebendorfer of Forest City, and Mr. and Mrs. R. A. Jorgenson of Klemme, were dinner guests on New Year's day at the Joe Liebendorfer home at Hampton.

Corporal John Clements is now stationed at Camp Sutton, North Carolina. He has been stationed at the Aberdeen Proving Grounds at Aberdeen, Maryland, for some time.

Rev. and Mrs. Calvin Grosshuesch entertained to dinner Sunday their daughter Gertrude and her room-mate, Miss Marie Backhaus of Marshalltown; and the Misses Lucille Hartbeck and Eunice Larsen.

Mr. and Mrs. Mitchell Bock had as their guests for dinner Sunday: Mr. and Mrs. Wm. Bessman and son, Harry, and Mr. and Mrs. Gilman Hanson, all of Dows; and Mr. and Mrs. Erwin Meyer, of Alexander.

Mrs. Ben Coobs, accompanied by Miss Lydia Bock, drove to Des Moines this Wednesday morning to visit with Ben Coobs and Billy Bock at the Veterans hospital. Ben Coobs, who has been there for six weeks, returned home with them.

A large number of people attended the plays given by the Reformed Church young people at the school auditorium Thursday evening. The plays were very good and greatly enjoyed. Putting on plays is an annual event by the Reformed young people.

The Misses Gertrude Grosshuesch and Marie Backhaus came Friday and visited until Sunday at the Rev. Calvin Grosshuesch home. Miss Backhaus is from St. Joseph, Missouri. Both young ladies are student nurses at the Marshalltown hospital.

Mrs. H. W. Adams returned to her home at Missouri Valley, Iowa, Friday, after spending a couple of weeks at the home of her son-in-law and daughter, Mr. and Mrs. Wesley Patterson, where she helped care for her new grand-daughter.

Mr. and Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, entertained at dinner Sunday in honor of Sgt. Lyle Wilcox who was home on a furlough, the following: Mr. and Mrs. Verle Keraus and baby son of Garner; and Mr. and Mrs. Wm. C. Keraus of Klemme.

Marching Thru Berlin. First of a Series of Song Hits To Be For '43, each selected by one of America's Ace Band Leaders. Get the Complete Words and Music in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Miss Stella Thiemann, who has been employed as clerk at the C. A. Larsen food store the past year, and who resigned some time ago, continued her work there until Saturday night. Miss Thiemann will assist her parents, Mr. and Mrs. George Thiemann with their farm work this coming year.

Sunday dinner guests at the home of Mrs. Lena Schroeder were Mr. and Mrs. Will Barz of Garner; Mrs. Clara Barz and Allan; Mrs. Esther Barz, Milvern and Edward; Grandma Wille; Mr. and Mrs. Raymond Barz, Mr. and Mrs. Edmund K. Josten, and Mr. and Mrs. Fred Barz.

Tuesday was the birthdays of Ed. Becker and Raymond Swalve, and in honor of the event the following were invited to a six o'clock dinner at the home of Mr. and Mrs. Ed. Becker: John Swalve and family, Rev. Calvin Grosshuesch and family, the Becker sisters, Mrs. Peter Josten and Eugene Habercamp.

STANDARD BEARERS MET TUESDAY P. M.

The Standard Bearers of the Methodist Church met at the home of Mrs. Ole Ramsay Tuesday after school for lesson study and to enjoy a pot-luck supper together.

Barbara Johnson was presented with a gift as she will move away soon.

B. KIRCHNER NAMED HAN- COCK COUNTY CHAIRMAN

G. B. Kirchner of Garner was today named Hancock County chairman for the 1943 campaign to raise funds for the state annual drive against Infantile Paralysis.

In announcing the appointment, W. K. Niemann of Des Moines, the late chairman of the campaign, said that this year's effort will be entirely different from the Infantile Paralysis campaigns of former years and will be of more definite interest to every county in Iowa.

"It is our hope that we may raise sufficient funds so that every county may have one trained technician in the Sister Kenny Method," the chairman said.

If we can do this, we will insure our boys and girls throughout the county that if one of them should be stricken by the disease that they will have a far better chance to recover because our own nurses will then be able to start treatment immediately at a time when treatment is so vital.

The campaign in this county will begin January 15, continuing through January 30. Every section of the county will be canvassed, officials declared. Special cooperation has been tendered by farm organizations and civic bodies.

According to word received today from State Campaign Headquarters, Iowa is one of the few states in the union which has been able thus far to set up a modern clinic where technicians can employ the Sister Kenny Method.

Instead of employing braces, this method involves the use of hot packs and muscle reeducation and as resulted in complete cures for many types of cases which formerly meant a lifetime impairment.

"The Iowa clinic cannot take care of more than part of the cases that are constantly asking for treatment and funds raised during the campaign will not only be used toward raising local nurses for each county but also to provide more equipment and space.

Hancock County Organization
Following are the officers named for Hancock County:

G. B. Kirchner, County Chairman, Garner; Mrs. E. B. Bock, Vice Chairman, Garner; Mr. Fred Yates, Vice Chairman, Corwith; Mrs. R. A. Jorgenson, Secretary, Klemme; Mrs. C. E. Bartik, Treasurer, Britt.

Town Chairmen
Mrs. R. A. Jorgenson, Klemme; Mrs. L. W. Wesenberg, Goodell; Mrs. C. L. Fish, Garner; Mrs. L. A. Stover, Britt; Mrs. A. C. Taylor, Layfield; Mrs. H. P. Schenek, Crystal Lake; Mrs. Glenn Cashmere, Corwith; Mrs. Don Anderson, Kan-

For Excellence in Investment

The MOST YOU CAN BUY IS THE LEAST YOU CAN DO

Government Wants More Hemp Acreage In This County

2,200 ACRES SIGNED UP FOR HEMP IN THIS COUNTY

Open Letter To Hancock
County Farmers:

The farmers of Hancock County have been asked to do their part in this fight for freedom by planting a few acres of their best land to hemp in 1943.

Uncle Sam is going to invest at least \$330,000.00 in a plant and machinery located at Britt so that our sailors may have the necessary rope to complete the job of defeating the Axis.

At the present time we have about 2200 acres signed; 4,000 A is our goal and signing must be completed by January 20th. If you have not already signed a hemp contract, we urge you to see your AAA committeeman and enlist in this fight to beat the Axis.

Don't say you do not have time or that it is too much work for we have about 7 million men that have taken time and are risking their lives to defend our farms and homes that we may enjoy the best there is in life.

The least any farmer can do, providing he has suitable land, is to plant at least a few acres of hemp.

Up to January 9th, 169 farmers have signed hemp contracts.

USDA War Board

Please phone 12 or send in your news items. Thank you.

ABOUT RATIONED FARM MACHINERY

Announcement is made by the Hancock County Farm Machinery Rationing Committee that applications for new farm machinery will be acted upon on the following dates:

Machinery needed for preparing ground and for seeding or planting February 1, 1943.

Cultivating Machinery, April 1st, 1943.

Haying Machinery, May 1st. Small grain harvesting equipment, June 1st.

Corn harvesting machinery, August 1st.

These dates are uniform thruout the state, and farmers who need new farm machinery and plan on applying for a purchase certificate to purchase it should be sure that their applications are in the AAA office before the closing date.

Application blanks are available at all implement dealers and at the AAA office.

We suggest you clip this item for future reference.

W. S. C. S. HELD FIRST ALL- DAY MEETING

The W. S. C. S. of the Methodist church met for an all-day meeting last Thursday, with eighteen persons present for the pot-luck noon dinner.

Mrs. John Waddingham led the afternoon devotion; with Mrs. Harvey and Rev. Harvey installing the new officers.

The ladies worked on a quilt and sewed carpet rags. Lunch was served later in the afternoon.

The next all-day meeting with a pot-luck dinner will be Febr. 4th. The men are invited to come to dinner with their wives.

RAILBACK JOINS COOP. OIL ASSOCIATION

Roy Railsback, who has been operating the A. Y. P. service station at Garner for several years, has accepted a position with the Hancock County Cooperative Oil Association and will close his station. Mr. Railsback succeeds Steve Chizek, who recently resigned his position with the Hancock Co. Coop. and will return to his farm in the spring.

56 MARRIAGE LICENSES WERE ISSUED IN PAST YEAR

Elmer Raw, Clerk of the District Court for Hancock County, issued 56 marriage licenses in 1942.

His report shows that nine divorces were granted during 1942.

More Hancock County Men Called To The Colors

Our Men In The Service

NORMAN LAU NOW A PETTY OFFICER IN NAVY

Norman Lau, son of Mr. and Mrs. August Lau of Liberty township, graduated from a course in Aviation Metalsmithing at Navy Pier, Chicago, on Friday, January 8th. Lau's rank is Petty Officer Third Class.

He left Chicago Monday for Norfolk, Virginia to take up his new duties.

CPL. "TED" KADUCE ENGAGED TO CALIFORNIA GIRL

The following clipping is from Auburn, Placer County, California newspaper and is of interest to our readers:

"The engagement of Miss Ruth Hadlow, the daughter of Rev. and Mrs. Blake Hadlow of Sacramento, formerly of Auburn, was announced here this week at the home of Mrs. Floyd G. Woodsworth, sister of the bride elect.

"Guests found cards in small paper napkins telling of her coming marriage to Corporal Theodore Kaduce of Klemme, Iowa. He is the son of Mr. and Mrs. John Kaduce, Sr.

"Miss Hadlow, the librarian at the Public Library, is a graduate of the Riverside Library Service School.

"Those present at the announcement party were: Misses Mabel Champion, Phyllis Lardner, Nell McCutcheon, Wilma Beaver, Grace King; Mesdames C. A. King, Charles Hayden, Lester Milan and Malcolm Fowler."

SEVERAL FAMILIES MOVED THE PAST WEEK

A number of moving changes in this community took place the past week.

Ronald Barz and family who have resided in the ground-floor apartment of Mrs. C. F. Keraus' house moved to the Fred Kothenbeutel farm west of Klemme, so that Mrs. Barz can keep house for her father, Mr. Kothenbeutel. Mr. Barz is employed at the E. F. Jacobs store, and will drive to and from the farm to his work.

Mrs. Peter Merkel, who has resided in the Albert Krause house north of the Community Hall, has moved into the Keraus apartment, vacated by the Barz family. The Krause house has not yet been occupied.

The P. W. Johnson family, who have lived in the F. A. Arnold house in south Klemme for several years, moved their household goods to Humboldt, Sunday. Mr. Johnson works out of Humboldt as a salesman for the Curtis Candy Co. The Arnold house is vacant at present.

Mr. and Mrs. Oswald Evanson, who purchased the Cashman Store in Goodell last fall, have moved from their farm southeast of Klemme to the apartment over the Savogue Cafe in Goodell.

The Evanson farm has been rented to T. F. Matson of Kanawha. Harry Benson will move to the farm vacated by the Matson family.

NAVY RECRUITER AT BRITT EVERY WEDNESDAY

Because of the difficulty for interested parties to get to the Navy Recruiting Office at Mason City, a recruiter will be at Britt every week on Wednesday afternoon to interview prospects.

FORTY-ONE HANCOCK COUNTY MEN TO ENTER ARMY LIFE ON JANUARY 18

Following are the men selected to fill the Call for Inductees on January 18, 1943:

The following of the call enlisted:

John E. Sanford, Kanawha; Morris N. Peterson, Kanawha; Owen F. Conwell, Goodell; William G. Noonan, Britt; Russel D. Stille, Garner; Francis A. Harrington, Britt; Charles D. Noble, Jr., Woden, Wm. S. Spangler, Britt, Robert L. Peterson, Woden, and Verle J. Jurgenson, Garner.

Will Leave For Camp Dodge

The following will leave January 18th for Camp Dodge for induction into the Army.

From Britt:

Lowell R. Baker; Gordon Swan; Glenn E. Mehl; Russel C. Bailey; Leland D. Swan; Wayne F. Ohnemus; Henry P. Plemel; Albert B. Dietz; Herbert C. Goepel; Jacob J. Weiss; Adam Harr; and Melvin Van Dusseldorp.

From Garner:

John T. Enes; Joe M. Zrostlik; John H. Zrostlik; and Melvin L. Pannhoff.

From Kanawha:

Robert R. Johnson; Earnest M. Eliason.

Forest City:

Ivan L. Johnson, Carl E. Pitkin; Lloyd P. Cunningham.

From Woden:

CO-OP. OIL COMPANY WILL HOLD ANNUAL MEETING

The annual meeting and election of directors of the Hancock County Cooperative Oil Association will be held at the Avery Theatre in Garner at 1:00 o'clock p. m., Monday, Jan. 18th.

Free movies will be shown after the business meeting. Members and their families are invited.

CHOIR HAD FAREWELL PARTY FOR JOHNSONS

The Methodist Choir held a farewell party Thursday evening for Mrs. P. W. Johnson and daughter, Barbara, both of whom sang in the choir.

Games and stunts in charge of Miss Marie Blank and Mr. C. G. Waterman were enjoyed. Gifts were presented to Mrs. Johnson, and Barbara, and lunch was served.

Twenty-two people were present to bid farewell to the Johnsons.

RATIONING COUPONS

Coffee:

Coupon No. 28 (1 lb.) valid January 4 to February 7, 1943.

Sugar:

Coupon No. 10 (3 lbs.) expires January 31, 1943.

Gasoline:

"A" book coupons No. 3 (4 gals. each) good until Jan. 22.

Inspection:

Passenger car inspection deadline, January 31.

Commercial vehicles inspection deadline, Jan. 15.

Fuel Oil:

Period 2 coupons (10 gal. ea.) good until Jan. 27.

Period 3 coupons (11 gal. ea.) good until February 22.

Point Rationing Explained

The following article on "Point Rationing" appeared in the December issue of "Successful Grocer," with whose permission we are printing their story. The cut is also through the courtesy of "Successful Grocer."

Early in 1943 every consumer in the country will receive ration book number two, which will be based on the system of a coupon applicable to different food products provided they belong to the same category. A housewife will have a choice, with the same coupon of any kind of cereal or may be any kind of canned vegetables and canned fruits. To take care of price differences, the new book will introduce for the first time in this country the system of rationing by points. To illustrate: a box of bran flakes may require a coupon with six points, while corn flakes will be bought with a three-point coupon. Each consumer will have the same number of points to

WAR RATION BOOK TWO
Book is open, showing two pages of the stamps which will be used in buying commodities which are "point rationed."

spend every month, and thus he will be limited neither in choice nor in quantity, within the limitation of general national rationing. Suppose the housewives make a run on corn flakes because they require fewer points and do not buy bran flakes or other cereals which call for more points; then the OPA will assign a different point mark so as to adjust consumption to supply and demand. Successful Grocer will prepare a practical guide in sufficient time for our readers. Meantime, grocers should begin to think about ration books with the point system and what effect it may have on retail food selling.

Nobody knows yet which food products will be rationed first in

the early months of 1943. We are safe in guessing that meat and perhaps butter and cheese will be the first on the list. A certain number of points will buy a pound of roast lamb; fewer points will be required for lamb for stewing; more points for porterhouse steak, for the same weight. People with large meat appetites will be able to buy more of the cheaper cuts since every consumer will be able to spend the same amount of coupon points. There is a likelihood that a dollar a week will be the maximum allowed per capita for meat for a week. Illustrated above is the new War Ration Book Two, showing two pages of the stamps to be used in point rationed buying.

WEEKLY NEWS ANALYSIS

Reds' Middle Don Drive Toward Rostov Perils Huge Nazi Armies in Caucasus; French Pace Allied Tunisia Offensive; Wavell's Burma Campaign Aids Chinese

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

A French soldier (center) chats affably with a British Tommy and two helmeted American troops in Algiers. What are they discussing? How long it will take to drive the Axis out of Tunisia into the Mediterranean. Then the offensive against Europe.

SOVIET SURPRISE:

Offensive Perils Nazis

Two other Soviet offensives had been launched earlier—the first at Stalingrad and the second to the northwest near Rzhev. Both had taken their toll of Nazi men and equipment. Neither had threatened disaster to the German winter occupation of Russia.

But now had come the third Red offensive—this time aimed at the Middle Don area. It had started much the same as the other two, with drives through German communications, the capture of air fields and the cutting off of rail lines and roads. This third offensive, however, had a momentum and continuity the other two had lacked. Its apparent objective: To capture strategic Rostov and cut off all the German troops in the Don-Volga-Caucasus area.

How well this roughshod drive had succeeded over German resistance was indicated by a Red high command communique announcing the capture of Kamensk, rail and communications center only 85 miles from Rostov. The fall of Morozovskaya on the Moscow-Rostov railroad was also reported. In a single week's operations 60,000 Nazis were killed or captured, the Reds announced. So rapid and furious had been the assault that 1,000,000 Axis troops in the Caucasus and Don-Volga area appeared to be in imminent danger of being cut off.

Soviet communiques reported that German armies in the vicinity of Novaya Kalitva and Kazanskaya had "retreated in disorder," abandoning equipment and supplies in their flight. Further confirmation that the Nazis were reeling back before the Soviet sweep came in German high command admissions that the Russians had broken into the Axis defense front on the central Don after attacking "with a strongest concentration of tank formations."

At Stalingrad the Reds were reported continuing to wage offensive battles. To the north at Velikie, Luki which is only 80 miles east of the Latvian border, German counter-attacks were hurled back.

RETAIL PRICES:

To Be Standardized

Starting with meats and soaps, retail prices for foods and other grocery items were scheduled for standardization under a new program announced by the Office of Price Administration.

Under the new plan starting January 15, individual ceiling prices for grocery items based on March, 1942, levels, was to be replaced by a flat dollars and cents price ceiling. Purpose of the new order, officials said, was to establish a simpler method of determining what the top legal price should be. The plan specified that retail stores be grouped as independents, chains, and supermarkets. Each store in the same class would have the same ceiling prices.

Standard prices were to be of two types—either fixed dollar and cents, or percentage markup. OPA officials declared that the new regulations would eliminate a lot of reports and paper work.

BURMA:

Wavell Marches

The Burma road and China still lay many leagues distant, but Gen. Archibald Wavell's British Imperials had begun the long march from India designed ultimately to sweep the Japs out of Burma and establish direct and effective junction with Generalissimo Chiang Kai-shek's hard-pressed Chinese armies.

Content with methodically taking first things first, the British concentrated on nearby objectives. Striking suddenly between the Bay of Bengal and the Masu river, Wavell drove into Burma with the Japanese coastal air base at Akyab as his initial target. In the first stages of the campaign enemy resistance had been slight. Jap strategists had apparently relied on the dense Burma jungle to impede British progress while they organized in force to hold key objectives.

Air power assumed an important part in the campaign, with British planes bombing Jap-held towns along their route and American planes strafing Lashio, Burmese terminal of the Burma road. In retaliation the Japs bombed Calcutta. Long-range significance of Wavell's move would be greater than its immediate results, military observers agreed. First, by moving aggressively into Burma, Wavell was safeguarding wavering India. Moreover he was obtaining close-up operating space for his air forces to harry Jap holdings at Rangoon and Mandalay. But most important of all, the Allies were giving China visible proof that they were capable of deeds as well as words.

NORTH AFRICA:

Rommel Marathon

Deeper into Tripolitania the remnants of Marshal Rommel's Afrika Korps had plunged. In spite of British General Montgomery's brilliant flanking move hemming in the Nazis' rear guard, the retreating main German body was able to continue its move.

Several alternatives had been open to the now-defeated Rommel. One was to make a stand at Misurata, but since his previous efforts at such tactics proved fruitless, military prognosticators were convinced his destination was non-stop to Tunisia to join Gen. Walther Nehring.

Further to the west Allied air power had steadily stepped up its tempo and this growing plane strength hinted at an early end to the stalemate which had characterized the Tunisia front in recent weeks. Land fighting was still of a desultory nature, but in the air the United Nations were increasing the intensity of their attacks against Tunis and Bizerte.

That the Allied command had prepared grimly and well for its all-out attack on Tunis and Bizerte was evident in its use of French North African forces to envelop the Axis positions from the south and east. Radio Morocco quoting a French communique said the French had struck toward the east coast south-east of Pont du Fahs, 30 miles south of Tunis, taking numerous prisoners, guns and supplies.

AXIS CONFERENCE:

Mediterranean Moves?

Known only to those who were hurriedly summoned to Hitler's headquarters were the subjects discussed when Count Galeazzo Ciano and Chief of Staff Marshal Ugo Cavallero of Italy met with the fuhrer, Reichsmarshal Hermann Goering and chief of the high command Gen. Wilhelm Keitel. But observers were quick to point out that new Axis moves in Italy, France and Africa were to be expected.

Two immediate facts of significance were noted in the meeting. One was the absence of Mussolini—an absence which strengthened current reports concerning his serious illness. The other was the summoning to the conference of Pierre Laval, Vichy premier of France and arch-collaborationist with the Axis.

With Hitler stubbornly defending his last footholds in Africa and with Italian civilian morale shaken by repeated Allied bombing attacks, moves calculated to bolster both situations faced the Axis chieftains.

Still an ominous question-mark in the Mediterranean-Africa theater was Franco-ruled Spain. While the Spanish dictator had mobilized his army in the south perilously close to Gibraltar and Morocco and had used his radio for brash Axis propaganda, he had not yet violated his neutrality pledge. But the meeting of his foreign minister Count Jordana with Portuguese Premier De Oliveira simultaneously with the Axis conference was regarded by some observers as a cause for misgiving by the Allies.

BUTTER:

Rationed in Canada

Forecasting an action which many experts believe will be inevitable in this country, Canada officially undertook to ration butter by coupon with a weekly allowance of one-half a pound per person.

Butter became the fifth commodity rationed by coupon in the Dominion. The others are gasoline, sugar, tea and coffee. Rubber, particularly for tires, is likewise rationed, but not by coupon. Voluntary rationing exists with a few other commodities, notably meat.

Chairman Donald Gordon of the Wartime Price and Trade board said that butter rationing had been made necessary because of hoarders. "Some greedy and unscrupulous people," he charged, "aggravated local butter shortages and placed a serious strain on the distribution of the commodity. As a result panic buying was in evidence."

RICKENBACKER:

'Shame and Infamy'

"I know that if those of us who are raising cries of objections to being rationed could visit the boys as I did, you would realize the utter shame and infamy of your position."

This was part of the sermon Capt. Eddie Rickenbacker delivered to the

CAPTAIN EDDIE RICKENBACKER

"If you'd seen the boys."

American people when he told by radio the story of his miraculous rescue following 23 days in a rubber raft after being forced down in the Pacific with members of a plane's crew on a military mission.

"Speaking as a private citizen," the famous hero added, "I plead for additional effort, an all-out, total effort, to the end that we may increase production of planes, ships, guns, ammunition and all supplies that our fighting men must have in greater abundance."

NEW GUINEA:

3-Ply Offensive

General MacArthur's New Guinea offensive continued with mopping up activities after the significant capture of Buna village—enemy bastion on the northeast coast of the Papuan peninsula.

Two immediate objectives had remained before MacArthur undertook the large task of completely dislodging the Japs from New Guinea. One was to clean up the Buna Mission area, take over its airfields and completely liquidate the remaining Jap defenders. The other was to continue the pressure against enemy positions at Salamaua.

It was significant of the increasingly efficient American service of supply that for the first time since he undertook the offensive that General MacArthur was able to launch attacks with "co-ordinated support of tanks, artillery and aviation."

A communique from Allied headquarters disclosed that 13-ton American-built General Stuart tanks had been in action in the swamps and jungles of New Guinea. The communique also reported the destruction of two medium-sized Japanese cargo vessels in Finschafen harbor, 150 miles north of Buna.

Washington, D. C.

'INSIDE' HERO STORY

Behind the award of the Congressional Medal of Honor to 31-year-old Lieut. Com. Bruce McCandless of the U. S. Cruiser San Francisco is a story almost without parallel in the annals of naval warfare.

Inside fact is that shortly before he was cited for heroism "above and beyond the call of duty," in the smashing November 13 Solomons naval victory, McCandless wasn't sure whether he would be decorated or hauled on the carpet for insubordination.

His citation was one of glittering generalities, but here is the whole story of what happened:

McCandless was on the bridge of the San Francisco when it led a spectacular assault between two columns of Jap vessels, firing point-blank at both. In the roaring 35-minute engagement, Rear Admiral Daniel J. Callaghan, commander of the task force, and Capt. Cassin Young, skipper of the San Francisco, were killed, as well as other officers outranking McCandless.

The young lieutenant commander did not notify superior officers on other vessels in the task force of Callaghan's death, but immediately took command and began giving orders to the other vessels in Callaghan's name. Ordinarily, this would constitute a rank breach of discipline. However, McCandless acted as he did for two reasons:

(1) He was thoroughly familiar with the plan of attack, having been present at strategy powwows of Callaghan and Young when it was mapped out, and he feared there might be a shipup in carrying out the daring task maneuver if the command passed to another ship after Callaghan's death.

(2) It was vital to keep the news of Callaghan's death from the Japs, and they undoubtedly would have intercepted the radio communication.

After the engagement, when a friend suggested that he might be decorated for his brilliant "incognito" leadership, McCandless is quoted as replying that he would be lucky to get off without a "court martial." However, the navy was only too glad to give praise where praise was due.

MARCHING INTO TOKYO

Mel Maas of Minnesota, who is both marine corps colonel and congressman, has two mementos from the Solomons—a 50-yen Jap note and a 10-shilling note of Jap invasion money.

Maas got the money off dead Jap soldiers.

The other day he was displaying it to Representative Gordon Canfield of New Jersey and two British WRENS, comparable to our WAVES, who were having lunch with Canfield in the house restaurant. The WRENS, Third Officers Dorothy Taite and Elizabeth Gibson, were especially interested in the yen note, which was covered with brightly-colored designs and pictures.

"Be sure to give that money back to me," said Maas. "I have big plans for it."

"Yes, these notes will make a wonderful souvenir to show your grandchildren," commented one of the WRENS.

"Souvenir—nothing," exclaimed Maas. "I'm keeping that money to spend in Tokyo."

GUARDING THE WHITE HOUSE

The White House called Speaker Sam Rayburn the other day, asked him to come in to see the President, bringing with him a group of congressmen of his own choosing.

When they arrived at the front gate of the White House, in the speaker's car, the chauffeur said to the Secret Service men: "This is the speaker and members of congress."

The guards were skeptical. "The speaker is all right, but how about these other men?" Whereupon they insisted upon a personal examination of the other members of congress.

When Rayburn got inside the White House, he was as mad as that good-natured Texan ever becomes. He found a senior officer of Secret Service and said: "Look here, when I am asked to bring members of congress to the White House, I want them to be admitted without any third degree examination. You ought to know I wouldn't bring any bomb throwers!"

Note: The White House has been more closely guarded in this war than at any other time in history; including World War I. Streets on three sides are blocked off, and no one can get near without a pass, even a member of congress.

MERRY-GO-ROUND

¶ The Germans are trying to scare Franco out of making a commercial deal to sell us certain critical materials which have been going to Germany.

¶ Practically every young officer in the navy department here is asking for active duty, and many are getting it. Waves of WAVES are replacing them.

¶ The Pennsylvania Quaker village of Swarthmore is subscribing for a bomber to bear the name "Swarthmore."

It's the Same Old War!

By Capt. Richard J. Kennedy

It's the same old war! The basic principles never change—only the methods change. . . . The same battle order with which Hannibal won the battle of Cannae won the second battle of the Marne for Marshal Foch. . . . Vegetius, Roman columnist of his day, after a careful study of all the great battles up to and including the 4th century, decided that there were but seven systems of battle. . . . A study of Vegetius' selections shows that four of them were innovations of the other three, therefore there were and are but three basic orders of battle, as follows: (1) The parallel order; (2) The oblique order, (3) The enveloping order. . . . However, 900 years before Vegetius was doing his stuff on the Roman Daily Mirror, Sun Tzu, famous Chinese generalissimo, had prescribed the basic rules of warfare. . . . These basic rules are the same as prescribed for our armed forces today and will probably win the Tunisian affair for General Eisenhower.

Mechanized cavalry isn't new, by a long shot. . . . Rameses II introduced it in Egypt when he invented the chariot. . . . And tanks—China used armored carts as far back as 1200 B. C. . . . The ancient Persians introduced the elephant tank, elephants protected by armor with large scythe-like weapons attached to their trunks for mowing down enemy troops, equipped with turrets on their backs from which archers could fire. . . . And the large scaling towers of the Romans were built on wheels and rolled, like tanks, to their objectives. . . . Chemical warfare was practiced by the Greeks in 380 B. C. . . . They mixed incense, sulphur, pitch and faggots in a pot, ignited same and threw them into the ranks of the enemy. These were the first known incendiary bombs. . . . History shows that Genghis Khan used smoke screens extensively to cover his maneuvers.

WALTER WINCHELL is on a tour of duty outside Continental U. S. During his absence, contributors will substitute.

Hand Grenades were used by the Egyptians as far back as 490 B. C. They consisted of boxes in which vipers were secreted. These were thrown into the enemy lines. . . . And the Romans invented the granddaddy of the Molotov cocktail, consisting of crude oil in a bottle. The Roman doughboys would ignite the oil, then heave the grenade against the enemy's weak point. The smashing of the bottle would scatter liquid fire in all directions. . . . We hear a great deal about war decorations these days. The first known record of a public presentation of a decoration for bravery occurred in the first century, when the emperor of China decorated one of his subjects "for bravery above and beyond the call of duty."

"Hash-marks" came into vogue in the Continental army in the form of a strip of white cloth sewn to the shoulder of the uniform. Each strip of cloth represented three years of service. . . . We get the word chevron from the French "chevre," meaning a goat—probably because the inverted chevron of the French troops resembled goats' horns. . . . Our word "colonna" is derived from the Latin "colonna," meaning a column and indicating the colonel was commander of a column. . . . The corporal's chevrons date back to the Middle Ages when the artisans who worked on the construction of a castle were permitted to wear two inverted Vs (representing the castle roof) as a distinction.

Rifle Grenades were used at the siege of Stettin in 1677 and the men assigned to firing the grenades were known as grenadiers. . . . Caminelli Vitelli, an Italian, was experimenting with pistols 'way back in 1540 and the first bomb was invented by another Italian named Bando in 1588. . . . A form of shrapnel was used by the British at the battle of Crecy and the forerunner of our present rifle sight was a part of each cross-bow.

Chaplains are not new in the army. . . . Each Christian knight during the Crusades brought along his own private chaplain. . . . Oliver Cromwell recruited a regiment of cavalry known as the "Old Ironsides," most members of which were clergymen. . . . Bishop Leonidas Polk, an outstanding Southern clergyman, rose to the rank of general in the Confederate army.

As regards the Signal Corps. . . . Caesar sent back to Rome via carrier pigeon the reports of all his Gallic campaigns. . . . And we all know the story of the runner who reported the battle of Marathon in 490 B. C., then dropped dead. . . . True, there were no planes before the 20th century, but the ancient Persians had an air "blitz" all their own. They had trained falcons which would swoop down and scratch out the eyes of the enemy troops. . . . The Greeks, Persians, Egyptians and Chaldeans all used military maps,

APPLIQUE animated dishes. . . . A clever idea for a breakfast cloth, especially when they are used above a colorful plaid and complemented with napkins of the same plaid.

HOARD YOUR PENNIES TO BEST BUY WAR MATERIALS. SAVINGS STAMPS.

SNAPPY FACTS

ABOUT RUBBER

The average car owner drove 9,000 miles in 1941, clicked at the rate of about 6,700 miles a year in 1942 before gasoline rationing was nationalized. Essential driving is now pegged at an average of 5,000 miles annually and the "A" rationing book allows for 2,880 miles of driving a year.

Don't always be content with an "on the wheel" inspection. Have your tires removed from the wheels, spread and closely checked. You'll be surprised what this inspection sometimes shows in the way of internal carcass injuries. Catch them in time and save mileage.

In 1941 a total new supply of rubber amounting to 1,441,000 tons, 310,000 or 21% consisted of reclaimed rubber.

For more facts on rubber, write to: B.F. Goodrich, Dept. 100, Akron, Ohio.

Synthetic Era Taking Shape Today.

SUBSTITUTES INCREASE

Law Materials Might Have Less Importance After War Ends.

Remember not so long ago when the slogan "Accept no substitutes" was popular? Today, because of war demands for strategic materials, the very opposite of that is the rule!

And the enemy is beginning to realize that what with Paratroopers popping down on them from the skies in synthetic cloth parachutes, from transport planes made from substitute synthetic material, it could be good for them if they could get a personal substitute on a battle field all over the world.

As the war progresses, Americans are awakening to the fact that they are in the middle of a chemical revolution, the end of which is not sight, and the social possibilities which are far from being completely, thoroughly achieved.

It used to be that the motorists of this nation were completely dependent on the laboring, sweating natives coming out of the jungles of South America and the Southwest Pacific area with their crude rubber extracted from trees. Within a year, according to William M. Jeffers, there will be plenty of synthetic tires for every one who has a car. And these tires will be synthetically made from all native, easy to obtain, either chemically or from the earth itself, material in the U. S.

An interesting part of this chemico-industrial revolution is that the rural section of the United States is taking an increasingly important part in it. Chemurgy, the science of finding new industrial uses for farm products, has been very busy during the past years. Now that the war is on, the good it is doing can be noted in the extensive use made of casein obtained from skimmed milk. The plastic material obtained offers the best possibilities as a substitute material in various kinds of war material.

Parts of many bombers, dropping block busters over Italy and Germany, are made from casein. Further research will find still greater uses for it. As it is now, a contented cow chomping grass along a

The Army's New Wooden Plane

This is an official war department sketch of the new type wood and non-strategic material military transport plane. It is twin-engine, and about the size of the present-day all-metal transport planes operated by domestic airlines. It is officially designated the Curtiss C-76. Performance details are a military secret.

Mississippi levee in Louisiana is partially the cause for discontentment in Axis nations.

Soybeans, from which many plastic articles useful both for the war effort, and helpful in the homes, is another farm product that is being further developed. Bagasse obtained from sugar cane waste has proved its worth for electrical goods, washing machines and automobile parts. Possibly the toothbrush you used today had a handle made from sugar cane.

Often you hear the statement that possibly, because of the nation's all-out war and death-dealing on the Axis, most of its natural resources such as oil, coal, iron ore, will be used up. But from the great strides taken by industries making substitute synthetics and plastics, it isn't far-fetched to suggest that maybe there will be no need for the present natural resources in years to come. At least, not as necessary as today.

Miss and Mrs. America have found that many synthetic products are clothing them just as well as when they could buy all the silk they wanted from Japan. Scientists state that it is quite possible that every bit of clothing you will be wearing in the not too far distance will be synthetically made. Maybe four or five of the pieces of clothing you own today are synthetically made, and yet you never realized it.

Household furnishings, from glass fireplaces to dishes, from dressers to stoves are now being made from synthetic materials. The old gag about the errant husband hiding all the dishes before facing his wife

holds no more. For many plastic dishes don't hurt when they land on the target because of their light weight. On top of that they won't break and are also too colorful to throw around. Any angry wife will think twice before she begins to lay down a barrage with such ammunition.

Many of the war plants constructed, and in the process of construction today, have no windows. All artificial lighting and air-conditioning takes care of what nature used to consider her job. Glass bricks that let the health rays of the sun through, but prevent vision, now take the place of windows.

Those who aren't "up on" their knowledge of what is going on in the world of substitutes still say something to the effect that "People who live in glass houses shouldn't throw stones." But there are glass houses today, with more in the offing, that wouldn't be in the least affected by anyone who might want to throw some stones at them. Even some good, solid glass bricks wouldn't cause them any damage.

Statements from scientists busy working in laboratories far into the night in all the free United Nations have hinted that what has been seen so far in plastics, is nothing compared to what is to come. One spokesman stated that by October, 1943, synthetic production will be sufficient to provide the nation's military needs.

As you look about and see the hundreds, thousands, of articles of everyday commonplace variety, you automatically begin to ask yourself, after fully realizing the significance of the substitution era you are in, whether that article, or this article—probably having some strategic, or scarce material—could not be substituted by a plastic. More than likely in the months to come you won't be surprised when that article appears in its plastic dress.

Scientists have tagged the millions of years in ancient man's past as belonging to certain periods as he slowly developed from the brute stage. Then there were the various ages, of stone, wood and iron. The astounding use of steel, brought about by quicker, more efficient production methods, gave that period of development in the U. S. the title The Steel Age.

You wouldn't be surprised, would you, if after this war is over and won, the present days, and then, would be appropriately titled the Plastic Period, or the Synthetic Era?

Glamorous

U. S. Department of Commerce Puts Title on Plastic Industry in Bulletin.

Acting director of the U. S. department of commerce's bureau of foreign and domestic commerce, in a reference service bulletin, issued this statement:

"The spotlight of industry today is focused on our glamorous plastics which are commanding much interest and attention. This gigantic new industry, now gone to war, is doing a fulltime job in meeting the requirements of the war effort where performance counts most.

"Both at the front and behind the front, plastics are playing an important part in war equipment. Through their ever-increasing use as materials vitally essential in both combat and industry they are now on equal basis with the older fundamental raw materials, glass, wood, stone and metal.

"Although the new and original uses, as well as substitutions, in the non-essential civilian classification have been curtailed for the duration, the plastics industry, we feel assured, will not retreat after the war, but continue its rapid advance.

Bulletins being printed for the department of commerce contain latest information on present-day articles now being made from synthetics.

As each new substitute is put on the market, the various bulletins have been listing them. Along with the articles listed are the trade names, besides technical names.

Celluloid, one of the earliest synthetics, which was used as transparent windows for early model car side curtains, is the forerunner of comb, brush, and mirror handles.

STUDY OF MAN GONE SLIGHTLY MAD THROUGH RATION RULES

Mr. Twitchell took two more letters from ration boards from the letterman and weighed them carefully. Then he handed them back. "Sorry. Can't use 'em," he said. "I've already had my two and a half pounds this week."

"Get the sugar bowl," he commanded, addressing Mrs. Twitchell. "What for?" she asked. "Got to turn in all but five lumps," he said.

Elmer then stood on his head in the middle of the living room and put on his glasses.

"What on earth are you doing now?" demanded Mrs. Twitchell.

"Got to copy the serial numbers on the sidewalls of all my oil burners," he snapped.

At this point, Mrs. Twitchell went upstairs and quietly summoned the doctor.

The doctor arrived as Elmer was leaning over a table repeating his name and address over and over again and giving his height, age and color of eyes.

"Elmer, what are you doing now?" asked the wife.

"Just another registration," he snapped.

The doctor motioned to Mrs. Twitchell to sit down and whispered that it would be better just to observe Elmer without any comment for a while.

Elmer took from his pocket a small thermometer and held it in his mouth a few moments. Then he read it. "Seventy-nine degrees," he announced. "They can make trouble for me for having a temperature like that. I could have avoided it all, though."

Mrs. Twitchell forgot herself and asked: "How?"

"By switching from meat to coal," he barked. "You remember all those warnings that all cars should keep down to two cups a mile."

He then went into the kitchen, took the coffee pot and threw it away.

"Got to get something smaller," he said. "I'm only an 'A' card holder. My allowance is to be cut to three gallons a week now. Used to be allowed four. Tried to join a Share-the-Mocha club but couldn't do it."

Elmer walked to the telephone.

"Hello. Is this Henderson?" he asked. "Just want to tell you about the butter. It was worth retreading so I called the express company and turned it in."

"Quite a case," observed the doctor, making notes.

Mr. Twitchell now got a can of gasoline, poured out a small quantity, added condensed milk, a pinch of sugar and proceeded to drink it.

"Tastes lousy," he said, "but a ration order is a ration order."

Suddenly he put the cup aside and remarked, "I forget this was a coffeeless Tuesday."

"How long has he been acting like this?" asked the doctor.

"Just for the last day or two," said Mrs. Twitchell.

"Who's that?" demanded Elmer, suddenly noticing the doctor. "Ah, I recognize him now. He's the federal furnace inspector. It's okay, inspector. I laid my furnace up for the winter and am heating the house by bicycle now."

The doctor at this point sneaked up behind Elmer and slugged him with a heavy paperweight, knocking him cold.

"It's the only way to handle these cases," he said to Mrs. Twitchell. "I'm getting more of 'em every day."

Father's pretty dizzy now— They've tossed him into bed: To get those tire numbers he stood too long on his head.

Sign over a Connecticut movie house:

The General Died at Dawn with Jukebox Jennie

Now that butter is to be rationed we ought to see less of the fellow who always took about a pound of it on his knife and said: "Please put a little toast on this."

New slogan: Praise the war and don't pass the butter.

NO USE

Last night I sprayed my radio with strong insecticide, but just the same Laval got through; He's tough as hippo hide.

Many stores are now rationing ice cream, and refusing to sell any to take out. One man says his wife wanted a pint for a sick child, and so explained to the ice-cream clerk. But the reply—believe it or not—was: "You'll have to get a prescription."

Horse meat, so labeled, is now being sold in many cities, and it is selling pretty fast. Some people say it isn't bad. Elmer Twitchell insists it's pretty good. "It all depends on the horse," he declares.

Radio Brazzaville... In Darkest Africa

By Gordon Gaskill

(WNU Feature—Through special arrangement with American Magazine)

I am writing this from the Free French radio station in Brazzaville, three hundred miles up the Congo in the African jungle. Here I found the "Voice of Fighting France," the world's strangest broadcasting station.

Brazzaville is, first of all, the unlikely spot on earth for an important radio station which rivals in efficiency anything in London or New York. Brazzaville is real Africa, some 300 miles up the Congo river. It is steaming hot; the sun is a sledge hammer; fever and worse are always at hand.

Nobody in his wildest moments would have thought that Brazzaville would be one of the world's radio capitals. It became so by chance, by necessity, and by the efforts of three men.

First, the brothers Desjardins—Captain Francois, the elder, Lieutenant Pierre, the younger—both experienced French newspaper men. When France fell they escaped to London, joined De Gaulle as soldiers, came with him on that famous naval excursion that was a flop at Dakar, a success in the Cameroons and French Equatorial Africa.

Radio for Fighting France.

At Brazzaville, capital of the latter, De Gaulle asked the two brothers to set up a "Service of Information," a radio mouthpiece for Fighting France. The third man is a mild little radio engineer named Defroyenne, a sort of Gallic Thomas Edison, able to work all kinds of miracles with meager equipment. The Desjardins would tell him about some impossibly intricate piece of apparatus they needed. As they talked, Defroyenne would stare dreamily out the window, apparently not hearing a word. Then he'd wander off, still in a dream. Then in a couple of days he'd be back smiling shyly, with exactly what they asked for. Maybe it was made of bits from an old tractor and a sewing machine.

Their First Big Problem.

With such a man, the Desjardins tackled their first big problem: to make Radio Brazzaville talk. There existed only a Morse Code station and a flea-power amateur station with a midget 50 watts.

The code station had to be "modulated"—that is, modified so that it would transmit voice instead of dots and dashes. The incomparable Defroyenne vanished into the gloom of his workshop, dug into old boxes, tore down other gadgets to find parts and within a few weeks Radio Brazzaville somehow became a voice station. Not perfect, but quite good enough. The small amateur station was boosted to 350 watts, seven times its original power. All this work was done on a night-and-day schedule with almost no letup—except once, when a 20-foot boa constrictor turned up in the radio station grounds and had to be shot.

Assembling a Staff on Congo River.

Not the least of the Desjardins' tasks was to assemble a staff to prepare the programs. It might have been fairly easy in Paris or London or New York, but not 300 miles up the Congo river. Yet somehow, somewhere, they collected one of the strangest assortments of human beings anywhere on the globe. One used to teach English in French schools; another taught law in Singapore; another was a Parisian bank clerk; another a civil engineer. Still another was a gentle little man who used to sell antiques. An American girl reporter chucked a job in Washington and came. A French girl from South Africa, and another—the one who took down Hitler's speech—escaped from Alsace and found her way here.

Ambitious as these programs are, they're nothing to what's ahead, in the very near future. En route to Brazzaville is the most powerful short-wave transmitter ever built in America—a 50,000-watt which can thunder anywhere in the world. Radio Brazzaville will soon be broadcasting around the clock in some 20 Allied languages, plus counter-propaganda in enemy tongues, plus news in Morse Code to the Free French sailors.

A brand-new building will replace the old warehouse that Radio Brazzaville has used as emergency quarters. Not the least of its equipment are six pairs of fiber-wheeled roller skates, so that native messengers can zip around the 500 yards of outer passageways in short order.

All this has meant enormous human effort. Veteran colonials who have lived in Brazzaville for years predict that the Desjardins' staff will be dead within a year. This is steaming, fever-ridden country that richly deserves its nickname: "The White Man's Graveyard."

BRIGHT blue is the color keynote in this bathroom. Blue is used for towels and bath mat stripes and for a painted box cornice. The curtains are of coarse white muslin tufted with old-fashioned candlewicking in bright blue. It is difficult to find appropriate curtains that will stand steam and moisture so you may want to copy these in your favorite color.

Cut the curtains the length and width desired with ample allowance for shrinkage and baste the hems in. Next place the material flat on a table and mark diagonal

lines on the goods with a yardstick and pencil, spacing the lines four inches apart to form the plaid pattern. Now, thread a tufting needle with four strands of candlewick yarn, and work along these ruled lines using the thread double, as at the upper right. Also, sew the hem in this manner; then clip the stitches, as shown at lower right and dip in water. Spread out smooth to dry but do not iron. Finish the tops with a rod casing.

NOTE: It is easy to give all your windows a professional finish with box cornices; and they prevent light from showing at the top, in a blackout. Pattern 207 which gives directions for making cornices will be mailed for 10 cents. Address:

You can depend on the special sales the merchants of our town announce in the columns of this paper. They mean money saving to our readers. It always pays to patronize the merchants who advertise. They are not afraid of their merchandise or their prices.

Old License Plate Still Useful

The small tabs which this New York miss is holding fits right over last year's license. By using them, instead of full size tags, the state will save many tons of strategic metal, besides thousands of dollars production costs. Regardless of the size of the license, they will still cost the same last year.

It all depends on where you are living whether you will be seeing new automobile licenses, or new color combinations on the license plates on automobiles. This year only five states—Colorado, Illinois, Mississippi, Wyoming and South Carolina—are having new color combinations on the licenses.

Of course, you might be living near

one of these adjoining states and get to see them, but the possibilities are very small, considering how gas rationing is cutting down highway travel.

The reason for the use of 1942's license for the current year, 1943, is due to a WPB order, of March 18, 1942, curtailing the use of steel for license purpose by 90 per cent.

State officials have devised many schemes to overcome the obstacles brought on by the lack of steel for plates.

Some states will use a windshield sticker, some will use date tabs on the license plates, while even wooden fibre board tags will be available.

About half of the states will continue to use the old plates with a small tab, or strip (as shown above) attached to them. Of these states, 13 will not even use steel for the purpose, registration will be shown by a windshield sticker.

Florida and Massachusetts will use both tag and windshield identification.

Pennsylvania's license, which has had added a touch of individuality by having the plates in the shape of the state's outline, will go a little further this year in originality by having a date tab in the form of the state's symbol, a keystone.

Ingenuity has been shown in every state with the license problem.

Illinois is using new plates made from fiber board. Arkansas is using wooden plates for trucks and motorcycles, but passenger cars will use their old license plus a windshield sticker.

Wyoming will have new plates of orange letters and black background, because they were made before the WPB order went into effect.

The other four states' new color combinations are: Colorado, yellow letters with black background; Illinois, white letters with green background; Mississippi, white letters with green background; South Carolina, black letters with yellow background. The new plates—with the exception of Illinois—will be issued on to an automobile while the WPB order stands.

Hancock County Board Proceedings

8TH ADJOURNED NOVEMBER MEETING

Garnier, Iowa, December 31, 1942

The Hancock County, Iowa, Board of Supervisors met in session on above date with G. L. Klipping, F. J. Schoun and F. J. Schoun present.

The minutes of the last meeting were read and approved.

On motion and second the cash in the various county offices at the close of business on December 31, 1942, is reported as follows:

On motion and second the quarterly report of County Recorder Fern Peck Katter is approved.

WHEREAS Wm. H. H. H. County Engineer has reported that Buns Bros., of Woden, Iowa, have completed their contract for the construction and

WHEREAS the Board of Supervisors has approved a final estimate in the amount of \$1,455.00 in favor of Buns Bros. as a final payment on said contract, it is hereby resolved that the Board of Supervisors do hereby approved

BE IT RESOLVED, that Clarence Paulson, Hancock County Shop Foreman, be and he is hereby appointed to be the inspector for all Hancock County trucks and rubber tire motor vehicles and the Honorable Fire Rating Board of Hancock County, Iowa, is hereby requested to appoint Clarence Paulson as such inspector with full authority to make periodical inspections and reports.

BE IT RESOLVED, that the claims heretofore set out in the amounts designated thereon and the County Auditor be and he is hereby authorized to draw warrants for the same out of the Hancock County fund for such claims in amounts set out as follows:

Name of Depository	Max Deposit in effect under this Resolution
Hancock County National Bank	\$225,000.00
Garner	\$225,000.00
First State Bank	200,000.00
First National Bank	200,000.00
Klemme	150,000.00
State Savings Bank	150,000.00
Goodell	50,000.00
Farmers State Bank, Kanawha	150,000.00
Exchange State Bank, Wesley	50,000.00
Titonka Savings Bank, Titonka	50,000.00
Ventura State Bank	50,000.00
Ventura	25,000.00

BE IT RESOLVED, that the following salaries for the deputies in the following offices for the year 1943, be and he is hereby approved:

Position	Salary
Deputy County Auditor	\$100.00
Second Deputy Auditor	70.00
Deputy County Sheriff	125.00
Deputy County Recorder	85.00
Deputy County Superintendent	92.50
Deputy County Clerk	77.50
County Superintendent (annually)	200.00
First Deputy Treasurer	87.50
Second Deputy Treasurer	87.50
Employment Clerk	70.00
County Attorney's office	40.00

BE IT RESOLVED, that the County Auditor be and he is hereby ordered to have warrants for Principals and Deputy's salaries semi-annually.

THOUGHT FOR THE DAY

"Ideas are funny little things They won't work unless you do"

NEWS AROUND THE SCHOOL

Report cards were given out on Tuesday afternoon.

The new semester began Monday Examinations were given on Wednesday and Thursday of last week New subjects this semester will be a Refresher Course in Mathematics, American Government, Business Arithmetic

OUR SCHOOL AT WAR SCRAP BOOK MADE

A scrap book called "Schools At War" was prepared by the pupils of the school. In it were listed the activities the school is engaged in, in helping to win the war.

Outstanding were stamps and bonds purchased, and helping with the scrap drive.

Since the beginning of school last fall a survey shows that pupils and teachers have purchased approximately \$1,450.00 to date. The pupils and parents are to be complimented upon this fine showing. Let us keep it up!

The scrap book was sent to Des Moines. Schools all over the nation were building scrap books as part of the program of Schools at War.

SENIOR CLASS NEWS

Anna Lee Bruner, Reporter

HO hum! The week after vacation and semester tests. They were all taken Wednesday and Thursday. Most of the students found out what their grades were, however, the report cards will wait until next week.

We have a new schedule now to begin the second semester. It has a few conflicting spots in it yet, but we hope to have them worked out in a few days. We are also changing our system of conduct.

The Physics class had their semester test Wednesday. We reviewed our work on the chapter "Heat" on Friday. We also learned the three kinds of temperature: Fahrenheit, Centigrade and Absolute.

The Senior Home Ec. girls are starting their unit in Cooking. Several members of the class have taken other subjects this semester and so the class is smaller.

The English Literature class has started the semester with a new period of literature called "The Nation United."

The U S History class is working on the period just before the Civil War.

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

Monday and Tuesday we reviewed for semester tests.

On Wednesday we had our Economics, English Literature, Biology and Bookkeeping tests.

On Thursday we had the Geometry test.

The Typing class had speed tests and a written test on Friday.

We finished our course in Economics, so next semester we will take American Government.

Barbara Johnson left our class this week. She will attend the Humboldt high school.

From now on the high school is on a point system in deportment.

Mr Micklick entered a scrap book, containing the different projects our school has accomplished in aiding the war effort. We have done about seventeen things to help. Two of the main things are buying war stamps and bonds, and helping in the scrap drive.

Our schedule has been changed, starting the second semester.

SOPHOMORE NEWS

Patricia Kudje, Reporter

The first couple of days this

week we reviewed for our semester tests. Wednesday and Thursday morning we had the real thing.

We have been having the reports over the book, "The Mediterranean Sea." Each of us gave one, so we didn't have a test. Since we hadn't finished our chapter before in World History, we finished it Friday and discussed it.

In Biology we started a new unit called "The Biology of Plant Life." We got as far as the introduction.

We have been writing sentences with infinitives in English II. Our English test wasn't very hard.

FRESHMAN NEWS

Elwyn Etchen, Reporter

In Algebra we reviewed part of the week. We had our test Thursday. The Sophomores took the same test as the Freshmen.

In English we had our semester test. All grades could have been better.

In Science we had our test. The grades were high. The test was made of other tests we had taken.

The Home Economics girls have received their new cook books.

In Manual Training the boys are using the power scroll saw. We lined some of the lumber on the lumber rack.

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher

Peggy Lou Coobs, Reporter

Both grades have been writing semester tests this week. Some of them were quite long. We got back our Arithmetic tests and most of us got a score of average or above.

Those who received 100 per cent in their Spelling tests were Roger B, Phyllis, Roger R, Marville, Harold, Ruth, Shirley and Helen S.

Next week when we begin the second semester we will take Civics instead of Science and Health.

In Arithmetic the 8th grade has begun a new chapter about Stocks and Bonds.

In History both grades are now studying about slavery.

The people who had perfect attendance for this semester are Ruth S, Helen, Esther, Velma, Phyllis, and Peggy.

Those who have missed school this week because of illness are Elizabeth, Carol, and Clarence. We all hope they will recover soon.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

After wishing everyone a Happy New Year, we began studying our semester tests. Those who received 100's in their Spelling tests were: In: Rosendahl, Maurice Trumbell and Isabella Gibbs.

There also were many who missed only one or two out of the 100 words.

In Art we are beginning to study color. We are now working on color wheels.

THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

We are sorry that Nancy and Peter are leaving us. We will miss them very much. Friday afternoon we had a farewell party for them.

We have been busy taking semester tests this week.

Richard, Harley, and Janice have not been absent or tardy this six week. Richard had a perfect record for the semester.

La Nelle, Sandra, Audra, Maxine, and Delores T received perfect scores in Spelling this week.

PRIMARY ROOM

Virgie Hardeopf, Teacher

In Social Science the second grade is making the picture of our neighborhood. The girls drew the south side of Main Street, and the boys drew the north.

Alan Neuberger was five years old and on Wednesday he treated us to suckers.

In Art Class we colored snow men and put them on the bulletin board.

The following were neither absent nor tardy this past six weeks: Billy Waddingham, Larry Stille, Roger Terhufen, Melborne Trampel, Terry Koerner, Adeline Medaus, Carole Ann Montgomery, and Joan Lemke.

Roger Terhufen is the only person in the Primary Room who has been neither absent nor tardy this semester.

The following people received 100 per cent in Spelling: Larry, Lu Verne, Neva Ann, and Billy. The boys and girls in our room bought \$15.30 worth of war stamps this week.

4-H BOYS STRESS WAR PRODUCTION AS MAJOR 1943 RESPONSIBILITY

Hancock County 4-H Club members are assuming part of the responsibility shouldered by the state 4-H club in resolving that during 1943 their major efforts will be directed toward increasing the production of food products vital to the war effort.

The resolutions adopted at the 3-day annual 4-H Boys' Short course and Convention which closed at Iowa State College Dec 30 have been incorporated into the plans set up for club work in Hancock county.

Other points included in the resolutions are that every 4-H boy increase his contributions, both materials and leadership, to all salvage campaigns, fire prevention, health programs and the purchasing of war bonds and stamps.

The 4-H boys are going to assist in helping to meet the farm labor shortage by aiding their parents and neighbors even more than before, and by training you men from town and cities in doing farm work.

Throughout the year the programs will be set up and evaluated on the basis of contribution to the war effort, with emphasis placed on developing ideals, hope, courage and character during war times.

Attending the convalesce from Hancock County were 16 boys and two leaders. More than 700 members and leaders from throughout the state were at Iowa State College for the 3-day event.

FEED THE BIRDS THIS WINTER

Our little feathered friends, the birds, are having a hard time of it this winter as the heavy, deep snow and ice has covered all of their sources of food supply.

The birds need the help of kind humans to bring them through the winter. The scraps from your table will prove a real blessing to the birds if you will place it where they can feed on it.

This writer has tacked a couple of pieces of course screen on a tree in the back yard. The screen was tacked on loosely, to form a sort of pocket, in which we place dry crusts of bread, beef tallow, bits of fat and meat scraps.

It didn't take the birds long to find this new feeding ground, and now it is a common sight to see twenty-five or thirty birds feeding at the tree.

In any large crowd there are a few "bums" out to get a free feed. In birds the "bums" are sparrows and starlings, with a blue-jay showing up occasionally. But this is offset by the friendly slate-colored juncos, or snow-birds, the downy woodpecker, the red-headed woodpecker and the flickers. Some winters our feeding station has been honored by frequent visits by the bright plumed cardinal.

The birds have not heard about food-rationing, so let's help them out and serve them the crumbs we usually throw away.

Issues Marriage License

County Clerk Elmer Raw reported one marriage license issued during the past week to Ralph H DeVries, 29, of Holland, and Louise Harringa, 25, of Titonka. This was the first license issued in 1943.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE

Timely Information Prepared by Iowa State College Specialists

Farm tractors need to be winterized the same as automobiles. Most jobs in the winter, such as feed grinding, saw wood etc, are for only a few hours' duration, whereas summer field work is for 10-12 hours at a time. For this reason a tractor need to be handled and serviced more carefully.

The crankcase should be drained and refilled with a good quality oil of lighter viscosity. If SAE 30 oil was used during the summer, the winter oil ought not be heavier than SAE 20, and for operation in below zero temperatures SAE 10 should be used.

The air cleaner should be taken apart and all heavy oil, dirt and sludge cleaned from the oil cup and filtering element. Fill tractor or radiator with commercial anti-freeze if tractor is to be used to a considerable extent. If used only occasionally fill with water but start motor first, if using water, or be sure it will start.

If tractor is to be stored for winter, drain all fuel from fuel tank, sediment bowl, fuel lines and carburetor to prevent formation of gum. Remove the spark plugs and pour in two or three tablespoonfuls of lubricating oil to coat cylinder walls with oil. Turn engine over by hand to distribute oil on cylinder walls. Drain summer oil from crankcase and refill with fresh oil. Store tractor in closed shed.

If an overhaul job is needed take your tractor to a reliable service man early in the winter, and have a thorough reconditioning job done. Repainting at the time of overhaul is recommended.

Another article will appear in this column next week.

Little Lunches Flatter Wartime Menus
(See Recipes Below)

Victory Lunches

Mid-day meals with that go-and-get-it spirit are those that are properly balanced, and have plenty of eye-appeal. The days are gone when you can make a quick dash to the corner grocery and bring home lamb chops to broil quickly. Gone, too, are days when you had loads of leftovers from yesterday's roast.

But, homemakers, you need not be foiled, rather let your ingenuity devise new ways of getting nutrition requirements into your menus. Use protein foods like peas, beans, eggs, and vitamin B1 foods like cereals as extenders to make up for meat. Your New Year victory menu parade starts off with a meat loaf "stretched" with oatmeal.

Savory Meat Loaf.

(Serves 8)
1 pound ground beef
½ pound ground pork
¾ cup oatmeal
1 egg, beaten
¾ onion, grated
¾ cup milk
2 tablespoons chopped parsley
3 tablespoons catsup
1½ teaspoons salt
Combine ingredients in order given. Mix lightly until well blended. Place in a greased loaf pan, patting smooth. Bake in a moderate oven (375 degrees) about 1 hour. Makes approximately 2½-pound meat loaf.

*Little Luncheons.

(Serves 6)
2 cups sifted enriched flour
3 teaspoons baking powder
1 teaspoon salt
2 to 4 tablespoons shortening
¾ to 1 cup milk
¾ cup ground ham
6 poached eggs
Creamy Cheese Sauce
Sift flour, baking powder and salt together. Cut or rub in shortening. Add milk to form a soft dough. Turn out on lightly floured board and knead ½ minute. Roll dough out into a long rectangle 8 inches wide and ½ inch thick. Cut in half lengthwise and spread each half with ham and roll jelly-roll fashion, sealing edges well. Cut rolls into 8-inch pieces. Form each piece into rings on baking sheet. Pinch ends together. With scissors, cut through rings almost to center, in slices about 1 inch thick. Turn each slice slightly on its side. Bake in hot oven (450 degrees) 10 to 12 minutes. Place a poached egg in the center of each ring and serve with Creamy Cheese Sauce.

Creamy Cheese Sauce
2 tablespoons butter or margarine

Lynn Says:

Cans and Jars: You will have noticed that your grocery shelves present a different picture than in the past. Instead of all food being put up in cans, some food has been preserved in glass. In those foods placed in cans, the government has decreed three different sized cans. A number two sized can, one of the standard sizes yields 2½ cups and will serve four to five people. The number 2½ sized can averages 3½ cups and feeds six people. Largest food can is number 10, usually used by institutions and restaurants. This large size is not usually practical for a family of less than eight since it yields 12 cups and would last for at least two meals. A few additional sized cans are allowed in the case of canned meats, fish, baby food, and citrus juices.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for January 17

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS WINNING SOULS

LESSON TEXT—John 4:27-42.
GOLDEN TEXT—He that reapeth receiveth wages, and gathereth fruit unto life eternal.—John 4:36.

Man's need is the same wherever and whoever he may be. The Christ who met the need of the distinguished religious leader Nicodemus did the same for the poor sinful woman of Samaria.

The incident at Jacob's well in Sychar took place when Jesus, leaving Jerusalem because of increasing hindrance to His work, went up to Galilee. Unlike His Jewish brethren, who detoured around the land of the hated "half-breed" Samaritans, He "must needs go through Samaria," for there was a sin-sick soul that needed Him.

Our lesson abounds with instruction regarding soul-winning, both in principle and in practice. We here find Jesus:

I. Winning a Soul-Winner (vv. 27-30).

The faithful and kindly ministry of Christ led the woman to faith in Him as the Messiah. She left her water pot and ran at once into the city to share her new-found joy with everyone she knew.

Since the first expression of spiritual life is testimony, the one who brings a sinner to Christ not only saves a soul, but also wins a worker for Christ. One fears that we often assume that winning men to Christ is enough. We should expect that the new light should shine forth into the darkness.

So we have a two-fold reason for soul-winning; saving a soul from perdition, and setting a life on fire for testimony. It's a great business. Why don't we do more of it?

II. Instructing Soul-Winners (vv. 31-38).

This work of soul-winning requires a sustaining grace which this world cannot give. Jesus by His own example showed His disciples how that strength comes from above.

He who had seated Himself at the well, tired and hungry, to await the return of the disciples with food, had been refreshed in the doing of the Father's will—in reaching this forlorn woman. "The greatest thing that ever occurs in the world is the transformation of a human soul, and the greatest joy anyone can ever have is to act as the divine agent in bringing about such a transformation" (Douglass).

There is another thing these soul-winners needed to learn—even as we need to learn and re-learn it—that the time to win souls is now. How prone the human being is to procrastinate. Tomorrow—next Sunday—next week, we will speak to someone about his spiritual need. Next year we will give more liberally for missions, or for the work of soul-winning in our local church. But "look on the fields." Do you not see "that they are ripe already unto harvest"?

Again, soul-winners need to remember our Lord's words in verses 36-38. Not only the reapers receive the reward, but also those who sow and those who labor in order that the harvest may come. The man who plows is just as important as the one who reaps—perhaps some would say more important. Some of us who are called to be God's plowmen should remember that and be encouraged in our labors.

Like the perfect leader that He was, Jesus did not require of His disciples what He did not do Himself. So we find Him again in the work of evangelism. He practiced what He preached.

III. Practicing Soul-Winning (vv. 39-42).

There is real danger that those of us who have a measure of leadership in the church may be quick to tell others what they ought to do—and not do it ourselves. This is particularly true in this matter of soul-winning. One is apt to write, preach and teach about it, and then neglect to do it.

The disciples had been to town for bread. One wonders whether they had talked to the store-keeper about Christ. Have you?

Jesus did not theorize about it—He really sought men for God. The testimony of the woman He had won sent a host of people out from the city. He spoke to them the word of life and they believed.

This was evidently "group evangelism" as distinguished from the "personal evangelism" which won the woman. They are both important, and belong together. Some are saying that the days of group evangelism are gone. We doubt that, but certainly the days of personal evangelism are always here. Let us be busy about that kind of soul-winning—and God may so bless that we will have a real revival. Are you ready for it?

The Best Prayer

He prayeth best who loveth best
All things both great and small:
For the dear God who loveth us,
He made and loveth all.

—COLERIDGE.

PATTERNS

SEWING CIRCLE

curved shoulder yokes framing a flattering neckline and a wide, waist-smoothing girder which ties firmly in back.

Pattern No. 8273 is in sizes 2, 3, 4, 5 and 6 years. Size 3 takes 1¾ yards 36-inch material, 2½ yards braided trim. Send your order to:

SEWING CIRCLE PATTERN DEPT.
330 South Wells St. Chicago.
Enclose 20 cents in coins for each pattern desired.
Pattern No. Size
Name
Address

It's Flattering!

EVERY line of this easy-to-look-at dress flatters the mature, larger figure. The deep cut neckline shows off an expanse of throat which makes your face appear younger and prettier. The smooth shoulders and simple sleeves simplify the top of the dress, gathers through the bodice give the soft fullness which is best for you, the panelled skirt fits flat over the hips.

Pattern No. 8268 is in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38, short sleeves, requires 4 yards 39-inch material, 2 yards bias fold.

Child's Frock.

PRETTY frocks for children are easy to come by, even at lowest possible costs, when you sew at home. Today's pattern suggests an adorable style for two to sixers with a perky scalloped front.

Household Hints

When liquid glue has hardened so as to be unfit for use, try softening it with a bit of hot vinegar, just a little at a time.

To oil a door lock, dip key into oil and turn several times in lock.

A few cranberries added to applesauce when cooking will give it a delightfully new and interesting flavor.

If a fruit pie runs out in the oven, sprinkle salt over the spilled juice and the oven will not become filled with smoke.

A little salt added to the last rinse water will prevent clothes from freezing on the line.

ASK ME ANOTHER?

A General Quiz

1. What does "recherche" mean?
2. Why did King Arthur's knights sit at a round table?
3. In architecture, what is an abacus?
4. If England is invaded what signals will spread the alarm?
5. Where does genuine mocha coffee come from?
6. How old was George Washington at the end of the Revolutionary war?
7. Is the slogan "America First" original with us?
8. Who was the "March King" of America?

The Answers

1. Rare or exquisite.
2. To avoid showing distinction.
3. A flat stone placed above the capital of a column.
4. Church bells.
5. Arabia.
6. Forty-nine.
7. No. Previously an Australian Fascist organization used "Australia First," and the British Union of Fascists used "Britain First."
8. John Philip Sousa.

Adams Hurried Away

It is the custom of retiring Presidents of the United States to take part in the inaugural ceremony of their successor, but John Adams, the second President, drove his horse and carriage out of Washington while Thomas Jefferson, the third, was being sworn into office.

Hostess Let Herself In For an Awkward Moment

At a Christmas gathering the shy young hostess, in an effort to be genial, led aside the comparative stranger, whose name, somehow, eluded her.

"Look," she said, "I've paired you off with that lady in the corner. Will you take her in to dinner?"

"My husband says she's a bit of an old frump, but she's got lots of money, and one of his clever friends has just married her for it, so you can understand we must be nice to her."

"I'm sorry," said the guest, "but I am the clever friend in question."

Pull the Trigger on Constipation, with Ease for Stomach, too

When constipation brings on discomfort after meals, stomach upset, bloating, dizziness, gas coated tongue and bad breath, your stomach is probably "crying the blues" because your bowels don't move. It calls for Laxative Senna to pull the trigger on the slow bowels, combined with Syrup Pepsin for perfect ease to your stomach in taking 10 years, many Doctors have given person prescriptions in their prescriptions to make medicine more agreeable to a touchy stomach. So be sure your laxative contains Syrup Pepsin. Insist on Dr. Caldwell's Laxative Senna combined with Syrup Pepsin. See how wonderfully the Laxative Senna wakes up lazy nerves and muscles in your intestines to bring welcome relief from constipation. And the good old Syrup Pepsin makes this laxative so comfortable and easy on your stomach. Even finicky children love the taste of this pleasant family laxative. Take Dr. Caldwell's Laxative Senna combined with Syrup Pepsin, as directed on label or as your doctor advises, and feel world's better. Get genuine Dr. Caldwell's.

Half-Bushel Pockets

American mothers who despair over their son's junk-filled pockets should be glad that Junior wasn't born in Korea. Korean men have their pockets in their sleeves; capacity is half a bushel!

TWELVE NEW CASES FILED IN HANCOCK COURT

Only twelve new civil cases are on file in the office of Elmer Rav, Clerk of the District Court, for the January term of the district court which opened Monday, Jan 11 with Judge Henry Craven of Clear Lake presiding. This is an appearance term only and no jury will be called.

New civil cases filed are as follows: Martha Geilenfeldt vs. Arthur Geilenfeldt, suit for separate maintenance; Mrs. A. J. Olthoff vs. Kenneth Boughton, promissory note suit for \$1,562.95; Bertha Callies vs. G. E. Stott, promissory note suit for \$105.90, Rosetta Tanner vs. Albert Tanner, suit for divorce; Central States Electric Co. vs. Evelyn Daly, et al, conditional sales contract suit for \$231.43; Adolph J. Brandenmuhl vs. H. J. Hill and Fred A. Fassler, auto damage suit for \$16,439.50

Hancock County Cooperative Oil Association vs. Wesley Alden, promissory note suit for \$175.12; Pure Oil Co vs Roy Railsback, \$559.35 suit on account; Alfred Semon vs. C. H. Bunting and Raymond Bunting, auto damage suit for \$357.47; Agricultural Mutual Insurance Association v. Mike Kelly, suit on account \$177.92, Delia Fish vs. Pauline Nessel, suit on two promissory notes \$219.80 and \$237.54

In a divorce suit filed Wednesday Gertrude Ganseveld vs. Dan Ganseveld of Britt, plaintiff charged, cruel and inhuman treatment, and asks custody and support for a son, age 7. The couple was married Aug. 27, 1925 in Garner and lived together until about Jan. 1, of last year.

Elmer Wessels went to Clarion Friday morning to work for Martin Hill for about a week.

Elwood Harvey, who was ill with the flu all of last week, returned to school again Monday.

Mr and Mrs. Wallace Pavey were at Garner on business Monday afternoon.

Miss Ruby Wille spent Sunday evening visiting with Miss Helen Albers

Mrs P M Wilson was called to Clarion Tuesday by the death of her step-mother.

Temperatures in North Iowa again are down to the zero mark, and below.

Mr and Mrs. Leppo Wessels visited at the home of their son, Fred and family near Meservey Sunday evening.

W H Lemke, who was a patient at a Mason City hospital receiving treatment, returned home Thursday.

Mrs Daisy Lemke and son, Donald, visited at the Verner McLaughlin home at Belmond Sunday afternoon.

Doris Reuben is assisting with house-work at the Walter Lauster home while their daughter, Ruth Ann is ill with an ear infection

Mr. and Mrs. Clifford Montgomery and children were dinner guests Sunday evening at the Geo. Dodd home.

Mr and Mrs Wayne Pavey and daughter, Carol Ann, were visiting with relatives at Plymouth, Sunday.

Mrs. Wistey and son, Glenn, of Clear Lake, were supper guests at the E. F. Jacobs home Tuesday evening

Mayor W C. Keraus was in Mason City Thursday to see his little grandson "Mickey" who was a patient at the hospital, ill with pneumonia

Wallace Pavey, Jack Etchen and Melvin Coobs, of Des Moines, came Sunday evening and visited home folks in Klemme until Tuesday morning.

Mr and Mrs. Carol Larson and children of Des Moines were visiting in Klemme last Wednesday and Thursday. Mr. Larson is employed at the Ankeny ordnance plant.

Mrs. Naska Bock went to Mitchellville last Wednesday to visit for several days with her son-in-law and daughter, Mr. and Mrs. Lyle Burr, and to help her grandson, Bobbie, celebrate his birthday

Ben Coobs, who underwent a major operation and spent about 6 weeks at the Veterans Hospital at Des Moines, came home last Wednesday. Ben is feeling good and will soon be back to normal.

Mrs. Conrad Quandt left by train Monday afternoon for Wichita, Kansas, being called there by the illness of her little granddaughter, Gracka Maria, daughter of Mr and Mrs Ernest Gerardi.

W C Keraus is assisting at the Wellemeyer Furniture Store this week, helping Mr Wellemeyer get ready for a couple of carloads of furniture that will arrive soon for spring

Mr. and Mrs. Leppo Wessels and son, Paul, visited at the William Wessels home near Clarion Sunday. Grandpa and Grandma Wessels were anxious to see their new granddaughter there. This is Mr and Mrs. Wm. Wessels' first child and they have named her Shirley May.

Pete Paulson Jr and family who have been residing in Mrs. Daisy Lemke's apartment, have moved into the Tom Blank house, recently vacated by Mr and Mrs. Henry Wessels. Mr. Wessels, who was a painter was called into army service from Wright county. Mr. Paulson is employed on the Rock Island railroad here.

Local Happenings

Klemme and Vicinity

Mrs. Sumner Trumbull is carrying her left arm in a cast as the result of an accident Monday afternoon. Mrs. Trumbull slipped on the icy sidewalk and in falling broke a bone in her left wrist.

Mr. J. A. Chambers was a patient at the Belmond hospital all of the past week, suffering with a severe cold that bordered on pneumonia. We are glad to report that Mr. Chambers is greatly improved at this writing.

Mrs C A Arnold and Miss Minnie Lenz entertained to dinner Sunday Sgt. Asa Gibbs, who is home on a furlough from Alaska, Miss Harriet Gibbs of Mason City, and Mr. and Mrs. Harry Gibbs and family of Klemme.

Mr. and Mrs. Wm. Reuben and Della, of near Kanawha, were dinner guests Sunday at the George Albers home. Mr. and Mrs. Ted Albers and family of Swaledale were supper guests at the Albers home

Mrs August Lau returned home Sunday evening from Chicago, Ill., where she went to attend the graduation exercises at Navy Pier. Her son, Norman, graduated as a Petty Officer 3-C, as a specialist in Aviation metal working

Mrs. Paul Grange and son, Dora-ance of Mason City, were visiting with Klemme friends Thursday. Dora-ance is "marking time" awaiting call to begin pilot training in the Army Air Corps. He expects to start training sometime in February.

Miss Shannon Adams, who has been staying with her brother-in-law and sister, Mr. and Mrs. Wesley Patterson for the past couple of months and attending high school here, left Sunday for her home at Missouri Valley, where she will again enter high school there.

Paul Schultdt, son of Mr. Herman Schultdt, some time ago enlisted in the U. S. Marine Corps for officer training. Paul left Tuesday noon for the marine base on Paris Island, Port Royal, South Carolina, where he was ordered to report for duty, Thursday, January 14th.

Housewives Will Be Required to Invoice Canned Food

More About Point System Rationing

Women are asked to co-operate in the coming point rationing system by buying sparingly of canned and bottled processed food, purchasing only for immediate needs, until the program can be effected in effect. The new system is fair, as the wife of a millionaire may purchase no more than a wife a laborer.

During the week prior to the day rationing will begin, retail selling of all canned and packaged processed foods will be suspended to give the merchant's time to replenish stocks, train clerks and receive the post the official OPA list of point values. Before the effective date the public must register for their Ration Book Two, and become familiar with the program. The rationing of coffee and sugar will continue as at present.

Persons applying for War Ration Book Two will be required to fill out and sign a "Consumer Declaration" form stating exactly the stock of processed food on hand. Heavy penalties can be applied to those making false declarations.

Home Canned Goods Exempt

Fruits and vegetables canned at home need not be declared and no stamps will be deducted for them. However, the government is asking persons having home canned supplies to use them instead of buying commercial products.

A housewife is required to report the number of cans of commercial products on hand. Ration books for all members of the family may be used by the person doing the marketing.

Point Values May Change

Should point values be changed, which they probably will from time to time, newspapers will announce them. Every food store will have an official OPA poster showing current point values for each product. Point values will be the same in every store regardless of the price charged for the product.

With regard to coffee stamps, the OPA has announced that the valid period of stamp No. 28 is from Jan. to Feb. 7, 1943, inclusive.

The Times will keep readers informed from time to time of any further information regarding the new point rationing system.

If machinery cannot be housed, it should be heavily coated with paint or grease.

IOWA'S RATION CALENDAR

Coffee:
Coupon No. 28 (1 lb) expires February 7

Sugar:
Coupon No. 10 (3 lbs.) expires January 31, 1943

Gasoline:
"A" book coupons No. 3 (4 gals each) good until Jan. 22
Coupon No. 4 good from Jan. 22 to March 22

Tires:
Class A Ration First inspection deadline - March 31
Class B, C, or bulk coupon Rations First inspection deadline - February 28
Commercial vehicles inspection deadline - February 28.

Fuel Oil:
Period 2 coupons (10 gal. ea.) good until Jan. 27.
Period 3 coupons (11 gal. ea.) good until February 22.

HERB BAILEY WILL HOLD A CLOSING OUT SALE SOON

Herb Bailey, who lives on his farm 2 miles south and 1 mile east of Klemme, will have a closing out sale on Friday, January 29th. The sale will begin at 12:30 p. m.

List 43 Head Of Livestock
The bill of sale includes a total of 43 head of livestock: 13 head of cattle, 4 head of horses and 26 head of hogs.

Mr. Bailey will also dispose of a large line of farm machinery and tools, some hay and feed, and some household goods.

Mr. and Mrs. Bailey are retiring from farm life, but there plans for the future have not been made.

The complete bill will be printed in The Klemme Times next week.

Remember the date: Friday afternoon, January 29th.

MORE FARMERS SIGN UP HEMP CONTRACTS

Last week farmers in Hancock County contracted for 826 more acres of hemp, which makes a total of 3,028 1/2 acres contracted. 4,000 acres of hemp is the goal for Hancock County.

Hemp is a War Crop. The hemp is made into rope to be used by the U. S. Navy, which needs it badly.

Anyone who has suitable land is urged to grow hemp. Contact your Township AAA Committeeman or call at the County AAA office if you wish to sign a contract.

THE TIMID SOUL By Webster

Farmers Warned To Test Beans Before Planting In Spring

KLEMMME WOMAN HAS FOUR BROTHERS IN THE NAVY

When Glenn Wistey, of Clear Lake, son of Mr. Louisa Wistey, entered the U. S. Navy last Thursday. He became the fourth and last brother of Mrs. Ed Jacobs of Klemme to enter that branch of the service.

Mrs. Jacobs' other brothers in the Navy are Edwin, machinist first class, who has been in the service four years and is on a cruiser; Clarence, construction carpenter first class, joined last April, and was a third hand of from Duluth, Alaska; Lloyd, seaman second class, enlisted last October 18 and has been at Hueneme, Cal.

Mr. and Mrs. Clair West of Des Moines are the parents of a baby boy born to them at the Methodist Hospital in the Capital City on Tuesday, January 19, 1943. They have named him Peter Joseph.

Miss Ruth Johnson, Klemme registered nurse, is caring for mother and baby.

The West's also have a little girl who has been staying with her grandparents, Mr. and Mrs. Sumner Trumbull in Klemme for several weeks.

URGE GERMINATION TEST ON ALL BEAN VARIETIES

Soybean seed from the 1942 crop has a viability much lower than was previously anticipated, and it is highly important that all seed beans be tested for germination now.

This is pointed out by County Extension Director Paul Henderson.

Although on the basis of experimental data it was indicated earlier that beans would germinate successfully despite the September freeze, it now appears that a considerable portion of the Iowa crop was so immature at the time of the freeze that the viability was seriously reduced.

R. H. Porter, head of the Iowa State College seed laboratory, reports that all varieties of late-planted beans which contain a large proportion of green beans are not giving satisfactory germination. Farmers' samples so far are testing from 10 to 85 per cent with most of the samples below 75 per cent. The demand for soybean seed is heavy, and undoubtedly many lots fit for seed have been sold, Porter says.

This means that Hancock County farmers will have to make an effort to locate adequate supplies now while there is still some seed available. And every farmer who plans to plant beans next spring should make preliminary germination tests on his own farm. Such tests can be made by placing a sample of beans in moist sand and holding at room temperature. If fewer than 75 per cent of the seedlings emerge the lot should be considered unfit for seed.

If 75 percent or more of the seedlings appear, a 1-pound sample taken from various parts of the bin should be submitted to the College Seed Laboratory at Ames for further test. The cost of a germination test is 40 cents for a 1-pound sample and 50 cents for a combined germination-purity test.

Although there is some variation in the germination of different varieties, with early maturing varieties such as Richland, Mukden and Manchur in some cases germinating satisfactorily, no variety has been found to meet seed specifications in all cases.

WELLEMAYER STORE HAS BIG STOCK OF FURNITURE

Last summer the Wellemeyer Furniture Store was literally flooded with new furniture, but before Christmas Mr. Wellemeyer had disposed of just about everything in the store.

Since then he has been getting in more new furniture and at present his store is again well stocked with furniture of all kinds which is now on display.

Another car load of furniture is on the way, and added to what is already on hand, will make Wellemeyer's furniture stock one of the very largest in North Iowa.

Large Crowd Attended Mobilization Day Meet

FARM MOBILIZATION DAY LAUNCHES 1943 FOOD PROGRAM

The 1943 food production campaign in Hancock County was launched last Tuesday when the "Mobilization Day" meeting was held at St. Boniface church hall in Garner. Considerable interest was shown, with 160 attending, a much larger crowd than had been expected. Dinner was served at noon. The meeting was held in conjunction with the "National Farm Mobilization Day" held all over the United States.

The program here was for the USDA War Board, the Farm Bureau and all related farm organizations, the office of Civilian Defense, and many civic groups were also represented. J. M. Townsend, chairman of the County War Board, presided, opening the meeting by reading the President's proclamation of the day. He also spoke briefly about hemp. Other speakers were:

Alfred Josten, vice chairman of the County AAA, who explained the 1943 production goals and the reasons for asking greater production this year; County Auditor F. C. Missal, representing the office of Civilian Defense who talked on the rationing program and why it is necessary; A. E. Rasmussen, the third member of the County AAA Committee, who gave a talk about rope needed on a ship and connected this with the hemp program, and he also stressed the need of food by Axis-conquered nations which the Allies will be feeding when they take them over.

Paul Henderson, County Extension Director, discussed better oats for Uncle Sam and recommended the Tama, Boone, Central and the Marion varieties, all four of which are rust resistant. He spoke on the soybean meal problem and the need for protein feeds, and said that the Commodity Credit Corporation is shipping 88 carloads of soybean meal to Iowa from the south. Mr. Henderson suggested seed testing as a means of increasing production, especially of soybeans. He suggested also that the Township AAA Chairman, Township Farm Bureau Director, and the Township

FAVORABLE CONDITIONS FOR DAIRY PRODUCTION PREDICTED IN 1943

Hancock County dairymen can look forward to one of their most profitable years in 1943. The butter-fat to feed ratio is above the 1920 to 1940 average and the feed situation is especially favorable to dairymen.

The shortage of grain feeds does not threaten milk production since dairy cows make efficient use of roughages which are likely to be abundant next season.

Dairymen must plan to increase production if the 1943 goals are to be reached. At present the labor shortage is the greatest handicap to increased production. Dr. C. Y. Cannon, Iowa State College dairy specialist, says that most of the families on small farms can handle more cows than they are milking. Reorganization of building arrangements and other methods allow more time to devote to dairy production.

Increasing the production of each cow in the herd will also help to meet the nation's demand for dairy products. Wise feeding, comfortable quarters and adequate water supply will do much to encourage higher production.

KLEMMME LADIES ENTERTAINED IN HOME AT GARNER

Mrs. Edwin Bock, of Garner, was hostess to a group of Klemme ladies at her home Friday to a one o'clock luncheon, followed by bridge.

Mrs. A. J. Kudje won the high score in contract, with Mrs. P. M. Wilson second highest.

The Klemme ladies report a very enjoyable time.

Home Project Chairman work as a committee to set up township meetings as follow-ups for the mobilization meeting of Tuesday.

The group listened to the Mobilization Day program presented over a nationwide radio hook-up, which included President Roosevelt's address read by James F. Byrnes, director of economic stabilization.

R. J. Fritsch led the community singing and provided some humor during the dinner hour.

GAME BIRD PROGRAM MAY BE SUSPENDED

Members of The Des Moines Chapter of The Izaak Walton League Releasing Quail in Madison County

The game bird program has been in operation since 1938, during which time more than 187,000 quail and pheasant chicks have been hatched at the State Game Farm at Boone and distributed to sportsmen cooperators throughout the state for release to the wild after the birds were able to care for themselves. The program may be discontinued for this year. The game program has been partially responsible for the tremendous numbers of quail and pheasants in this state. The reasons advanced for temporarily terminating the program are because there was a surplus of game birds left in the wild after the close of the hunting season and because so many cooperators have either entered the armed services or have become engaged in war work, and it is felt the plan could not operate successfully this year. Breeding stocks of both quail and pheasants will be held at the Game Farm so that the program can be re-inaugurated when the need for stocking again becomes apparent.

It Takes Both, War Bonds and Taxes, to Win—Victory Tax Special Direct Levy Asked to Help Meet Heavy War Costs

WASHINGTON, D. C.—Approximately 50,000,000 American workers began to make an added contribution to the War cost this month in the form of a 5% Victory tax.

For many millions of Americans the Victory tax and the 1943 income tax are the first direct levies to be made by the Government to meet the staggering War costs. And it will take both taxes and War bonds . . . to provide the supplies and materials to win the War and the peace afterwards.

The Treasury Department estimates that the Victory tax will raise approximately \$2,000,000,000. Every person receiving more than \$12 per week must pay the Victory tax upon that part of his income over and above the \$12. For example, a married man with a salary of \$50 per week, with two dependents, would make only a net payment of \$1.06 per week after allowance for post-war credit.

The Government has made every effort to make the impact of the new tax as light as possible. The law, in effect, provides that in the case of married persons whose sole income is from wages or salary, 40 percent of the Victory tax paid (up to a maximum of \$1,000) plus 2 percent for each dependent (up to a maximum of \$100) may be used as a credit against whatever Federal income taxes the individual may owe at the end of the year—provided he

leaving 73.5 billion dollars of disposable income. During 1943 total income payments are expected to rise to 125 billion dollars and total personal taxes under existing revenue legislation will be 15 billion dollars—leaving 110 billion dollars of income at our disposal as against only 73.5 billion dollars in 1940.

In 1942 Mr. Average American will still be carrying a much lighter tax load than his Canadian or English brothers-in-arms. In Great Britain total national and local taxes paid by individuals at present amount to 31 percent of the national income. In Canada, total individual taxes amount to 25 percent of the national income. In the United States, total personal taxes, Federal, state and local, will amount in 1943 to 18 percent of national income. Our English allies invest an additional 10 percent of national income in War savings. Our Canadian allies invest an additional 11 percent of national income in War savings. We Americans, to match the record of our Canadian neighbors, would have to invest this year 20 percent of our national income in War savings. To match the English record we would have to invest 23 percent of national income in War savings.

U. S. Treasury Department

WEEKLY NEWS ANALYSIS

Soviet Offensive Stretches Westward; French Cooperation in North Africa Paves Way for Unified Allied Campaign; Fierce Buna Battle Marks Pacific War

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Gen. Henri Giraud, newly designated high commissioner of French North and West Africa, reviews American fighters soon after his appointment as successor to Admiral Darlan. The appointment of the French general, famous for having twice escaped the Nazis, did much to satisfy the elements discontented over the "deal" with the assassinated Darlan.

AFRICA: Cooperation

World-wide cooperation of all French leaders not captives of the Axis powers was deemed almost a certainty when Gen. Henri Giraud, successor to the assassinated Adm. Jean Darlan as high commissioner of North Africa, named Gen. Alphonse Juin as commander in chief of the French forces in Africa.

Jun commanded French African forces at the time of the Allied occupation in November and had since been collaborating with the pro-Ally French regime.

The previous appointment of Giraud had a unifying effect which was missing under Darlan. French North African civil and military forces rallied around the new commander, as did Gen. Charles de Gaulle, leader of the Fighting French, who would have no part of Giraud's predecessor.

Battle in Tunisia

Although the Allied North African headquarters acknowledged that British and American forces had withdrawn from a hill position six miles northeast of Medjez-el-Bab—which they held for less than a week—competent observers said that the Allied position as a whole was not materially affected.

In another area of operations it appeared as though Field Marshal Erwin Rommel was intent only on getting his broken Africa Corps to Tunisia for the Axis final stand on the African continent. Rommel had three possible lines of defense on the Libyan coast. But British eighth army patrols broke through the first one at Wadi Bei El Chebir, 55 miles west of Sirte and 185 miles east of Tripoli. Rommel's chances were lessening. And above all, the Middle Eastern command appeared confident.

Plot Nipped

An assassination plot against Giraud and Robert Murphy, President Roosevelt's minister to French Africa, was nipped in the making when Giraud announced the arrest of 12 persons, including two who helped the American landing at Algiers.

Brief initial dispatches said that Giraud has announced that 12 persons were arrested to prevent "further assassinations." He said that "it is better to prevent than punish" and that those arrested were not going to be shot.

RATIONING: Little Hoarding

Despite the fact that more than 200 canned food items will be rationed soon, American housewives have made very little attempt to stock their cupboards in advance, Office of Price Administration spokesmen have pointed out.

The absence of hoarding was due to two factors: Consumers must declare all canned goods on hand, on the basis of which deductions will be made from the ration points allotted each person; the feeling that hoarding would be emphatically unpatriotic kept many a person from ordering more than the usual supply of foodstuffs.

Even though a tremendous prying job is yet to be completed, OPA officials expressed hope that the point-rationing program would get under way some time in February.

DRAFT:

3 1/2 Million in '43

Approximately 3 1/2 million men—18 through 37 years old—will be called to the armed forces during 1943, draft officials have announced. They will be called at an average rate of 250,000 or 300,000 a month.

About half of the quota will be drawn from the 18 and 19 year olds who completed registration in December. The other 1,750,000 will be childless married men since the pool of unmarried men available for military service is practically exhausted.

TAXES:

Record Year

Early on the agenda of the new congress was consideration of some form of pay-as-you-go tax payment plan. There were increasing indications that one of the many proposed methods for meeting this year's income tax out of this year's income would be adopted.

Most widely discussed was the program advanced by Beardsley Ruml, New York Federal Reserve bank official. Under this setup one year's taxes would go by default, and taxpayers would meet 1943 taxes out of 1943 income rather than pay 1942 taxes this year.

Well might congress study tax plans because this year brings increased income tax rates, the 5 per cent Victory Tax and larger levies on many everyday living items. And the treasury department indicated that to meet the rising cost of war even greater sacrifices may become necessary. But U. S. citizens were taking the new situation in stride. Most people realized that it takes a great deal of money to win a modern war.

GIFT:

Of 20 Million

In 1939, Walter P. Murphy, head of the Standard Railway Equipment company, gave Northwestern university \$6,735,000 with which to establish a technological institute on the Evanston, Ill., campus.

When death came to Walter Murphy on December 16, 1942, he had not forgotten Northwestern. A provision of his will, announced at the end of the year, gave the university more than \$20,000,000 to develop, maintain and operate the technological institute. Beyond this restriction the will placed no limitation on the use of the bequest.

The gift raised Northwestern university to fifth place in amount of endowment among the universities of the country. Harvard, Yale, the University of Chicago and the University of Rochester lead.

DRINKING:

And the Army

Drinking conditions in and around army camps do not constitute a serious problem for officials, according to a report made by the Office of War Information after an extensive coast-to-coast investigation. This survey was undertaken to determine what truth if any there existed for some of the rumors among U. S. citizens about excessive drinking among the nation's armed forces.

In all U. S. history, the OWI says, no army has been so orderly.

The sale of 3.2 beer in army camps is described as a "healthy and sensible" arrangement. This is listed as the main reason for the vastly less amount of drinking by soldiers in this war as compared to World War I.

Security Planner

Pictured with his wife, Sir William Beveridge attends a luncheon at the Savoy hotel, London, in the interest of his social security plan. Sir William is the author of a financial assistance plan which protects the people of Great Britain from the cradle to the grave. It has received considerable publicity in the United States.

MISCELLANY:

RECORD: American shipbuilders in 1942 turned out a record number of 750 merchant vessels, totaling 8 million tons, according to the National Council of Shipbuilders.

STRIKES: Man-days lost from war production as a result of strikes dropped to 91,925 in November—the lowest since Pearl Harbor.

SALVAGE: A Jap radio broadcast reported that engineers had refloated and repaired an 11,000-ton U. S. floating dry dock which it said American forces scuttled last April at Port Marivales, Bataan.

IMPREGNABLE: According to French radio reports, Adolf Hitler has nearly finished construction of a "new, impregnable Siegfried line" along the Atlantic seaboard of France.

ORDER: The Finnish Information Center in New York has been ordered by the state department to cease issuing news releases and pamphlets, and the American legation in Helsinki has stopped sending out bulletins. This development followed reports that Finnish officials joined in a toast to the Japanese Pearl Harbor success.

\$30,000,000 Spent for Recreation by U. S. Cities

Recreation needs for war industry workers as well as service men, and conditioning programs for civilian defense workers contributed in 1941 to an expanded national recreation program costing cities more than \$30,000,000.

Although this expenditure did not approach the peak outlay of pre-depression days, it was nearly \$1,000,000 more than was spent in 1940, according to figures submitted by 1,164 cities to the National Recreation association, source of the city manager association's information.

Expenditures for the current year may rise equally high or higher, the association said, since tire and gas rationing are providing new reasons for programs for stay-at-homes.

Popular in municipal recreation programs were picnicking and gardening, reported by an increasing number of cities. Basketball, bowling-on-the-green, football, boating, swimming, skiing and first aid classes are other activities listed as favorites in recreation programs.

Nearly 18 per cent—or 207—of the cities offered special services for men in uniform last year, while 190 cities provided special services for war industry workers. Among these services were evening-hour programs and clubs for families of workers new to the city. In addition, 300 or more recreation agencies said they had served large numbers of service men through their regular facilities.

Wilson's 14 Points

The famous 14 points assailed by Hitler were first outlined to congress by President Wilson in January, 1918. These points which Wilson believed necessary to a post-war settlement were, briefly: 1. Open treaties through open international diplomacy. 2. Freedom of the seas. 3. Free international trade. 4. Disarmament. 5. Impartial adjustment of colonial claims. 6. Evacuation of Russian territory. 7. Evacuation of Belgium. 8. Evacuation of French territory and return of Alsace-Lorraine to France. 9. Readjustment of Italian frontiers. 10. Autonomy for Austria and Hungary. 11. Evacuation of Rumania, Serbia, and Montenegro and security for Balkan states. 12. Sovereignty for Turkey along lines of nationality. 13. An independent Poland. 14. Formation of a "general association of nations."

Such Men As . . .

Some of the principal arguments against United States membership in the League were advanced by such men as Senator Borah, Senator Johnson and the late Senator Lodge of Massachusetts. The arguments were that it has been since its earliest history the policy of the United States to avoid foreign entanglements; that the proper province of the United States is the Western hemisphere, and that any interest of the United States with the Eastern hemisphere, other than commercial, is non-existent; that the United States is a sovereign nation and that adherence to the League covenant delegates a part of the sovereignty to a state established in a foreign country and composed of foreign nations.

Barbados' Fine Climate

Healthful climate has in fact so encouraged native black population as to make Barbados one of the world's most heavily peopled areas of its size. Almost 200,000 people live on its 166 square miles. The density, nearly 1,200 people per square mile, is comparable to that of China's most crowded provinces. Labor is cheap and mass production methods have been purposely withheld from the island's great sugar industry because they would cause unemployment and starvation. Women outnumber men largely because thousands of rugged Barbados males have moved to less crowded neighboring islands for employment.

Nature, Too, Is Great Enemy of the Rising Sun

Will Nature follow in Gen. Jimmy Doolittle's wake with a volcanic raid, an earthquake attack, or a tidal-wave invasion of Japan?

Scientific bodies in Washington are receiving inquiries as to such a possibility. Some imaginative laymen have even suggested ways that the United Nations might "scientifically" promote such natural hazards in Nippon. Others ask advice about the odds they should wager on another earthquake or volcanic eruption in Japan within the next year.

Of course, seismologists say, none of these natural upheavals can be promoted by man; the belief that they can is in a class with the superstition that heavy gunfire brings rain. Volcanic eruptions, however, can be predicted by their symptoms, and study of the relationship between volcanoes and earthquakes may eventually indicate early warning signs of 'quake disasters.

A dramatic example of successful prediction occurred in 1914 in connection with the outburst of Sakurajima volcano, off the Japanese island of Kyushu. Scientists long had expected trouble in the vicinity, and as the time of the cataclysm approached, stronger and more frequent earth tremors, accompanied by volcanic rumblings, added their warning signals. When the big eruption came, no lives were lost, the island's more than 20,000 inhabitants having fled to the mainland only the day before.

Although their immediate origin is no Shangri-La mystery and certain cycles of possible recurrence may be worked out, neither earthquakes nor volcanic disturbances run on schedule. Moreover, scientists still offer various theories as to the ultimate factors deep within the earth which cause the surface dislocations.

Unknown Donor's \$5.00

Is Start of Loan Fund

A \$5 banknote, left anonymously upon the doorstep of the president of the Pennsylvania State college two years ago, has increased its value almost 1,000 times.

With that banknote as a starter, Mrs. Ralph D. Hetzel, wife of the president of the college, established a loan fund which is available to students when they need it in an emergency.

Total loans of \$4,981 have been made to students. With \$10 named as the highest loan, students borrow money from this fund to meet emergency needs for food and room rent, special visits home, job interview, and medical expenses.

No interest is charged and no time is specified for the payment of such a loan. The only requisite is that a student must need the money to tide him over an emergency. Up to and including August 31, 338 students have borrowed \$24 times from the fund.

Nearly two-fifths of the loans were made to men and women who needed money for food and living expenses. Graduation expenses, books and shoes, eye glasses, clothes, and personal reasons were other necessities which brought the student to the emergency loan fund.

Donations, many of them from alumni, faculty, and undergraduates, have increased the fund to its present status of \$2,367.

Copyright

The first requisite of the copyright office is that the work be publishable. You can publish your booklet with the following copyright notice: "Copyright 19—(year date of publication), by—(your name)." Promptly after publication to register your copyright claim, send two complete copies of the best edition to the Copyright Office, Library of Congress, Washington, D. C., with the statutory fee of \$2. Remittance should be made by money order or bank draft payable to the register of copyrights. The copyright office will not accept personal checks unless certified.

Point Rationing Brings Equitable Sharing, Food Administration Officials Announce

Enough Food for All U. S. Promised; Sub-standard Diets Said Unnecessary

Even though Americans will have to have a ration book with their ration opener starting next month when all canned, dried and frozen fruits and vegetables are rationed, those who live on farms and in the rural section of America will fare much better than their city-dwelling friends and relatives.

For fresh fruits and vegetables, and those preserved at home, will not be affected by the rationing order.

Those who have hoarded canned goods will have to declare the amount of goods they have on hand, to housewives on farms, and in the rural sections of the nation who have always been more "canning conscious" than those living in the cities, will reap the benefit of all their extra housework during the last summer and early fall months.

But, all in all, everyone will have enough to eat, even though there will not be the usual assortment of formerly available foodstuffs. Food Administrator Claude R. Wickard declared that nearly half of next year's production of canned and dried fruits and vegetables will be needed for military purposes.

He also stated that rationing in the U. S. does not mean sub-standard diets.

It is possible that eventually all food and wearing apparel will be rationed. The rationing system will be carried on through the new so-

on different commodities. Using meat again as an example, a pound of one kind of meat might be given a value of eight points. A pound of another kind of meat, more plentiful, might be given a value of six points. The more plentiful a foodstuff, the less point value it will be given. The government will determine the point value of each commodity on the basis of supply and demand. As the supply or demand fluctuates, the point value can be changed accordingly.

The new ration books will have stamps that are designated as worth eight, five, two or one points. Virtually any point value can thus be computed by using this combination of stamps. When purchases are made the appropriate stamps are turned in to the dealer. The stamps besides having the point value designated on them will also be marked with a letter to indicate the period of time in which it may be used.

This point rationing system would be similar to the system that has

will be required, according to Leon Henderson, OPA director.

Food administration officials have hinted that for a while the point rationing plan will be somewhat confusing. They feel, though, that the American people will be able to swing into the point purchasing plan in a minimum amount of time, with but little complaint, and with the same spirit they have shown during the past year of war effort.

Food Rationing List:

Here are the processed foods to be rationed and the exceptions, as listed by the Office of Price Administration:

Canned and bottled fruits and fruit juices (including spiced fruits).

Apples, including crabapples, applesauce, apricots, baby foods, berries, all varieties; cherries, red sour pitted, other cherries; cranberries and sauce; fruits for salad and fruit cocktail; grapefruit, grapefruit juice, grape juice, peaches, pears, pineapple, pineapple juice, all other canned and bottled fruits, fruit juices, and combinations.

Fruit juices in containers holding more than a gallon are exempted.

Canned and bottled vegetables and vegetable juices:

Asparagus; baby foods; beans, fresh lima; beans, green and wax; beans, all canned and bottled dry varieties including baked beans, soaked dry beans, pork and beans, kidney beans, and lentils; beets, including pickled; carrots; corn; peas; sauerkraut; spinach; tomatoes; tomato catsup and chili sauce; tomato juice, all other tomato products; all other canned and bottled vegetables, vegetable juices, and combinations.

Vegetable juices in containers holding more than one gallon are exempt.

Other processed foods:

Canned soups, all types and varieties.

Dried, dehydrated fruits: prunes, raisins, all others.

Frozen fruits: cherries, peaches, strawberries, other berries, all other frozen fruits. Frozen fruits in containers holding more than 10 pounds are exempt.

Frozen vegetables: asparagus, beans, lima beans, green beans, and wax beans, broccoli, corn, peas, spinach, all other frozen vegetables. Frozen vegetables in containers holding more than 10 pounds are exempt.

The following additional items are exempt:

Candied fruits, chili con carne, fruit cakes, fruit puddings, jams, jellies, meat stews containing some vegetables, olives, paste products (such as spaghetti, macaroni, noodles) whether or not packed with added vegetable sauces, pickles, potato salad, preserves, relishes.

been in use in England for some time. There the system is used for food as well as clothing. According to OPA officials British housewives learned to welcome point-rationing.

To put the rationing system into effect more than 1,500,000 volunteers

Inescapable Facts Prove Farmers' Job for 1943 Almost Superhuman

Every American farmer is facing one of the most grueling years he has ever had in prospect. He will be expected to produce more in the face of less farm labor than last year and serious shortages in mechanical equipment. 1942's record achievements were, in a sense, merely a "warm-up" for the job to be done in 1943. These facts are inescapable, and the earlier they are accepted, and the sooner every possible step is taken to overcome the handicaps which will be encountered, the better the assurance that the 1943 farm program will be successful, according to L. G. Elliott, president, LaSalle Extension university, Chicago.

No one can deny the seriousness of the worldwide food situation. Millions upon millions of once productive farm lands have been laid waste by the ravages of war in Europe. Wartime drains on manpower, which have created serious farm labor shortages already in this country, have had a paralyzing effect on farm production in Russia and Germany particularly. Countries under the conqueror's grinding heel have been stripped of cattle, swine, surplus food supplies, and even seed grains. Total world production of food is down sharply, while world food demands are up.

We can no longer think only in terms of this nation's requirements. America has never been able to stand idly by and watch other nations starve, and, regardless of what effort is required, what sacrifices are entailed, we are not going to turn a deaf ear to the world's frantic pleas for food. In food, as well as in arms and munitions, we cannot and will not produce "too little, and too late."

Bone, on Algerian Coast, Ranks Third Among Ports

Bone, or Bona, objective of the easternmost landing by American forces on the Algerian coast, ranks third among the ports of Algeria. Like the two larger ports, Algiers and Oran, Bone is the seat of a French naval station.

A modern and typically French commercial port city of 85,000 people, Bone lies on a small bay only 60 miles west of the Tunisian border and 220 miles by rail west of the city of Tunis. It is 270 miles

east of Algiers, and almost due south across the Mediterranean from Monaco at the French-Italian border.

The development of Bone on its present lines dates from 1833 when its region passed from Arab to French control. The iron ores from the hills of the Constantine district in which it lies were the incentive for dredging its shallow harbor and building port facilities continuously from 1857 to 1868.

Increases of more than 10 per cent above last year's record peaks are planned for many of the major farm products, including pork, lamb, beef, eggs and poultry. They are the products that will be most urgently needed. Farmers who have specialized in these lines have already boosted their output and for the third consecutive year have surpassed even their previously high totals. They will do even more this year in order to meet the larger demand from consumers with higher incomes, from the government to supply the armed forces, and from nations abroad that are fighting with us.

Long before planting time much can be done to insure higher production in 1943. Right now is the time for every farmer who has not already started to do so, to examine every piece of mechanical equipment he owns for wear and correctable defects which, if not remedied now can cause breakdowns at a time when they would seriously interfere with production. Now is the time to do all possible repairing and construction of buildings, and all other work which can be done in advance. During the planting, growing, and harvesting season every hour which is devoted to any other task will rob the world of food.

Even though the 1943 volume of production will cost more than in previous years, the total net income of the farmers will be larger because the prices of what they sell are considerably higher than they have been for many years. They are likely to rise substantially farther during the coming months. Because of the enormously increased demands they are expected to average not less than 10 per cent above present levels.

Larger production and higher prices will add another \$2,000,000,000 to the income received by farmers.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for January 24

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS THE GREAT PHYSICIAN

LESSON TEXT—John 5:2-17.
GOLDEN TEXT—Wilt thou be made whole?—John 5:6.

Hope of the hopeless, help of the helpless—who would that be, but Jesus? Coming to Jerusalem for the feast He did not seek out the homes of the mighty, the places of learning and culture, but betook Himself to the Pool of Bethesda, where there "lay a multitude of them that were sick, blind, halt, withered." Why did He go to such a place? Because He always had compassion upon those in need.

In this multitude He saw at once the neediest man of all—one without friends or loved ones to care for him, despondent and disheartened. What happened that day may well encourage the heart of every sad, lonely, and discouraged one.

We see three things here

I. Hopeless Infirmary (vv. 1-7).

How weak and helpless is humanity. Oh, yes, we seem to be strong, capable, fearless, but only until we meet some great elemental problem. Then we see that we are indeed a great multitude of impotent folk. The gently falling snow stopped the undefeated Napoleon. The silent fog can paralyze a nation. Sickness, death—who can stay their hand? We need the steady and powerful grip of God upon our lives if we are to go through such experiences. Not only was this man ill and weak, but his long years of suffering had made him so accustomed to weakness that he had reached a state of despair.

Such an attitude invites defeat. It may be the only recourse of the man of the world, but with Jesus standing by to help, there is good reason for assurance of faith in the darkest hour.

In the face of his need—yes, even in the light of Jesus' provision for that need—the leaders of the Jews could only criticize.

II. Heartless Religion (vv. 10-13, 15-16).

Jesus had done for the man what the Jews had not been able to do; in fact, one wonders whether they had so much as lifted a finger to help this poor sufferer. But now that he was able to walk, they were greatly concerned about the violation of their Sabbath day restriction against any work.

Instead of shouting for joy that this man was able to carry not only himself but his bed, they became zealous about maintaining the letter of their law.

Are there not those in our day who would be greatly disturbed if the deathlike quiet and dignity of their church services were to be broken by the cry of a new born babe in Christ? Would a revival be welcomed in the great churches of America which have lost the savor of Christ and the power of the gospel? We think not.

The man who had been healed answered well (v. 11). He did not know who Jesus was, but he knew that if He had authority to heal, He also had the right to tell him to carry his bed. When we meet Jesus we will be healed of our infirmities and, like this man, be delivered from the fear of cold ecclesiasticism.

But let us turn to the heart of our lesson, which is the act of Jesus in giving him

III. Healing of Body and Soul (vv. 8, 9, 14).

The body of this man was miraculously healed. There was no partial improvement, no long drawn out convalescence and regaining of strength. In fact, he was told to do something which called for the full vigor of a healthy body, to show that he was healed.

Even so when we are healed from sin it is not to a half-dead existence, but to the full vigor of spiritual life. We are to arise and walk in the power and grace which Christ has brought into our lives.

Note that the miracle performed here was for the glory of God. The miracles of God are not mere marvels or wonders. They are not for the advancement of the cause of any man or for personal glory. They are the mighty signs of an omnipotent God wrought for the good of men, for their spiritual enlightenment, and as a testimony to the one true God.

So in this case Jesus found the man in the temple to admonish him to continue steadfast in the spiritual liberty which had come to him "lest a worse thing befall" him.

Evidently this man's infirmity had been caused by sin, and even though he had suffered those 38 long years the tendency toward sin was still alive in his heart. Sin dies hard. How often have we not seen those who have cried to God out of their affliction, promising all sorts of spiritual changes if God will deliver them. When He does, they go right back to their old ways. The one who does that may well be looking for the "worse thing" which will surely befall him.

ON THE HOME FRONT with RUTH WYETH SPEARS

NEWSPAPERS BOUND TIGHTLY WITH MUSLIN STRIPS ARE PADDED WITH COTTON BATTING AND THEN COVERED TO MAKE STIFF BACK CUSHIONS FOR THE COUCH

A SECOND STITCHING MAKES A FINISH FOR OUT SIDE OF SEAMS

THIS is the story of an old couch that became glamorous and played a conspicuous part in a charming sunny living room. The transformation started with a heavy cotton twill fabric in a soft tan tone to match the background color of the hooked rug that you see in front of the couch. It was decided not to use any contrasting trimming but to accent the clean-cut box-like edges outlining the couch pad and cushions with a second seam on the outside.

When the smartly tailored cover was completed it was fastened firmly in place with zippers of the type that come apart at the bottom—one side being stitched to the seam allowance of the cover and the other sewn to the couch pad. Next came the stiff cushions to stand up at the back. These were made with an inside core of newspapers tightly bound together with muslin bands and then padded with cotton batting, as shown.

NOTE: Directions for making the hooked rug in this sketch may be found on page 14 of your copy of Book 5. Directions for making the spool table at the left of this sketch are also in that book. The velvet covered frames for the pictures over the couch are in Book 6, which also contains a description of the series of booklets prepared by Mrs. Spears as a service to our readers. Address:

Another Job Open for Women

(as well as men)

WOMEN can probably do this job better anyhow, because it is the women of America who raise most of the chicks.

We will pay \$1.50 per 100 to women (or men, glad to have them too) who take orders for our Insured Chicks. We will insure 90% of every order for 6 full weeks against death from any cause whatsoever. It makes a real selling advantage, emphasizes extreme livability of our sturdy chicks.

You and your neighbors probably order chicks anyhow. Get the facts. Make and save some money. Choice 12 leading breeds. Competitive prices. Pullets tested. Rigidly culled. And the best R. O. P. bloodline.

For doing the jobs will go toward Victory when paid to her.

Betsy
The little girl tugged gently at her mother's sleeve
"Now, Mother?" she asked. "Now can't we write my letter?"
"Why, of course, Betsy," Mrs. Carson grinned. "Are you going to write it or am I?"
"Well," Betsy said. "Maybe you'd better kind of say it to me. Only I'd love to write it."
"All right, then, Miss Carson, take a letter," her mother said, walking slowly up and down the room. "Ready?" "Dear Mr. Morgenthau: The way I save money for War Stamps buying is to steer all the small household jobs toward my daughter, who is eight years old. She is so keen about buying War Stamps that I know all the money I might have paid to someone else for doing the jobs will go toward Victory when paid to her."
"Now make a list, Betsy. 'Windows washed, 60 cents. Apples picked from under the tree, 25 cents. Emptied trash cans, 4 cents. Sold string beans from the garden, 15 cents. Sold strips of spoiled film to children for sunbathing, at one cent a yard, 20 cents. Total, \$1.24. Yours helpfully, I hope, and then I'll sign it at the bottom.'"
Betsy was puffing like a grampus from her labors. The tall, painstaking letters tottered bravely across the sheet of paper. Gravely Mrs. Carson took the pen to sign.
"Mother, would it be the proper etiquette if I signed it too?"
"Perfectly proper, I think," Mrs. Carson said without a smile, and handed the pen back to Betsy.
(Letter from an actual communication in the files of the Treasury Department.)

Around Iowa

FROM HIGH TOWER
A wire used by Frederick Decker in repairing the top of his windmill on his farm near Clarence, almost caused fatal injuries. It was blown by the wind until it came in contact with the high line. Mr. Decker was knocked out by the electric shock and fell to the ground, where it is thought that his contact with the ground started his heart beating again. He was able to walk to the house without assistance. He was badly bruised and the palms of his hands were burned.

RUNAWAYS
A team used for delivering started 1943 off with a bang and caused some excitement for LeMars residents. Hitched to a bobbed, driven by Bob Koerner, it decided not to wait as Bob made a delivery and started off on their own initiative. Some small damage was done to various cars parked along the streets, but otherwise the event ended happily.

NO SLEDS
Fort Dodge officials have decreed that no one shall skate or slide on the streets during the remainder of the winter. Anyone found to be so doing will be minus their skates or sleds, as they will be confiscated by the police. The death of an eleven-year-old boy brought about the drastic change in the rules.

MODERN HUNTING
What with a shortage of shells, Ern McKean of Hamburg was considered lucky to obtain a fox so easily as he did recently. On his way to town, he discovered a fox hanging on a fence, caught by a hind leg. With the aid of a club, Ern dispatched the fox. The fox was not damaged as the animal had not been there long.

FIRST OCCUPANT
An oxygen tent purchased last summer by the Elkader fire department was used for the first time recently by Jerry Johnson, seventeen-month-old boy suffering from pneumonia. The baby was soon able to be removed from the tent and returned to his home.

ADVERTISING
Miss Gertrude Tobin received a note from a friend, cooking for the armed forces stationed in Ireland, enclosing a label placed on dressed bowl by a Garner concern. The label read "Goodrich & Bethke, Inc. Iowa fed, Garner, Iowa".

MONTH GONE
Molly Richmond of Hawarden was in an automobile accident a month or so ago. Just recently, she discovered that she suffered a fractured jaw bone, as a result of the accident.

HONORED
The Rev. and Mrs. T. J. Severson of Eagle Grove were honored recently by members of the East Side Lutheran Church. They have been associated with the church for 25 years.

NOT WASHABLE
Willard Hartman of Owasa has applied at his rationing board for more gasoline. He has learned that the rationing books will not wash, as both his A and B books went through the washing machine.

THE METHODIST CHURCH
Herschel E. Harvey, Pastor

Klemme Methodist
Thursday:
Choir rehearsal at the Overholt home at 7:30 p. m.
Sunday:
Sunday Worship Service 10 A. M.
Church School at 11 A. M.
Youth Fellowship and Church College at 7:30 p. m.
Liberty Methodist
Sunday Church School at 10:15 A. M.
Worship Service at 11:15 A. M.
The postponed Sub-District Brotherhood meeting will be held on Monday, January 25, with supper at 7:00 p. m. All men are cordially invited to attend.

INFANT SON BAPTIZED SUNDAY

Michael Verle, son of Mr. and Mrs. Verle Keraus, was baptized Sunday afternoon in the home of his parents at Garner, by the Rev. Calvin Grosshuesch, pastor of the Immanuel Evangelical and Reformed Church of Klemme.

Dinner guests at the home of Mr. and Mrs. Keraus were Mr. and Mrs. E. C. Buntbach and son, Edward Jr., Mr. and Mrs. Wm. C. Keraus, and Rev. Grosshuesch.

POULTRY SPECIALIST WILL SPEAK IN COUNTY

W. R. Whitfield, poultry specialist from Iowa State College, will discuss poultry diseases and poultry management at the Kanawha high school January 26, and at Corwith high school January 27. Mr. Whitfield will show slides and film to illustrate his discussion. The meetings will start at 8:00 o'clock each evening.

DID YOU KNOW?

Did you know that one pound of waste kitchen fats contain enough glycerine to make one and one-third pounds of gun-powder? That's why we want every Iowa housewife to save every spoonful of grease, to strain it into a wide-mouth can, keep it in the refrigerator and sell it to her meat market when she has collected a pound or more.

Margaret
Margaret turned off the humming vacuum cleaner, and straightened the slipcovers of the armchair and the daybed that she had pushed up to go over the rug. Then she stood quite still in the doorway and looked at the small bedroom with its southern exposure. It was as neat and impersonal as a pin. It might never have been lived in. The door stood open on the clean, bare closet. There was not a pennant, not a team picture, not even so much as an old Arithmetic book left to show whose room it had once been.
Margaret stared at the walls, the furniture, and deeply, slowly, she realized that no matter what lodgers with their own trinkets and pictures might occupy it, she would always see it the old way. It was the old way that she saw it now. A pair of hard-worn gray pants lay on the floor where they had been dropped. Three baseball bats were stacked with a fishing rod in the corner. A battered red cap with a letter on it lay on the bed. And through the bed, as though it were transparent, Margaret saw another bed, smaller, and with high slatted sides.
She put the vacuum cleaner away and went down to her desk in the sitting-room. She took the fifteen dollars rent that the new lodger had paid that morning in advance for the room, and added to it, from her purse, three dollars and seventy-five cents more. Then she drew out a sheet of paper and began to write on it, slowly, gravely.
"To buy a bond to help train a young man to replace Don, Jr.—killed on June 6th in the Battle of Midway."
(Letter from an actual communication in the files of the Treasury Department.)

Mute Swan, Once Eaten, Now Has Royal Tradition

The mute swan, Cygnus olor, has a royal tradition. The species is said to have been introduced into England from Cyprus by King Richard Coeur-de-Lion on his return from one of the Crusades. In Henry VII's reign the theft of swans' eggs was punishable with a fine and a year's imprisonment. To this day the king of England shares with the ancient Vintners and Dyers' companies the ownership of all the many swans on the Thames river. The swannery at Cookham, near Windsor, belongs to the king, and it is thence that George V and Edward VIII sent presents of swans to both Canada and South Africa.

Queen Victoria used to send every member of the royal family a present of a cygnet or young swan on New Year's day, but mute swans are not now regarded as table birds. In the past, however, the mute swan was highly esteemed as food, and accounts of banquets show that numbers of the great birds—full grown, they weigh between 24 and 40 pounds—were dished.

Auto Dealers on Main Street May Make Arms

The Main Street auto dealer may soon become a "miniature arsenal" for Uncle Sam's all-out armament drive.

At least that's the object of a survey of the nation's 40,000 new car retailers which was launched recently. It queried dealers for specific information on the number of lathes, grinders, drill presses and other machine tools available in their shops for light manufacturing.

The object of the study, which was prepared by Joseph W. Frazer, member of the OPM auto advisory committee, is to work out a plan by which large producers of armaments can award subcontracts to dealers for the manufacture of small parts. It is believed that it might be possible for several dealers to pool their facilities to handle subcontracts of considerable size.

Several foreign countries, particularly China, have kept their armies supplied by small shops which are widely scattered and less vulnerable to air attack.

Three Cities' Joint Airport

Three Michigan cities—Saginaw, Bay City and Midland—will co-operate in managing a new airport to be built with federal funds, adding to the list of more than 40 such jointly operated airports in the country.

The airport will be built by army engineers under supervision of the Civil Aeronautics authority, at an initial cost of \$527,000. Half the land cost of \$100,000 is assumed by Saginaw, which also will pay half the maintenance charges when the airport is finished. Bay City will pay 30 per cent of the maintenance costs and Midland 20 per cent.

The intercity action dates back to 1940, when the three cities requested state aid on individual airports. The joint project was suggested by the CAA, and each city passed an ordinance under the state enabling act permitting participation. A three-man commission consisting of the chief officials of Saginaw, Bay City and Midland, will operate the airport and will be responsible directly to the city councils.

Beavers Baffle Engineers

Ingham county, Michigan, road commission engineers, with the aid of a trapper, have solved a highway construction problem which has puzzled them for two years.

A family of beavers did it. Alameda township was the location of the knotty road building problem. The beavers had selected a timbered hideout along the poplar-lined branch of Mud creek. A troublesome sink hole developed at the point where the stream crosses a township road.

The problem was made more complex by the fact that the beavers had constructed a dam in the creek branch and kept the swamp thoroughly flooded. Engineers learned by tests that hard bottom was 60 feet from the surface of the old road.

Persisting in their efforts to build a firm road across the three-quarter-of-a-mile stretch of swamp, the county engineer obtained a permit from the state conservation department to trap the beavers. A trapper was employed and he caught three of the animals.

Magnesium for Duck Shot

Magnesium added to the lead used in duck shot may give wild ducks a chance for their lives if the hunter misses, the U. S. biological survey has announced. Paradoxically, the widespread use of this new type of ammunition would result in increasing the number of ducks.

Lead pellets of the kind now used get two chances at the ducks, survey scientists explain. The first is the hunter's honest chance to knock down a bird when he fires. The second puts no ducks in anybody's pot, but only kills the poor fowl by slow lead poisoning.

Shotgun pellets falling thick into hunted-over marshes where wild ducks feed are shoveled up as the ducks grub in the mud for food. They are retained in the gizzard like small pebbles, and slowly rubbed down so lead dissolves.

YOUTH GROUP PICK NEW OFFICERS FOR YEAR

The Hancock County Rural Youth Group recently elected new officers for the year 1943. They are: President, Lillian McDermott; vice-president, Claude Huling; secretary, Inez Eckels; treasurer, Walter Anderson and Grace Guernsey.

The group held a 15th anniversary party at the home of the group which they met. C. Clark of Iowa State assisted the officers in the 1943 program.

MUSIC NEWS
We are now having band on Tues-
days and Thursdays from 1:30 to
2:00 p. m. This way many will be
able to come to band who other-
wise could not come.
Anna Lee sang the alto in Sex-
tet the other day We hope she can
take the part
SENIOR CLASS NEWS
Anna Lee Bruner, Reporter
The American Literature class
has started a new section call The
Nation United So far we have
studied Bret Harte, Mark Twain,
and Joel Chandler Harris
The Physics class is still on the
chapter, "Heat." As it is a difficult
chapter we are taking our time on it
The Senior Home Economics
period has been taken up by study-
ing breakfast menus, which may be
served at this time They had a
test Thursday over calories and vit-
amins and how to wash dishes
The new Mathematics class is
starting out on simple problems,
and working into more difficult
ones The course will become more
and more difficult as it goes into
Algebra II
JUNIOR CLASS NEWS
Larry Van Syoc, Reporter
We began our study of American
Government. The first chapter ex-
plains to us why we pay taxes and
the benefits we receive from pay-
ing them
In English Literature we have
been studying "Puritanism and
Milton," and also Milton's two
great poems "L'Allegro and L'Pen-
sere."
Our Typing assignment for this
week was to write the alphabet and
a few sentences after each letter.
All this work is in our Typing
Handbook On Thursday we had
speed tests.
The Biology class has taken up
the study of plants, which is called
Botany We were all given folders
to put our work in.
Everyone in high school is urged
to contribute dimes to the March of
Dimes in its fight against infantile
paralysis
SOPHOMORE NEWS
Patricia Kudje, Reporter
We have not been using our Al-
gebra textbooks lately as we have
been using the regular books, but
now we are going back to the note-
books again They have harder
problems and are more complicated,
but we know how to do them
In Biology we filled in an outline
about leaves, as the plant's fact-
ory Each of us wrote twenty-five
true and false statements and had
the class work them It was really
quite a lot of fun.
Friday we had a review test in
English over verbals, infinitives,
participles and gerunds. We have
been studying them all week
In the chapter "The Awakening
of Western Europe," we learned
about the Renaissance, a period
when education and art took a
new hold in Europe We are now
studying important writers of this
time
Many of us are going to take the
First Aid Course that is to be given
in high school.
FRESHMAN NEWS
Elwyn Eichen, Reporter

have Geography We had History
the first semester
We have new seats this six
weeks Some like them, some do
not
In Art we are making color
wheels We are learning the Pri-
mary colors
THIRD AND FOURTH
GRADE NEWS
Evelyn Guelff, Teacher
We are learning to multiply in
the Third Grade We think it is a
lot of fun.
Iris celebrated her eighth birth-
day Saturday, January 16th She
brought treats for us
We are reading a new book "The
Good Master," by Kate Seredy
This semester we have a Spell-
ing Club in our room. Anyone who
misses more than three words in a
test is a member for a week The
Club meets every night after school
Those who received perfect
scores in Spelling this week are De-
lores T., Lucille, Billie, Iris, Max-
ine, Jimmy, La Nelle, Harley and
Darlene.
PRIMARY ROOM
Virgie Hardecopf, Teacher
The First and Second grade each
have new Reading Books. The
First Grade book is "Our New
Friends," and the Second Grade
are reading in the Elson Gray Bas-
ic Reader
LuVerne was eight years old on
Wednesday He treated us to suck-
ers Adeline's sixth birthday was
on Friday She also gave us treats
Billy, Neva Ann, and Larry all
received 100 per cent in Spelling
this week.
BROTHERHOOD SUPPER AND
MEETING POSTPONED
Because of the storm and cold
weather and blocked roads, the
Methodist Sub-District Brother-
hood supper and program sched-
uled for last Monday night has been
postponed until next Monday night
January 25th. Supper will be served
at 7:00 o'clock, followed by the
program.
All men interested are welcome
to attend.

War at Sight Is Not
Rule in World of Ants
War at sight is not the rule in the
ant world, but rather the exception,
despite widespread belief to the con-
trary, declares Dr. Laurence J. La-
fleur, according to Science Service.
When two stranger ants meet, in-
stead of instantly beginning battle,
they usually merely back off, turn
aside a little and go their respective
ways.
"Except when slave-making ants
make raids on their neighbors and
when spring competition for extra
land causes wars, the ants of the
North states are a peaceful lot,"
he states in a communication to the
American Naturalist.
Even the slave-making species
are not necessarily murderous in
their raids, Dr. Lafleur points out.
He cites the observation of the late
Prof. William Morton Wheeler of
Harvard university, who watched
such a raid in progress. Slave-
making ants in such raids are con-
cerned only with the pupae, or im-
mature infants, of the species they
kidnap and carry off to be their
servants. In the attack described
by Dr. Wheeler, the marauders,
much bigger and stronger than their
victims, nevertheless did not kill
them, but only carried the defend-
ers out of the nest and set them
down outside, uninjured.
Searchlights of Army
Always Ready in Field
Mobile 60-inch searchlights of 800-
000,000 candle power, developed by
the corps of engineers, U.S.A., and
operated by the coast artillery, play
a vital role in the nation's aircraft
defense, the war department points
out These searchlights are the re-
sult of experiments conducted by
the corps of engineers over a pe-
riod of about 20 years. The great
lamps and reflectors throw a beam
far up into the skies, and of such
brilliance that on a fairly clear
night, a newspaper can be read by
its light five miles away.
The searchlights are carried,
ready for instant use, on balloon-
tired trailers, capable of transport-
ing them over the roughest terrain
without damage, while gasoline mo-
tor-driven electrical generators ac-
company them on separate trailers.
The light is equipped with high in-
tensity carbons mechanically held
and adjusted as they burn. The
lights require five men each to
operate. They are also used for
general anti-aircraft defense.
Soldiers' Identification Tags
The two identification tags which
every American soldier carries to-
day contain more information than
those used in the World war, much
of it medical data which might save
the soldier's life in the event he
was wounded and unconscious, the
war department revealed today.
Instead of the aluminum disc of
the World war, which sometimes
deteriorated under the action of
chemicals and acids encountered on
the battlefield, the new tag is made
of stainless and rustproof monel
metal. It is two inches long, one
and one-eighth inches wide, and
0.025 inch thick, with rounded cor-
ners and smooth edges.
The tag carries, besides the sol-
dier's name and serial number—
the only data of the World war disc
—the name and address of the per-
son to be notified in case of an em-
ergency, his religion and medical data
concerning his record of tetanus im-
munization, the date on which it was
completed, and his blood-type.
Inland Cities Helping Navy
Sixteen western Pennsylvania cit-
ies are doing their share in helping
build a two-ocean navy. Enough
steel and iron scrap, in the form of
abandoned street car rails, to pro-
duce a dozen destroyers or two
cruisers is being dug out of streets
in the 16 cities for use by Pitts-
burgh district steel plants working
on defense orders.
The scrap is under salvage in con-
formity with a suggestion by the
Office of Production Management
that old rails be used to augment
dwindling supplies of scrap for the
mills. Rail removal projects now
under way or planned in the 16 cit-
ies will recover an estimated 8,800
tons of iron and steel scrap—enough
to produce 17,600 tons of open hearth
steel. Largest project will be under-
taken in Pittsburgh, where the
Pittsburgh Railway company has
arranged with the WPA to remove
1,800 tons of track.
Archeologist Completes Job
What archeologists might be do-
ing some day—if Hitler should be
allowed to win—in the ashes of War-
saw, Belgrade, Athens, London, per-
haps even Chicago, has just been
done by an archeologist in the ruins
of a 1,000-year old culture in Ecua-
dor which was shattered by the con-
quering Incas about A. D. 1450. The
Incas used methods which are al-
most identical with those Hitler em-
ployed today.
Donald Collier, a museum curator
of South American ethnology and
archeology, returned to his post after
five months of rummaging in the
ruins of a people known as the Can-
nari. They were conquered by the
Incas, who slew thousands of them,
looted the rest of their property,
and shifted the population from its
lands and over the mountains to Bo-
livia more than 1,000 miles to the
south. The Incas then moved their
own people to the evacuated coun-
try.

Farm Machinery
Preparedness Tips

A BLUE TAG FOR EVERY FARM
MACHINE
Timely Information Prepared By
Iowa State College Specialist
WINTER TRACTOR STORAGE
If the tractor is to be idle dur-
ing the winter it should be under
some form of shelter. When
the machine is in out of the
weather, it is possible to do re-
pair work and overhaul work
when time is plentiful The ap-
pearance of the tractor is better
when it is housed and the ul-
timate trade-in value will also be
greater Rusting and corrosion
of many parts are prevented
The rubber-tired tractor must
be jacked up on blocks so that it
will not stand on the tires and so
that no damage will result if the
tires should happen to lose air
All transmission grease should
be carefully cleaned off If the
tires are filled with water it will
cause no harm to let the water
freeze so long as the tractor is
not run with ice in them A care-
ful cleaning of tires is recom-
mended, and if they are exposed
to sunlight, either indoors or out,
it's well to throw a canvas or
other cover over them
If the oil in the crankcase is
clean and fresh, there will be no
damage by leaving it in the ma-
chine. Frequently there is likely
to be a small amount of water in
used oil. It is best to drain out
all of the oil and refill with new
The engine should be started and
run for a few minutes or until
the fresh oil has circulated thru
the engine, coating the inside
parts thoroughly.
The exhaust pipe should be
covered to prevent moisture en-
tering and rusting valves and
valve seats. A tin can makes a
good cover It should fit down
tightly and wired in place The
oil should be washed out of the
oil cleaner
Gasoline should be drained
from the fuel tank, sediment
bowl, fuel lines and carburetor
to reduce the fire hazard Gaso-
line used as fuel has brought the
problem of gum formation when
the engine is allowed to stand
for long periods of time Remove
the spark plugs and pour in 2 or
3 tablespoonfuls of lubricating
oil to coat the cylinder wall
with oil. Turn the engine over
two or three times by hand to
distribute the oil on the cylinder
walls.
Cooling system should also be
drained, whether stored inside
or outside.

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to perform a marvelous job. Their task is to keep flowing blood stream free of an excess of waste. The act of living itself is constantly producing waste matter. If good health is to be maintained, there is a constant warfare that must be waged against these waste products. One may suffer from nagging back persistent headache, attacks of dizziness, getting up nights, swelling, pain under the eyes--feel tired, nervous, worn out. Frequent, scanty or burning urination are sometimes further evidence of kidney or bladder disturbances. The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisonous body waste. Use Doan's Pills. They have had a record of forty years of public approval and have been sold in every country over the world. Doan's. Sold at all drug stores.

DOAN'S PILL

West Point at War

By Maj. Gen. Francis B. Wilby
(Superintendent of West Point Academy)

Being a newspaper columnist and reporter, I am a new experience for me. However, I feel that I can give you a "Reporter's Report to the Nation" from West Point, which should be of interest to every red-blooded American.

I wish that everyone could visit West Point for just one day, and see what I see. You would get an inspiration that you cannot help but feel when you see the men of the Corps and what they are doing. They are not only fitting themselves for winning this war, but also for winning the peace, and preventing, if possible, the recurrence of such another world conflagration as we are passing through today.

As you know, a cross-section of American youth is selected from all parts of the country to come to West Point. They are selected by the most democratic of methods, many of them by winning competitive examinations.

Starting with these young men, we aim to develop a rigorously trained soldier-officer, a job which is greatly facilitated by the fact that the Cadets themselves sincerely desire to make the most of the opportunity they have here. With the rapidly changing weapons and new methods developed in modern warfare, we are constantly working to keep up to date and give the latest, most accurate information and training to the Cadets.

WALTER WINCHELL is on a tour of duty outside Continental U. S. During his absence, contributors will substitute.

The Cadets learned and were doing everything a thoroughly trained enlisted man ought to be able to do, and before the Summer was over, they looked like veterans.

Summer maneuvers don't end the story of tough training at West Point. Summer maneuvers are just a phase of the year-round program which is built to train fighting leaders.

Every minute of the 16-hour day (6 a. m. to 10 p. m.) is filled by a tight schedule of instruction, study, and athletics plus tactical training in the arms and branches of the Service. The program is designed to turn out officers schooled in all types of army operation, and each Cadet is familiarized with the use of every weapon from the pistol to the airplane.

So one can see the West Pointer is TOUGH—physically and mentally. He has to be.

At the close of the Summer, the Cadets come back into the classrooms for what we call academics. During the Winter months emphasis is placed upon academic instruction while the schedule in tactical training is somewhat reduced.

A reporter probably would say that we have a highly mathematical and stiff engineering course. Perhaps that is right, but the West Point curriculum aims at teaching a man to think, to reason, and to draw sound conclusions expressed clearly and concisely. Mathematics and the sciences provide this training of the mind which we believe is so essential in order to produce the finest military leaders.

I am happy to announce that this week the West Point instruction is being given a first-hand inspection by some of the leading educators in our country. I have invited Doctor Compton, President of the Massachusetts Institute of Technology, and Doctor Hopkins, President of Dartmouth, along with the principal military experts on training in our Army today, Major General Bull of the Replacement Training Center of the Ground Forces, Brigadier Huebner of the Training Division of the Services of Supply, Brigadier General Edwards of the Training Division of the War Department General Staff, and Colonel Schlatter of the Flying Training Command of the Army Air Forces, to meet, confer and review our plans for the new 3-year course at the Military Academy. With this course we propose to produce a graduate of West Point who will have the finest education and training it is possible to afford in the time available. By constantly keeping abreast of the latest developments, we aim to do the job which America and Americans have asked us to do. In the days of Robert E. Lee and U. S. Grant, West Point produced men to meet the challenge of that era. John J. Pershing fulfilled his task in the days of the Kaiser.

During the past Summer over 2,000 West Pointers went through the most rigorous field maneuvers that have been held in the history of the Academy. Every phase of combat training was given the Cadets. They worked, they sweated, they maneuvered over the hills and through the rivers of northwest New York State, as well as here at West Point. They had a good taste of how modern campaigns are fought.

During these maneuvers some of the toughest combat problems were carried out by the Cadets.

THE RICKENBACKER SAGA

It's the second day out now . . . Lost in a hellish sun in the tropic seas . . . No drinking water and no food beyond four . . . Oranges cut into bits, and now nearly gone . . . Eight Americans adrift in rubber boats, . . . Eight Americans on a mission for you and me . . . Now face to face with agonizing torture and death!

("Say what's all this stuff about ration cards? Who's giving all these orders about gas, anyhow? I'm sick of being ordered around like this, I tell ya . . . They can't make me turn in my extra tires!")

The boy, John Barker, fumbles now and pulls out an issue Bible . . . A murmur runs through the rubber boats . . .

They organize dawn and evening prayer meetings, . . . And Rick reads from the Good Book: "Our Father, who art in Heaven. Hallowed be Thy name . . . Give us this day our daily bread . . ."

"Dear Christ, hear our prayers . . . Grant us deliverance!"

("Well, what's new? More cuts in gas and oil, eh? Gotta turn in my spares? The hell I will!")

Hear about the latest down at the shop? They're talking of fifty hours . . .

Yeah? We'll tie up the whole shebang first.")

"Grant, oh Lord, that we may not die like this? . . ."

"Rick, are our minds cracking? Are we seeing things?"

"No, boys . . . I've touched it . . . I've got it by a wing!"

They kill the seagull as mercifully as possible and bait their hooks. A six-inch mackerel and one bass are caught . . .

Thanking God, they tear them to bits and devour them.

("I tell ya, we're working too many hours! . . . There's a limit to what a man can stand! . . ."

Rub it in any more and we strike, that's what.

Nobody can do this to us and get away with it.")

It's the eleventh day now in those three rubber boats . . .

Alex, the boy, is about done for. The salt spray breaking

Over his fevered body in the night is like ice . . .

Rick takes him in his arms and cuddles him like a child . . .

On the thirteenth day the lad wants to get into the little boat . . .

They switch him, but at three in the morning there is the final gasp.

On the fourteenth day they lower his body into the sea.

"Into Thy arms we commend his spirit . . ."

"We bring nothing into this world, we can take nothing out!"

("Say, didja read what we're supposed to do about meat? . . . Gotta cut out having steaks often. What next?")

"Washington's gone nuts, that's all . . ."

The people are getting mighty sick of sacrifices.")

Seventeenth day . . . "God, grant us deliverance . . ."

If only somebody could sight us . . . Look! Boys! There's one off to port . . . five miles off . . .

Coming this way! . . . Hooray! . . . Yell! Wave your hands! . . .

She's veering off . . . She's going on!"

("Take these fuel oil regulations. They're outrageous! Imagine trying to tell me how warm I can be!")

Eighteenth day . . . Two planes are sighted . . . But again

They disappear into the blue distances . . . Well, it's

Too late now . . . Death can't be far off.

Nineteenth day . . . "Grant us Thy spiritual presence, Lord,

That we may meet our end as You would have us . . .

Forgive us our sins . . . Comfort our loved ones . . .

Look! . . . Two planes! . . . Three! . . . Four! Are we stark mad?

They, too, go on!

Twenty-first day—Another plane . . . It sights us—

It's coming for us now.

We're saved! . . . saved! Glory be to God!"

William O'Neil, head of the General Tire & Rubber Company, has bought the Yankee Network, a radio network serving all New England.

He says he does so to provide for "the great expansion in the rubber industry after the war." Are we going to tune in and get a tire for our car?

Or has Mr. O'Neil devised a plan for making it possible for us to get our rubbers repaired by television?

—Buy War Bonds—

WHO'S NEWS This Week

By Lemuel F. Parton

Consolidated Features.—WNU Release.

NEW YORK.—Scouting optimists in the news around the New Year, one finds Dr. Thomas Midgley Jr. becoming president of the American Chemical society, after years of hopeful prophecy and

Holds Science Will Clear the Way for Peace, Abundance

dotted-line achievement. Among his prophecies have been his forecast of about three quadrillion dollars' worth of gold to be taken from sea water, inter-planetary travel, age control and the end of indigestion by the use of hormones. His achievements, which are many, include his discovery of tetraethyl lead as a gasoline anti-knock compound, his development of non-toxic and non-inflammable refrigerants and his many contributions to basic research in synthetic rubber processes.

As to the mundane outlook in general, Dr. Midgley takes the cheerful view that the potential creativeness and productiveness of science, with its command of new energies and processes, will clear the way for peace and abundance in spite of our collective stupidities and villainies. These alluring, if remote, horizons, Dr. Midgley sees from his wheel chair in Worthington, Ohio, having been stricken with infantile paralysis in 1940. Thus afflicted, he has continued his research, with no slackening of either work or fervor, and a possibly heightened belief in some kind of happy ending, or rather fulfillment for the comedic humane. His story would be a case in point for Thomas Mann, who says the calmest faith and truest personal integrity is attained through suffering.

In Cornell university, where he was graduated in 1911, it was said that young Midgley would coast along through routine work, but was always busy on something out of the groove—some idea of his own. This inclined him quickly to research and before he had been out of college a year he was threading the subatomic maze of synthetic rubber. It was in the years from 1922 to 1926 that he brought through his knockless gasoline, which bloomed into the impressive ethyl gasoline industry, with headquarters at Detroit, of which industry he is vice president. In his wheel chair, he is a big business executive, with special telephone rigs to make his inter-office communication around the country easy and casual—like everything else about him.

Speaking of attainment through frustration, he worked with tellurium when he was bringing through his non-toxic refrigerants and that permeated his genial person with a powerful odor of garlic. He took scientific measures—something like protective coloring. When he traveled, he found in the smoking car the closest possible concentration of bad cigars. The fragrance of garlic was just a harmless added starter here, and nobody noticed him. He is resourceful, diligent, optimistic.

PERSONS who have been a bit jittery about the government telling us where to work and what to do may be assured by the public record

He'll Square Our War Manpower With Blackstone and attitudes of Grenville Clark, the New York lawyer who

drafts the quite unprecedented and drastic manpower bill for Paul McNutt. A staunch advocate of compulsory military service, and of any and all methods necessary for national survival, Mr. Clark has been at the same time an alert and outspoken defender of civil liberties. He is a pioneer of the Plattsburg system and chairman of the National Emergency Committee of the Military Training Camps, and an active advocate of a big and strong army, but he is a wary opponent of anything suggesting a military caste. In May, 1931, he said: "My experience in the war department has led me to distrust the participation of army or navy experts in affairs of national policy."

Similarly, he has opposed any encroachment on Constitutional safeguards by bureaucrats, or excessive centralization of government which might endanger individual liberties. He may be cited as a conspicuous holdout against both the weakness of a peace-loving democracy and the aggression of militarists and war-planners who might save the country but leave it no longer a democracy.

He thinks we can keep both the Bill of Rights and a strong wallop. That seems to be the nub of the argument, as military urgency closes in on manpower—our most free and footloose zone of casual and migratory tradition. Maybe we never wanted to move to Perth Amboy, but it's tough if anybody says we can't. Mr. Clark knows all about that. He drafted the original selective service act, and kept it legally in bounds. Mr. Clark was born in New York in 1882, was graduated from Harvard in 1903 and practiced law in New York.

PATTERNS SEWING CIRCLE

Young Charmer.
YOU are proud of your figure? Of course! Then show it off with this smoothest, slickest of princess frocks which fits like a sheath and discloses every curve! Gay and young, this is a style for soft, downy velvet, for a crisp faille or for one of the knock-out rayon crepes.

Pattern No. 8256 is for sizes 12, 14, 16, 18 and 20. Size 14, with short sleeves, 3½ yards 39-inch material; ¼ yard to trim.

Two-Piece Suit.

DRESS up for winter in this smooth, smart, two piece dress. Change its appearance whenever you wish by wearing dif-

ferent sets of accessories with it. The soft rolling collar forms an attractive background for pins, clips—flowers, scarfs or contrasting collars.

Pattern No. 8283 is in sizes 12, 14, 16, 18, 20; 40 and 42. Size 14, with short sleeves, requires 4 yards 39-inch material. Send your order to:

Those Khaki Uniforms

British soldiers in India during their war with the Sikhs, 1848-49, felt too conspicuous in their white campaign uniforms. By dipping them in muddy water they changed them from white to—the Sikhs had a word for it—khaki. The United States quartermaster general, now buying scores of millions of yards of khaki cloth for uniforms, specifies a khaki dye that results from blending many dye shades.

ASK ME ANOTHER?

A General Quiz

The Questions

1. How many countries have a larger population than the United States?
2. Why does an owl stare?
3. What gives the color to the so-called "red" snow?
4. What is the average life of a dollar bill?
5. What is the oldest living thing in Florida?

The Answers

1. Three (China, India and Soviet Russia).
2. Because its eyes are immovable in their sockets.
3. Microscopic plants.
4. The average dollar bill is in circulation but nine months.
5. "The Senator," a cypress tree near Orlando, 3,500 years old.

★ IN THE ARMY ★ they say:

"YARD BIRD" for a recruit who is slow to learn
"BLITZING BRASS" for polishing buttons
"COW TRACKS" for non-commissioned officer's chevrons
"CAMEL" for the Army man's favorite cigarette

FIRST IN THE SERVICE

With men in the Army, Navy, Marines, and Coast Guard, the favorite cigarette is Camel. (Based on actual sales records in Post Exchanges and Canteens.)

CAMEL
COSTLIER TOBACCOS

THE PACK FOR ME IS CAMEL. I FIND THEY'RE Milder BY FAR—AND THAT FULL FLAVOR IS GREAT!

Feast on Peacock
The peacock was the official Christmas bird in early England, and was not replaced until the 16th century, when the turkey came into favor.

Druggists recommend PAZO for PILES

Relieves pain and soreness
For relief from the torture of simple piles, PAZO ointment has been famous for more than thirty years. Here's why. First, PAZO ointment soothes inflamed areas, relieves pain and itching. Second, PAZO ointment lubricates hardened, dried parts—helps prevent cracking and soreness. Third, PAZO ointment tends to reduce swelling and check bleeding. Fourth, it's easy to use. PAZO ointment's perforated Pile Pipe makes application simple, thorough. Your doctor can tell you about PAZO ointment.

Get PAZO Today! At Drug Stores!

China's Fireworks
Fireworks were first used in China, 5,000 years ago. To this day China marks beginning of a year with fireworks.

SNAPPY FACTS ABOUT RUBBER

In Calcutta wealthy natives with cars invariably paint their tires red because of the superstition that this will obviate motor trouble.

The rubber tapper, or seringueiro, in Brazil lives partly off the forest he ranges in search of wild rubber. A shotgun and machete are his traditional equipment.

Superstitious negroes of Georgia believe that the best cure for rheumatism is to sleep with an old tire around the waist.

When dual tires are mis-mated, the larger tire carries most of the load, wears off its tread abnormally and fails early due to the generation of excess heat in its cord carcass.

It is estimated that the average tire loses 12 per cent of its weight in use and yields about ½ of its original weight in reclaimed rubber.

FORMER KLEMME TEACHER EMPLOYED IN L. A. BANK

The Times is in receipt of a letter from Miss Irma Merritt, former Klemme teacher, who is now employed in the installment credit loan department of the main office of the Bank of America, at Los Angeles, California.

Miss Merritt describes conditions on the West Coast as follows: "Food is really scarce. We can get a quarter of a pound of butter one day a week, that is if we can get to the store before everyone else has. Bacon is something that we dream about. I really don't know what we are going to do. The grocery stores have very few cans of vegetables and since the Japs have been evacuated, fresh vegetables are sky high. Most of the small restaurants have had to close their doors."

NORTH IOWA HIT BY COLD WAVE AND BLIZZARD

Strong winds and snow Saturday afternoon and evening reached the blizzard stage Sunday morning and many roads were blocked. The thermometers dipped down to 22 degrees below zero Sunday morning and rose only five or six degrees during the day, with continued strong winds.

Monday the temperature hovered around 10 degrees below zero all day. With most roads blocked rural and town schools were closed for the day.

Tuesday the temperature was again down to 20 degrees below the zero mark, but the wind had died down and the sun came out. Many roads were again blocked during the night and schools were again closed for the day.

Schools were again opened this Wednesday morning, and all roads had again been cleared of snow.

A Quick Change In Iowa Temperature

Ralph Elder reminded the Times last Thursday of the sudden rise in temperature, within twenty-four hours. Mr. Elder observed that on Wednesday morning it was 14 degrees below zero, and on Thursday morning at the same time the thermometer registered 36 degrees above or a rise in temperature of 50 degrees.

California may have its weather, but Iowa has a variety!

You can get V Mail Letters to send over seas at The Times Office. Package of 10 for a dime.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Postmaster John Day was a dinner guest at the R. A. Jorgenson home last Thursday noon.

Mrs. Julius Meyer of Hayfield came Thursday to visit over the week end at the Emil Patet home.

Wallace Pavey and Jack Etchen came Monday night from the Ankeny ordinance plant to spend a couple of days with home folks.

Mrs. Ernest Lewis was at Grundy Center from Friday until Sunday, visiting with her mother, Mrs. Franz.

Mr. and Mrs. W. J. Anderson's children, Allen and Alice Mac were both ill the past week and unable to attend school.

Rev. H. E. Harvey attend a two-day meeting of Methodist ministers at Algona last Thursday and Friday.

Henry Ludeke, of near Meservey was transacting business here last Thursday afternoon and visiting with old Klemme friends.

Cpl. Asa E. Gibbs began his return trip back to Alaska after visiting with his parents, Mr. and Mrs. Harry Gibbs and family since the first of the year.

We are glad to report that Billy Bock, a patient at the Veterans Hospital at Des Moines, is getting along fine. Billy would appreciate hearing from his friends.

Mrs. W. F. Pavey, Mrs. John Clements and Mrs. Wayne Pavey and daughter, Carol were visiting at the Carl Smith home at Forest City, Thursday afternoon.

Mr. and Mrs. P. M. Wilson were at Clarion Thursday where they went to attend the funeral of Mrs. Eva Williams, step-mother of Mrs. Wilson.

Miss Virgie Hardcopf and Pvt. Bernard Onerheim were dinner guests at the home of Mr. and Mrs. Wesley Patterson Tuesday evening.

The members of the Methodist Choir will hold their rehearsal at the J. I. Overholt home Thursday evening of this week at 7:30 o'clock. A social hour will be held after rehearsal.

Baby Ferrel Paige Patterson made her first "social call" Sunday evening when her parents, Mr. and Mrs. Wesley Patterson left her at the R. A. Jorgenson home while they attended the movies.

Joint Installation of officers of the Masonic Lodge and Eastern Star Chapter will be held at Garner this Wednesday evening. Mr. J. I. Overholt of Klemme is the retiring Master.

Mrs. R. W. Elder and Mrs. Ben Katter were called to Minnesota last Wednesday by the death of their niece, Mrs. John Fuller. Mrs. Fuller leaves her husband and a family of three small children.

We are glad to report that Supervisor John Chambers is recovering from his recent illness and was brought home from the Belmont hospital. Mr. Chambers was ill with flu and pneumonia.

Pvt. Bernard Onerheim of Camp Butler, North Carolina, was a guest at the Arthur Kudje home Tuesday for dinner. Pvt. Onerheim is with the band at Camp Butler. He was director of music in the Klemme Schools before entering the service.

Mr. and Mrs. Frank Sandry have purchased the late Mrs. Henry Stromer's residence on East Main street and will move to Klemme in the near future. Mr. and Mrs. John Micklick and son, Bobbie, are residing there at this time.

Mrs. Byrnes E. Missman of Atlantic, Iowa, spent several days of the past week visiting at the home of Dr. and Mrs. W. F. Missman. Dr. and Mrs. Byrnes Missman have resided in California since their marriage. Dr. Missman holds the rank of Lieutenant in the U. S. Navy and is a dentist in the medical corps.

Henry Whetsler, of Clinton, Ill., brother of Mrs. Walter Kimball, came to assist Mr. Kimball at the Leather Store during the annual rush of repairing and oiling harness. Mr. Whetsler assisted at the shop last winter and spring also.

Mr. and Mrs. W. J. Barz of Garner entertained the following to dinner at their home Sunday: Mr. and Mrs. Fred Barz; Mr. and Mrs. Edmund Josten; Mrs. Esther Barz and sons, Milvern and Edward; Mrs. Clara Barz, Allen and Avis; and Mrs. Lena Schroeder.

Mrs. Naska Bock returned last Thursday morning from a week's visit with her son-in-law and family, Mr. and Mrs. Lyle Burr and children at Mitchellville. Mr. Burr is engaged in the furniture and undertaking business at Mitchellville. Mrs. Bock made the trip by bus.

A. G. Koerner recently purchased a registered Guernsey bull from Emery W. Schaefer of Liberty township, to add to his local dairy herd. "Daisy's Champion Boy, 324, 787" is the name under which this animal is registered with the American Guernsey Cattle Club.

Our friends, Bill Stille, and Mrs. J. N. Day are missing some good old Iowa winter weather. Both are in California where they can pick flowers in the sunshine. A letter from Mrs. Day said Dorance was mowing the lawn. This writer had just finished shoveling snow off of the side walk. Some difference!

Mrs. Ben Katter and Mr. and Mrs. Duane Katter returned Friday from Minnesota where they had been called by the death of Mrs. John Fuller. Mr. Fuller is in the army and the funeral would be held on his arrival home. Mrs. R. W. Elder, who accompanied the Katters, remained in Minnesota.

Don't miss "Shadow of Doubt," the fourth in a series of "Song Hits To Be For '43" selected by the country's leading bandmasters. You will find the words and music of this newest song hit in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Mr. and Mrs. Floyd Burnham of Jasper, Minnesota, visited at the Rev. Calvin Grosshuesch home last week from Wednesday until Sunday. They are moving to Pekin, Illinois where Mr. Burnham will be employed in a war work plant. Mrs. Burnham is a sister of Mrs. Grosshuesch and was Miss Adella Kuhlman before her marriage.

WAR CROP LOANS AVAILABLE TO FARMERS SAYS PETIT

Arthur J. Petit, field supervisor for the Emergency Crop and Feed Loan office announced today that "Food For Freedom" loans are now available.

The loans furnish credit to farmers to pay expenses and purchase supplies needed to plant, produce, and harvest special war goal crops, victory home gardens, regular cash crops, feed and soil conservation crops and purchase or produce feed to increase the production of vitally needed dairy products, beef and pork.

The loans can be used to purchase seed, feed, tractor fuel, and oil, machinery repairs, fertilizer and other supplies.

To obtain information on where to make application, farmers should get in touch with the County AAA Committee, County Agent or the Township Committeeman, or write Arthur J. Petit, Field Supervisor, Emergency Crop Loan Office, 323 Old Federal Building, Des Moines.

ARMY PROVIDES EACH MAN IN COMBAT WITH NEW DRUG

Every American soldier who goes into a theater of operations is equipped with a package of sulfanilamide tablets that may some time spell the difference between life and death.

Twelve sulfanilamide tablets in a special spill-proof metal box, constituting an initial dose of the most effective chemical agent to prevent infection known to modern medical science, are a standard addition to the first aid equipment of all troops going into a combat area.

HAVE YOU PURCHASED ONE OF THE NEW OAT VARIETIES?

Have you taken steps to prevent the ruin of your 1943 oat crop from oat rust? If not, do it now by buying one of the rust resistant varieties. The varieties that are recommended by Iowa State College at Ames are: Tama, Boone, Control and Marion. These varieties have proven their superiority in good oat years as well as in years when the oldest oat varieties were ruined by rust. In planting one of these proven varieties of oats you are insuring yourself against a poor crop, such as was prominent in the year 1941.

Your County Extension Director will be glad to discuss these oats with you, if you will call at the Farm Bureau Office.

BRYSON DISCUSSES FARMING PROBLEMS WITH THE YOUNG MARRIEDS

Harry Bryson, organization director of the Iowa Farm Bureau Federation, discussed "Farming Problems of 1943, and What To Do About Them" with twenty-seven Hancock County Young Marrieds who attended the meeting Wednesday evening at the I. O. O. F. Hall in Britt. Mr. Bryson pointed out many of the sacrifices we may be asked to undergo, the tremendous amount of production that we must meet, and he suggested many short cuts that might be followed.

The group is planning to hold their next meeting February 11. The committees in charge will be: dinner, Mrs. Emory Weaver, Mrs. Ed. Thiemann and Mrs. Roger Schlawn; entertainment, Jack Osterclawp, Imko Huisinga, and Erwin Hall.

INJURED

Albert Budding, a worker in a mine near Pella, was injured when the mule he was driving in the mine ran away. Budding's leg was broken as he was riding in a coal car, and it was caught between the car and the shaft wall.

What About The Old Folks?

When they're not so active anymore and spells of constipation annoy them with dizziness, heartburn, headaches, or torturing gas pains, get ADLERKA. We have many letters from thankful users who are far past middle-age. Your druggist has ADLERKA.

WILSON'S PHARMACY

GEORGE WILSON SWORN INTO SENATE

Senator George A. Wilson (Iowa) was sworn into office Thursday by Vice President A. Wallace to complete the term of the late Senator Clyde M. Wells (D., Iowa) who was unable to take the oath earlier because of his connection with completing his expiring term as governor.

County Basketball Tournament At Britt Friday And Saturday

SHAMROCKS WILL PLAY HAYFIELD IN FIRST ROUND OF COUNTY TOURNAMENT

All Schools In County Represented At The Tournament

At a meeting of the Hancock County Schoolmasters Club held at Britt last Tuesday night, pairings were made for the annual basketball tournament to be played at Britt on January 29 and 30. This year's tournament will be under the management of L. J. Thies, Britt superintendent.

In the first round to be played on Friday, Jan. 29, Britt will meet Goodell, Crystal Lake will meet Kanawha, Hayfield will play the Klemme Shamrocks, champions of last year's tournament, while Garner will play the winner of the Woden-Corwith game, which will be played before the opening of the regular tournament play.

Games Friday will be played at 2:00 and 3:15 p. m. and 7:30 and 8:45 p. m.

Second round games will get under way Saturday at 2:00 and 3:15 p. m. with the consolation game at 7:30 p. m. and the final championship game to be played at 8:45 p. m.

HANCOCK COUNTY HEMP QUOTA OVER THE TOP

Plan To Erect \$325,000 Processing Plant At Britt

Hancock County AAA officials announced Friday that the hemp quota in the county had gone over the top with over 4,000 acres being contracted. This assures the erection of a hemp plant on a site yet to be chosen near Britt, costing approximately \$325,000. Work is expected to get under way on the project as soon as a Commodity Credit officials purchase the necessary site which it is expected will be done in the very near future.

4,200 Acres New Signed
The goal set for the county was 4,000 acres; then word was received from the State AAA that contracts for 4,200 acres of hemp could be signed, but that the mill would not be able to handle any more than that.

By Saturday the 4,200 acreage goal had been met. Below are the acreages signed for in each township:

Britt 858 2; Erin 749; Orthel 581; Amsterdam 442 3; Bingham 374; Ell 118 5; Crystal 325; Boone 281; Major 222; Twin Lake 91; Madison 66; Garfield 47; Liberty 35; Concord 10.

FIRST AID CLASSES AGAIN BEING TAUGHT HERE

More Red Cross First Aid classes will again be in full swing here this week when the second Standard Course for adults will start on Wednesday night.

The Standard Course is open for who have a Standard certificate, is scheduled for each Thursday night, beginning this week.

The Advanced Course is open for any adult. The class begins at 8:00 o'clock at the school house.

With the beginning of the second semester of school, high school students were given the opportunity to enroll in a Junior Red Cross First Aid Course, conducted by Rev. Calvin Grosshuesch.

Klemme has three authorized instructors for First Aid: Rev. Calvin Grosshuesch, C. G. Waterman, and Wayne Pavey.

Our Men In The Service

MORE HANCOCK COUNTY MEN CALLED INTO SERVICE

The following men reported back to Camp Dodge, January 25th, following a 7 day furlough after their final examination at Camp Dodge:

Henry M. Haxton, Glenn E. Mehl, Leland D. Swan, Russell C. Bailey, Lowell R. Baker, Herbert C. Coepel, Peter S. Lowman, Wayne F. Ohnatus, Gordon O. Swan, all of Britt.

Lloyd P. Cunningham and Carl E. Pitkin, Forest City
Earnest M. Elason and Robert M. Johnson, Kanawha
John T. Enes, and Joe M. Zostlik, Garner.

Earl H. Johnson, Corwith, Heron H. Lauch Meservy, Fred Smith, Woden and Jimmie P. Smith of Wesley.

George Menke, Garner, and Henry P. Plemel, Britt, will report at Camp Dodge, January 27th.

Jacob J. Weiss, Britt, will report back to Camp Dodge, January 28. Hereafter the Board will be in session Monday afternoons instead of Thursday evenings, effective on February 1.

REPORT ON COLLECTION OF CHRISTMAS SEAL SALE

At a dinner and meeting held at Garner Saturday a report was given on the recent Christmas Seals Sale and the following sums were reported by the various townships:

Avery, Mrs. Ostendorf	\$43 58
Amsterdam, Mrs. Schroeder	53 55
Engman, Mrs. Huisenga	37 62
Boone, Mrs. Rutmeyer	35 46
Britt, Mrs. Fry Baker	23 80
Concord, Mrs. Peter Engstler	38 23
Crystal, Mrs. Griggs	34 10
Ell, Mrs. E. J. Schneider	52 10
Ellington, Mrs. Walter Kester	45 04
Erin, Mrs. F. Friedew	31 90
Garfield, Mrs. Henselman	54 66
Liberty, Mr. John Goll	56 45

Major, Mrs. Erdman	55 50
Orthel, Mrs. Fox	42 91
Twin Lake, Mrs. Chambers	50 95

Towns In County

Garner, Mrs. Williams	\$147 65
Britt	97 62
Klemme, Mrs. Bredbenner	44 75
Corwith, Mrs. Woodbury	61 54
Kanawha, Mrs. Waner	87 30
Goodell, Mrs. Graber	20 16
Crystal Lake, Mrs. Rose	18 42
Woden, Mrs. Helm	35 40

The total collected was \$1,217 23, less \$30 18 for postage, leaving a balance of \$1,187 05.

The quota for Hancock County for 1942 was \$1,193 91.

The best increases over last year were in Garfield township which had an increase of \$26 91, and in the town of Woden which had an increase of \$18 60 over last year.

LOCAL POST OFFICE HAD BIG INCREASE IN BUSINESS

Postmaster John N. Day reports that for the month of December he sold 78 War Bonds with a cash value of \$3,187.50.

Sale of stamps for the last quarter of 1942 totaled \$1,412.56, which was an increase of \$248.91 over the same period in 1941.

NEW HOURS FOR RATIONING OFFICE AT GARNER

The Rationing Office at Garner, located in the courthouse, will be closed to the public every morning, except Saturday. The office will be open all day Saturday and will be closed all day Monday.

LEONARD LAU IS INSTRUCTOR IN VANCOUVER STATE DEAF SCHOOL

Leonard Lau, former Klemme man employed at the Northern Lbr Co. as shopman and cabinet maker, is now an instructor in the wood-working department of the State School for Deaf at Vancouver, Washington.

Beides instructing Mr. Lau is also Counselor of Older Boys and in addition is Coach of the Girls Basketball team.

Leonard enclosed a check to renew his subscription to The Times.

FRED J. ARNOLD PURCHASES ROSENDAHL GARAGE

Last week Fred J. Arnold purchased the garage building and a plot of ground from Walter Rosendahl. The property is across the street northeast of the Telephone Office.

Mr. Arnold expects soon to move his equipment from the Eichen garage and shop to his new location.

AUXILIARY UNIT WILL MEET TUESDAY EVE., FEB. 2

The Auxiliary will hold their next meeting at the hall on Tuesday evening, February 2nd. Ladies are asked to bring rags to sew.

The bachelor men will serve the lunch.

TRIPLE A REPORT

Hancock County AAA officials reported this week that Hancock County farmers had received a total of \$453,001.99 in compliance payments to date. Recent payments received total \$249,148.63.

Liberty Township Couple Married Quarter Century

V. A. COOK TELLS AIMS OF FARM BUREAU IN WINNING THE WAR

The 1943 War-time Farm Bureau program can be summarized in six points, according to V. A. Cook, Klemme, President of the Hancock County Farm Bureau.

The first point, he said, is to win the war in spite of all hazards.

To meet the 1943 food production goals, it is essential that farmers have an adequate supply of equipment and farm labor. The Farm Bureau will work constantly in an effort to protect the farmer's ability to produce in 1943 as well as he did in 1942, Cook said.

The fundamental processes of a democratic form of government must not be discarded. It is the interest of every farmer and every businessman and every professional worker in Hancock County to see to it that the Hancock County Farm Bureau and the Iowa Farm Bureau are so directed as to protect the fundamental principles of our democratic form of government, Cook said.

The Farm Bureau in 1943 will continue to support a program of balance between industry, labor and agriculture. Mr. Cook pointed out that the Farm Bureau has insistently and consistently supported heavy taxes, urged control of labor as well as industry and agriculture to avoid inflation.

A lasting peace for the protection of our children must include economic stability and justice in international relations, Mr. Cook said.

HELLO, FOLKS!

A daughter weighing six pounds 10 1/2 ounces was born to Mr. and Mrs. Walter Bachman, Klemme, at the Mercy hospital in Mason City on Thursday, January 21, 1943.

MORE FATS ARE NEEDED FOR PRODUCTION OF WAR MATERIALS

A reminder for Hancock County women to turn in their waste kitchen fats was issued this week by Miss Dorothy Simmens, extension home management specialist at the Iowa State College. This county's contributions are needed to help meet the nation-wide goal of 16 1/2 million pounds of kitchen waste fats per month. Although the results of the nationwide fat collections have been encouraging, civilians are falling far short of the goal.

All kinds of waste fats are useable. Pan drippings from roasts, broiler drippings from steaks and chops, and fats used in frying, all should be turned in. Two pounds of waste fat supply enough glycerine to fire five anti-tank gun shells.

No special processing of kitchen fats is required before they are turned in. They should be carefully strained through a fine mesh strainer to remove all foreign matter, unmelted particles, seasonings and bits of meat spoil the fat for use.

The fats should be stored in a wide-lipped container, such as a coffee, sirup or shortening can. Glass is not recommended since it breaks easily in handling and rendering. The container should be covered with a lid or waxed paper and kept in a cool, dark place until one pound or more has been saved. Then it is advisable to turn it in to the local meat dealer immediately so the fat will not become rancid.

Twenty-one counties the past season have cooperated in the clean up work of disease eradication in bee colonies.

MR. AND MRS. EMIL BLUMER MARRIED 25 YEARS

Surprise Held For Them At Liberty Church Sunday

A large number of relative and friends gathered in the dining room of the Liberty Methodist Church Sunday noon at a surprise dinner in honor of Mr. and Mrs. Emil Blumer's twenty-fifth or Silver Wedding Anniversary.

While Mr. and Mrs. Blumer were attending church the tables were set and decorated. A large decorated wedding cake served as the centerpiece.

Rev. H. E. Harvey acted as master of ceremonies. Those who appeared on the program included Darlene Schulz who sang and played several numbers; a duet by Lois Riemer and Hilda Abele and a solo by Rev. Harvey. Mr. Blumer was called upon and told of the wedding twenty-five years ago.

Mrs. Mildred Brager, daughter of Mr. and Mrs. Blumer, came from Des Moines to assist with plans and to be present at the dinner.

SECOND 4-H TRAINING SCHOOL ON HOME EFFICIENCY TO BE HELD THURSDAY

The second 4-H Leaders Training School on Home Efficiency will be held two days in Hancock County. The meeting scheduled for Thursday, January 28, will be held from 10:00 a. m. to 4:00 p. m. at the Farm Bureau office in Garner. On Friday, January 29, a training school will be held at the Hayfield school from 10:00 a. m. to 4:00 p. m.

Miss Esther Everett, Extension Specialist in Home Management will have charge of the training schools.

It is suggested that the leaders from Bingham, Britt, and Madison townships attend the meeting in Hayfield, and the others attend the meeting in Garner. One older girl from each club may attend the training school.

Iowa produced 22 percent more eggs in the first 10 months of 1942 than in the like period of 1941.

Hancock County Co-Op. Oil Association Held Meeting

"It Takes Both"

It takes an Isbell and a Hutson... a Sammy Baugh and a Dick Todd to form a forward pass combination. It takes both... War Bonds and Taxes to provide the necessary finances to win this war—a war for freedom and humanity. Are you doing your part?
U. S. Treasury Department

HERB BAILEY'S SALE IS THIS WEEK FRIDAY, JAN. 29

Herb Bailey's closing cut farm sale will be held this week Friday. Turn to Mr. Bailey's sale adv in this issue of The Times for a complete listing of livestock, farm machinery and household goods to be sold to the highest bidder.

Mr. and Mrs. Bailey are retiring from the farm.

HANCOCK COUNTY REPORTS COST OF STATE PATIENTS

Cost and care of insane patients from Hancock county at state hospitals at Independence and Cherokee for the quarter ending Dec. 31 totaled \$2,300.94, according to a report released by County Auditor Fred C. Missal.

Five patients were cared for at Independence at a cost of \$296.60 and 35 at Cherokee at \$2,004.34.

In addition to the 40 patients cared for at state institutions, 10 mild insane cases are being cared for the Hancock County home.

Iowa dairymen can look for one of their most profitable years in 1943.

WINTER FISHING IN MISSISSIPPI RIVER TOP FLIGHT SPORT

Two McGregor Fishermen Display Fine Catch Of Walleyes Taken In The Mississippi River

Since the construction of the Mississippi River dams, the winter fishing on the boundary waters has steadily increased in quality and quantity. The favorite fish, walleyes, have been taken this winter in large numbers, some weighing as much as nine pounds, the average size being well over three. The water flowing swiftly over the dam prevents freezing and raises the oxygen content measurably. Fish congregate in immense numbers below the dams, and it is in these areas that most of them are taken. Boats are hauled over the ice to the open water on sleds. Fishing is done in deep water with heavy lines and sinkers, and the bait almost universally used is minnows. In spite of the fact that fishermen wear the heaviest outdoor clothes procurable, this winter fishing is extremely uncomfortable, and many boats contain small stoves in which roaring fires are kept burning. Only the hardest fishermen attempt this sport, and because of the tire rationing, fishing this year has been done mostly by local sportsmen. The walleye season is open in the Mississippi River until March 1, with the best fishing in February. Catch limit is eight and possession limit 16.

WEEKLY NEWS ANALYSIS

Jap Armada Repulsed in New Guinea; Russians' Rostov-Caucasus Offensive Wins Back Vital Areas From Germans; FDR Cites 'Miracle' of War Production

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

First picture of an American officer questioning German prisoners is shown above, as Maj. William Yarborough (bareheaded) of Seattle, Wash., interrogates two German prisoners taken in Tunisia. Fighting French troopers look on. Major Yarborough is liaison officer between the advanced U. S. forces and the French in Tunisia.

ROOSEVELT: Better World Ahead

Bad news for the Axis, good news for the United Nations and the assurance of victory followed by post-war economic security were the three most significant elements in President Roosevelt's annual message to the 78th congress.

In delivering his bad news to the Axis on all fronts, the President bluntly announced "Now our aim is to force the Japanese to fight. Last year we stopped them. This year we intend to advance." In the African area he promised that the last vestige of Axis power would be driven from the south shores of the Mediterranean. Concerning Europe, he said, "We are going to strike—and strike hard."

The good news for the United Nations was contained in Mr. Roosevelt's enumeration of the "miracle of production" at home, as well as the evidence of close co-operations between all Allied leaders. In his summary of accomplishments during the last year, the President listed the production of 48,000 airplanes, 56,000 tanks and self-propelled artillery weapons, and 10,431,000,000 rounds of ammunition and the transporting of 1,500,000 men of our 7,000,000 armed forces overseas. Significantly, he revealed that more supplies are now being flown by American planes to China than were ever transported over the Burma road.

In his approach to postwar planning and domestic policy, the President succeeded in promoting good will for the administration in a congress now closely balanced in political faith. He suggested principles rather than specific recommendations for legislation that might stir up factional disputes.

NORTH AFRICA: Allies Coil

Give and take operations continued on the Tunisian front, with the Allied forces steadily recruiting their strength until superior air and land power aided by more favorable weather would enable them to smash ahead in the all-out assault for Bizerte and Tunis.

As American troop concentrations were speeded in the new U. S. fifth under Lieut. Gen. Mark Clark, British infantry units wrested important heights from the Germans west of Bizerte.

The British, however, were dislodged from these positions by fierce German counter-attacks indicating the enemy's determination to contest every remaining foot of African soil.

British and American bombers were active in the air, while Allied submarines harassed Axis shipping in the Mediterranean, sinking two enemy ships believed to be carrying troops to Africa.

In the east, General Sir Bernard Montgomery's British eighth army had been sparing for an opening for a new push on Tripoli.

On the diplomatic front it was reported that Gen. Charles de Gaulle, leader of the Fighting French, and Gen. Henri Giraud had agreed to a discussion of North African problems designed to speed French action against the Axis in collaboration with their Allies.

LOCAL TRANSPORT: ODT Takes Over

In a far-reaching executive order designed to speed up the movement of war workers, President Roosevelt placed Federal Transportation Director Joseph B. Eastman in charge of local bus lines and street cars.

The effect was to give ODT complete supervision over all local transportation equipment and to authorize Mr. Eastman to revise present service and schedules wherever necessary to step up the movement of passengers to and from war plants.

SOUTH PACIFIC: Japs Are Stubborn

Although General MacArthur's forces had cleared the enemy out of the Papuan peninsula, the Japs still held an area in New Guinea as large as Texas and Oklahoma combined. That the Nipponese intended to stubbornly hold this area was evident from their naval operations to reinforce it.

First Jap efforts in this direction were frustrated when United Nations bombers attacked a convoy of 10 enemy ships off Lae, 160 miles up the eastern New Guinea coast from Buna. The Allied airmen sank two ships, one a 15,000-ton vessel loaded with troops, scored hits on a third and shot down 18 Jap planes, according to a communique from General MacArthur's headquarters.

Meanwhile other Allied airmen roved as far as Gasmata and Rabaul in neighboring New Britain, where unusually heavy concentrations of Jap troop and supply ships and war craft had assembled.

In the Solomons, American fliers continued to assert Allied air supremacy by attacking Jap airfields at Munda and Kahili on Bougainville island. Meanwhile in Burma, British planes strafed the area northwest of Akyab and damaged enemy shipping off Burma's west coast.

RUSS STEAMROLLER: Gains Momentum

Best news for the United Nations' cause continued to come from the far-flung expanses of south and central Russia.

The Reds' two-pronged threat aimed at Rostov, vital city at the mouth of the Don, grew more menacing to the Nazi defenders, as both the northern and southern arms of the pincers continued to make new gains, capturing 61 villages in the Middle Don and rolling up impressive advances in the Caucasus.

The Caucasus offensive was especially significant, for after expelling the Nazis from Mozdok, gateway to the Grozny oil fields, and from strategic Nalchik, the Russ pressed the retreating Germans hard, advancing toward Mineralnye Vody, center of a network of Caucasus railroads. The capture of more than a dozen Caucasus towns indicated that the Nazi front in the area was breaking up faster than in any previous battles.

The seriousness of the German plight in the Caucasus was emphasized by the fact that for the first time the Berlin radio conceded that Axis troops were retreating in the east Caucasus, explaining that their troops had carried out "a shortening of the front, according to plan by giving up advanced strong points."

PETROLEUM RATION: East Curbed Again

The OPA cut deeper into the use of rationed petroleum products in 17 eastern states, when an order banned pleasure driving and slashed the amount of fuel oil that schools, stores, theaters and non-residential establishments may consume to 25 per cent below present rations, giving them about 45 per cent of normal requirements.

Future operation of many amusement places was left in doubt, since the OPA order specifically banned motoring to theaters as well as race tracks, and the fuel restrictions threatened to make theaters and night clubs cool beyond comfort. The OPA warned, too, that future cuts in non-residential fuel oil rations might be necessary.

Stern measures faced motorists violating the new orders. Any car owner driving to amusement centers or to "purely social engagements" was liable to the cancellation of all or part of his gasoline ration.

CONGRESS:

Farm Bloc Program

Increasing strength of the farm bloc's influence in the 78th congress was evident as leaders mobilized their forces in both houses to modify administration farm policies and to seek release from the armed forces of drafted farm youth as a means of relieving the agricultural manpower shortage.

That the farm bloc had support for its efforts in rural America was indicated by the action of five major farm organizations in uniting behind the program. These groups include the National Association of Commissioners, Secretaries and Directors of Agriculture; the American Farm Bureau Federation; the National Grange; the Milk Producers Federation and the National Co-operative Council.

Speaking for the farm bloc, Senator John Bankhead of Alabama said that preservation of the farm labor supply should figure in a complete redistribution of manpower. Indicating the farm bloc's support of the farm organizations' appeal for release of drafted farm youth, he asserted that the estimated 3,000,000 to 3,500,000 men scheduled to be drafted in 1943 might well be diverted to production of both weapons and food.

CONSUMER GOODS:

Fewer Purchases Ahead

Purchases of consumer goods and services by American civilians will register declines of 10 to 15 per cent in 1943, while production of goods will show a 15 to 20 per cent dip, according to a prediction by the Office of Civilian Supply of the War Production board.

The OCS estimated that the lag in production would be offset by the absorption of 25 per cent of the inventories on hand at the beginning of the year.

Largest drop in buying is expected in durable goods, continuing a trend started in 1942 when purchases by civilians declined 45 per cent below 1941. This year's decline is estimated at 35 per cent below 1942. The OCS said that production of consumer goods from steel would virtually stop.

VICTORY PREDICTIONS: Premature, Says Davis

White-haired OWI Chief Elmer Davis, who prides himself on being realistic, exercised that trait when he took exception to Admiral William F. Halsey's prediction of a United Nations' victory this year.

Commenting on the naval officer's forecast, Davis said: "I have no information to support such a prediction, although I have been trying to get some."

Davis pointed out that the Germans are still building submarines faster than the Allies are sinking them and the U-boats' toll is creat-

ELMER DAVIS

ing "heavy losses in ships and the cargoes that go with them and sometimes trained men on them."

The director of war information tempered his pessimistic views, however, by stating that the Allied nations, particularly the United States, for some months past have been building more ships than Axis submarines have been sinking.

POSTWAR CARS: To Cost \$400

Radically new light-weight passenger cars that may sell for as little as \$400 were envisioned by F. C. Crawford, president of the National Association of Manufacturers, as a postwar development resulting from amazing strides in metallurgy.

Mr. Crawford said that motorists in the coming peace era will have better gasoline than the 100-octane fuel now used for combat aircraft. The superior gasoline, plus greater use of light metals developed during the war, will give the American people far greater mileage on their cars and the cheapest all-around automobile transportation in history.

The NAM president said automobile companies expect to start production on some cars immediately after the war, but that the new postwar models probably will not appear for 15 to 18 months afterward.

MISCELLANY:

NEW YORK: The American people contributed more than \$9,000,000 to United China relief during 1942, Wendell L. Willkie announced here. Speaking over a national radio hook-up, Willkie, honorary national chairman of the drive, said that last year's donations amounted to \$7,083,357 in cash and pledges totaling \$2,209,676. Gifts, he said, ranged from 3 cents to Bernard Baruch's \$100,000.

This Is the Army

(By the Soldiers in Irving Berlin's Show for Army Emergency Relief.)

According to the pay rate for American soldiers as compared with the wages the average Jap soldier gets, Uncle Sam considers the American private to be worth 167 Japs. . . Soldiers are flooding the Fifth Ave. Public Library with requests for books about Germany, Japan and Italy—especially the points of interest in those countries. They're so confident the U. S. will take over they want to be prepared for a bit of sightseeing.

The Quartermasters Department at Philadelphia has asked manufacturers of medallions and decorations to bid on the manufacture of between 500,000 and one million decorations to be worn by the soldiers of the Army occupying Germany after the present war. . . The U. S. Army tells its men: "It is commonly supposed that the first duty of a good soldier is to die for his country. This is a mistake. The first duty of a soldier is to make his enemies die for theirs."

The U. S. Army runs the largest movie chain in the world—500 theaters at camps throughout the country. . . The Army soon won't have any dish-breaking problems in its messhalls. The Quartermaster Corps has developed a new shatterproof glass that will bounce like a golf ball when dropped. . . One of the Army's special services for its men is providing members of the A.E.F. with an opportunity to acquire an education via correspondence courses.

WALTER WINCHELL is on a tour of duty outside Continental U. S. During his absence, contributors will substitute.

Our average soldier is more than a half inch taller and nearly 10 pounds heavier than the men of 1917, according to the war department. . . Glider pilots are referred to as the "G-Men of the Air". . . The speed limit for all Army vehicles is 30 miles per hour, regardless of the civil speed limit. The Army wants its vehicles driven in a manner that will set an example for civilians. . . The men who load the bombs on Uncle Sam's planes refer to them as "Bundles for Berlin."

As the result of a survey made by the Quartermaster Corps, all government issues of Army trousers, in the future, will be more roomy around the seat. . . A Negro private, after being issued his Army clothing at Fort Sill recently, was asked about the fit of his new uniform. "Why, these duds fits fine, sa'gint," he replied, "but do you mind if I buys another pair of pants for jitterbugging?"

Although the new steel helmet is slightly heavier than the 1917 model, the soldiers don't mind the extra weight. They claim the new helmet is a hair-restorer because it stimulates the scalp by bouncing around on the head.

During the Army's recent maneuvers, the boys discovered lots of uses for their new steel helmets. It makes a good seat just outside the pup tent, sort of a front stoop. It's an excellent container for the things a soldier takes out of his pockets before going to sleep. It can be used for taking baths. And it's the finest outdoor washtub ever designed—it holds at least two shirts and a couple of pairs of socks.

Army Slang: Insects are "mechanized freckles". . . A wastebasket is known as "File 13," and the nut house is "Section Eight". . . Nurses are "Snow Whites," and a letter from the girl friend is a "sugar report". . . The guardhouse is the "Cross-bar hotel," and woolen underwear are "Superman drawers". . . The bugler is "Gabriel," money is "E Pluribus," and a garbage truck is a "honeywagon."

A girl in Sebring, Fla., whose boy friend is on duty in the Pacific war zone, recently received a letter from him. On opening the letter, the girl found only a narrow slip of paper on which was written: "Your boy friend still loves you, but he talks too much." It was signed "Censor."

When Gen. Jimmy Doolittle recently made a breathtaking steep takeoff with an observer, he turned around and chuckled: "Bet 95 per cent of the people down there thought we'd crash". . . The observer replied: "Only 50 per cent up here thought so."

U. S. troops in Australia have a hit tune of their own titled, "The Aussie and the Yanks Are Here". It was written by Pvt. Johnny Nauer of Michigan, while aboard his troopship bound for Australia. . . Swimming is a compulsory activity for recruits at the Army Air Force training center at Miami Beach, Florida. . . The shortest movie review ever printed appeared recently in the Fort Leavenworth Reception Center News training film on "Sanitation." The comment was: "Good clean fun."

Washington MERRY GO-ROUND

DREW PEARSON

Washington, D. C.
THE GENERAL'S TWO WIVES
There was much more than meets the eye behind the departure of Gen. Hsiung Shih-wei, head of the Chinese military mission to Washington. It had its intriguing personal side, but also it went deep into the vitals of our most difficult war problem.

On the personal side, it happened that General Hsiung had two wives, which in China is a criterion of power and prestige. But it also happened that Madame Chiang Kai-shek, educated in the United States, does not approve of two wives.

When in China, Madame Chiang does not interfere with the military appointments of her husband. But in the United States, General Hsiung is reported to believe that the situation might have been otherwise, and that the U. S. A., big as it is, might have been too small for both of them.

FARM FIGHT

A group of presidents of land grant colleges, headed by President H. C. "Curley" Byrd of the University of Maryland, called on Secretary of Agriculture Wickard the other day. Behind that call was one of the most important fights which will come before the present congress.

Actually the land grant college presidents came to propose an agricultural program which they think will overcome the food shortages. But behind this is a plan to put control of the farm economy back into the hands of the farm bureau and the powerful farm lobbies. It is a fight which probably will keep up a running fire all during congress.

Background of the fight goes back to early in the Roosevelt administration when Henry Wallace, then secretary of agriculture, delivered a speech in which he criticized his own agriculture department for helping only the one-third upper-crust farmers. The great mass of the farmers, he said, the tenants, the little farmers, and farm labor, got no help from the government.

Wallace was referring to the fact that the American Farm Bureau federation, the Grange, the National Co-operative Milk Producers, and other organizations with powerful lobbies in Washington, had always influenced farm policies and dominated the agriculture department.

Working hand in glove with them have been the land grant colleges, the state commissioners of agriculture, the county agents, and the farm extension services.

These groups controlled agriculture locally, even when Washington was supplying a majority of the funds.

HITLER OR JAPAN?

Another factor, however, goes much deeper and is one reason behind reports that Gen. Joseph Stilwell may return as head of the U. S. military mission to China.

This factor is the Chinese argument that Japan is a greater enemy than Hitler, coupled with the fear that after we have defeated Hitler, we will make peace with Japan at the expense of China.

This fear is one which cannot be laughed off easily. In fact, it will take a lot of persuading to dispel Chinese worries. They know that a lot of the career gentlemen, powerful in the state department, have contended that Japan should have her place in the sun. They know that some of the state department clique tacitly favored Japanese occupation of Manchuria, while the British almost openly supported it.

The realistic Chinese, therefore, argue that after Hitler is defeated Japan is more than likely to propose a compromise (as she got Teddy Roosevelt to do to end the Russo-Japanese war) whereby Japan gets a slice of China and the world gets a rest from war.

The realistic Chinese also know that they could make peace with Japan tomorrow by giving her several treaty ports and a slice of the North. In fact, the Japs probably would like nothing better than a peace which would permit them to withdraw half a million men from China and use them against us in the Pacific.

Finally Chiang Kai-shek has his own troubles with his generals, many of them pliable to Jap wiles, especially "silver bullets," which the Japs claim is the easiest way to win wars.

So Chiang needs something to show to keep his generals in line—either more arms, which he is not getting; or a treaty from the United States pledging we will fight to the end until China is absolutely free.

Instead of such a pledge, Chiang has a military mission headed by a man whom the Chinese don't like—General Stilwell. Joe Stilwell comes from the old school which didn't particularly like the Chinese, and the Chinese make no bones about the fact that they don't like him.

He insists on doing all his business direct with the generalissimo, talking to him only.

As a result, Willkie was given a message to take back to Roosevelt to get General Stilwell out of the picture.

AROUND THE HOUSE

If you will rub a bit of melted taffin on your snowshovel before using it, you will find that snow will stick to it.

For a special hanger for that rag that keeps slipping off a larger rubber bands placed tight around the ends of the hanger will do the trick.

If there is a sick person in the house, who requires stillness, you can lessen the noise of the doorbell by placing a finger of an old love over the clapper.

If garden tools are stored in a small box in which a little lime has been placed, they will not rust. The lime will absorb the dampness and keep the tools bright during the winter.

If you haven't an ice bag, put the ice cubes in a rubber glove and tie wrist securely. Watch out, however, when the ice begins to melt.

Rub fish-knives and forks, after they have been washed, with fresh lemon rind—takes away flavor and smell.

If shredded coconut becomes dry it may be freshened by soaking for a few minutes in sweet milk.

YOU CAN'T BUY ASPIRIN

that can do more for you than St. Joseph Aspirin. Why pay more? World's largest seller at 10c. Demand St. Joseph Aspirin.

The problem of what to send a service man has been solved by the men themselves. Tobacco tops the list of gifts service men prefer from the folks back home, according to numerous surveys. If you have a friend or relative in the armed forces—Army, Navy, Marines, or Coast Guard—who smokes a pipe, or rolls his own, a pound of his favorite tobacco is very much in order. A big favorite with many service men is Prince Albert, the world's largest-selling smoking tobacco. Local dealers now are featuring Prince Albert in the pound can for the men in the service.—Adv.

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

We Can All Be EXPERT BUYERS

● In bringing us buying information, as to prices that are being asked for what we intend to buy, and as to the quality we can expect, the advertising columns of this newspaper perform a worth while service which saves us many dollars a year.

● It is a good habit to form, the habit of consulting the advertisements every time we make a purchase, though we have already decided just what we want and where we are going to buy. It gives us the most priceless feeling in the world; the feeling of being adequately prepared.

● When we go into a store, prepared beforehand with knowledge of what is wanted and at what price, we go as expert buyers, filled with self-confidence. It is a pleasant feeling to have, the feeling of adequacy. Most of the uneasiness in the world can be traced to the lack of this feeling. This advertisement shows another of its manifold uses—shows itself as an aid toward making all our business relationships more secure and pleasant.

\$

1943 Will Test America's Production Strength As Axis Armament Plant Capacity Is Left Behind

Before this year ends the present 15,000,000 war workers will be increased to 20,000,000 or more in the nation's all-out, everybody-aboard war effort that will produce something like 125,000 planes, 75,000 tanks, 35,000 anti-aircraft guns, and over 10,000,000 tons of shipping to put Adolf, Hirohito and little Musso in their respective places.

This is the year when American industry and labor will show that it can do next to, or even, the impossible in turning out the weapons for victory over the Axis.

For some time the gigantic machinery of American industry was slowly gaining speed. There was temporary confusion.

Soon, though, the might and power of America hard at work began to be felt as the armed forces of the nation began to make glorious use of weapons rolling from unusual production lines, steel mills, automobile plants, and converted peace-time manufacturing plants. Today there is hardly a person whose work is not at least closely tied up with the national armament production plan.

Speaking in the nation's Capitol, Secretary of Commerce Jesse Jones said: "We are already outproducing our Axis enemies and are only now approaching peak production in certain essential military categories. While 1943 will be a real test of the ability of American productive genius to supply our own armed forces and those of our Allies, past performances give us every ground for confidence that the high goals fixed by the President will be achieved."

That program, which was shown in part at the beginning, calls for a total expenditure of at least \$53,000,000,000 by June 30, this year.

Where 5,000 planes a month was the schedule for 1942, the 1943 output will be more than twice that. (In 1940 only 500 a month were produced.)

During 1942 the shipbuilding industry produced over 8,000,000 tons of shipping. The goal for 1943 is twice that amount. A total of 16,000,000 tons would be equivalent to 25 per cent of the entire merchant marine of the world when the war broke out.

Over a year ago it took almost 180 days to construct a "Liberty ship." American inventiveness, ingenuity and efficiency have whittled that time down to 56 days, and there is no doubt even that time will be further cut down.

Not so long ago Donald Nelson spoke before the National Association of Manufacturers and said: "At this moment the United States is producing combat armaments in as great a volume as all the Axis powers combined. A year from now (this year, '43) it will be producing twice as much; and the United Nations as a whole will be out-producing their adversaries by a margin of three to one."

The automobile industry, after re-tooling for war production, began to get in its main stride toward the middle of 1942. Even then, before it was in complete working order, it turned out war equipment valued at \$6,600,000,000, equivalent to 8,500,000 passenger cars and trucks, or 3,000,000 more than it turned out in the historic, prosperous year 1929.

Farmers of America, as Secretary of Agriculture Wickard said elsewhere on this page, are making superhuman efforts to make 1943 a greater production year than was the giant 1942.

This year farmers will have fewer farm hands than last year; more of his family will be helping. Labor shortages have already shown in various sections of the nation, but Manpower Commissioner McNutt has come to the aid by bringing in transient farm help whenever and wherever possible. About the only commodity farmers are not asked to produce more than they did in 1942 are grain cereals for bread and foodstuffs. The granaries of America are filled to the overflowing. There will be plenty of bread, and similar products not only for Americans, but neighbors who need it, Allies and lend-lease friends.

The men behind the men behind the guns, such as those shown here, are the ones that are keeping the production line humming.

AMMUNITION WORKERS TURNING OUT

During the first year of war American ammunition workers turned out enough rifle and machine gun ammunition to enable each individual Axis soldier to be shot at by 83 rounds of stinging, hot lead.

That amount, according to Undersecretary of War Robert P. Patterson, is still mounting. At one arsenal, data collected showed each employee made and assembled an average of more than 47,000 rounds of small ammunition, calibers .30 and .50. Besides each workman turned out an average of 605 artillery cartridge cases, made parts and

Production for Victory

Even though over 30,000,000 farmers worked from before dawn until far late into the night during 1942, they still were unable to keep up with the demand for some products, such as meats of certain types and grades, and dairy products. The latter were being dehydrated in enormous quantities for shipment abroad both to the armed forces, and to lend-lease nations.

This year over 26,000,000 milk cows will be utilized to supply the increased demand for dairy products. The great amount of milk alone that needs to be dairied during 1943 can be imagined when during 1940, a non-war year, the U. S. per capita consumption of all dairy products amounted to over 97 gallons. That figure includes such per capita amounts as 17 pounds of butter, 5.9 cheese, 2.3 ice cream.

Food will write the peace after this war is ended, whether it be this year or during 1944. But food—and plenty of it—is needed right now for fighters and workers, and those not so fortunate in war-torn lands. Meat rationing will attempt to bring a fair allotment to each American. Even then the farmers will be pushed to supply the per person per year consumption of meats for this nation alone.

In 1942 American farmers went over the quota set for them. That they can top 1943's quota is an almost certainty.

One of the dangers—which American people have been careful enough to heed—arising from the increase in employment is that of an increased income, without an accompanying supply of products which they could buy with their new wealth. That this danger will be no less during 1943 when employment will increase still more, and products for consumption will be less is under-

Farm Production Job This Year Not Easy One, Says Sec. Wickard

Because one-fourth of all the food that is going to be produced here during 1943 will go to U. S. armed forces, and outside of its boundaries to feed the peoples of the United Nations

and those peoples in lands occupied by the Axis which may be taken from the enemy, that doesn't mean that Americans won't be well fed or healthy.

In England, after the nation went on a point rationing plan and many of the frills of the diet were cut out, it was found by public health officials that the average Englishman's diet was far more nourishing than before, and also that public health had improved.

The food goal for 1943 stresses the need of foods of most dietary values for wartime. Every effort will be made by the farmers of America to achieve them. A greater production of milk, meat, eggs, feed grains to support the increased livestock production is called for. Besides that there is an increased demand for

'Notch by Notch'

Secretary of Commerce, speaking of what is ahead in '43, said: "Our people have tightened their belts and will further tighten them notch by notch if and when war developments make it necessary. They know that no matter what hardships we must endure at home those suffered by our courageous armed forces and their gallant Allies on distant fighting fronts will be infinitely greater."

standable. Bond buying, Victory tax on payrolls, increased income taxes, and probably compulsory savings might take some of this excess spending power away. But the force of what remains will still be greater than it was in 1942.

The record farm income of 1919, according to statisticians, was exceeded last year by over a billion dollars, with the 1942 gross income being \$18,500,000,000; cash income, including benefit payments, being \$15,600,000,000. The national outlay in salaries and wages was at least \$80,000,000,000 in 1942, an increase of 80 per cent from 1939. It is assumed, despite certain countervailing forces, that salaries and wages will be more than that in 1943.

The consciousness with which the armed forces, rural and urban workers, went about their respective jobs during 1942 gives an idea of the might which this nation will achieve during this present year.

Poet Walt Whitman wrote, "I hear America singing . . ." This year Americans will continue to hear the nation's industry humming—humming a tune of Victory which will soon—everyone hopes—break out into a mighty song celebrating the victorious defeat of the enemy.

Smoke Gets in Their Eyes* (*Hitler-Hirohito-Musso.)

more dry beans and peas to supplement the proteins needed in our diets, more poultry to supplement our supply of meats, and more of the vegetables so necessary and essential because of their high food value.

Speaking to the farmers of America, Claude R. Wickard, secretary of agriculture, said: "The 1943 farm production job will not be easy." But he added that "it was not easy in 1942 . . . in general farmers met the goals, and exceeded by 12 per cent the previous high records set in 1941."

For months food officials have been at work figuring out how much the country can produce and have fixed what they believe to be attainable goals. They also know what the minimum needs of this nation are, besides the minimum for United Nations countries, outside of what they can supply by themselves.

What has them in doubt is the amount of territory recaptured from the Axis and the number of persons within such territories who will have to be fed. North Africa is a part example of feeding natives in territory wrested from the Axis.

The point rationing plan which is to begin next month is said to provide a means of manipulating public demand and also compelling public adherence to a predetermined balanced diet. Each month, or every six weeks the OPA will announce various "point values" of various type canned goods. Current point-value rates will be prominently posted in all grocery stores and housewives can decide from an inspection of the list what are the best "bargains" or "buys."

FAST QUANTITIES

itors, watchmen. Had only the men and women actually engaged in manufacture been included in the per capita figures given above, the production would have been 20 per cent higher.

What will be produced there in '43 can be imagined when it is shown that in '42 over a billion rounds of small arms cartridges and over ten million artillery shell cases were shipped from there.

ELMER TWITCHELL ON THE NEW RATIONING

"Yes and no," said Elmer Twitchell today when asked if he minded the latest ban on canned stuff. "I got pretty sick of it down through the years. In fact, I suppose I have suffered as much from hastily prepared canned bean suppers as anybody. There were many times when I thought the country had stopped delivering food in any other way."

"If Uncle Sam had called for less canned goods years ago I would have cheered till I was blue in the face. After every meal in my house there were tin cans all over the place. Nothing would have disrupted our home more than the loss of a can opener."

"My wife seemed to have forgotten that food came out of the ground. She developed the notion that men could live via the canning corporations alone. She thought food was something dependent on complete liaison between the tin mines, the beaneries and the gas range."

"And I never saw much excuse for it until the past year during which time the old gal has been flying all over the map in something she calls home front activities, letting all her home affairs go to pot."

"Now I claim that among the home front activities conducive to preserving morale and winning the war few take precedence over making the home fairly comfortable and doing a little decent cooking now and then."

"A lot of those women you see trotting around in all sorts of uniforms or with all sorts of bands on their arms are just sabotaging the home front by leaving the men folk hungry, cold, disgusted and pretty sore."

"I know a couple of 'em who are spending 12 hours a day working on the problem of sustenance, morale and first aid while their husbands are so neglected that they could use some ambulatory aid right now."

"The point of which is that thousands of American husbands who don't know much about cooking are obliged to depend on canned stuff. Something they just dig out of a container and hold over a gas flame five minutes. If they find they are suddenly cut off from canned food they are going to be in a bad way."

"Don't you think all men should learn to cook?" we asked Elmer.

"Learn to cook!" he exclaimed. "They should now learn to scout and forage."

RHYMES FOR THE CANNED GOODS CRISIS

Cut me down on canned fruit juices— If it deals the Axis deuces.

Take away those pitted cherries; They will give Adolf "the berries."

Lima beans I'll gladly lay off If in victory they'll pay off.

Pork and beans? Well, I'll go easy— If they make Der Fuehrer wheezy.

Carrots, corn, asparagus? Take 'em and swamp "Hit" and "Muss."

In this rationing of canned goods there is this thing to bear in mind: Maybe the can you give up will be the one they'll tie on Hitler.

GONE WITH THE RATION CARDS

- 1—I'll take a second helping.
- 2—Oh, have another chop!
- 3—I'd like to reduce but I just can't stop eating everything.
- 4—Please pass the butter!
- 5—Add a cup of sugar and a quart of rich cream and stir well.
- 6—You are cordially invited to a beefsteak dinner, tickets to be \$1 per plate.
- 7—My order of steak hasn't arrived yet; what's the matter?
- 8—Just cut me off some round steak for the dog.
- 9—And I'll take ten or twelve cans of soup, too.
- 10—The best dinner in town for 40 cents.

WINTER, 1942-43
I pull down shades, I wear my longs;
I've put up new storm doors;
I sleep with heavy, woolen socks;
Rugs cover all my floors.

Each crack is sealed, I've closed off rooms;
Such neat tricks I well know;
I've even insulated pipes—
Do I keep warm? Gosh! No!

—PIER.

Everybody is remarking on the splendid appearance of our service men. When the first draft army was called the boys didn't look any too hot. Even a year ago the equipment seemed somewhat catch-as-catch-can. But there are no smarter looking soldiers on earth today, and the same applies to other branches of the services.

The fellow who has a laugh on others today is the man who stuck to his old coal furnace and never let the oil-burner salesman get a foot inside the door.

"DEAR Mrs. Spears: Recently I sent for your stamping pattern of Mexican figures and used them for two sets of tea towels and pot holders and a pair of curtains for my grand-daughter. Her husband made racks of them that also helped to give the kitchen a gay air."

A triangle shelf to fit in a corner near the sink was put up. It had

an ordinary bathroom towel rod screwed to the bottom, and painted, cut-out scallops nailed to the front. For the pot holders, he scalloped both edges of a 4 by 1/2-inch board; painted it; screwed a brass cup hook in the center of every other scallop and then nailed it up over the stove. G. B. S."

NOTE: You will enjoy these gay figures. There are more than 20 on the transfer, all different and easy to do. Mexican Pattern No. 203 is 10 cents if ordered direct from

And Spatters

By Jergie

THE DAYLIGHT SAVING FARCE

The nation has now given the
"day-light saving time" a year's
trial and as far we people in the
great middle West are concerned, it
has proven to be a big flop. It just
didn't work satisfactorily in a farm-
ing territory and causes more hard-
ship and inconvenience than it does
good and the sooner we get back to
the old time the better it will suit
farmers and business men alike in
the agricultural belt.

Perhaps our newly elected Sena-
tor George A. Wilson can do some-
thing about it.

THE WAR IS GETTING TOUGH ON US

What with all the many rules and
regulation brought on by the war,
life is getting miserable.

The latest and worst thing the
bakers thought up was making
the bakers quit selling bread al-

ready sliced. That is really a hard-
ship and something ought to be
done about it.

Remember how grandma used to
slice bread? But that is now a lost
art. She would tuck the loaf (and
by the way, she baked her own de-
licious bread) under one arm like a
quarterback tucks a football under
his arm on a line-smash, and with a
long, sharp butcher knife she cut
the bread toward herself with deft
strokes that produced even slices.
Modern women should not try this
method unless they want to make a
trip to the hospital to have some
fancy stitching done on their anat-
omy.

Most households are without a
breadknife, or the one that might
be found is rusty. There are proba-
bly no bread knives to be purchas-
ed, as they passed out of the picture
with the dodo birds years ago.

To slice bread without a bread
knife is like shaving without a raz-
or. It just can't be done.

Now come the bakers with adds
on how to slice bread. First have
a nice sharp breadknife (Now ex-
tinct.) Then unwrap the bread. (It
is better to remove the wrapper be-
fore slicing, as it keeps the wax and
paper from getting into your false
teeth later.) Next step is to find a
board to lay the bread on while the
slicing process is going on. (The
Northern Lumber Co. will sell you
a piece of board for a dime.)

Then lay the bread on the board
bottom-side up. (The bottom side
of a loaf of bread is the side the
bread sits on, naturally.) Hold the
bread firmly down with the left
hand (or put your foot on it) and
then start on the starboard end and
with easy (?) light saw-like strokes
of the knife, start cutting. Be sure
your fingers are out of the way un-
less you want fresh meat in your
sandwiches. Keep your eye on the
knife like a golfer keeps his eye on
the ball when swinging. If direc-
tions have been followed the bread
will part company.

In another hundred years or so
you should be able to cut nice even
slices of bread. They probably will
have the shape of pie until then and
be twice as thick on one side as
the other, but don't let it worry
you. It will save butter because you
will eat twice as much bread with
a single spreading of butter.

This Scribe's better half is a so-
called "south-paw." And when she
goes into action slicing bread, it is
a marvel to behold. It is far more
thrilling to watch a south-paw at
work on a loaf of bread, than the
common right-handed kitchen me-
chanics. The variety of shapes of
bread she tosses out is amazing!

HIAWATHA UP-TO-DATE

He killed the noble Mudjekeewis,
Of the skin he made him mittens,
Made them with the fur side inside,
Made them with the skin side out-
side.

He, to get the warm side inside,
Put the inside skin side outside
He, to get the cold side outside,
Put the warm side fur side inside.
That's why he put the fur side in-
side.

Why he put the skin side outside.
Why he turned them inside outside.
—Author Unknown.

YOU CAN'T PRODUCE TOO MUCH PORK IN 1943

Farmers in Hancock County can-
not produce too much pork in 1943.
The demand and prices are great
enough so that all farmers will be
assured of a market and a very
profitable price.

All farmers can produce profit-
ably and be patriotic by raising an
extra supply of pork.

The most important thing now is
to increase the total food output on
each farm. Hog production is one
of the easiest ways to do this.

Your Farm Bureau office would
like to know of any extra brood
sows or gilts on farms. They have a
continuous demand for bred gilts.
It is a war measure to have these
gilts used for spring or summer fur-
row.

WILL MOVE TO GOODELL

George Stille has purchased the
Carl Robbins property at Goodell,
and will move there with his fam-
ily, February 1st. Mr. Stille is em-
ployed on the county highway sys-
tem.

FIRST GAS STAMPS EXPIRE

The first series stamps marked
No 3 in the gasoline ration books
expired at midnight Thursday. One
minute later the second period ser-
ies, marked No 4 became effective,
and are valid until March 21.

BRITT WOMAN GRANTED A DIVORCE BY COURT

Mrs. Tillie Baker of Britt, was
granted a divorce last week from
Peter Baker in District court at
Garner.

Judge Henry N. Graven of Clear
Lake granted the divorce on the
grounds of cruel and inhuman
treatment.

Mrs. Baker was granted the cus-
tody of the couple's three minor
children. The couple was married
February 6, 1924, and lived togeth-
er until about Oct. 10, 1932.

Hancock County Board Proceedings

2ND ADJOURNED JANUARY MEETING

Garner, Iowa, January 18, 1943

This being the 18th day of January, 1943, a date heretofore set for an adjourned meeting of the Board of Supervisors of Hancock County, Iowa, and no quorum appearing for said meeting, I, Fred C. Missal, duly elected and qualified and acting Auditor in and for Hancock County, Iowa, do hereby adjourn said meeting as commanded in section 5118 Code of Iowa, 1939, and amendments thereto.

Witness my hand and seal this 18th day of January, 1943

FRED C. MISSAL
County Auditor.

On this, the 19th day of January, 1943., Supervisors F. J. Schoun, Penn Eckels and John Chambers appeared making a quorum, and the Hancock County, Iowa, Board of Supervisors went into session as by law directed in accordance with section 5118 Code of Iowa, 1939, and amendments thereto.

The minutes of the last meeting were read and approved as read.

On motion and second the Farm Bureau Certificate of Membership was approved.

WHEREAS, the Hancock County, Iowa, Farm Bureau has requested the Board of Supervisors of Hancock County, Iowa, to appropriate the sum of \$3,000.00 to the Hancock County Farm Bureau for the year 1943;

WHEREAS, the certificate of membership of the Hancock County Farm Bureau and Financial report have been filed as by law directed and they have qualified for said appropriations under section 2930, Code of Iowa 1939, and amendments thereto;

Be it therefore resolved by the Board of Supervisors of Hancock County, Iowa, that there be and is hereby appropriated the sum of \$3,000.00 from the General Fund of Hancock County, to the Hancock County Farm Bureau for the year 1943, to be paid in four equal installments, February 1, April 1, July 1; and October 1, 1943

And the County Auditor be and he is hereby directed to draw warrants on the General County Fund in payment of said appropriation to the Hancock County Farm Bureau, all in accordance with and as directed by Chapter 134, Code of Iowa, 1939 and amendments thereto.

In the matter of the account of Hancock County, Iowa, against Lou Bailey for care of Lou Bailey at the State Hospital at Cherokee, Iowa

Be and it is hereby resolved by the Board of Supervisors of Hancock County, Iowa, that Henry C. Meyer, County Attorney, be and he is hereby directed to bring suit on account of Lou Bailey for care at State hospital at Cherokee, for Hancock County, Iowa, and Chairman F. J. Schoun is hereby authorized to sign an attachment bond in said care in the sum of \$1,000.00

The foregoing resolution was offered and read by Supervisor Eckels who moved its adoption, was seconded by Supervisor Chambers, whereupon the Chairman placed the motion of its adoption and upon roll call the vote thereon is F. J. Schoun and Penn Eckels, aye, John Chambers being absent and not voting.

On motion and second the following bonds are approved: Edmund K. Josten, Township Clerk; Myrtle White, Deputy Auditor; Velveta Jorgensen, Deputy Treasurer; Dolores Lenz, Deputy Treasurer; Wm. H. Henschen, Engineer; H. D. Schroeder, Justice of the Peace; Donald Neuberger, assessor; and G. H. Oxley, Justice of the Peace

Quarterly reports are approved: H. H. Mullin, Justice of the Peace; Wm. Riener, Justice of the Peace; J. N. Stell, Steward; H. D. Schroeder, Justice of the Peace; and G. H. Oxley, Justice of the Peace.

Supervisor Schoun is appointed a committee to investigate and cause repairs to be made in D. D. No. 37-39 and in D. D. No. 3 and 4, lateral No. 20.

Be it resolved that the present existing salary schedule be continued at the County Home until further notice.

BE IT RESOLVED THAT the agreement with Minnie Peterson for care of the Benson Children be continued and the Auditor is directed to draw warrant therefor semi-monthly.

WHEREAS, the Hancock County Auditor is required by law to deduct five percent of the county payroll for Victory tax under Provision of the Revenue Act of 1942, and

WHEREAS said Auditor must make a return of such moneys to the collector of Internal Revenue quarterly.

Be it therefore resolved by the Board of Supervisors of Hancock County, Iowa, that the County Auditor be and he is hereby authorized to draw warrants on the several funds of Hancock County, Iowa, in payment of such amounts as are directed.

WHEREAS, Mrs. Fairfield Dean has tendered \$250.00 as payment in full for the care of Fairfield Dean at the State Hospital at Cherokee and

WHEREAS, it is deemed for the best interests of the taxpayers of Hancock County, Iowa, that said \$250.00 be accepted as full payment for said account.

Be, and it is therefore resolved by the Board of Supervisors of Hancock County, Iowa, does hereby accept payment of \$250.00 full payment of the account of Hancock County, Iowa, against Fairfield Dean for care of Fairfield Dean at the State Hospital at Cherokee.

The foregoing resolution was offered and read by Supervisor John Chambers, was seconded by Penn Eckels, whereupon the Chairman placed the motion of its adoption, and upon roll call the vote thereon is Penn Eckels, John Chambers, and F. J. Schoun, aye, Nays—none.

On motion and second the annual report of the Hancock County is approved.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE

Timely Information Prepared By Iowa State College Specialist

Since many farm machines and pieces of farm equipment depend on sharp cutting edges for best performance, good grinding and sharpening equipment is essential on each farm. The performance of such machines as the mower, corn binder, ensilage cutter and many others is greatly improved by correctly sharpened knife edges. This also is true of the many hand tools as chisels, spades, planes, axes, hatchets, hay and corn knives, not to mention the beloved scythe and sickle.

The principal shapes of cutting edges should be developed by grinding. The finished cutting edge should be produced with an oilstone or whetstone. The grinding can be done either with an emery (silicon carbide or aluminum oxide) grinding wheel or with a grindstone. The emery or grinding wheel cut much faster than a grindstone.

"Burning" or destroying the temper of the cutting edges of tools when using an emery grinding wheel can be eliminated by (1) using a light pressure against the stone; (2) selecting a medium grit stone about 60 grit or coarser; (3) keeping the stone clean and well shaped by an occasional fitting with an emery wheel dresser; (4) by not holding the tool in a fixed position long enough for the heat in the tool edge to rise above a danger point. Many good types of oilstones, hand stones and finishing abrasives for sharpening the ground cutting edge are available in all communities.

It is necessary to provide for the protection of the operator's eyes as well as to provide guards for the general safety of the operator from prevalent flying particles around grinding equipment.

Many broken and worn machine parts can be made serviceable by one of the welding processes. Welding supplies are as much in demand as any other materials, and consideration should be given as to whether to weld the part or to replace it with a new one. Availability of welders, welding supplies and replacement parts, total cost, total labor required and final performance should be considered in deciding whether to weld or replace a machine part.

We Owe You

regarding the building material outlook this year, particularly as it will effect the farmer in his mighty battle of production. Those of you, who are planning some type of new construction this year, will do well to get your plans under way well in advance of the time you will want the building.

A Tip:

Some materials, particularly in the hardware line, are scarce and may soon be on the unobtainable list. If you need a new Chick or Hog Brooder House, NOW is the time to investigate the possibility of getting one. Chick raising will start earlier this year to fill government requests for more poultry and eggs.

DON'T SAY WE DIDN'T TELL YOU SO!

Flatter Your Winter Menus With a Crisp Salad Bowl
(See Recipes Below)

Flair for Salads

Tie a string around your finger and remember that salads belong in wintertime menus, too.

Their cool crispness will be a tonic to your stove-hot meals, and their vitamin alphabet is one of the longest and most substantial that you can find in any food. Oranges and grapefruit are having a fling in their abundance, and crackly crisp, red, red apples are better now than during warmer months. Use leftover bits of vegetables or just plain greens—lettuce and watercress—and your table will take on a new charm.

A bit of cheese here and there will bring a longed-for sharpness in salads. Here's one that makes use of winter vegetables, and is as pretty as pretty can be:

*Bermuda Salad Bowl. (Serves 6 to 8)

1 small head cauliflower
1 small head lettuce
½ large peeled Bermuda onion
½ cup stuffed olives, sliced
Watercress, for garnish
2½ ounces Blue cheese, crumbled
French dressing
Separate uncooked cauliflower into flowerets. Break lettuce into pieces. Toss together with cauliflower, lettuce, onion rings, olives, and french dressing into which the blue cheese has been crumbled.

Look to the crisp and juicy apples for real menu inspiration. Apples which provide plenty of vitamin A—to help you resist winter colds and infections—along with sunny carrots make for a nice salad:

Apple-Carrot Salad.

3 large, red apples, coarsely diced
2 cups shredded raw carrots
1 small onion, minced
½ cup cream, sweet or soured
1½ tablespoons lemon juice
Salt and pepper to taste
Dice apples without peeling and combine with grated carrot and onion. Add cream blended with lemon juice, salt and pepper. Serve in crisp lettuce cups.

A salad that can make you the hit of the party is this grapefruit ring if you fill the center with a Waldorf salad made of apples as crisp as the frosty night:

Grapefruit Salad Ring. (Serves 6 to 8)

2½ tablespoons gelatin

Lynn Says:

Your Diet I.Q.: If you're deficient in some vital vitamins and minerals you may have certain physical indications of this lack. Check the following indications:

Frequent ear and sinus troubles, nose, throat and sinus infections? Perhaps you're missing vitamin A—found in meat, eggs, milk, green vegetables, yellow-colored fruits and vegetables.

Is the appetite poor and are you nervous and tired? You may be skipping over lightly vitamin B—found in whole grain cereals, meats and fish, liver and kidneys.

Can't recover quickly from a cold, from that run-down feeling, or having bleeding gums and a sallow, muddy complexion? Better get more vitamin C—from oranges, grapefruit, green leaves, cabbage, tomatoes and berries.

Anemia? Feel tired and listless? You may need iron—molasses, liver, beans, peas, whole grain cereals, egg yolks and leafy green vegetables.

Poor teeth, brittle bones, excessive bleeding when accidents occur, or weakened heart and muscles? A deficiency of calcium may be responsible. Eat more cheese, milk and cream—green vegetables.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for January 31

JESUS THE BREAD OF LIFE

LESSON TEXT—John 6:8-14, 30-35.
GOLDEN TEXT—Jesus said unto them, I am the bread of life.—John 6:35.

Spiritual truth becomes understandable to us as it is put in the language of our daily life. Jesus was the Master Teacher of all times, and made use of graphic figures to present the message of salvation.

He spoke of the wind, of water, and in this lesson of bread. Even a child knows about such things and understands the good news. Bread is still the staff of life. It speaks of life and health, of satisfaction and strength.

Beginning with the five small barley cakes (and two fishes) which a provident little boy had taken with him into the wilderness, Jesus preaches by miracle and by precept of eternal things. One is glad that a bright lad was more thoughtful than all the adults that day, for he provided the occasion for the miracle and the message.

I. Daily Bread (vv. 8-13).

The great multitude had followed Jesus to the other side of Galilee where He had gone to rest. They sought Him out and He had compassion on them—these sheep without a shepherd (Matt. 9:36). That interest was first spiritual, for "he began to teach them many things," but it was also practical in the realm of daily life, for He saw that they were physically hungry.

His appeal to Philip revealed the lack of faith which at times afflicted the disciples. They knew they had the Son of God in their midst, and yet they were bound by the matter of dollars and cents, of portions and—well, they just wished Jesus would send these people away. That would solve the problem. Oh, yes, "there is a lad here," but what he has amounts to nothing.

All this was perfectly natural. They talked just like most of us, do when we are up against a similar problem. But the point is that they (and we too!) ought to realize that "little is much when God is in it." If we let Christ have all that we have and are, it will be adequate for every need.

Are you worrying about your lack of money; your inability to do things for Him? Are you limiting God when He would like to take what you have and multiply it by His blessing?

Notice that though there was plenty, there was none to waste. What was over was gathered up. God never encourages waste. Perhaps we in America may learn that lesson the hard way in these days—but having learned it let us not forget it.

II. Heavenly Bread (vv. 14, 30, 31).

The people (probably incited by the religious leaders) after their first surprise at the miracle, sought Him out in the temple and demanded a greater miracle. Jesus never put much dependence on those whose faith rested on miracles, and we do well to be careful of those who must have something spectacular going on all the time if they are to be interested.

They contrasted His miracle of one meal with the repeated miracle of the daily manna—the bread from heaven—under Moses. Jesus makes it clear that He is not in competition with Moses, for the manna came not from Moses but from God. Those who seek signs and wonders had better get their eyes off such things and get them on God who is the Giver of every good and perfect gift.

Their plea for heavenly bread gave Jesus the opportunity to tell them about the true bread from heaven.

III. The Bread of Life (vv. 32-35).

Feeding the body is important, but the real need of men is for spiritual food. Daily bread is a food that perisheth (see v. 27), but the "meat that endureth unto eternal life" is received by faith in Christ (v. 29).

Instead of a sign, or the passing blessing of daily sustenance, Jesus presents Himself as the bread of life which will eternally satisfy the deepest hunger and thirst of the human soul.

Those who teach that Christ is but our example, giving Himself as the spiritual bread to those who by development of character are seeking to be like Him, should read verses 47 to 51 of this same chapter. Here He makes clear that by the giving of His flesh in the death of the cross everlasting life comes to the believer.

It is only the man who eats of this bread, who by faith makes himself partaker of the death of our Lord, that can have eternal life.

This must be done in the right way—the way of faith. The people said, "Lord, evermore give us this bread" (v. 34). One wonders whether some of them did not say it scoffingly, and others perhaps still with the thought of daily bread for their bodies. Among them, however, were surely some earnest souls who that day saw the light of eternity through His wonderful words about the bread of life.

PATTERNS SEWING CIRCLE

1692-B

Girl's Jumper

WHEN she's the age to be "hard on her clothes" and wants to be smartly dressed, too—the answer is a jumper and blouse outfit. The jumper can be of sturdy stuff; flannel, corduroy or corded wool, so that it will wear and wear. Contrasting blouses will give variety and constant charm.

Barbara Bell Pattern No. 1692-B is designed for sizes 8, 10, 12, 14, 16 years. Size 10 jumper requires 1½ yards 54-inch material, short sleeve blouse 1½ yards 36-inch material.

Cat's Nine Lives

We speak of a cat having nine lives. Of course it is not true that cats have more lives than one, nor has it more persistent vitality than other animals, but it has the advantage that, even after thousands of years of domestication, it retains self-dependent instincts of preservation to a greater degree than, say, the dog or the horse.

A cat is more skillful in defending itself from attack, in avoiding accident and in treating itself when it suffers injury, because it has never been debilitated by too much dependence upon man.

But its actual vitality is no greater than that of any other beast.

1694-B

Midwinter Frock

PLAN a frock now, in bold striped material or fabric of vibrant solid color, to wear under your winter coat . . . it will brighten your entire outlook on the snowy season! And, what better style could you pick, for a dress to make at home, than this shirtwaist—with its straight, simple cut and few fussy details?

Barbara Bell Pattern No. 1694-B is designed for sizes 34, 36, 38, 40, 42, 44, 46, 48. Size 36, short sleeves, requires 4 yards, 39-inch material.

SNAPPY FACTS

ABOUT RUBBER

Driven under 35 miles an hour, properly inflated and on a car with wheels in alignment war tires of reclaimed rubber should rotate up to 10,000 or more miles of service. Care should be the watchword of the "war tire" user!

Rubber is considered one of the three most important strategic materials in war by officers in the Army's ordnance department.

Progress in reverse is the reopening of a street car line in Brooklyn, N. Y., that had been converted to motor buses several years ago. A war measure that will save 1,300,000 bus miles a year—and of course a relative amount of rubber.

Center, camber, toe-in and king-pin inclination are factors in wheel alignment the users are going to hear about now that periodic tire inspections are mandatory. They mean much to tire conservation.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

F. E. Beshey, of Garner, was in Klemme on business Friday.

Mrs. Fred Ridder was at Hampton Friday on business.

Miss Anna Sampson of Colesburg came last Friday for an extended visit at the Emil Patet home.

Mr. and Mrs. J. C. Thomas were at Belmont Monday morning to attend the funeral of a relative.

Mrs. Kenneth Johnson and children of Goodell were shopping in Klemme Tuesday afternoon.

Mr. and Mrs. Victor Waldek of Garner were supper guests at the home of Mr. and Mrs. Emil Patet Friday evening.

C. A. Larsen is absent from his place of business as he is home in bed. He came down with a case of mumps last Thursday.

Ed Jacobs returned to the store last week Wednesday, after being confined to his home for a couple of weeks, ill with mumps.

Mr. and Mrs. Wesley Patterson and baby daughter drove to Seneca Saturday and visited with his folks until Monday afternoon.

Mrs. J. I. Overholt left Tuesday for Washington, D. C. for several weeks visit with her son-in-law, John Lament and family.

Mr and Mrs Henry Jost and Phyllis drove to Dougherty Sunday and were dinner guests at the home of Mr and Mrs Adriant Bielefeld.

Mr and Mrs Lyle Liebendorfer of Forest City were visiting at the R. A Jorgenson home Tuesday afternoon.

Mr and Mrs Henry Lewis and son, Duard visited at the home of Mrs. Laura Brooks at Clear Lake Sunday afternoon.

Mrs. Raymond Meyers of Mason City visited at the home of Mr. and Mrs C. A. Larsen the past week. Her husband is in the army and stationed in England.

Mrs. Byrnes Missman went to Belmont last week to help care for Grandpa Ely, who has been critically ill. Mr. Ely passed away Sunday night.

Mr. and Mrs Ole Ramsay and children drove to Webster City on Sunday where they were dinner guests at the home of Mrs. Viola Schlader and daughters.

Ed Jacobs took George Lawhorn to the Veterans Hospital at Des Moines Monday. Mr. Lawhorn entered the hospital for examination and treatment.

Friday the weather really warmed up and the snow began to melt, but not for long as toward evening cold again set in and sub-zero temperatures again set in.

George Dodd, tenant at the E. J. Arnold farm was taken to the Mercy hospital at Mason City last Wednesday for treatment. Mr. Dodd was ill with pneumonia.

Sunday dinner guests at the home of Mrs. Lena Schroeder were Rev. and Mrs. Calvin Grosshuesch, and Mr and Mrs Fred J. Arnold and son, Bobbie.

Hereafter the rationing office at Garner will be closed every morning, except Saturday, when the office is open all day. However, the office will be closed all day on each Monday.

Chris Gram, a former Klemme resident, and for several years the proprietor of a garage and filling station at Nora Springs, is reported to be seriously ill, at Cedar Falls, where Mr. and Mrs. Gram now reside.

Mrs. Conrad Quandt returned early Sunday morning from Wichita, Kansas, where she had spent a couple of weeks in the home of her son-in-law, Ernest Gerardi and family. She was called there at the time by the serious illness of her granddaughter, Gracka Maria. The little girl was ill with pneumonia, but is now well on the way to recovery.

Mrs. Eddy Medaus left last Friday for Iowa City to enter the University hospital for treatment.

Mr. and Mrs. Fred Schlichting have purchased the late Lew Lewis house and lots in Klemme and will move to town soon. Their son-in-law and daughter, Mr. and Mrs. Harold Lassahn, will operate the Schlichting farm.

Supt. John Micklick and family and family have rented one of Dr. Anderson's house in East Klemme where the Don Christiance family now resides. The Christiance family will move to their farm north of Ventura this spring.

Loren Gast, who is a student at Morningside College at Sioux City, has been granted a local preacher's license by the district conference. Mr. Gast, who is enlisted in the Army Air Corps Reserves, has also passed the examinations for that branch of service.

"No One Ever Comes Around To My House." That's the title of the fifth song in the smashing series of "Hits to be for '43" selected by the best-known bandleaders in the country. Try it with words and music. You'll find both in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Mrs. John Goll of Liberty township; Mrs. E. J. Schneider of Ell township; Mrs. John Chambers of Twin Lakes township, and Mrs. R. A. Jorgenson of Klemme were at Garner Saturday to attend a noon luncheon and meeting of the Christmas Seals Sale committees. The sale was considered a great success this year.

Shamrocks County Champions Second Consecutive Year

W. BRITT IN CLOSE GAME COUNTY TOURNAMENT

Shamrocks Waded Through Hayfield and Woden In Preliminary

The Klemme Shamrocks, coached "Pat" Patterson have hung up Hancock County basketball championship for the second consecutive year by winning over the Britt team in a closely fought, fast game in the finals, by the score of 21 to 19.

Shamrocks Never Behind

The Shamrocks stepped into an early lead on two speed plays in the first minute of play when Janky Bruce broke through for a basket on the next play Greiman tipped another through the net, making score 4 to 0 for the Shamrocks. Britt called time out to stop the Kreig.

Britt found the hoop once in the quarter which closed with the Shamrocks out in front 8 to 2.

They stretched this into a 12 to 2 early in the second quarter.

Britt could launch an offensive. From there on the Britt started whittling away and as half ended the score read:

Shamrocks 13, Britt 6

Britt came back in the third quarter to press the Shamrocks who tiring from the effects of two fought games and narrowed margin still more and at the end of the third the Shamrock held a 16 to 13 lead. But the battling Shamrocks played Britt on fairly terms and managed to ring the counters: a basket by Greiman and Jacobs and a free toss by Shuesch, to just about offset Britt baskets and two charity shots as the game ended 21 to 19 in favor of the Shamrocks.

Of the Shamrocks to give the County Championship the Shamrock scoring was fairly evenly divided throughout the game. In the first quarter Jacobs two baskets, Groshuesch and Eisman each one. Britt's lone shot was made by Eisman.

Second quarter put on the scoring spree Klemme in the second quarter two baskets and one free toss. Britt, Eisman tallied one basket and Beaman, one.

In the third quarter Klemme but three points, while Britt up seven. For Klemme a basket by Groshuesch and a free throw Greiman completed the count.

Britt, Eisman again scored a basket and Beaman and Hartzell got one, while Ford earned a free throw.

In the last quarter Jacobs and Eisman each got a bucket, while Groshuesch collected a charity shot. Britt, Eisman and Peterson dived from the field, while the Shamrocks also collected on a free toss and also got a free throw that counted.

Britt lost the game on their inability to cash in on free throws. Of 14 tries they only made 3. Shamrocks had 7 chances from free throw lane and made 3 of good. The Shamrocks, missed field goals, while Britt chalked field goals.

The game was clean, but fast, and fans really saw plenty of fast action in this game.

THE BOX SCORE

Time	FG	FT	PF	TP
Shuesch	2	1	4	5
Greiman	2	1	1	5

Our Men In The Service

LT J. F. BYRNES MISSMAN SOMEWHERE AT SEA

Dr. W. F. Missman received a letter Friday from his son Lt. J. G. Byrnes E. Missman. The letter contained little information as to the location of Lt. Missman other than that "I am in the middle of a lot of water."

Lt. Missman is a dentist in the Medical Corps and was stationed on the West Coast until his embarkation sometime ago.

PVT LOWELL MAU NOW AT LUBBOCK, TEXAS

Pvt. Lowell Mau, son of Mr. and Mrs. Lewis Mau, has recently been transferred from Victoria, Texas to Lubbock Texas. Lowell's new address is:

Pvt. Lowell Mau, 370 Base Headquarters, Air Base Squadron, F P A F F Ordnance Section, South Plain Army Flying School, Lubbock, Texas.

Another Klemme young man is also stationed at Lubbock: Lt. Ray A. Jorgenson, Jr., who is an instructor at the advanced flying school.

PVT. MARVIN LEMKE IS AT CAMP MAXEY, TEXAS

Pvt. Marvin G. Lemke, son of Mrs. Daisy Lemke, would like to get letters from his friends around Klemme. His address follows: Pvt. Marvin G. Lemke, Co. E, 40th Infantry, APO 102, Camp Maxey, Texas.

CPL. OTHO KERAUSE IN NORTH AFRICA

Cpl. Otho Kerause, son of Mr. and Mrs. W. C. Kerause, is with the U. S. Army in North Africa. Censorship regulations do not permit us to publish his address.

PAUL SCHULDT AT NORTH CAROLINA MARINE BASE

Pvt. F. C. Paul H. Scholdt, U. S. Marine Corps Reserve, is stationed at the Marine Base on Parris Island, North Carolina, where he is taking preliminary training to become an officer. Paul's address: P. F. C. Paul Scholdt, USMCR, Rec. Dep., Plat. 48, 8th Rec. Bn., Parris Island, North Carolina.

HERB BAILEY HAD GOOD FARM SALE

A good crowd of lively bidders was present at Herb Bailey's closing out farm sale held Friday. Everything sold at a good price and buyers were quick to place a high bid.

Mr. and Mrs. Bailey are retiring from the farm, but are undecided as to where they will locate permanently.

Following are the games played in the tournament held at Britt.

FIRST ROUND

Woden 24, Corwith 21.

SECOND ROUND

Britt 25, Goodell 15.

Crystal Lake 22, Kanawha 20.

Klemme 59, Hayfield 27.

Woden 29, Garner 25.

SEMI-FINAL ROUND

Britt 31, Crystal Lake 17.

Klemme 49, Woden 26.

FINAL ROUND

Consolation Game: Crystal Lake 26, Woden 14.

Championship Game: Klemme 21, Britt 19.

BOY SCOUTS MEAN BUSINESS

Scouting's Job in '43 TOUGHEN UP BUCKLE DOWN Carry on to Victory

BOY SCOUT WEEK February 1-7

"Toughen up, Buckle down, and Carry on to Victory" is the Boy Scout major task this year. Their 1,574,000 members are in the conflict to the hilt on the home front, doing everything boys of Scout age can do to help win the war speedily and a just peace permanently.

This One Should Be A Real Thriller

BIGGEST GAME OF THE YEAR HERE FRIDAY NIGHT

With One Game Each, This Will Be The Pay-Off Game

The biggest game on the Shamrock schedule and the best attraction in North Iowa for this Friday night will be staged at the Klemme gym when the Britt high school Eagles come over to try to stop the Shamrocks' winning streak.

In an early season game the Britt Eagles defeated the Shamrocks in a hard fought game 21 to 16.

The Klemme Shamrocks met the Eagles in the county championship finals and lugged away the trophy by beating Britt 21 to 19.

That made it one win, but the Shamrocks still have the long end of the deal by winning the championship. The Eagles from Britt say they can take the Shamrocks Friday night.

Come out and see!

DORANCE GRANGE CALLED INTO ARMY AIR CORPS

Dorance Grange, former Klemme young man, and the only son of Mr. and Mrs. Paul Grange of Mason City, left Tuesday of this week for San Antonio, Texas to enter the Army's pre-flight school in aviation. There he will attend the army "ground school" in aviation and later will begin actual flying. In approximately thirty weeks he will graduate as a pilot, receive his coveted wings and be commissioned a Second Lieutenant in the U. S. Army Air Forces.

Dorance is a graduate of Klemme high school, and took an active part in athletics.

After graduation he attended the Junior College at Mason City one year and then attended Iowa State Teachers College for a little over a year, fitting himself for a career in aviation.

Iowa loses annually an estimated 50 million dollars because of improper handling of barnyard manure. One of the chief means of losses is through leaching because not enough bedding is used or because of rains washing out the soluble portions.

WAYNE CHAMBERS MARRIED JANUARY 23 IN WASHINGTON

Wayne Chambers, son of Mr. and Mrs. John Chambers, and Miss Nancy Radley were married on Saturday evening, January 23rd, 1943, at Squalmie, Washington.

The ceremony was performed in the home of the bride's uncle and aunt, Mr. and Mrs. J. N. Davis. Wayne graduated from the Corwith high school and Iowa State College.

For the past couple of years he has been with an engineering group in Alaska working on Government project. Wayne was at Dutch Harbor at the time it was bombed by the Japs.

Wayne has been called back from Alaska and is now going into the U. S. Army.

SCOUTS AND PARENTS WILL HAVE POTLUCK SUPPER

Fred Misal Will Speak; Dr. Phillips Will Present New Charter

Klemme Boy Scouts, Scouters, and parents of Boy Scouts, will get together Wednesday evening, Feb. 10th at 6:30 o'clock for a pot luck supper and program at the high school gym.

Fred C. Misal, county auditor of Garner, will be the principal speaker, and Dr. E. H. Phillips of Garner will present the new charter for the year 1943.

Mr. Wesley Patterson, the Scoutmaster of Troop 56, Klemme, will act as the master of ceremonies.

It is hoped that every Scout in the troop and the parents of Scouts will be present, along with members of the Troop Committee and their wives in this anniversary get-together.

LIMESTONE WILL COME FROM FERTILE

The Limestone Products Co. from Fertile, was the low bidder on Agricultural Limestone to be delivered and spread on farms in Hancock County in connection with the 1943 AAA Program.

The price per ton ranges from \$2.60 to \$3.20, depending on the distance from the quarry to the township.

IOWA'S RATION CALENDAR

Tires:

Class A Ration: First inspection deadline - March 31.

Class B, C, or bulk coupon Rations: First inspection deadline - February 28.

Commercial vehicles inspection deadline - February 28.

Gasoline:

"A" book coupons No. 4 (4 gals. each) expire March 21.

Period 3 coupons (11 gal. ea.) expire Feb. 22.

Period 4 coupons (11 gals. ea.) valid Feb. 2 until April 17.

Coffee:

Coupon No. 28 (1 lb.) expires February 7.

Sugar:

Coupon No. 11 (3 lbs.) valid Feb. 1, expires March 15.

Registration:

Date of registration for War Ration Book Two will be announced soon.

RATIONING OFFICE HOURS

The Hancock County Rationing Board Office, located in the Court House at Garner, is open every afternoon except Monday. The office is open all day Saturday. The office is not open any morning except on Saturday.

FRED BACHMAN TO HAVE FARM SALE FEB. 16

Fred Bachman will have a closing out sale at his farm south-east of Klemme, Tuesday, February 16. He will offer a complete line of farm machinery and livestock.

Look for Bachman's sale advertisement in The Times next week.

HANCOCK 4-H LEADERS ATTEND TRAINING SCHOOLS

Ell, Liberty And Concord Townships Represented

4-H Leaders from Ell, Liberty and Concord townships attended a 4-H Training School on "Home Efficiency" at the Farm Bureau office in Garner on Thursday, Jan. 28.

Miss Esther Everett, Iowa State College Specialist, had charge of this meeting. Mrs. C. J. Wille, of Klemme, County 4-H Chairman and Miss Ruby Schram, County 4-H Music Chairman, also attended this meeting.

On Friday, January 29, Miss Everett conducted a training school at the Hayfield school. 4-H Leaders from Bingham, Ortherl and Madison townships attended this meeting. Two county committee members, Mrs. D. E. Keat and Mrs. Lyl Fox attended this meeting.

Accident prevention and fire prevention in homes was emphasized. It was decided that each girl should make a home inspection to try and eliminate fires. In Hancock County there are 3 1/2 fires per thousand farms annually. This is a fairly good record.

Simple business procedures were discussed. Miss Everett stressed the importance of writing checks correctly and pointed out many mistakes that are often made on checks.

The specialist also showed the group how to make simple household repairs. They learned how to repair electric cords and how to make other simple household repairs.

You can get V Mail Letters to send over seas at The Times Office. Package of 10 for a dime.

WINTER IS CRITICAL PERIOD FOR WILDLIFE

Pheasants Winter Killed During 1940 Armistice Day Blizzard

At the close of the past hunting and fishing season, Iowa's fish and game inventories were the highest in modern times, but with the critical winter period at hand, sportsmen and game officials await with bated breath the coming of spring and the end of the "winter kill season." Already isolated reports of winter loss of fish and game have reached the State Conservation Commission, and the most dangerous days of winter are yet to come.

The most common victims of winter kill are pheasants and quail, and fish in shallow lakes. Generally the pheasant loss is caused by sharp, sudden storms during which zero temperatures, high winds, and fine snow cause ice to form on the nostrils and in the throats of the birds, causing suffocation. Except in rare instances, pheasants in good winter cover do not suffer from this cure of the pheasant tribe. However, maximum populations of birds cause many to winter where cover is insufficient.

Winter losses of quail are caused generally by a shortage of cover in the immediate vicinity of good quail cover. Heavy snows and ice which cover feed for long periods cause considerable quail loss. When such a condition exists, emergency winter feeding often prevents loss of large numbers of quail that otherwise would perish.

Winter fish loss is generally caused by suffocation because of lack of dissolved oxygen in the water. Ordinarily the loss occurs in shallow lakes that contain heavy masses of decaying organic material or heavily polluted by sewage or industrial wastes. When the ice freezes and is covered with heavy layers of snow, sunlight is unable to penetrate and stimulate the oxygen-producing activities of plants. At the same time gas from the decaying organic matter absorbs the surplus oxygen, and the water finally reaches the point that it will no longer support fish life.

There has been no practical method discovered for supplying oxygen during the critical winter period, and the only method by which some of the shallow lakes can be made to support fish life during winter is by a long-time program consisting of dredging, rough fish removal, and elimination of pollution.

WEEKLY NEWS ANALYSIS

Ickes Cites Small Business Peril; Congressional Pay-as-You-Go Tax Program Gets Treasury's Approval; Fifth Russ Offensive Batters Nazis

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Somewhere in China this soldier of Generalissimo Chiang Kai-shek's armies stands guard before a line of American P40 planes at an inland air base. His shift is 24 hours at a stretch in guarding these precious craft that hold off Jap advances in China.

PAY-AS-YOU-GO: Tax Gets Go-Ahead

It had been clear that official Washington from Capitol Hill to the White House had agreed that a pay-as-you-go income tax was the most effective means of raising the multi-billion revenue needed to help defray war costs.

How to apply the levy to the nation's 35,000,000 taxpayers and what yardstick to use had been the subject of numerous recommendations. The treasury department gave its support to a bill by Sen. Bennett Clark for a new 19 per cent withholding tax. Added to the prevailing 5 per cent Victory tax this would mean a total of 24 per cent withheld from payrolls.

Under the Clark program the pay-as-you-go plan would be inaugurated March 15. The taxpayer would file his income tax return on that date and pay his first quarterly 1943 taxes on the basis of his 1942 income. The withholding tax would then be effective on weekly or monthly paychecks, as well as on income from interest and dividends.

Persons not on payrolls such as farmers, independent business men, professional people and others could pay their taxes on a monthly or quarterly basis.

FOOD PRICES:

Index Up 43 Per Cent

Skyrocketing retail prices of fresh fruits and vegetables, whose cost is not controlled by the OPA, were largely responsible for an increase of 43 per cent in the food cost index since August, 1939, the month before World War II began, according to a summary released by Secretary of Labor Frances Perkins.

Even since the price control law began to operate last spring, Mrs. Perkins said, retail food prices have gone up because of the increases in the cost of items still uncontrolled. The index in December was 9 per cent above last May and 17 per cent above December, 1941, the month the United States entered the war.

NORTH AFRICA:

War vs. Politics

As French forces broke the lull in North Africa's stalemated war by capturing a number of passes on the road to the Tunisian seaport of Sousse, so, too, it appeared that the French had moved effectively to end the political strife that had hampered all-out action against the Axis.

The importance of the French drive toward Sousse was that it threatened the Axis land supply routes for operations in central and southern Tunisia.

On the political front Harold Macmillan, British minister for North Africa, predicted an agreement between Gen. Henri Giraud and Gen. Charles de Gaulle, leader of the Fighting French, would remove most of the objectionable features in the present administration of North Africa.

A three-way conflict of interests had raged since the American invasion. On one side stood the Liberals and Republicans, who had welcomed the Americans. On the other stood the Vichyites and Fascists. In between were the Royalists, attempting to capitalize on the battle.

HIGHLIGHTS . . . in the week's news

LONDON: King George signed a proclamation lowering from 20 to 19 the age at which women are liable to be drafted for national service. Single women born between July 1 and December 31, 1922, will have the privilege of choosing between work in war industry and the uniform services, or they may volunteer for nursing before being called up for national war work.

NEW HAVEN: Yale's historic campus became a place of marching commands and shouted commands when the army air force technical command school established its biggest cadet training school here for men who will keep Uncle Sam's planes in condition to fly and do photographic and communications work necessary to plot their way. 3,000 officer candidates will be quartered.

SULLIVAN BROTHERS:

A Tale of Heroism

The five Sullivan brothers of World War II promised to become as celebrated in American annals as the five Bixby brothers of the Civil war, immortalized by Abraham Lincoln's letter to their mother.

Not yet was it known whether the Sullivan boys were dead or alive, but a navy communication to their parents in Waterloo, Iowa, ominously reported them "missing in action." The brothers joined the navy to avenge a friend slain at Pearl Harbor. They were shipmates at their own request and were believed casualties of the cruiser Juneau sunk in the November battle for the Solomons.

The Sullivan brothers are George T., 29, gunner's mate second class; Francis H., 26, coxswain; Joseph E., 23, seaman, second class; Madison A., 22, seaman second class; and Albert L., 30, seaman, second class.

ROAD TO TOKYO:

Mired by Rains

The road to Tokyo was bogged down by tropical rains that turned fighting Allied sectors in New Guinea into swampy mires, but in the air American and Australian commanders broadened their air offensive against the Japanese with raids on four main bases.

On the Allied air calling list were Madang and Finschaven on the northern New Guinea coast. Flying Fortresses supported by medium bombers and fighter planes struck likewise at Lae and Salamau. In the Lae area 160 miles up the eastern New Guinea coast from Allied-held Buna, large fires were started among barges, stores and harbor installations.

In the Solomons, the plight of the Jap garrisons had grown more serious as efforts to land extensive supplies had been balked by American air power. The navy department reported that a three-day offensive on Guadalcanal island had progressed satisfactorily, with several Jap positions isolated and awaiting destruction. Air raids were continued against Munda island.

NAZI HOME MORALE:

Signs of Strain

Volumes had been written by Allied commentators about the state of the German home front since the Russ offensives, but two brief statements by high Nazi officials revealed the enormously heartening fact that Reich morale had at least begun to creep.

The Nazi officials were Dr. Paul Joseph Goebbels, propaganda minister, and Gen. Kurt Dietmar, a leading German military critic.

Writing in the magazine Das Reich, Goebbels denounced civilian "sluggards" for impeding Nazi war

PAUL JOSEPH GOEBBELS
Propaganda in reverse.

activities, called for more belt-tightening and announced that "burdens on the home front can and will be increased."

General Dietmar said that whether they like it or not, Germans would have to put up with new restrictions to provide more troops. He admitted that the Russians had broken through German lines on the southern front, and that the situation was becoming serious. "The need has come for still greater hardships at home," he said, "to increase the flow of recruits to the front."

NAVY MAIL:

To Be Speeded

Because the problem of mail deliveries to men in the navy, marine corps and coast guard has been complicated by the vast increase in personnel, the navy department announced that two rules would be placed in effect immediately to insure prompt service:

Parcel post packages must weigh not more than five pounds and measure not more than 15 inches in length and 36 inches in length and girth combined. Inappropriate second and third class matter such as advertising circulars would not be forwarded to men overseas.

WAR PRODUCTION:

No 'Self-Congratulation'

War production and manpower management have alternately been subjects for national praise and blame. The latter was the theme of a report laid before congress by the Tolan committee, which charged "general maladministration," "haphazard handling" and failure to use small industry in the war effort. The committee had been at work for a number of months studying war output.

Washington, D. C.

REVISE WARSHIP PLANS

Due in part to the fact that the U. S. navy had not had opportunity to profit from the experience of engaging in any major naval battles between 1812 and 1942, some of our biggest and fastest ships now under construction are being revised.

The main factor being changed in the blueprints is extra precaution against fire.

This is the lesson learned from the aircraft carriers Wasp and Lexington, and the cruiser Boise, all swept by fire after the direct damage of battle.

Since then the bureau of ships has made a study of fire hazards, finding that even an all-steel vessel can be swept by fire when tremendous heat is engendered, as from exploding shells and burning oil and gasoline.

New plans call for elimination of linoleum flooring, substitution of spun glass for cork in insulation, decrease in paint, and elimination of interior woodwork. Also, there will be larger fire hose and better fire fighting equipment generally.

Navy hopes to put an end to the grief of losing ships by fire after they have survived the battle.

Note: In the War of 1812, fire was a real hazard to wooden ships. But in the Civil war the only real engagement was between the Monitor and Merrimac which were not much bigger than modern escort vessels. In the Spanish-American war, there were no real naval battles and only one life was lost at Santiago, when an American sailor fell down a hatch on the Texas. In the World war, the U. S. navy got in too late to participate in any naval activities other than convoy work.

FDR'S SURPRISE

One thing that didn't get out about the "surprise" party at the White House for Speaker Sam Rayburn, on Sam's 61st birthday, was a little frill added by the President.

Rayburn was called to the White House with other congressional leaders ostensibly to discuss the legislative program for the new session. But when the group arrived, all but Rayburn were ushered into the private office of Economic Stabilizer Jimmy Byrnes.

The speaker was told that the President wished to see him alone for a few minutes.

The two men discussed legislative problems for a few minutes. Meantime, the President was keeping a sharp eye on the clock. Suddenly he broke out:

"Sam, the reason I asked you to come in here alone was to discuss a personal matter that has been worrying me."

Rayburn eyed him curiously, said nothing.

"It's about you, Sam," continued the President without batting an eyelash. "We're old friends and I feel I can talk to you frankly. I've got reports from Capitol Hill that the Democrats are dissatisfied with your leadership. They think you're getting too old to be speaker."

At that precise moment, Democratic Congressman Cliff Woodrum of Virginia, Bob Ramspeck of Georgia, Republican Leader Joe Martin of Massachusetts, Rep. Jim Wadsworth of New York and other house members burst into the President's office, led by Jimmy Byrnes.

Together they began singing "Happy Birthday to You" at the top of their voices.

"That was perfect timing, fellows," beamed the President. He had planned it all very carefully himself.

JOE MARTIN VS. SAM RAYBURN

Privately Republican Leader Joe Martin never had any intention of letting the Republicans organize congress and elect him as speaker. Until 1944, this responsibility is the last thing he wants.

However, the canny Republican leader took keen delight in keeping the opposition guessing and carried on his little joke until the very last.

When he marched into Speaker Rayburn's office with the committee that was to escort Rayburn to the floor, following his re-election, Martin was grinning from ear to ear.

"Sam," he said, "I've got some bad news for you. I hope you can hold up under the shock. You've been re-elected speaker."

MERRY-GO-ROUND

Jeeps which have been delivered to Mexico from the United States have earned the nickname "las cucarachas" (the cockroaches).

Undersecretary of War Patterson is so busy he has to send a messenger out to buy his shoe laces.

Under current military rule in Hawaii, the army takes about \$1,500 monthly from the civilian government's budget and uses it for propaganda and publicity to keep itself in power.

Soldiers and marines on Guadalcanal may not be aware of it, but one thing they are fighting for is rubber. As soon as our position in the Solomons is stabilized it will be possible to start gathering wild rubber. The amounts will be small, but a symbol of what we can get when we begin the reconquest of the great network of Pacific islands.

WALTER WINCHELL is on a tour of duty outside Continental U. S. During his absence, contributors will substitute.

Some Items Which

WE SHOULD KNOW ABOUT THE JAPS

By James R. Young

Who Was 13 Years in Tokyo for INS.

MAYLING SOONG FOUNDATION, honoring the First Lady of China, established by her many friends in this country, has been given further impetus by Wellesley College alumnae on her arrival here 25 years after her graduation.

TWO JAPS, former students in the United States, are reported handling the 12,000 man Jap invasion army units in Northern Japan. These men would specialize in a follow up, after combat troops, in commandeering radio stations, telephone switchboards, gasoline stations, highways, railways, bus lines and power houses. One is Lieut. Henry Shimomouchi, a former San Francisco resident, and as of Dec. 7, 1941, in charge of Japan's so-called cultural society in Rockefeller Center. The other, Capt. Frank Matsumoto, was athletic director of Waseda University in Tokyo who entertained visiting American college and professional athletic teams.

A BICYCLE, the chief means of transportation in Shanghai, now costs \$10,000 in Chinese currency. The Japs, pre-Pearl Harbor, were the world's largest bike manufacturers, making them from processed American scrap at \$3 apiece and selling them on a one year installment plan to the natives of Indo-China, Siam and Malaya. In the drive on Singapore, Bangkok and Rangoon, the Japs seized the bicycles and literally peddled their way through the peninsula. Tokyo has an estimated 2,200,000 bicycles. Few have coaster brakes, which are the costliest part. The ingenious Jap manufacturers decided to leave off the expensive part—if you want to stop, fall off.

THIS WINTER Shanghai will witness hundreds of deaths from freezing and insufficient food. The European refugee colony, numbering several thousands, will suffer, too. The Japs, last Winter, seized all wheat and rice, and sealed Red Cross supplies—not one ounce or a single bottle of medicine was permitted in use. The Japs prefer to have thousands die in Shanghai's below zero weather than survive and require to be fed.

CHILEANS are being told by the Jap ambassador down there that if their country breaks with the Axis, Japan will bomb the long shore line. Japan for years was one of Chile's great nitrate buyers. In return the Chileans obtained Jap cotton piece goods, pottery, rayon, uniforms and military equipment. Boatloads of Chilean nitrate, sold by a British controlled company, went to Japan in return for munitions and agriculture. Now we must use nitrate on the Japs in the Pacific. Just as our oil and gasoline have taken the Japs to the Solomons and the Aleutians. Or, as Dr. Lin Yutang explains the paradox, we sold the Japs the Ninth Avenue Elevated so they could make bullets. Now we have torn down the Second Avenue Elevated to make bullets to fire back at the Ninth Avenue train.

HOUSE FOREIGN AFFAIRS

committee should include besides Clare Boothe Luce, a famous medical missionary from China, Dr. Walter H. Judd, elected from Minneapolis. He was one of many warning us years ahead of Japan's method of attacks. Possibly the Luce-Judd combination might shake down some of the mentally stagnated members of the State Department. And here's a tip: These Chinese are indignant that we have not cleaned house in the Far Eastern division of Mr. Hull's department, a year after war started. We'd better clean those career barnacles from the ship of state, if we expect future co-operation from the Chinese.

RAY KINNEY, the coast to coast

Hawaiian bandman who recently played to a \$22,000 house in Chicago, knows Hawaiian legislative work. He worked as a page boy in the Territorial halls. His brother is an outstanding authority on Japs in Hawaii and published a book 20 years ago which was suppressed because it revealed Jap plots and intrigue in illegal immigration work.

SIR GEORGE SANSOM, one of

the few British officials really familiar with Japan, has been appointed economic expert on Far Eastern affairs to the British Embassy in Washington. His counterpart in the American Embassy in Tokyo was Frank Starr Williams. Both Sir George and Frank Williams were outstanding authorities on Japan's plans for war—but few wanted to listen to them, especially the cotton people who were selling the Japs on credit and wanted Williams to help collect their bills!

SNAPPY FACTS ABOUT RUBBER

The first known rubber hose was manufactured in England in 1827.

Collapsible rubber boats equipped with paddles, bullet-hole plugs, sea anchor, water, etc., are being produced for fighting U. S. airmen. In 1910, this boat formed part of the pilot's boat and darts with him when he hits the water.

An Omaha, Neb., tire salesman hauled into court before returning for parking his car near a hydrant first talked himself out of the \$2 fine, then sold two new tires to the judge, two to the cop who arrested him and two to the court attendant.

Production of War tires is definitely tied to the production of reclaimed rubber. It is estimated that the country has refining capacity to process 360,000 tons of reclaimed a year.

Rubber authorities estimate that 900 million tires have been scrapped since World War I.

ix Million Farmers Pledge Co-operation In Nationwide Campaign for More Food

Committee Is Elected To Study Various Production Plans.

Eyes of the nation are on the American farmer this month. What's he doing to merit all this attention?

Why nothing at all, except making plans for an even better production job in '43 than he did last year—and '42 broke records for production and left!

Farm Mobilization day in mid-month set in motion a coast-to-coast plan for getting the most from every acre. Demands on the farmer and his land will be heavier than ever, but shortages of labor and materials will be met. That means that many farmers will have to produce still more to meet the goals.

When the nation-wide sign-up men, land and livestock already under way is completed, the farmer will know what he expects from his "food and fiber" on 6,000,000 farms.

Farm Mobilization day began the greatest campaign for food production in the long and meritorious history of United States agriculture.

Farmers assembled in groups all over the nation on that day for special meetings at which the national local production situation was discussed. Production goals for each locality were studied, and the farmers part in meeting goals for his land was shown in its relation to the entire war contribution of agriculture.

Keynote of the farm mobilization program was set in a national program on January 12. Government officials and high ranking officers of the armed services were among the speakers. A Minnesota farm woman whose son is fighting in Algiers told of her doing to meet food production goals, and a county war chairman from Illinois represented the farming man.

Explanation of the importance of the farmer's goals to the strength of Americans at home, and the freedom of all the United Nations, is expected to bring a clearer appreciation of his problems among organizations and the people at large. Many groups will pledge co-operation and support the farmer's efforts to meet these problems.

Immediately following the Farm Mobilization day meetings, farmer committeemen elected by farmers themselves began visiting each farm to help the operator work out his individual production plan. At the same time, a survey of his labor, machinery and other needs is being made. Each plan, when completed, will represent that farmer's share in national production goals.

Agriculture's "1943 Farm Plan" is set up on a single sheet the crop acreages for 1942 and the new 1943 plan for each farm on war crops such as soybeans, peanuts, toma-

Clarence Wink (right), whose farm is in Potter county, near Amarillo, Texas, signing up for planned production. Aiding him is John Cotten, AAA county committeeman.

atoes, peas and potatoes, and acreages on other crops such as feed crops for grain. The farmer's "intentions" for livestock, poultry and hogs for slaughter are indicated, and the same single sheet contains information regarding allotment crops (tobacco, cotton, wheat, rice, peanuts and corn) necessary to enable the Agricultural Adjustment agency to determine eligibility of farmers in all regions of the country.

Copies of these "Farm Plan" outlines are kept in the office of the county committeeman, and referred to by the farmer.

When springtime rolls around such scenes as these will be multiplied a thousand times. American farmers by then will be on their way toward a successful completion of their designated job.

ence will be made to them by the department of agriculture war boards in determining the individual farmer's labor, transportation, gasoline, machinery and other production requirements, and the greatest possible local assistance that can be given to him.

January and February are the months when the production pattern for the year is developed in its entirety, and to a large extent the planning and organization taking place at this time will forecast whether or not national goals will be met in '43.

The most critical food production year in history requires careful planning if there is to be enough for everyone.

Farmers will have to continue the co-operatively managed program they approved and followed last year, with harder work and longer hours ahead. Civilian consumers will have to follow a co-operative program of their own, so that fathers and brothers and daughters in the armed forces of all the United Nations may be assured the food and clothing they need while they are serving on far-flung battlefronts.

United States military needs in '43, plus cargoes for food ships crossing the seven seas to aid fighting Allies, are expected to take one-half again as much as was demanded in '42. About one-fourth of the anticipated total food production must be earmarked for this use.

One-half of all canned vegetables and one-third of the billions of eggs gathered during the year will go off to war. Over 25 per cent of total meat production will join the ranks, together with the products from other millions of acres.

It is easily apparent that farm production goals and how well they are met will play a vital part in the progress of the war.

This should give Mr. and Mrs. U. S. Citizen on the home front a keen interest in what the farmer expects to do in 1943 and how he is

going about the business of achieving his expectation.

Greater emphasis is on the new production goals is on farming for war needs. It's going to be a tough year for the farmer, this 1943, because increased labor and machinery shortages will demand more of each remaining farm worker as well as a pooling of equipment for the widest possible utilization of available mechanical aids.

The remarkable 1942 production record of America's farmers took careful planning and co-operation. Most of all it took a lot of hard work on the part of these soldiers of the land.

Mobilization of all his forces is the farmer's answer to the new challenges he must meet before his 1943 goals can be realized. He won't be trying to do the impossible, because he doesn't recognize the existence of such a word as applied to agriculture in wartime.

Food is needed and the farmer will produce it. That's all there is to it, so far as he is concerned.

If he gets a little recognition and appreciation it will make his work seem easier, but—

He's producing Food for Victory. That's honor enough for him.

Nation's Farms Provide Needed War Materials

New Emphasis Is Placed on Crop Conversion.

Much deserved publicity has been given to the converting of industries such as automobile manufacture to war production. Vivid pictures have been drawn of the "change-over" of machinery to new high-speed aircraft work, for example, and of the rapidity with which these changes have been made.

Farmers have been making just as abrupt—and often considerably more sweeping—conversions to assure their best possible contribution to the war effort.

Farm products have been utilized by industry all along, but new emphasis has been placed on this aspect of agriculture since it became necessary to replace imports with things produced at home, and increase production of crops already in use.

When the farmer starts raising hemp he is entering a new type of production that requires careful study and intelligent application of efficient methods. He's growing hays and hawthers for the navy, and it's up to him to replace the millions of feet of lines that once came thousands of miles from the Philippines.

Drug plants, such as belladonna and henbane, and the trees from the bark of which comes quinine, are being raised in increasing quantities to take the place of former imports that are vital to the lives of soldiers and civilians alike.

War activities used to refer mainly to muskets, bayonets and cannon. Not so today. Now in the front line is placed farming. Food is not only a weapon in itself, but the farmers' fields are also providing needed materials of war.

Cotton Production Up

Texas was one of several states which produced more cotton in 1942 than in the preceding year to make up the department of agriculture's December 1 estimate of a total crop in the belt of a little less than 13,000,000 bales.

According to the A. and M. College Extension service, Texas farmers increased their acreage by 405,000 over the 8,118,000 acres of '41.

THE WILL OF HUMPHREY Z. CLEEK

I, Humphrey Z. Cleek, being of sound mind, do make this my last will and testament. I hereby give and bequeath:

To my wife, Zenobia Cleek, my old five-passenger coupe in the hope she may get tires for it after the war; the two gallons of gasoline left in the tank at the time it was put up, and the road maps which I wish her to keep if only in memory of the happy days when they meant anything. I also give to her the car battery in the sincere hope it is not too far gone to be charged up, the six (6) cans of assorted soups which will be found in my strongbox at the Mercantile Trust company, the can of hash which is in my safe and the three (3) tins of sardines which she will find behind the clock in the kitchen. Also all can openers in my possession.

II

To my daughter, Allagala, the four (4) cans of peaches, the two (2) cans of sauerkraut and the small can of tongue which was left me by my late Uncle Frisby, and the pre-war jar of pitted cherries which I won as first prize in the 1942 Toopsey Heights Golf Club Fall Tournament.

III

To my older son, Buckingham, my original Hochstetf oil painting "Gentleman Eating" and my Gabby still-life "Tenderloin Steak," the mere inspection of which has meant so much to me in the last few months.

IV

To my younger son, Chidsey, my watch, the old family carving knife so reminiscent of better days, and my collection of American restaurant menus, with the request that he treasure especially the ones showing dollar table d'hôte meals and 40-cent luncheon specials with meatballs.

V

To my sister, Phronisia Dibbels, the Cleek family coffee pot, which will be of much value as an antique, in testifying to the life of a bygone America.

VI

To my cousin, Zeke Fetherstone, the old tire which now hangs in the garage and which can be retreaded in more opulent times.

VII

To my aunt, Ella Belle Burpey, the second-string percolator, not because of any possible utility, but for whatever sentimental value it may possess for her.

VIII

To my nephew, Gideon Bloodworm, my oil ration card. It was never any good to me, but he is a man of energy and determination and may be able to do something with it.

IX

To Samantha McCarthy Persky Schmalz, maid in the Cleek household for the unusual period of almost seven successive weeks (unless she shall have carried out in the meantime her threats to go to work in the powder mill), any lamb chops that may be in the icebox and a half-pound of butter in appreciation of incredibly long service in my household.

Signed,

HUMPHREY Z. CLEEK.

Codicil.

Having overlooked it inadvertently in the above, I wish that any sugar and such grains of coffee as may be anywhere in my possession go to my wife outright. I also leave to her, in trust, my 1934 Eagle bicycle. Nothing can prove of greater value to her in the present shape of things.

FAIR WARNING

Of little things so much depends; Beware of false acclaim. So watch the guys who pose as friends,

Yet mispronounce your name. —MERRILL CHILCOTE.

OPA has cracked down on bowling alleys now, making them reduce their rates. They were only making pin money, as it was.

Motorists are going to be rolling their own if the gas shortage continues much longer.—Joe Nolan.

"Winter may be difficult."—Herr Hitler.

The understatement of the month.

"We have not done the slightest thing to France, England or even to America."—Adolf Hitler.

Now, come Adolf, don't you remember that time you dropped ashes on the parlor rug?

Henderson came in like a lamb but he is going out like a Leon.

"It's hard to think of the fuel oil mess today and realize that this administration was once accused of 'turning on the heat,'" says Elmer Twitchell.

FORWARD LOOKERS

A wise old droop

Was Chester Lowe:

He sold his car

Two years ago!

If you're out in an auto today the burden of proof that you should not have your gas card revoked is on you, should a policeman hold you up. Elmer Twitchell was stopped this morning and his alibi was that he was driving down to the ration board to see about coupons for getting a horse.

Japan's Secret Weapon

By Robert Bellaire

(WNU Feature—Through special arrangement with Collier's Weekly)

All the Japanese people have been taught that morale, the willingness to sacrifice, will win the war. They believed it before Pearl Harbor, and what has happened since has convinced them. This conviction, a national faith in morale as distinguished from blind confidence, is their "secret weapon," and every Jap, from the youngest school child to the oldest peasant, is armed with it.

He is undergoing, with scarcely any complaint, discomforts and privations which would bring yelps of anguish and indignation from almost any other country in the world. Take a brief look at the Japanese standard of living, which has declined to a mere subsistence level, and compare it with our own pampered existence.

Japanese civilians are eating one-third as much as they did ten years ago. All food is rationed at that level. Sometimes housewives must wait six and eight hours in line to get their meager rations. This is not so much a matter of food shortages in Japan. Essentially, it is a matter of conserving by 66 per cent the manpower and transportation facilities which would be required to bring food to civilians.

How Clothes Are Made.

The manufacture of civilian clothing from wool, cotton, linen and even silk is forbidden by law. All clothing must be made of sufu—artificial material derived chemically from wood pulp. This clothing is rationed to the point where the average Japanese barely manages to keep clothed. It is not attractive. It is not even durable.

The official Domei news agency reported recently that the grasshoppers were eating shirts of this material right off the backs of the farmers in the fields. But this clothing has permitted Japan to divert 90 per cent of her vast textile industry to the production of war materials.

Japanese shoes are now made of cardboard and rationed at the rate of one pair per year. They will wear about a month. When they are gone, nothing is available but wooden shoes and grass sandals.

Japanese Transportation.

The use of private automobiles for any and all purposes has been abolished. Buses and streetcars have been reduced to the point where only half the city workers and students can ride to the factories and schools. The others walk, often eight to ten miles a day. A government permit is required to buy a railroad ticket, and the journey must be necessary.

The Japanese worker never had a 40-hour week. He had a 75-hour week, but now it is a 98-hour week, with one Sunday off each month. All workers are registered. They accept assignments for training and duty exactly as if they were in the regular army.

Jap Heat Rationing.

This winter, the Japanese civilian will be rationed only enough charcoal to heat his home for 28 hours. He is advised to use this fuel two hours daily during the two coldest weeks of the winter.

Office buildings and government structures have had no heat for several years. Trains will not be heated, nor will buses. Japan has the wood to produce enough charcoal for all. But that would take time, manpower and transportation.

The consumption of gas, water and electricity in all Japanese households is set by law, at a fixed rate of about 30 per cent of prewar consumption. If the quotas are exceeded, a heavy fine is imposed. If the offense is repeated, the offender is punished by having all his public-utility facilities shut off.

Japanese students have no leisure time whatever. All are registered by the government and assigned to war work after school hours and during summer vacations. They work in factories, on farms, on road building, on the docks, and as auxiliary police and firemen—wherever they can replace older men who can join the army.

Scrap-iron drives in Japan are not merely a matter of cleaning out garages and basements.

Even doorknobs and window screens are taken. Volunteers walk along the streetcar and railroad tracks with magnets attached to the ends of poles to collect the iron dust from the rails. From 50 to 95 per cent of a Jap's income goes into war bonds, taxes and compulsory postal savings.

The Japanese do not consider night life essential to civilian morale in wartime. All night clubs are closed to civilians. Bars are rationed to the point where they can be open for two or three nights per week, from eight to ten o'clock.

SAVE MEAT WITH TASTY ALL-BRAN MEAT PATTIES

Here's a grand recipe for these times! Delicious, nourishing meat patties—made with Kellogg's ALL-BRAN. Makes meat go further. Gives these patties a tempting, crunchy texture—plus all the nutritional benefits of ALL-BRAN—valuable proteins, carbohydrates, vitamins and minerals. Try it!

Kellogg's All-Bran Meat Patties
1 egg 1 tablespoon
2 teaspoons salt chopped parsley
¼ teaspoon pepper 1 cup milk
2 tablespoons ¼ cup catsup
1 minced onion 1 cup Kellogg's All-Bran
1 pound ground beef

Beat egg, add salt, pepper, onion, parsley, milk, catsup and All-Bran. Let soak until most of moisture is taken up. Add beef and mix thoroughly. Bake in hot oven (450° F.) about 20 minutes or broil about 15 minutes. Remove meat patties from pan. Add some milk and seasonings to drippings. Thicken slightly to make gravy. Yield: 5 servings, 2 patties each.

Farm Shelterbelt Yields Big Dividends

Ten acres of trees planted a quarter of a century or so ago to protect a farmhouse from the winds have also yielded a good crop of fuelwood, according to Jacobson, farmer near Culbertson, Mont.

Further, Jacobson said, the grove will in fine shape and he "could plant 1,000 posts right now without affecting the effect of their removal." Jacobson's original planting was of Norway poplar and willows, fast

growing but short-lived trees. Aside from protecting the farm home, he said, they yielded 75 cords of fuelwood and 1,200 posts during the 22 years from the time of planting to the removal of the last of the original trees.

When he cut a tree, Jacobson continued, he planted a new one in its place. The replacements were a mixture of the faster growing species and slower growing, longer lived species.

FOUR-YEAR TERM FOR COUNTY OFFICES

A bill to establish four-year terms for county offices has again bobbed up in the Iowa legislature. A similar bill came up two years ago and died in the house committee.

This year the senate has passed two bills, S F 64 and S F 65. The first bill has to do with the county boards of supervisors, while the latter deals with the terms of clerk, treasurer, recorder, sheriff, auditor and coroner.

Under these bills, however, elections would still be held every two years. The shift from two-year to four-year terms would take place in 1944 for all county offices except sheriff, auditor and coroner. These would shift in 1946. Thus, every two years we would still hold an election. One election would be for clerk, treasurer and recorder, and a supervisor.

We believe a four-year term has many good points to consider, both from the standpoint of the taxpayer and the man in public office.

Efficiency should result. The longer term would give the elected officials time to be more proficient. It takes a good share of the first term of two-years for an official to become thoroughly acquainted with his duties. He can go ahead with his work without worrying about the next campaign for re-election, which also reduces his own expense.

In this longer term the officer would be more independent of political pressure and would be in a better position to serve the taxpayers more efficiently.

Most of our forty-eight states in the union have four-year term, for county offices and it has proven out satisfactory.

We would not favor the bill if all offices were elected for a four-year term once each four years. It

Half-Effort Will Not Defeat Japan

By JOSEPH C. GREW
United States Ambassador to Japan until the outbreak of war, and author of "Report From Tokyo."

(Written for the Treasury Department in connection with the Retailers' "SAY YES" campaign to complete the nation's 100,000,000 partially filled War Stamp albums.)

WASHINGTON, D. C.—In describing one of the big air battles over Guadalcanal a recent newspaper account tells of an American flyer who parachuted from his crippled plane to the waters of Lunga Bay. The Navy craft which picked him up next went to the rescue of a Japanese pilot seen struggling in the water nearby. As the rescue boat reached the Japanese flyer he suddenly pulled out his revolver, aimed it at the drenched American pilot and pulled the trigger. The cartridge failed to explode. Then the Japanese officer turned the gun on himself with suicidal intent. Again he pulled the trigger and again his revolver failed him. At this point an American sailor knocked him out with a boat hook and pulled him aboard the American craft a prisoner.

Almost daily one reads eye-witness stories such as this one, and all of them clearly demonstrate that war with our enemy in the Pacific cannot end in compromise.

For ten years I lived in Japan. The truth as I know it from close observation is this: Nothing less than the exertion of our maximum capacities, individually and collectively, in a war of offense will bring our beloved country safely to the longed-for haven of victorious peace.

JOSEPH C. GREW
Says It's Fight to Finish

From the flood of eye witness accounts of atrocity and bestiality one fact shines clear. We must utterly crush that machine and caste and system. If, however, we Americans think that collectively and individually we can continue to lead our nor-

mal lives, leaving the spirit of self-sacrifice to our soldiers and sailors, we shall unquestionably run the risk of a stalemate with Japan. I do not have the slightest doubt of our eventual victory. But I do not wish to see the period of our blood, sweat and tears indefinitely and unnecessarily prolonged. We must not fail to realize that we are up against a powerful fighting machine, a people whose morale cannot be broken even by successive defeats and untold economic hardship, a people who gladly sacrifice their lives for their Emperor and their nation. We must also remember that Japan did not start this war without carefully laid military plans for victory over the United States and a peace dictated by their war lords at the White House.

This is a total war, the only answer to which is a total American victory. It is a war in which half measures of any kind mean incredible waste of material, energy and human life. In this sense a half-filled War Savings Stamp album is symbolic of a half effort. There are, I am told, roughly 100 million partially complete War Stamp albums now in circulation. These uncompleted Stamp albums are, in a measure, like a 100 million threats to a speedy and victorious peace. On the other hand, for every War Savings album completed and cashed in for a Bond, you the owner have helped some soldier or sailor take a forward step on the uphill road to total victory. U. S. Treasury Department

that was the case too many people might lose interest in politics, but by "staggering" the offices as proposed in the bill, we would still have our elections every two years.

WEATHER REPORTS
CENSORED'

Tuesday, Feb. 2nd was "Ground Hog Day" and in past years it was a big event as he forecast weather for a six week's period in advance.

However, the Government has clamped down the lid on long-range weather reports and the Ground Hog was out of luck.

It is rumored the Ground Hog stuck his head out of his hole in the ground, but an F B I agent grabbed him by the tail and tossed him back into his hole for the duration.

So we will have to struggle along on whatever weather the New Dealers dish up for us.

But don't get caught with your pants down, that's our personal prediction of what the weather might be like for the next six weeks!

WHY SOME PEOPLE DON'T
GO TO CHURCH

One of our local ministers was invited to dinner. During the meal he was astonished to hear the little daughter of the family remark that a person must be awful brave to go to church these days.

The minister asked, "Why do you say that?"

Replied the little girl. "Oh, I just heard daddy telling mamma that last Sunday there was a big gun in the pulpit; that the choir murdered the anthem, whatever that is, and that the organist sure drowned out the singers."

I AM A KITCHEN
SALVAGE SERGEANT

Women in the Sioux City area, almost 100 percent of them, have signed a pledge which hangs in their kitchens. This pledge reads: "I throw nothing away."

Scrap Metal Rubber Goods
Tin Cans Aluminum
Grease Silk and Nylon Hcse

By continuous saving and collecting I am fighting on the home front."

More power to the Sioux City housewives, they are setting a fine example for all women to follow.

WAR RATION BOOKS TWO
HAVE ARRIVED IN IOWA

War Ration Books Two have been received throughout the state of Iowa during the past week. A total of 2,626,000 were shipped to the local boards to be distributed at a later date to the people here in Iowa. This book is to be used for the rationing of processed foods, and also meat. The quantity was based on the number of War Ration Books One (Sugar Books) distributed throughout the state last May, plus an added 10 per cent to take care of population shifts and late registrants.

Registration for War Ration Book No. Two will take place throughout the state at schoolhouse sites on dates to be announced soon, and will be completed within a period of six days.

TWELVE ENROLLED IN THE ADVANCED FIRST AID

The first Advanced First Aid class ever to be held in Klemme, got off to a good start last Thursday evening, under the direction of Wayne Pavay, authorized Red Cross First Aid Instructor.

Twelve people were enrolled in the class which meets every Thursday night at the school house at 8:00 o'clock.

The following reported for the class: Mr. and Mrs. John Micklick, Mr. and Mrs. Paul Mueller, Sumner Trumbull, W. C. Keraus, Harvey Barz, Mrs. H. E. Harvey, Mrs. Herman Paul, Mrs. Gertrude Carpenter, Mrs. R. A. Jorgenson, and Mrs. Leona Lau.

ALFRED MERKEL PROPRIETOR OF STANDARD STATION

Monday Alfred Merkel took over the Klemme Standard Oil Station, which Walter Rosendahl has been running. Walt took over the Standard Station west of Klemme, the former proprietor being Carol Larsen who is now employed at the Ankeny Ordnance Plant.

Both Merkel and Rosendahl have cream routes which they will run as usual.

NEED SOYBEANS IN SOUTH FOR PROCESSING

Word has been received from the Commodity Credit Corporation that southern processors of soybeans are needing beans for crushing.

Farmers who have soybeans on hand are urged to get in contact with their local elevator managers, and cooperate to the fullest extent in moving their soybeans now in order to keep processors operating their plants at full capacity.

COUNCIL PROCEEDINGS

Klemme, Iowa,
January 11, 1943
Regular meeting called by the Mayor will all members present. Minutes of the last meeting read and approved.

On motion the following bills were allowed:

Geo. Buseman, Dec salary	\$ 90.00
Lloyd Lau, drayage	68
Central States Electric Co	
Light and Power	62.31
Klemme Times, publ	2.63
Roy I. Schaefer, repairs	3.00

Meeting adjourned.
A. J. KUDJE, Clerk.

Janey closed the bedroom door and locked it. Alone at last! She threw back her head and heaved a deep sigh. Then she peeked out of the corner of her eye at the mirror to see whether she really did look like Hedy LaMarr. Quite a lot, she decided.

And now to business. She drew forth from the bottom of her top bureau drawer the sheet of pink writing-paper and the envelope that she had been saving for this day. She sat down at the table by the window and dipped the pen into the bottle of green ink that her sister Rose was such a pig about. She wrote, with beautiful arabesques, "Dear Mr. Morgenthau," and held her head back to admire this effort of the best pupil in penmanship class.

"Here are my stamps for a bond. \$18.75. I started last Christmas when I got \$3.00. Not counting 50 cents, I have earned all the rest, working one or more days a week at a local grocery store, and I'm quite proud to say I worked hard to get it."

Janey stared out of the window at Peterson's house and beyond at the big yard where the kids were playing football. She held her pen elegantly in air.

"Sitting here looking out the window, I see a peaceful little town, and I wonder how the world can be in such a turmoil and the people of this world can have such hate for their fellow men. So I'm proud to send these stamps because I know I'm helping to make the whole world peaceful again like our little town."

She signed her name with an important flourish, not forgetting a conspicuous "Miss" in front of the "Janey." After she had sealed the letter she went on staring out of the window. It really was awfully peaceful. Overhead she heard a plane go humming by through the sunny afternoon air.

Then the voice of her best friend, Betty, called from outside—"Janey!" In an instant Janey was on her feet and tearing downstairs and out. She was not Hedy LaMarr nor a deep philosopher any more, but exactly twelve years old.

(Letter from an actual communication in the files of the Treasury Department.)

CREAM SEPARATOR CAN BE WASHED IN TWO MINUTES

A cream separator can be washed in about 2 minutes, if a new method recently discovered by A. W. Rudnick, extension dairyman, is used, says County Extension Director Paul Henderson.

The method was discovered on the H. C. Stengel farm in Worton County where more than 30 gallons of milk was separated at each milking. This is more than the average farm separator is required to handle.

The whole plan is based on the use of "wetting agents," compounds which have come into use in the past few years. When properly applied these agents will make the separator practically self-cleaning. The cost per treatment is about 1 cent per washing and no special equipment is required.

"A Cream Separator Washed in Two Minutes" is the title of a leaflet just issued by the Iowa Extension Service. Copies can be obtained through the Hancock County Farm Bureau office or by writing direct to the Extension Service at Ames.

Iowa farmers with medium-sized farms, 140 to 219 acres, accounted for half of the increase in 1942 in sow herds under the government request for increased pork production.

When the soldier talks about "the skipper" he means his captain, the head of his company. And that's just what the title "captain" means. It comes from the Latin word "caput" meaning "head." Another leader high in Army men's favor since '18 is Camel Cigarettes. (Based on actual sales records from Post Exchanges and Sales Commissaries.) It's the gift they prefer from the home folks. If you have a relative or friend in the service, send him a carton of Camels. Your dealer is featuring Camel cartons to send to service men.—Adv.

STAGE-SCREEN-RADIO

By VIRGINIA VALE
Released by Western Newspaper Union.

CBS' Stage Door Canteen will be the vehicle through which Bert Lytell, once a movie idol, will return to films. The movie version, produced for United Artists by Sol Lesser, will bring as a host of celebrities, including Katharine Cornell, who's shunned the films so far, and Lunt and Fontanne, Tallulah Bankhead, and scores of others. Lytell has been so busy with stage and radio engagements of recent years that he's had no time for pictures.

Orson Welles isn't trying to set a new fad with that shock of long hair that he's wearing at "Ceiling Unlimited" rehearsals. He's letting his hair grow at the request of 20th Century-Fox for his role of "Rochester" in their version of "Jane Eyre."

George Montgomery will do one more picture before he goes into the service; it's in "Bomber's Moon," opposite Annabella—the

GEORGE MONTGOMERY

story of an American pilot who's shot down in Germany. Do you wonder that Hollywood's wondering what to use for leading men?

Maybe Bob Hope's a prophet; he hopes so. His "The Road to Morocco" was filmed six months before the Allied invasion of that territory, and released right on the dot. Recently he interrupted his tour of the army camps for 48 hours to do a scene for "They Got Me Covered" which depicts a deflated Mussolini escaping from the nation he led into its present predicament—it's being filmed with the blessing of the Office of War Information. Bob's got his fingers crossed, hoping that this scene, too, will come true.

Alan Ladd's date with Uncle Sam upset the apple cart so far as Paramount's "Incendiary Blonde" was concerned. He was to have starred in this screen version of Texas Guinan's life with Betty Hutton, but his prospective induction into the army wrecked that plan. At present the film has been shelved; Miss Hutton gets the feminine lead in "Let's Face It," and Betty Rhodes gets a supporting role.

They could hardly believe it at Metro when they got two new leads at once. Tommy Dix and Gil Stratton were brought from the New York stage for "Best Foot Forward"—and at once Stratton was assigned to "Girl Crazy" and Dix will win Lucille Ball in "Best Foot Forward."

If the actors on your favorite radio program sound pretty exhilarated, it's practically certain to be due to just one thing—the return of a former member of the group in uniform. "Pepper Young's Family" was almost disrupted when Larry Woodleaf appeared recently. Larry's a handsome lad who joined up before Pearl Harbor, after doing publicity for the program; he'd spent eight months in the Far East.

Eddie Cantor's explanation for substituting for Phil Baker on "Take It or Leave It"—"Last April, Phil Baker took my place when I was in the hospital. So I took his place when he was in the hospital. Next time we'll both be on the program—the audience will go to the hospital!"

William L. Shirer, the news commentator, is planning a series of talks at service camps throughout the country in the near future. He has already given numerous talks at camps in the eastern area. Ed Murrow, the London newscaster, reports that he's expecting to solve the no-gas problem soon; he has his eye on an elderly horse, but is still dicker over the price.

ODDS AND ENDS—Radio's Tim and Irene are among the featured players in Columbia's picture, "Reveille With Beverly" . . . Joe Schilling, Edward G. Robinson's stand-in in "Destroyer," wears a naval lieutenant's uniform—the best his boss can do is a chief boatswain's mate outfit . . . Thomas Mitchell's been added to the cast of Metro's "Bataan Patrol" . . . Nelson Eddy, who hasn't made a picture since "I Married an Angel," will return to the screen in Universal's remake of "The Phantom of the Opera"; Deanna Durbin, originally scheduled for the picture when it was planned for years ago, probably won't appear in it.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for February 7

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS AFFIRMS HIS DEITY

LESSON TEXT—John 8:12, 25-36, 56-59.
GOLDEN TEXT—He that hath seen me hath seen the Father.—John 14:9.

"The Light of the World Is Jesus!" Who does not remember with what delight we as children sang, "Come to the light, 'tis shining for thee . . . The light of the world is Jesus."

How precious was the truth that thus flooded our souls. Jesus is the light. Just as the sunlight sheds its glory on an awakening world at dawn, so He sheds abroad the light of God in the hearts of men. As this portion of God's Holy Word is studied and taught, may the light break forth on many a soul caught in the bewilderment of this dark world.

But that is only one of the great thoughts around which our lesson centers. As Jesus here reveals Himself as divine, we consider four simple words, each fraught with rich meaning.

I. Light (v. 12).

The text says: "Then spake Jesus." When? Just after He had silenced the hypocritical accusers of a woman taken in sin, and had spoken the word of peace to her troubled soul. She was to "go and sin no more" because she had met Him who is the light of the world. They that follow Him "shall not walk in darkness"; they are the children of light, they have the very light of life shining in their hearts and lives.

Not only does Jesus light the believer's heart, but this light shines into all the dark corners of this wicked world, exposing sin and hypocrisy, and showing the way back to God.

II. Salvation (vv. 25-30).

"Who art thou?" That is the question every man must ask and answer as he considers Jesus. Even neglect is an answer—a rejection.

The answer of Christ in these verses goes to the very heart of the matter, for He takes the people right to the cross of Calvary. When they had crucified Him, they would know. Did not the centurion say: "Truly this was the Son of God" (Matt. 27:54)?

It is true today that no man knows Christ until he knows Him as the crucified Saviour. Teacher, Example, Guide—all these He is—but they are not enough, for we sinners need a Saviour. May many today follow the example of verse 30.

III. Freedom (vv. 31-36).

Free! Four letters, but what a depth of meaning! Chains have fallen off, prison doors are open. The one who was bound is free.

But here we are concerned with an even more important liberty, the freedom of the soul. Many there are who boast of their independence but who are naught but slaves. Jesus said: "Whosoever commiteth sin is the servant of sin" (v. 34), not its master.

How shall they be freed? Note three things in these verses: (1) A condition, "If ye continue in my word." This means not only a profession of faith, but a daily appropriation and realization of His truth in life.

(2) A promise, "Ye shall know the truth." The philosophies of men profess to be a seeking after truth, but how few there are who look to the one place where it can be found—in Jesus Christ.

(3) A result, "The truth shall make you free." Truth always sets free. Men are enslaved because, as in some foreign lands, they have not had the opportunity to learn the truth or because they have rejected it.

Men profess to seek truth in their research and in the process of education, but without Christ they cannot have real truth. Educational systems which rule Him out are deficient and lead to bondage rather than freedom.

IV. Eternity (vv. 56-59).

Taking up their statement that they were Abraham's children (see vv. 33, 37), Jesus enters into the sharpest controversy with the unbelieving Jews of His entire earthly ministry. They were claiming kinship with a great man of faith who in his day had looked forward to the coming of Christ (v. 56). Now He was here, and instead of receiving Him as their Messiah they were ready to kill Him.

Not only did they claim Abraham as father, but also God. Jesus told them that in their sin and unbelief they were of their "father the devil." It is possible, then, to be very religious, to follow the traditions of one's fathers, and yet to be children of the devil.

All this led up to their sharp rebuke in verse 57, which denied to Christ anything but an earthly existence and which led Him to the statement of His eternity. He identified Himself definitely and clearly with the Eternal One—the great I AM of Exodus 3:14.

Christ is God, and is therefore "infinite, eternal, and unchangeable in His being, wisdom, power, holiness, justice, goodness and truth" (Westminster Catechism).

PATTERNS SEWING CIRCLE

Map of 1200 B. C.

The oldest existing map in the world is a route map of a mining district in Nubia, made by Egyptians about 1200 B. C. It is on papyrus. We are aware that the Romans surveyed large parts of their Empire, and had excellent maps, but not one of these has survived. The only relic is a 13th-century copy of a map made for the Emperor Severus.

The first of modern maps is one of a part of Switzerland dated 1513. In 1575 Saxton published an Atlas of England. This was from actual surveys and contains 35 sheets.

The French government was the first to start a survey of its whole country. This began in 1633, but was not published until 1744. In 1745 the Jacobite rebellion revealed the need of a correct map of the Highlands of Scotland, and the work began in 1747, but it was not until 1791 that Parliament ordered a survey of England for the production of a map of one inch to the mile. This was not completed until the year 1870.

The first mapping of the United States occupied 42 years.

WINGS OVER AMERICA

THE INSIDE STORY OF AMERICAN AVIATION

By HARRY BRUNO

"A fascinating account of a romantic chapter in the nation's development . . . written by an expert."—N. Y. Sun.

Here is the stirring saga of America's achievements in the air and a revealing forecast of its future. WINGS OVER AMERICA is an intimate, personal account of the Wrights, Billy Mitchell, Charles Lindbergh, Jimmy Doolittle—all the pioneers as well as the men and the planes in the thick of today's fighting. Over 100 rare photos, many never before printed. 416 pages.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Who are the hoi polloi?
2. What kind of an animal is a loggerhead?
3. What city in the United States uses the same name twice?
4. What is the total continental area of the United States?
5. When intact how tall was the Great Pyramid of Gizeh?
6. How great is air pressure at sea level?
7. What is the difference between a fog and a cloud?

The Answers

1. The masses; the populace.
2. A large turtle found in the Atlantic ocean.
3. Walla Walla, Wash.
4. The area is 3,026,789 square miles, 52,630 of which are water surface.
5. The pyramid was 481 feet tall.
6. More than a ton to the square foot.
7. It is a difference of height from the earth. Fog is a cloud on earth. A cloud is a fog in the sky.

Winter Breakfasts

Though the wind may howl mournfully and the icicles crackle coldly at your window these mornings when you arise to meet the day and all its tasks, a hot, well-balanced breakfast is bound to bring you to the alert in double quick time. Fruit or fruit juice will wake you first, then eggs, hot cereal, rolls or flapjacks will do the rest toward getting you on your way.

Citrus fruit crops are especially good this winter and will be at your breakfast service with all their rich vitamins, minerals and health-giving qualities. Their sparkle and freshness will give you a new start these busy mornings.

Vitamin Cereals.

It's a wonderful idea to follow up the fruit course with one of those quickly prepared hot cereals which are so rich in vitamin B1—that important vitamin you need daily for preventing nervousness, fatigue and restlessness.

There are several ways of doing up the hot cereals. The quick-cooking wheat and oat cereals may be readily prepared along with the rest of breakfast—in just a few minutes' time. If you have a deep-well cooker on an electric range you can place the cereal in glass jars along with dried fruits you are able to obtain, turn on the unit overnight, and have fruit and cereal ready-to-eat.

Don't hesitate at cooking the quick-cooking cereals longer—they are improved in flavor and more palatable if you give them a few extra minutes.

Coddled Eggs.

Coddled or soft cooked eggs are made by bringing a sauce pan of water to a good boil. Then turn out the heat, transfer into it the eggs with a spoon. Cover and let stand 5 to 10 minutes depending upon the consistency of egg you desire. This is a good way to fix eggs—you can place them in the water while you're getting the rest of the breakfast.

Change Your Breakfasts.

Fried food is a wonderful breakfast; serve it with syrup, butter and honey, and even fried apple rings—for a late Sunday morning feast.

Toasted English muffins teamed with poached eggs—and a piece of broiled ham in-between will work wonders toward getting the family on its way out of bed.

Packaged pancake mixtures will speed up the tempo at breakfast time. Serve them with butter or vitaminized margarine—honey and butter syrup, melted together, or dark corn syrup flavored with a maple extract are all that could be desired, luscious indeed.

No, I haven't forgotten omelets! For a fluffy omelet allow 3 eggs for 2 people. Separate eggs, and beat each separately. Add ½ tablespoon cream to yolks, salt and pepper,

Lynn Says:

Saying it Briefly: Sauté minced onion and green pepper with left-over meat and enclose in pastry squares. Bake until crisply brown and serve with gravy.

Alternate slices of sautéed eggplant and slices of leftover meat in casserole. Pour over it some tomato soup, sprinkle with grated cheese, heat, and presto! Your main dish is ready!

Boil large onions, scoop out center, fill with hash, and heat, serve with gravy or tomato sauce. Scoop out centers from potatoes, mash potatoes, mix with ground, leftover meat, refill, heat and bring to the table.

This Week's Breakfast

Sliced Oranges
Hot Oatmeal Honey Top Milk
Coddled Eggs
*Butterscotch Pecan Rolls
Beverage
*Recipe Given

then fold in stiffly beaten whites. Heat butter in skillet, pour in eggs, cover and cook over low heat until mixture puffs, about 8 minutes. Uncover and finish cooking in slow oven (325 degrees) about 20 minutes. Fold over and serve on warm platter.

Omelet Variations.

If you have leftover ham, sprinkle a few tablespoons of minced ham

over omelet while it is cooking. For a jelly omelet, spread a tablespoon of jelly over surface of omelet before folding it over—after it has finished cooking completely. For special occasions, spread sautéed chicken livers before folding omelet.

Freshly baked rolls with swirls of brown syrup and whole pecans on top are bound to make your breakfast a real pleasure. Make the rolls in the afternoon—reheat for breakfast, for these won't dry out:

*Butterscotch Pecan Rolls.
(Makes 3 dozen)

1 package yeast, compressed or granular
¾ cup warm water
¾ cup milk, scalded, cooled to lukewarm
1 teaspoon salt
¼ cup sugar
¼ cup melted shortening
2 eggs, well beaten
About 4 cups sifted all-purpose flour
1 cup butter, softened
1 cup brown sugar, packed firmly
1 cup pecan meats
Pour ¾ cup lukewarm water over yeast, add 1 tablespoon sugar, stir, let stand about 5 minutes.

Dissolve salt and remaining sugar in milk. When lukewarm add yeast and blend with 2 cups flour. Beat very thoroughly. Next, add eggs and shortening. Mix well and beat three minutes. Add remaining flour enough to make a smooth dough. Knead lightly on board about 5 minutes. Use only enough flour to keep dough from sticking. Dough should be kept as soft as possible. Grease top and let rise until doubled. Fold dough down again and let rise again until doubled.

To shape: roll dough into oblong pieces until ¼ inch thick. Spread with butter, brown sugar and nuts. Roll as for jelly roll. Cut into 1 to 1½ inch slices. Use muffin tins, add ½ spoonful of butter, and a few nutmeats to each pan. Place rolls of dough, cut side down on each pan. Let rise again until double. Bake about 12 to 15 minutes in a hot (400 to 425-degree) oven. Remove from pans immediately.

Quick Coffee Cake.

¾ cup butter
1 cup sugar
1 egg
1½ cups flour
2½ teaspoons baking powder
¼ teaspoon salt
1 cup milk
1 teaspoon vanilla
Cream butter and sugar. Add egg and beat until light. Add sifted dry ingredients alternately with milk and beat for several minutes. Add vanilla and pour into a greased, shallow pan. Spread with topping and bake in a moderate (350-degree) oven 25 to 30 minutes.

Topping.

2 egg whites
1 cup brown sugar
Nutmeats
Beat egg whites stiff. Fold in sugar. Spread on batter and sprinkle with chopped nutmeats.

SCRAP COPPER AND BRASS USED INSTEAD OF MONEY AT THE AVERY THEATRE

Wednesday And Thursday, Feb. 10 And 11 Scrap Days At The Avery Theatre, Garner

Next Wednesday and Thursday, February 10 and 11, will be "Copper and Brass Days" at the Avery Theatre.

Every person, adult or child, who brings one pound or more of scrap copper or brass to the Avery, Feb. 10 or 11, will be admitted absolutely free. This offer is good at any of the theatre's regular performances and the donations of scrap copper and brass will replace the regular charge of admission.

The feature picture will be: "Rings On Her Fingers" starring Henry Fonda, Gene Tierney, and Laird Cregar

Persons who do not bring scrap copper or brass can obtain admission, of course by paying the regular price for tickets, but G. B. Kirchner hopes that he doesn't take in much actual cash on February 10 and 11, as he would much rather have a big pile of precious copper and brass to donate to the nation's war effort.

The reason for all this is that copper and brass have become virtually as precious as gold in the nation's war production, and the War Production Board has issued an urgent appeal for an immediate civilian collection of scrap copper and brass to alleviate a critical shortage in our war plants. The motion picture industry is responding to this call by presenting thousands of free shows and free Copper and Brass days all over the country.

Copper is non-replaceable for many essential military purposes. It takes copper for warships, tanks, scout cars, fighter planes, artillery field guns, machine guns, rifle shells and practically every other weapon for war. Uncle Sam has clamored the lid no so tight that a civilian couldn't purchase a pound of copper with an equal weight in gold. That's just how serious the situation is today. With the need so vital, Uncle Sam is counting upon every citizen to help with this job of digging up scrap copper to help win the war. You can do your part by bringing one pound or more of copper and brass to the Avery Theatre next Wednesday and Thursday.

Some of the better sources of copper and brass around homes, in garages and attics are: electric wiring, auto radiators and gaskets, old wash boilers, heating coils, old hub caps, copper pots and pans, ornaments, light fixtures, picture frames, washing machines, old vacuum cleaners, door handles and knobs, boys' locks, old fair treads, electric fans, ventilators and bookends.

Many items including some of these listed above, are made only partially of copper and brass. Patrons are urged to strip from such articles all iron, steel, wood, rubber insulation and other foreign elements so that what they bring to the theatre will be composed exclusively of copper or brass. An easy way to determine copper or brass is to touch the metal with an ordinary magnet. If the magnet sticks to the metal, it is not copper or brass.

Proceeds from the sale of the copper and brass collected at the Avery Theatre will be donated to the American Red Cross.

Local Happenings
Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mr. and Mrs. Mitchell Bock were dinner guests Sunday at the home of Mrs. Naska Bock.

Mrs. Walter Lemke visited with her sister, Mrs. Alvin Meyer, near Ventura, Tuesday.

Fred J. Arnold moved his shop machinery and equipment Wednesday and Thursday to the Rosendahl building which he purchased.

Mr. and Mrs. R. A. Jorgneson visited at the Lyle Liebendorfer home at Forest City Sunday afternoon and evening.

Mrs. C. A. Arnold and Mrs. E. J. Arnold and daughter, Miss Evelyn, were visiting in Mason City Saturday.

Mrs. Frances Ridder entertained a group of ladies at her home last Thursday afternoon at a quilting bee. Lunch was served by the hostess.

Bruce Arnold, who is a freshman student at Iowa State College at Ames, spent the week end visiting with his parents, Mr. and Mrs. E. J. Arnold and family.

Melvin Coobs, who is attending a government vocational school in Des Moines, spent Sunday visiting with his parents, Mr. and Mrs. Ben Coobs.

Mr. and Mrs. E. G. Gregory entertained the Shamrocks basketball squad and coach and Mrs. Patterson to an oyster stew Monday evening at the Gregory home.

Mr. and Mrs. Henry Ludeke and son Paul, of near Meservey were business callers in Klemme Tuesday afternoon. The Editor enjoyed a visit from Henry and Paul.

Sunday for dinner Mrs. Edna Thada had as guests for dinner at her home Mr. and Mrs. Fred Etchen and Mr. and Mrs. George Schoenwetter.

Art Wellemeier was a guest and speaker at a meeting of the Lion's Club at Garner this Wednesday noon. Mr. Wellemeier gave a talk on "The History of Garner."

Miss Lorraine Buntentbach returned to Carleton College at Northfield, Minn., Thursday, after spending a couple of days visiting with her parents, Mr. and Mrs. Ed C. Buntentbach.

The Standard Bearers will meet Thursday afternoon, February 4th, at the Methodist Church at 5:30 o'clock for a supper. Mrs. H. D. Ramsay is Leader of the Standard Bearers.

Garland Brinkman, who is a freshman student at Iowa State Teachers College at Cedar Falls, spent the week end visiting with his parents, Mr. and Mrs. Martin Brinkman and family.

Mrs. George Lawhorn, Mrs. Ed Jacobs, Miss Lydia Bock, and Mrs. H. D. Lawhorn of Garner, drove to Des Moines Tuesday where they visited with George Lawhorn and Billy Bock at the Veterans' Hospital.

Mr. and Mrs. Jay T. Griggs of Ventura were business callers in Klemme, Saturday afternoon. Mr. Griggs has not been well this winter and has suffered with rheumatism. Mr. and Mrs. Griggs live in their cottage just east of Ventura on the north shore of Clear Lake.

Supt. and Mrs. John Micklick, and Mr. and Mrs. Clifford Montgomery entertained Mr. and Mrs. Wesley Patterson, Mr. and Mrs. E. G. Gregory and the Klemme grade and high school teachers at a six-thirty o'clock dinner at the Micklick home Tuesday evening. Court whist was played after dinner.

"In All This World"—That's the intriguing title of the last in the series of "Hits To Be For '43" selected by the leading bandleaders of the country. Hal McIntyre picked this one. You'll find both words and music in The American Weekly, the magazine distributed with next week's Sunday Chicago Herald-American.

Use the Times Want Ads.

Mr. and Mrs. Ernest Lewis have rented the Wm. Meyer house in the southeast part of the town and will move there when the Meyers move to their farm near Miller. The Wm. Meyer place is owned by Mr. and Mrs. Jake Hess, who purchased it several months ago.

Mrs. Earl G. Schaeffer of Des Moines, came Monday for a visit at the Art Kudje home. Her husband, Capt. Schaeffer is somewhere overseas and Mrs. Schaeffer has not heard from him since the middle of December. Capt. Schaeffer is a dentist in the Army Medical Corps.

Supervisor Penn Eckels stopped in at The Times office Tuesday morning on his way to Hampton to attend a bond meeting. Mr. Eckels informed us that Hancock County went over the top in War Bond and Stamp sales for 1942. He expects to have the figures ready for publication soon.

Mr. and Mrs. Lester Neuberger, and Robert Schulz drove down from Minneapolis to spend the week end visiting with Klemme relatives and friends. Mr. Neuberger was sworn into the U. S. Army last Friday and will leave again this Thursday for Ft. Snelling, Minnesota, to be inducted into the service. Mrs. Neuberger will remain in Minneapolis and keep house for her brother, Robert, who is employed in a war-work plant there.

F. H. Ridder and Frances, to Albert Etchen and John Etchen Warranty Deed, 10-2-23, \$4,500 S 1/2 of lots 1 and 2 in Block 7, Original Town of Klemme, Iowa.

HANCOCK MEN ATTENDED ANNUAL MEETING

Three members of the Hancock County Farm Bureau attended the annual meetings of the Iowa Farm Mutual Insurance Company and the Iowa Farm Serum Company at Des Moines on January 29, according to V. A. Cock, president.

Those attending the meetings from Hancock County were: Clark Lackore, organization director, Geo. Ulrich, Treasurer, and Walt Kahl, Chairman of the County Legislative Committee.

Delegates to the annual business sessions of the Farm Bureau companies attended a banquet on the evening of January 29th at Hotel Fort Des Moines, at which time the problems concerning the serum and insurance companies were discussed.

A feature of the banquet was a discussion of the 1943 production problems. Albert J. Loveland, the state chairman of the AAA discussed the production goals, while R. K. Bliss, Director of Extension of Iowa State College, discussed ways and means of achieving the goals.

The sessions were continued on Saturday, January 30, and allowed ample time for discussion of state and national legislation and other matters of general interest. Cook said.

MRS. FRED J. ARNOLD HOSTESS TO BRIDGE CLUB

Mrs. Fred J. Arnold entertained the U-Delt-Em bridge club at her home Thursday afternoon where contract bridge was played.

Mrs. H. D. Ramsay won the high score and the second and third high scores were won by Mrs. R. A. Jorgenson and Mrs. Geo. Lawhorn.

Heating fuel may be difficult to get next winter, so an extra supply of wood cut this winter may come in rather handy.

General Services Held Monday for Mrs. John Christians

JOHN CHRISTIANS, 61
FRIDAY AFTERNOON

Township Resident Died After
Several Month's Illness

General services were conducted Friday afternoon at 2:00 o'clock by Calvin Grosshuesch, pastor of the Evangelical Reformed church. Special music for the service was given by a male quartet. The arrangements were in charge of the Wellemeier Funeral home.

Mrs. Christians, who had reached the age of 61 years and 26 days, at her home in Ell township, northeast of Klemme, Friday afternoon, February 5th, following an illness of several month's duration. Burial was in the Ell Township cemetery near Klemme, and she was carried to her final resting place by her neighbors and friends: Pannhoff, Clarence Grosshuesch, Dan Webber, Paul Havelik, Barz and William Kurtz.

and BACHMAN WILL HOLD
SALE TUESDAY

Forty-one Head Of Livestock
And Farm Machinery

Mr. and Mrs. Fred Bachman are returning from farm life and will move to town, so this week Mr. Bachman is advertising a public sale to be held Tuesday, February 16th, at his farm 2 1/2 miles south of Klemme, 3 miles east of Klemme.

The bill includes 41 head of fine livestock, eight head of horses, seven head of cattle and twenty-five head of hogs, besides a large amount of farm machinery, poultry and other items.

The complete bill is published in this issue of The Times. Turn to page 4 for a list of items to be sold at the public auction Tuesday, Feb. 16th.

ENROLLMENT IN THE
STANDARD RED CROSS
FIRST AID CLASS

Those who have enrolled for the Standard Red Cross First Aid class under the direction of Rev. Calvin Grosshuesch and Mr. C. G. Waterman are:

Mr. and Mrs. Carl Wille, Mr. and Mrs. Glen Terhufen, Mr. and Mrs. Raymond Barz, Mr. and Mrs. Alvin Hill, Mr. and Mrs. Edmund Josten, Mrs. Walter Lemke, Mrs. Ewald Lemke, Mrs. Wayne Pavey, Mrs. J. Anderson, Milvorn Barz, Aaron Hill, Clifford Montgomery, Avis Barz, Ruth Neuberger, Adel Wille, and by Wille.

The class meets at the School house on Wednesday evenings. It is the second Standard Course to be given this winter.

Wayne Pavey is instructing an advanced First Aid Class on Thursday evenings.

Our Men In The Service

"BILL" LEMKE NOW IN U S
ARMY AIR CORPS

William Lemke, son of Mr. and Mrs. W. H. Lemke of Liberty township left last week Tuesday for Jefferson Barracks, Missouri to begin preliminary flight training as a Cadet in the U. S. Army Air Corps. "Bill" was one of Klemme high school's star basketball players a few years ago. He has been working at an electrical shop as a refrigeration expert at Mason City the past few years.

Bill's present address follows: William W. Lemke, Flight B, 1168 - T. S. S., U. S. Army, Jefferson Barracks, Missouri.

PVT. HERBERT WEBNER HOME
ON 10 DAY FURLOUGH

Pvt. Herbert Webner accompanied by his wife, spent a ten day furlough visiting with his parents, Mr. and Mrs. Dan Webner of northeast of Klemme, and with Mrs. Webner's parents at Wesley.

KERMIT KOERNER RECEIVES
ARMY PROMOTION

Kermit Koerner, son of Mr. and Mrs. A. G. Koerner, stationed at Hill Field, Ogden, Utah, has been promoted to the rank of Sergeant.

SOLDIERS WON'T NEED LICENSE
TO FISH OR HUNT IN IOWA

The house by a vote of 98 to 0 Wednesday completed action on a bill which would permit men and women in service to hunt and fish during war time without paying a state license. The senate previously had passed the bill and it now goes to the governor.

ESTHERVILLE VAN EMPLOYED
AT WELLEMAYER STORE

Has Had Many Years Experience
In Furniture Business

Mr. Louis V. Perkins, of Estherville, who has had many years of experience in the furniture and linoleum business, began work at the Wellemeier Store Monday.

Mr. and Mrs. Perkins have three children, the youngest being a Junior in high school and the older son and daughter are employed at Estherville.

The family moved into the Walt Rosendahl residence last Friday. Read Wellemeier's ad in The Times this week and learn more about Mr. Perkins.

"THAT'S THE 'UNION' TO STRIKE FOR NOW!"

Engineer Henschen Tells Of Construction Program

HANCOCK COUNTY ENGINEER
GIVES REPORT ON 1942
ROAD PROGRAM

On or before February 1 of each year, the County Engineers of the 99 counties in Iowa are required to file with the State Highway Commission a detailed report showing the expenditures for construction and maintenance of the county roads. This report is divided into four parts. The following report is a brief summary submitted by Wm. Henschen, Engineer for this county in 1942.

Part One: Roads & Bridges Road Construction

Trunk Roads	
Grading	\$ 4,344.06
Clearing and Grubbing	320.00
Culverts and Tiling	389.69
Graveling	619.43
Right of Way	10,953.02
Total	\$16,626.20

Of the above amount spent for right of way, \$7,403.91 was on farm to market roads to be built in the future.

Local Roads	
Grading	\$17,378.13
Clearing and Grubbing	468.37
Bridges, Culverts, Tiling	14,933.25
Graveling	8,314.55
Right of Way	760.95
Total	\$41,855.25

During the year the three new concrete culverts listed were built: 6-7 Avery township, 8'x6'x24' R. C. concrete \$836.50; 5-6 Orthel township, 8'x4'x24' R. C. concrete \$525.98; 32-33 Bingham twp., 6'x4'x24' R. C. concrete \$525.97.

Road Maintenance

Maintenance cost on trunk roads were \$22,255.73, and on local roads \$64,000.25. Included in the main-

tenance costs are: labor, \$27,070.37; gasoline, \$8,984.69; new machinery, \$18,223.61. The balance was spent for oil, grease, culvert pipe, snow fence, tools, right of way, signs, cement, lumber, supplies, tile, calcium chloride and altacide.

Part Two: Engineering

The total cost of Engineering was \$4,708.35. This includes wages, expenses and supplies of the engineer, instrument man, rodman and office girl. This is approximately .032 of the total amount spent on the roads in 1942.

Part Three: Financial

The construction fund balance is \$4,550.42 greater than on January 1, 1942. The maintenance fund balance is \$7,683.99 greater than a year ago. The county road funds have no outstanding obligations, except for a few unpaid bills. There was no road construction property tax levied or collected in 1942. All revenue for construction of roads was derived from the state gas tax.

Part Four: Statistics

Five and one half miles of trunk roads, and forty-seven miles of local roads were graded during the year. Gravel surfacing was placed on five and one-half miles of trunk roads and eighteen miles of local roads.

The mile of road east of Section 36, Avery Township was vacated, and .4 of a mile of new road was built between Sections 2 and 11, in Madison Township.

During the year the road from the Iowa River east of Goodell to the county line east was graded and gravelled, as a farm to market project.

SURPRISED ON ANNIVERSARY
OF TWENTIETH WEDDING
DATE SUNDAY EVE

Sunday evening, February 7, the neighbors of Mr. and Mrs. Leslie Hartbeck held a surprise party on them at their home in honor of their twentieth wedding anniversary.

The evening was spent in a social way after which a delicious lunch was served.

Mr. and Mrs. Hartbeck were presented with a set of dishes as a remembrance of the occasion.

Those present included: Mr. and Mrs. Ewald V. Josten; Mr. and Mrs. Paul Goll; Mr. and Mrs. Alfred Jurgemeyer; Mr. and Mrs. Oris Lundy; Mr. and Mrs. Menno Albers; Albert and Mary Swanson; Mr. and Mrs. Ernest Helps; Mr. and Mrs. Donald Neuberger; Mr. and Mrs. August Josten; Mr. and Mrs. John D. Meinders; Mr. and Mrs. William Jurgemeyer; Mr. and Mrs. Howard Baack.

Point Rationing System Goes Into Effect March First

IOWA'S RATION CALENDAR

Tires:

Class A Ration. First inspection deadline - March 31.

Class B, C, or bulk coupon Rations: First inspection deadline - February 28.

Commercial vehicles inspection deadline - February 28.

Gasoline:

"A" book coupons No. 4 (4 gals. each) expire March 21.

Period 3 coupons (11 gal. ea.) expire Feb. 22.

Period 4 coupons (11 gals. ea.) valid Feb. 2 until April 17.

Coffee:

Coupon No. 28 (1 lb.) expires February 7.

Sugar:

Coupon No. 11 (3 lbs.) expires March 15.

Shoes:

Coupon No. 17 good for one pair of shoes. Expires June 15.

Registration:

Date of registration for War Ration Book Two will be announced soon.

CIVIC CLUB SPONSORS HOME
TALENT PLAYS TO BOOST
WAR STAMP SALES

Admission Is Practically Free; You
Buy War Stamp And Keep It

The Klemme Civic Club is sponsoring a home talent entertainment to be given at the Klemme Community Hall next week Thursday evening, February 18th.

Main attraction on the program is a negro comedy "The Chocolate Wedding." All parts, both male and female characters are played by Klemme business men. (Can you imagine Ole Ramsay looking like Aunt Jemima in the pancake ads?) And that's just a hint of the fun in store next Thursday night.

The second feature on the bill is a "Mock Radio Program," and we are telling you anything can happen there!

In order to defray a few expenses prize candy will be sold between acts. It is rumored there might be such scarce items as coffee, silk hose and a barrel of gasoline given away, might be, who can tell, anything can happen at the big show!

This entertainment is being put on to promote the sale of war bonds and stamps. The admission is free because adults can purchase a war stamp for 25 cents or more, keep the stamp and walk in! Children are admitted by purchasing a 10 cent stamp! Or, if you prefer to buy a war bond, that is o. k. and will admit you and your whole family. The bond must be purchased that day. Bring either the bond or a receipt for admission.

This will be a lot of fun for everybody. The players have put in a lot of time and they should be rewarded with a packed house.

Remember the date, Thursday, February 18, Community Hall.

The plays are directed by John Micklick and the following business men take part:

Keith Albertson, Orville Stakesbary, Dr. D. P. Anderson, Harvey Hubbard, Melvin Neuberger, Bill Grosshuesch, Eugene Habercamp, Raymond Swalve, Ole Ramsay, Allan Barz, Bert Jones, Walt Kimball, Pat Patterson, Ed Thompson, Bill Keraus. A male quartette will also sing several numbers.

SHAMROCKS DOWNED
THORNTON 64-26

The Klemme Shamrocks threw their scoring machine into high gear here Tuesday night to down a hard playing Thornton team 64-26.

The Little Shamrocks dropped their game to the visiting Reserves who held the long end of a 22-19 count.

CANNED, FROZEN, AND DRIED
FRUITS AND VEGETABLES
TO BE RATIONED

More Than 200 Items Will Be "Frozen"
Beginning Monday, Feb. 22

The office of War Information has released for publication the following dispatch:

"Rationing begins March 1. Rationing of canned, dried and frozen fruits and vegetables will begin on March 1st, and retail sales of the more than 200 items to be rationed will be "frozen" on February 20. Beginning Monday, February 22, housewives will register for War Ration Book No. 2, which will allow a total of 48 "points" for each member of the family for the month of March. Stamps will have values of 8, 5, 2 and 1 points.

"If a family has more than five 8-ounce cans per person on hand, stamps will be removed from the book in proportion to their excess holdings.

"Official point values will be made public as soon as stocks are "frozen." Registration will probably be held in local school houses and one member may register for the whole family.

"Some foods need not be counted. They include canned olives, canned meat and fish, pickles, relish, jellies, jams, preserves, spaghetti, macaroni, noodles and all home-canned foods."

The definite dates for registration for War Ration Book Two will be announced later.

In order to procure the War Ration Book No. 2, you must first of all have War Ration Book No. 1.

Then be prepared with a list of coffee you have on hand and a list of canned food (purchased at the store, and not home-canned) that you have on hand. Remember there is a severe penalty for giving in a false report.

RATIONING OF SHOES WENT
INTO EFFECT FEB. 9

Shoes are now on the rationed list and the order went into effect Tuesday morning, February 9th.

Coupon No. 17 in War Ration Book One will be used to purchase one pair of shoes and is good until June 15, 1943.

This order covers all shoes with the exception of infants shoes and a few other types of soft shoes.

Any member of the family may use a coupon from any other member of the family's book to purchase shoes.

The new ration will allow each person to purchase about three pairs of shoes a year.

Those whose work requires more shoes than the ration allows, will be able to procure them.

HONORED ON FORTIETH
ANNIVERSARY

Mr. and Mrs. Fred J. Arnold entertained a number of friends at a dinner last Thursday evening in honor of the fortieth wedding anniversary of Mrs. Arnold's parents, Mr. and Mrs. Wilbur Carr, of Garner. Besides the honored guests present were Mr. and Mrs. Fred Steiff, Mr. and Mrs. Jens Paulson, Mr. and Mrs. John Love and Miss Belle Love, all of Garner.

HELLO, FOLKS!

A daughter weighing 6 pounds, and 3 3-4 ounces was born to Mr. and Mrs. Wilson Sandrey, Goodell, at the Mercy hospital at Mason City on Friday, February 5th, 1943.

Obituary Of Mrs. John Christians

CHRISTINA CHRISTIANS

nee Ennenga, was born in Otsfriesland, Germany, January 9th, 1882. During the days of her childhood she attended the public and religious schools. She was baptized and later confirmed in the Reformed Church.

At the age of 27 she came to America with her parents. On September 8, 1909, she was joined in holy wedlock to John P. Christians. During the first three years the family lived on a farm near Hartsburg, Illinois, and then moved to a farm about 5 miles northeast of Klemme, Iowa. Three sons and five daughters were born to the Christians family, all surviving the mother. They are: Karsjens, Anna (Mrs. Lloyd Smith), Emma (Mrs. Wm. Neuberger), Henrietta (Mrs. Art Tebbets), Sina (Mrs. Laverne Christensen), Harold, who at the present is serving in the army, Elsie and Duane. The older children of Mr. John Christians, by his first marriage, to whom she proved herself to be a good and faithful mother are: Pete, Edward, Mrs. Herman Merkel, and John Harm Christians preceded his mother in death.

The other surviving relatives are a sister, Mrs. Peter Miller of Bigelow, Minn., and a brother, Tjark Ennenga of Steamboat Rock, Iowa, and twenty-one grandchildren.

Mrs. Christians was a modest, quiet person, a sincere believer, devoted to her husband and children. She was much concerned about the spiritual welfare of her children; she could say with the Apostle John: "I have no greater joy than to hear that my children walk in truth."

Mr. and Mrs. Christians had planned to retire from active farm life and move to Klemme this spring, where they had bought a home. However, last summer Mrs. Christians became ill and her condition gradually became more serious. She was taken to hospitals at Mason City and Hampton. During the last months of City and Hampton she was cared for by her husband and children at home. She departed this earthly life Friday afternoon at 1:30 o'clock, February 5, 1943 at the age of 61 years and 26 days.

"She looked for a city which hath foundations, whose builder and maker is God," and death to her meant "an entering into that rest, that remains for the people of God."

WEEKLY NEWS ANALYSIS

Farm Implement Quota Boosted by 30%; Hitler's Disasters Mount as Russians Speed Up Caucasus-Ukraine Offensive; Tripoli's Fall Spurs Tunisia Drive

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Closer relations between the United States and Chile and a harder crackdown on Nazi espionage in South America were results expected from the recent action of the Chilean government in breaking diplomatic relations with the Axis. Shown above are Undersecretary of State Sumner Welles (left) and Senor Don Rodolfo Michels, Chilean ambassador, discussing the situation.

FOOD PRODUCTION: Gets New Incentive

Two significant steps to spur the "Food for Victory" campaign were taken when the War Production board authorized a 30 per cent increase in production of farm machinery and Secretary of Agriculture Wickard announced a program of federal credit designed to extend from \$200,000,000 to \$250,000,000 to farmers for stepping up essential food production.

The WPB increased the steel allotment for farm machinery from 137,000 tons to 187,000 tons for the first quarter of 1943. This new tonnage was in addition to an increase previously authorized for the production of repair parts for farm implements.

Mr. Wickard said loans needed mostly by small and medium-sized farmers would be extended through the Regional Agricultural Credit corporation. Size of loans will be limited only by the amount needed to do the production job. The loans will be of short-term duration at 5 per cent interest.

NORTH AFRICA: Death of Empire

Tripoli's fall had various meanings for various interpreters. To historians it wrote finale to Mussolini's grandiose dreams of empire, for it was here the Duce had begun his disastrous expansion policy. To military observers it meant that the Allies could now concentrate closer attention on cleaning up the last Axis strongholds in Tunisia.

It had been apparent to observers that Marshal Rommel's retreat through Tripolitania had had Tunisia and not Tripoli as its goal. Rear-guard efforts to protect the main body of his retreat had constituted the only action in and around Tripoli.

Allied airmen had not only strafed Tripoli, but General Montgomery's British eighth army and General LeClerc's Fighting French had constantly harried the retreating Afrika Korps.

In Tunisia the Axis had made strenuous efforts to cover Rommel's withdrawal by launching offensive thrusts against French positions southwest of Pond-du-Fahs.

While junction of Rommel's army with those of Nazi Col. Gen. Von Arnim would strengthen Axis forces in Tunisia, the Allies would similarly be strengthened by the addition of British and Fighting French troops to Gen. Dwight Eisenhower's legions.

PRICE RISE: Predicted by Brown

As additional rationing and price regulations were promulgated, the American public learned that Price Administrator Prentiss M. Brown's direction of the OPA would be less dramatic but no less firm than that of his predecessor Leon Henderson.

Mr. and Mrs. Average Citizen were assured by the new administrator, however, that the OPA would be operated solely for the protection of the American people. Frankly acknowledging that price rises were inevitable, Mr. Brown promised that such rises would be "slow and well-ordered."

RUSS STEAMROLLER: Impact Hurts Nazis

From Leningrad to the Black sea the Russian steamroller offensive rumbled on, gathering momentum on all fronts. Nazi armies were forced to yield ground won in bloody battles last year, to surrender strategic "hedgehog" strong points and to see supply and communication lines shattered.

Russian sources asserted that 500,000 Germans had been killed and 200,000 captured since the winter offensive was launched in November.

Red strategy had specially concentrated on five key Nazi-held cities between the Ukraine and the north Caucasus. These were Kharkov, steel producing center; Rostov, communications city at the mouth of the Don river; Voroshilovgrad, industrial metropolis of the Donets basin; Salsk, important rail junction; and Armavir, gateway to the Baku-Rostov oil railroad.

Possession of these cities would not only open a vast reservoir of materials and machinery to the Russians, but it would loosen the Nazi stranglehold on the central and southern front. It would mean that the Germans would have to fall all the way back to the Dnieper river and hold lines dangerously close to Rumania, Poland and Lithuania.

CHILDBIRTH: Pain Is Stilled

To a world snuffing out lives in pain on scores of battle fields, the American Medical association brought tidings that the sufferings attendant on life's beginnings might be banished through a new method of childbirth anesthesia that is without danger either to mother or baby.

Designated as "continuous caudal anesthesia" the new technique was developed by Drs. Robert Hingston and Waldo Edwards of the Marine hospital at Staten Island, N. Y. Their report was corroborated by statements from 19 other clinics and hospitals which tested the new method on 589 patients.

SOUTH PACIFIC: Prelude by Air

"Softening up" attacks by air on Jap-held Lae were carried on by Allied fliers as a prelude to land movements by General MacArthur's forces. For Lae was the next calling spot on the Allies schedule after mopping-up operations had been successfully concluded in the Sananda area, last Jap toehold in the Papuan peninsula.

Aerial activity was not confined to the Lae area, for American and Australian planes bombed shipping at Finschaven and hit the airdrome and wharf sections of Madang in New Guinea. Elsewhere Allied airmen visited Cape Gloucester and Gasmata in Jap-held New Britain and strafed an enemy barge concentration off Willaumez peninsula.

In Australia, Allied bombers continued their pounding of enemy warships and merchantmen far to the north. At Ambon, 600 miles northwest of Darwin, they scored hits on a cruiser and cargo vessel.

HARD COAL: Miners Bow to FDR

Dangers of a crippling hard coal shortage were averted and a face-saving maneuver for labor executed when 12,000 Pennsylvania miners returned to work after a three-week old unauthorized walkout following a curt ultimatum from President Roosevelt.

The President had served notice that unless the miners ceased their wildcat strike within 48 hours, he would take "necessary steps" to safeguard the war effort.

A tangled skein of labor politics had complicated the eastern hard coal situation. Efforts of John L. Lewis, president of the United Mine Workers, and the War Labor board to get the strikers back on the job had failed. Strike leaders said the miners had walked out in protest against a UMW dues increase of 50 cents a month. The strikers, however, had also demanded a \$2 a day wage increase.

AXIS TRUMP: Subs Still Potent

Hurled back on all world fronts by the ever-increasing ferocity of United Nations attacks, the Axis still controlled one ace offensive weapon—German submarines.

Hitler was said by British Admiral Sir Percy Noble to be maintaining 200 U-boats of his fleet of 500 at sea all the time in an effort to keep the tremendous output of Allied war factories from the battlefields. Unofficial British estimates placed Nazi submarine construction at 15 to 20 a month—faster than naval experts believe the Allies are sinking them.

Elmer Davis, director of the Office of War Information, reported that German submarines had sunk more Allied shipping in January than in December.

A brighter side of the picture emerged, however, when the Lend-Lease administration announced that the United States and Britain had sent Russia 5,800 tanks and 4,600 airplanes up to January 1 and promised that aid to the Soviet "will grow still more in 1943." Regardless of submarine wolfpacks, convoys were getting through.

RUBBER:

Jeffers vs. RFC

With his synthetic rubber program facing further curtailment so that more convoy escort vessels can be built and more high octane gasoline produced for fighting fliers, Rubber Conservation Director William M. Jeffers assumed control of all rubber import programs formerly exercised by the Board of Economic Warfare through the Rubber Re-

WILLIAM M. JEFFERS

serve company, a Reconstruction Finance corporation subsidiary.

This action meant that henceforth Jesse Jones, as head of the RFC's Rubber Reserve company, which supplies the money for operations, would take orders from Mr. Jeffers instead of from the BEW on rubber imports. It meant, moreover, that Jeffers hoped to bolster lagging synthetic rubber production by imports as a means of keeping civilians supplied with automobile tires.

NAZI AIR RAIDS:

RAF Welcomes Reprisals

Tragic as was the death of scores of school children in German bombing raids on London, aviation authorities hailed the renewal of Nazi attacks as a further opportunity to weaken the Axis in the air.

Every raid means a further thinning of Hitler's already over-extended air forces, these authorities pointed out. In the biggest daylight air assault on London since the 1940 battle of Britain, the Nazis lost 13 planes while the British lost two. Because of improved anti-aircraft defense, destruction and loss of civilian life were held to minimum levels.

The German raids have been in reprisal for gutting attacks on Berlin by large flights of RAF bombers raining down four-ton "block busters" on the Nazi capital, and spewing incendiary bombs that caused untold damage. British losses on these raids were comparatively light officials revealed.

MORE BLOOD:

Asked by Red Cross

Mounting war casualties prompted a request from the army and navy for the Red Cross to procure 4,000,000 pints of blood during 1943, or more than three times the amount obtained from donors last year.

Red Cross Chairman Dwight F. Davis disclosed that the request had come from Maj. Gen. James C. Magee and Rear Admiral Ross T. McIntyre, surgeons general of the army and navy respectively.

STUDY IN AMERICAN STRENGTH

("Three American airmen, Edward Mallory Vogel, Tennessee; Izzie Goldberg, the Bronx, New York; and Edwin J. Sipowski, Waukegan, Ill., killed in a takeoff in San Juan Harbor, were buried side by side with a Protestant chaplain, a Roman Catholic priest and a rabbi officiating. The flag for which they fought flew over them."—News item.)

A chaplain, a priest and a rabbi—Protestant—Catholic—Jew—Three Yanks in three simple caskets—

Three colors, red, white and blue—

A hush on a tropic island—

As notes from a bugle fall—

Three rituals slowly chanting—

Three faiths in a common call!

II

A lad from the Bronx; another

Who joined up in Tennessee;

A third one from far Waukegan—

A typical bunch, those three!

A crash in a naval airplane . . .

A rush to its crumpled side . . .

And nearby Old Glory marking

The reason the trio died.

III

They answered a call to duty

From church and from synagogue—

From hillside and teeming city . . .

Three names in a naval log!

Each raised in his separate concepts—

Each having his form to pray—

But all for a faith triumphant

When rituals fade away!

IV

A prayer in Latin phrases—

And one with more ancient lore,

A Protestant simple service—

All one on a distant shore!

"Qui tollis peccata mundi" . . .

And, "Enter ye unto rest" . . .

A blessing from ancient Moses . . .

For three who had met the test!

V

This is the story mighty

Making our sinews strong:

Boys from the many altars

Warring on one great wrong!

This is the nation's power,

This is its suit of mail:

Land where each narrow bigot

Knows that he can't prevail!

L'ENVOI

A chaplain, a priest and a rabbi—

Protestant—Catholic—Jew—

Knowing that forms are nothing

If but the cause is true;

Challenge all craven bigots!

Tell them, as brave men die

Fighting for fullest freedom—

Tell them they lie . . . they lie!

VI

1—Popper, I wish we could have

an auto, too

2—Where's the road map? I want

na plan a tour.

3—Why don't you take a nice ride

over the week-end?

4—This car will give you more

pleasure than anything you ever

owned. I'm telling you.

5—We did 400 miles the first day

and 540 the second.

6—The train service to Miami is

all right, but I love to go by auto.

7—What're you doing tonight?

Wanna go for a ride?

8—Slow down to fifty miles per

hour

9—Cars Bought, Sold and Ex-

changed.

10—I just can't imagine what we

would do if we didn't have a lim-

ousine

11—We're putting up the sedan

SUMMARY

The battling tenants of the nation . . .

No fuel-oil, no gas, no circulation!

Scourging the Scourge

By Don W. Gudakunst, M. D.

Medical Director, National Foundation for Infantile Paralysis.

WALTER WINCHELL has returned from a tour of duty outside the U. S. and will soon resume writing his column as usual.

The outlook in the battle against infantile paralysis, like the outlook in the war against the enemies of democracy, is encouraging.

The fight goes on, propelled by the National Foundation for Infantile Paralysis and by the dollars and dimes of a fighting people who celebrate the birthday of the President by dancing so that others may walk.

No cure has been found, but the Sister Kenny treatments, taught to doctors and nurses all over the land by the famous Australian nurse, here since 1940, alleviate suffering and reduce crippling after-effects. It must be emphasized, the Kenny method—is NOT a cure, though it restores about 80 per cent to normal life and the other 20 per cent are generally helped.

It takes one nurse and two assistants to treat 10 patients with the Kenny method. The nurse can learn her part in a week, but it takes the physiotherapist months to master the art of teaching paralyzed muscles to work again.

The cotton rats used in polio virus research come from southeastern United States. After trying to breed them in captivity, scientists discovered they would not mate unless they smelled alike. So they were sprayed with creosote—and all raised families.

Poliomyelitis, polio or infantile paralysis—whatever you call it—is an old disease. A picture carved on a tomb in Egypt 4,000 years ago, and mummies from the Land of the Pharaohs prove it.

Many persons have had poliomyelitis, recovered and never knew they had it. They are carriers. It is estimated there are 50 to 1,000 "carriers" to every victim. "Carriers" become nauseated but, fortunately for them, the virus centers in the digestive system instead of in the spinal cord nerves.

Poliomyelitis is taken from the Greek—"polios" meaning "gray," plus "myelos" meaning "marrow," plus "itis" Victims call one another "polios"

Each year there are in the United States an average of 8,000 to 10,000 victims of this disease. Many become cripples beyond cure. The greatest epidemic in this country was in 1916—over 27,000 reported cases.

Many children, badly crippled, were not discovered until later. Many died without the true cause of their death being known. These cases were in the East, near New York, Philadelphia, Boston and New Haven—cities where there are excellent doctors and plenty of hospitals.

Maybe you are one of many people who think all of the dimes and dollars go to the Georgia Warm Springs Foundation. They do not. Half of the money goes to the counties which contributed for local relief; the other half is retained by the National Foundation for Infantile Paralysis. It is used when an epidemic strikes and for research to try to find the cause, the preventive and cure of the disease.

Infantile paralysis strikes the rich and the poor alike. Epidemics are not always near great medical centers. The first cases discovered by Nurse Kenny were children in families who lived 10 miles from any neighbor or telephones, telegraph and improved roads. It was over 200 miles to the nearest doctor and hospital. This was 30 years ago.

In 1942 there were two places in the United States that were hard hit; one was thickly settled, fairly wealthy New Jersey, with plenty of doctors, nurses and hospitals; the other was Arkansas, where there was but one hospital in all the State willing to admit any case of infantile paralysis in its acute stage. This hospital could not begin to care for the 100 children who applied for treatment the first few weeks.

That is where the National Foundation for Infantile Paralysis came into the picture. It had money. It knew where to secure nurses trained in the Kenny method. Of that hundred and more patients almost all have now gone home restored to health. Of the rest, all but a very few will soon be walking, their condition good.

It costs about \$1,800 to keep one child in a hospital for a year, under the Kenny treatment. But that one year may mean freedom to that child for a lifetime. At a dime apiece 18,000 people have contributed to treat that child.

Throughout the country there are now 2,494 local Chapters of the National Foundation for Infantile Paralysis. They cover 2,894 of the nation's 3,050 counties. If you were stricken tomorrow, regardless of race, creed, age, color, one of these units would help you.

ON THE HOME FRONT

with RUTH WYETH SPEARS

THIS colorful afghan was made by clever fingers from the parts of old woolen garments together with odds and ends of bright yarn. Even trousers fitted jackets yielded strips of size required.

By holding the goods up to light it is easy to find the parts. These are cut out

washed with mild soap in lukewarm water; rinsed with a little warm water; and pressed damp. The pieces are then accurately according to the measurements given here. Crochet stitch is used around pieces, and the sketch shows the pieces are sewn together.

NOTE: Today nothing should be wasted. Even furniture may be repaired and made to do for the day. Book 7, in the series prepared for readers, contains 32 pages of illustrated directions. Readers may get a copy by sending

Northwest Passage

Only two expeditions in history have traveled the Northwest Passage, or between the Atlantic and Pacific oceans along the north coast of America, according to Collier's. The first was a 19th century voyage made from King William Land to Herschel Island, Roald Amundsen and six companions between 1903 and 1906.

The second was an eastward voyage made from Vancouver, Sydney, Nova Scotia, by eight men between June, 1940, and October, 1942.

Farming on Mined-Out Land Answer to Coal Industry Problem

ed Acreage Being
ned Into Recreation
nters by Foresters.

st operators have been
on by coal mine oper-
to provide the answer to
the most annoying prob-
which beset the coal indus-
that to do with mined-out

farming is proving to be
answer. The forest oper-
knew what it should be,
se to a lesser degree they
somewhat related prob-
which new crops of trees
helped solve.

miners call the devastated
of land surface left by strip
"spoils." No word could
be fitting than "spoil" in the
the coal miners use it. After
ppers have finished, the earth
looks to the public eye as if
been plowed by blasts from

appearance of the stripped
ge to the public eye does not
to be agriculturally true. The
that the strip miners' steam
have turned-up virgin
which otherwise could never
been touched by a plow nor
nourished a seed; aerated it
shovels' action; enriched the
ed earth by mixing through it
up limestone; and provided
surface contours which hold run-
water and raise the water level
the entire surrounding area.

es can turn these "spoils" into
of recreational paradise, but
the foresters have done their
the public remains blissfully
ant of this.

"spoils" can support vegeta-
but the only plants passers-
ee growing before the tree-
ers go to work are jimson weed
an occasional volunteer brush.
shoveled-up earth is full of rocks
would defeat or break the
gest plow, and the ridges and
ssions left by the shovels' turn-
would exhaust livestock pas-
there if acreage could be put
ass. Trees are an answer to
ituation.

Strip Mining.
ip mining is practiced in 21
s. Mine operators prefer to call
pen cut" mining. By whatever
e, it is the oldest mining meth-
Aboriginal man doubtless first
d "black stone" would burn
he happened to light a fire on
utop. Then with his rude tools
forced the surface earth back to

Giant shovels set aside the overburden and expose the coal.

because the ceilings of slate over
these veins are so thin and crumbly
that no mine timbering could sup-
port them.

Submarginal Land.
Most of the ground which bears
coal close enough to the surface to
be strip mined is submarginal which
government agricultural experts
have been urging for years be taken
from ordinary agriculture and put
back into woodland. In Indiana its
value before mining averaged only
\$20 an acre in the nine southern
counties where there is "open cut"
mining. The college of agriculture
of the University of Illinois rates
grazing land on a score of from 1 to
10. "One" is tops; 10 is impossi-
ble. Before the strippers went to
work, the land they shoveled in that
state was rated 5.63—barely par.
When they got through it was rated
7.49—good enough to grow trees. The
strippers' shovels damaged surface
fertility, but did not destroy it.

Stripping shovels do destroy earth
top humus. The deep fresh earth
they bring up to replace it lacks
nitrogen. If humus and nitrogen can
be returned, the new soil, because
it is virgin, will be better than it
was before. It has not been worked
out by improper farming or bleached
of its minerals by uncontrolled wa-
ter. It has been enriched by min-
erals mixed in from below. For-
merly below average on the raters'
scale, the land is now well above.

Trees are regenerating this land
and making parks out of waste. In
Illinois alone, only one of the 21 strip-
mining states, 7,250 acres of strip-
mined land in 12 counties have been
planted with 7,000,000 trees since
1930, and the rate of forestation is
increasing so that 2,000,000 trees

the tumbled-up earth as possible,
as quickly as possible.

If it were not for the need of lay-
ering humus on the soil the reforest-
er might plant, except for black loc-
ust, no hardwood trees at all. He
would concentrate on the evergreens.
For the conifers, members of the
great pine family, will grow on land
too poor to support any other kind
of trees. Out of the first 5,000,000
trees planted by the "Open Cut Min-
ing Industry of Illinois," 1,761,900
were black locusts, and 1,462,000
conifers. The needle-like leaves of
these evergreens drop only every
three or four years, but it is a con-
tinuous process. Their "duff" does
not make as much humus as broad
hardwood leaves, but it is good
humus.

Favorite conifers for strip "spoil"
planting are those which are native
to poor soils—such hard-scrabble
evergreens as the Scotch pine, Nor-
way spruce, and the red pine which
struggles a gallant living out of the
thin earth which veils the rocks of
northeast Canada and the bleached
hillsides of abandoned-farm New
England and coal-country Pennsyl-
vania.

Such species are grateful for the
mineral food the strip miners' shov-
els have brought up from under-
ground. They grow much more lux-
uriantly and rapidly on the "spoils"
than they do on the untumbled land
nearby, and far better than they ever
did at home. A large proportion of
the conifers included in the 6,000,000
trees planted on Indiana "spoils"
during the 1930s are now 10 or 12
feet high, covering the steep-pitched
banks of the lakes created by the
shoveled-up contours. At least one
observer is reminded by this reforest-
ed land of the Irish Hills of Michi-
gan and the forest-bordered lakes of
the Adirondacks.

Forests Replaceable.

The forest products industries are
able to give the open-cut mine op-
erators constructive aid and advice
because they formerly faced a prob-
lem which, while not so grave, was
similar. Early loggers looked on
forests as if they were mines. Both
timber and coal are natural re-
sources, the prime difference is that
once coal has been mined it is gone,
while forests are replaceable. Long
ago loggers were faced by a triple
economic problem.

First, land had to be cleared be-
fore it could be farmed. Woodcut-
ters were the first pioneers, proud of
their accomplishment when their
axes "let light into the swamp" the
life-giving sunlight without which
corn could not grow.

Second, the country was in urgent
need of harvested wood for construc-
tion lumber, for fencing, and for
fuel. In 300 years it took seven
trillion two hundred billion board feet
of lumber to build this country.

And third, the pioneers were faced
with seemingly endless mature for-
ests. Only swift harvesting of some
of them could save them from the
deterioration of old age. As a mat-
ter of silvicultural fact, this is still
true of thousands of thousands of
square miles of forestland in Amer-
ica. Harvesting virgin ponderosa
pine has in some sections resolved
itself into a race against the beetle,
plague of these aged trees. Harvest-
ing some stands of virgin Douglas
fir is a race against internal tree
decay. If we are to continue to have
forests in those sections many old
trees need to be removed so that a
new young tree crop can grow.

Enough farm land was finally
cleared. In some sections of the
country, too much. Some harvested
forestland proved unfit to farm.
Trees were the natural and only use-
ful crop these acres would grow.

New England and southern loggers
found themselves harvesting second
and even third-growth trees. The
evidence was inescapable. These
trees were volunteer crops.

Trees can be grown over and over
on the same land.

Where seed trees had been left in
cut-over areas, natural replanting
with fire protection provided ad-
equate new crops. But in some areas
fire, erosion, or other causes have
destroyed natural seed sources,
young growth and the surface fer-
tility of the soil. This was particu-
larly true of abandoned stumpland.
Fires had swept through the waste
litter and dead snags left behind
when the merchantable timber was
taken out. This had destroyed the
humus.

Planting young pine trees on stripped acreage.

cover more of the hot and lasting
d. The only difference between
n and modern strip miners is that
h steam shovels we can go deep-
after the coal—60 feet down if
cessary. Instead of bringing the
al to the surface, this method of
ing carries the surface down to
coal.

Surface earth is piled up in steep
nked hills with intervening val-
s. The valley at the end usually
comes, in the course of nature, a
ce storing run-off water.

Public Does Not Understand.
The public fails to grasp the pos-
sibilities of such land. It sees a big
nd-bordered pond surrounded by
astation. John Q. does not re-
ll, if he ever heard, the state-
ent of the U. S. Bureau of Mines
at "strip mining is a means of
venting waste of natural re-
sources that can never be replaced."

John Q. is no geologist, no engineer.
e does not know that most of the
ip-mined coal veins are less than
ree feet thick, so there would not
be room for men to burrow through
em if they could go underground;
nd that they can't go underground

Reforested 'Spoils' Being Stocked With Fish

Reforested "spoils" look like any
other green, watered rural area—
only better. The ridges and valleys
left by the mining operations devel-
op streams and lakes. With the
help of state conservation depart-
ments, particularly in Indiana, these
are being stocked with fish. The city
of Linton, in the heart of Indiana's
strip-mining country, bought more
than 600 acres of partly planted
"spoil" land, including 28 lakes, the
largest two miles long. Plans include

a supporting fish hatchery, the plant-
ing of quail, roads and bridle paths
winding along the ridges, skeet
and rifle ranges, boating, picnic grounds,
and a municipal arboretum of all
the trees native to the state.

Both as erosion retardant and to
provide food and cover for wildlife
the mine operators' foresters are
planting such species as hazelnut,
serviceberry, wild plum, wild cherry,
grapevines, dogwood, honey-
suckle, mulberry and elderberry.

Washington, D. C.

ARMY'S SIZE AND LABOR PROBLEMS

Manpower Boss Paul McNutt has
been sessioning with the Truman
committee regarding certain prob-
lems which touch the lives of every-
one. They include size of the army,
where we will get labor for farms,
and whether the army shall be used
in mines and industry.

Senators on the committee were
impressed both with the gravity of
the problems McNutt placed before
them, and his general views regard-
ing them.

McNutt revealed that Undersec-
retary of War Patterson had been
talking to him about a total armed
force of 11,000,000 to 15,000,000 men.
This included not merely the army,
but the navy, the coast guard and
the marine corps—everything except
the merchant marine.

However, McNutt pointed out that
shipping facilities and submarine
warfare seriously limited the num-
ber of troops which could be sent
abroad and supplied. The figure he
mentioned must remain a military
secret, but he indicated that with
Hitler's U-boats working overtime
around North Africa, it was going
to be difficult to maintain a very
large army in North Africa.

In addition to North Africa, he
pointed to the problem of supplying
other war fronts in the Pacific, to-
gether with Russia and England.

As a result, McNutt doubted the
feasibility of a world's record army
now. He was all for giving the mili-
tary and navy what they wanted so
long as it could be transported to
the combat zones, but he opposed a
huge army which would eat its head
off at home, especially in view of
the fact that morale deteriorates
when an army is kept idle.

At one time, McNutt said, a large
army at home was considered nec-
essary to protect the United States.
But now military experts felt this
danger greatly lessened, though a
certain number of reserves must be
trained.

Army and Industry.

McNutt was asked a great many
questions about farm labor, especial-
ly by Senator Truman of Missouri.
He replied that the army had been
unwilling to let men go home on
furlough to help with the crops be-
cause this hurt morale. However,
he said the army was working on a
plan to send army units into farm
areas, in battalions or companies,
and have them help with farm work
on an organized basis under army
command.

Though the matter was not dis-
cussed in detail, it seemed to be the
unspoken feeling of the committee
that too big an army going into in-
dustry and agriculture on an or-
ganized military basis might come
close to developing a militarized sys-
tem in the U. S. A. similar to that
against which we were fighting in
Europe.

Only one member of the commit-
tee, Senator Hatch of New Mexico,
felt that the armed forces should be
given free rein to go ahead and
build up tremendous strength not
subject to civilian check and super-
vision.

Other committee members ex-
pressed the view that it was only
natural for any military leader to
want the army to be the biggest in
the world; so a civilian check-rein
by the White House or congress
was necessary to balance farm labor
and industry against armed strength.

Finally it was decided that the
most important problems to lick be-
fore increasing the army to world-
beating proportions was the subma-
rine and shipping.

OFFICIALS SAVE GAS

Some few Washington bigwigs are
careless about gasoline rationing,
but they are exceptions. Most Wash-
ington officialdom is scrupulously
careful.

The chief justice of the United
States, for instance, is riding a
truck. Chief Justice Stone has dis-
carded his private car as a means
of getting to and from the Supreme
court, and instead hitch-hikes in the
delivery truck which runs errands
for the court. In addition, Stone is
one of the walkingest members of
the court.

The White House uses 11 cars now,
against 15 a year ago, and these in-
clude trucks for the White House
mail, as well as cars for the Presi-
dent and staff. White House Sec-
retary Marvin McIntyre now rides to
work in a Ford instead of a Packard.

Vice President Henry Wallace last
fall abandoned his 16-cylinder limou-
sine in favor of a humble five pas-
senger sedan. Every morning he
walks the five miles from the Ward-
man Park hotel to the Capitol, and
rides home in the evening.

Speaker Sam Rayburn uses his of-
ficial car sparingly. He often walks
from his apartment on DuPont Cir-
cle to Seventh street, where he takes
a street car to the Capitol.

Senator Thomas of Oklahoma gets
to work on foot or by bus. The other
day a Capitol clerk gave him a lift
from a bus stop on 16th street.

Milo Perkins, chief of the Board
of Economic Warfare, shuns the use
of his official car in driving from
home to office. Instead, he has
joined a car pool with six other BEW
members who live in the same sec-
tion.

With Montgomery, On Rommel's Heels

By Chester Morrison

(WNU Feature—Through special arrangement
with Collier's Weekly)

Last August Wendell Willkie, visit-
ing in Egypt, made an astonishing
statement about General Montgom-
ery's recent skirmishes with Rom-
mel's army west of Cairo.

Willkie, in terms that seemed at
the time to be extravagant, an-
nounced that the Axis armies in
North Africa had been thoroughly
beaten, that the threat to Egypt
had been removed for all time! Mr.
Willkie called it a victory "compar-
able to Nelson's at Abukur bay."

To the correspondents who had
covered the war in North Africa
since its beginning, it was less like
a victory won than like a battle that
had never been fought. They were
disappointed, and among the people
of Egypt there was only the accus-
tomed feeling of tenuous momentary
security.

Willkie, however, got his informa-
tion from a cocky little Irishman,
who had taken over the British
Eighth army two weeks before.

A month later—at the end of Octo-
ber—Montgomery swung again, this
time with power so tremendous that
the German and Italian armies
reeled and broke, reorganized clum-
sily and fled in what seemed like
panic. They fled out of Egypt into
Cyrenaica, fled back through their
own mine fields, fled westward on
the one main highway along the
Mediterranean coast, fled along desert
tracks hub-deep in sand.

And Montgomery stayed on their
heels. Montgomery, in his tent or
in his dugout, riding in his tank or
his jeep in the field, talking of "my
plan," with other generals putting his
plan into effect. Now, without ques-
tion, the enemy was beaten.

An Interview With Montgomery.

I interviewed him one day at his
headquarters in a cave. He was
wearing a gray home-knit sweater
with a silk scarf knotted about his
throat, khaki pants, unscuffed brown
calf desert boots and the jaunty
black beret of the tank corps. The
beret seemed somehow too large for
his small gray head. There were
no ribbons on his chest. None of
these articles of clothing was strictly
uniform, but uniform regulations
were seldom closely observed in the
field.

Always cocky, he was cockier than
ever that morning. His small, sharp
blue eyes flicked over the corre-
spondents and his close-clipped gray
mustache twitched. Suddenly—such
was the magnetism of the little man
himself—one noticed another figure
standing beside and a little behind
him. It was Coningham—chief of
the RAF in the western desert—ordi-
narily a commanding figure; tall,
heavy and solid, with a hawk nose
of the kind which belongs to a man
commanding the RAF in the field.
Coningham wore the proper uniform
with ribbons.

'Complete, Absolute Victory.'

"It was a fine battle," Montgom-
ery began. Here was that past tense
again—the same way Willkie had
spoken two months earlier—as
though the battle was already over.
"It was a fine battle," he repeated,
and now he no longer could suppress
the smile that had been making his
mustache twitch. "Complete, abso-
lute victory," he snapped. "Boches
finished. Finished! Completely
smashed!"

And it turned out that the enemy
was smashed. Not completely
smashed, not yet, but Montgomery
has the knack of reading the fu-
ture. "He's like the conductor of a
great orchestra," one of his most re-
spected minor subordinates told me
once. "He's always at least one
bar of the score ahead of the play-
ers."

While Montgomery fought on the
ground, Coningham fought in the air.
The RAF and its adjunct, the USAAF
fought by day and by night, with
fighters and bombers, and they
achieved a triumph such as has never
been achieved by any Allied air
force in any other theater of war.
It wiped out—in Coningham's own
words, it annihilated—the Luftwaffe
on the ground and in the air.

Banked today along the sides of
airfields which were German in
October are piles of junk—junked
German and Italian planes, wrecked
before they could leave the ground.

It was simply done, a simple thing
to do, given the weapons with which
to do it. For the first time since the
battle of North Africa began in 1940,
Montgomery had them.

In the battle of August and Sep-
tember—the battle so disappointing
for the spectators—Montgomery had
won a passive defensive victory. He
massed his tanks, his anti-tank guns
and his field guns in fixed positions.

The enemy came, his panzer divi-
sions nosing eastward. The oncom-
ing panzers met the massed fire of
Montgomery's positions, met it and
fell back, and the battle was over.

ASK ME ANOTHER?

A General Quiz

The Questions

1. Alluvial gold is what?
2. What is the correct name for the German secret police (Ges-tapo)?
3. What are the colors of the rainbow?
4. Which is the right bank of a river?
5. What is vegetable ivory?
6. What is a fellah?
7. If a man is sartorially cor-rect, he is what?
8. Tabasco is a state in what country?
9. What is the name of an ac-cumulation of earth, stones, etc., deposited by a glacier?
10. What are rhinestones and where did they originate?

The Answers

1. Gold found in the sands or soil of stream beds.
2. Geheime Staats Polizei.
3. Violet, indigo, blue, green, yellow, orange and red.
4. The bank at one's right when facing downstream.
5. The seed of the tagua nut, which looks like and is used as ivory.
6. A peasant in Arabic-speaking countries.
7. Dressed in good taste.
8. Mexico.
9. Moraine.
10. Colorless stones of high lus-ter, made of paste, and first man-ufactured along the Rhine.

COLDS' MISERIES PENETRO

For colds, coughs, nasal congestion, muscle aches, get Penetro—modern medication in a mutton suet base, 25¢, double supply 35¢.

Necessary Condition

"We speak of liberty as one thing, and of virtue, wealth, knowl-edge, invention, national strength and national independence as oth-er things. But of all of these lib-erty is the source, the mother, the necessary condition." — Henry George.

WHY SHOULD I GET ANY OTHER A B D VITAMINS BUT GROVE'S

And he's right! No need to pay big money when GROVE'S A B and D Vitamins cost only 25¢ for over two weeks' supply. The larger size is even more economical—only \$1.00 for over 10 weeks' supply. Each capsule supplies your daily protective require-ments of essential Vitamins A and D plus famous B1. Unit for unit you can't get finer quality. Potency—quality guaran-teed! Today start taking GROVE'S Vitamins!

GROVE'S A B D VITAMINS

BY MAKERS OF "BROMO QUININE" COLD TABLETS

Plant Walks Like Man

The roots of the Cactus Andante, found on the Peru coast, are actu-ally feet and legs. The plant walks over the surface of the arid desert with the aid of the winds, gets water from the damp night air, and food from the saline surface.

SNAPPY FACTS ABOUT RUBBER

Between 28 and 33 per cent of the road service calls answered by AAA clubs are in response to tire trouble—flats. Battery prob-lems cause the second largest number of road calls for help.

American synthetic rubber will fill 90 per cent of the country's rubber needs, within two years of Pearl Harbor, according to a rubber chem-ist. This will be a speedy transition from natural rubber Germany which started synthetic rubber development prior to 1914 can now only take care of 75 per cent of its rubber needs with synthetic.

Rubber tired trucks have been hauling about 18 per cent as many ton-miles as the railroads, ODT officials say.

Until gasoline rationing was applied as a brake, the car owners of the country were wearing off 750,000 pounds of tread rubber from their tires every day, a government statisti-cian asserts.

Ink Spots
And Spatters
By Jergie

THIS IS NO FAIRY
TALE

Once upon a time the big wigs
and wise men of our fair village
put their heads together and after
much whispering and council one
with the other they issued a decree
and would give the natives a nice
surprise by bartering for a castiron
atrocity which someone else had
heaped up in the market place. The
cast iron giant in its younger days
had been called Ro Admain Tai Ner.
It would be so lively and so nice
for smoothing out the wrinkles and
the dips and the bumps in our
streets and made the roadway as
smooth and gentle as a zephyr
breeze in the Springtime, and the
effect even made the old model T
ride like a chariot in heaven. It
did the trick.

The natives arose on their
hind leg and wept with joy. For
to these many years before they
had their gizards jarred to se riding
over the rough bumps. The path-
ways were heavenly smooth (but
dusty).

The big wigs had perf rmed a

miracle. They again went into a
solemn council and came out of the
council chambers with another de-
cree which they inscribed on tablets
and parchment. The cast iron gi-
ant had other qualities. It would be
a blessing in disguise when the icy
hand of winter smote the natives on
the beezer, and cold North winds
came and piled our pathways up
high with snow and would bring
gloom and dispair to the natives.
And the cast iron giant emerged
from hiding, and lo and behold!
What magic it performed. Soon
the pathways and biways had all
been cleared of snow and the people
rejoiced. They could again ride
hither and yon, mostly yon, with-
out danger of their chariots becom-
ing fast in the deep snow. And the
natives again arose on their hind
legs and rejoiced and acclaimed the
big wigs Good Scouts. The cast
iron giant was an angel in disguise.

But alas! One Ruler of a Foreign
country started a war, and a great
wave of "Conservation" swept over
the land and snow covered path-
ways. The big wigs were caught
in the web. They called together
the wise ones and held a council
in deep thought. They got their
heads together again and acclaimed
that in the name of "Conservation"
the cast iron atrocity should be
shielded from the eyes of the na-
tives. They would hide it in a shed
and cover the hind wheels with old
boxes and let the natives rant and
rave, slip and skid.

Soon the frosty air was rent with
wailing and cursing and gnashing
of teeth, as the Phords and the
Chevies, their brothers, sisters and
their aunts and uncles struggled in
the deep snows. Ye, verily, the ears
of the big wigs must be pink, their
necks must be red, as the natives
heaped their curses upon them. But
with no avail, for this is "cnserva-
tion." But to no avail. The snow lies
thick and heavy on our pathways.
The snow melteth into ice, the ice
soon fermeth into bumps and bogs
and the natives even now shudder
to think what will cometh in the
Springtime.

Thus speaketh the Scribe.

The consensus of opinion among
townsmen is that the town officials
have stetched their economy pro-
gram a bit too far this winter by
not keeping the streets plowed and
open to traffic as in former years.
An unestimated amount of rubber
tires have been damaged and extra
gasoline used by cars that were
tuck in trying to get free. It would

have been better economy and so-
called "conservation" of rubber and
fuel to have used a little gasoline
in the town snow plow and kept
our streets passable.

From a fire hazzard angle, it
might have been difficult at times
this winter for the fire truck to
have negotiated the deep drifts on
some streets in trying to reach a
house on fire.

It's too late to do much about it
now, but let's not go through an-
other winter with street conditions
so poor. Its not being done in oth-
er towns. Klemme is progressive
and wants to stay that way.

This column is open for a reply
if any town official thinks they are
unjustly criticized in this article.

THE POINT SYSTEM IS FAIR

That "all men are born free and
equal" will certainly be true when
the new point rationing system go-
es into effect March 1st.

No matter how rich, or how poor
you are, each person will be allow-
ed 48 points for purchasing foods
during the month of March.

Its up to the individual. If he
wants good, wholesome plain food,
he will get just that much more. If
he is "high-hat" and has to have a
diet of fancy food, he can starve
and like it!

No longer will the millionaire be
able to have twenty-five or thirty
pairs of shoes a year. He can buy
only three pairs, the same as you
and I, and most other folks. We
can struggle along on three pairs!
Sugar rationing has worked out

fine, and rationing of other foods
can be expected to be just as satis-
factory or better.

Remember how sugar skyrocket-
ed to \$30.00 per cne hundred dur-
ing the World War? It would have
happened again if the lid had not
been clamped down by rationing.
Today sugar is a long way from be-
ing 30 cents a pcund. In fact the
price is about 8 cents a pound today.

Rationing works more than one
way. First of greatest importance,
it assures our fighting men and our
allies of an adequate food supply to
win the war. Second, it prevents
"cornering" of food supplies and
gives a wider distribution of food
throughout the nation. It assures
all lower prices.

TWO ELECTION COMING UP IN MARCH

Klemme will have two elections
in March.

The first is the schcol election to
be held on March 8th, at which
time directors will be chosen by
the voters.

During the latter part of March
the annual town election will be
held at which time the voters will
elect a mayor, five councilmen, an
assessor and town treasurer.

Robert Sinclair, Garner, Hancock
County salvage chairman, disclosed
this week that Hancock County
ranked 50th among the 99 counties
in the state in the matter of col-
lecting salvage.

Hancock County's total was 315
pounds per person, or a total of
2,362 tons.

THE METHODIST CHURCH Herschel E. Harvey, Pastor

Klemme Methodist

Thursday:
Choir meets at 7:15 P. M. at the
R. A. Jorgenson home.

Sunday:
Sunday Worship Service 10 a. m.
Church School at 11 A. M.
Youth Fellowship with Valentine
Party at 7:30 P. M. for all young
people.

Monday:
Fifty-Fifty Class meets February
15th.

Liberty Methodist

Sunday Church School at 10:15
A. M.
Worship Service at 11:15 A. M.
Youth Fellowship with Party on
Tuesday, February 16th.

Plans for the Week of Dedication
are being completed when special
services will be held in every Meth-
odist Church in American during
the week of February 23 to March
7, inclusive.

At Klemme and Liberty, a guest
speaker, Rev. T. S. Bassett of Sioux
City, Iowa, will be here for the
week. The detailed program will
be announced later.

This week should be kept sacred
in the calendar of every Mthodist,
and every member should plan to
attend and participate in the ser-
vices.

Mr nd Mrs. Wayne Pavey and
daughter Carol Ann were dinner
guests of Mrs. W F Pavey and Mrs.

John Clements Sunday
second birthday ann-
February 7th and the dis-
her honor.

Eleven Tons Of Paste

and Other Store News

Wm. F. Meyer had a dream some months ago; he did not dream of a White Christmas, but he dreamed of a nice farm with rich, black soil, and it seems before he woke up he purchased another farm west of Miller and will move there March 1st, thus making his dream come true.

Mr. Meyer was connected with the Wellemeyer Furniture Store for several years and during that time laid over one thousand rooms of Linoleum. This means that he spread eleven tons of paste with a linoleum trowel, and traveled on his hands and knees as far as the distance from Klemme to Des Moines and back, and even tho he wore knee pads, his knees were sometimes sore from all the crawling. Mr. Meyer's linoleum work improved each year and for his loyalty to the Store and his excellent service to the customers, I take pleasure in hereby conferring on him the title of "Expert Linoleum Worker," and we wish him good luck and happiness in his new work on the farm.

The above is sad news because we do not like to see the Meyer family move away from Klemme, but we have good news, too.

The Wellemeyer Furniture Store was fortunate in finding a very good man to take Mr. Meyer's place, by the name of LOUIS V. PERKINS. He moved to Klemme last week from Estherville, Iowa, and lives in the Rosendahl residence, and is now at work in the Store.

Mr. Perkins grew up in a Furniture Store and certainly knows his woods and finishes, and loves good furniture. For the last six years he operated his own store in Estherville, specializing in Linoleum, Paints, Wall Paper, Window Shades and the like, and we were told at Estherville that he was their best Linoleum and Table Top workman.

Mr. and Mrs. Perkins have three children, the youngest daughter is a Junior in High School, and the older son and daughter are employed in Estherville. We know you will like this family, and if you have any Linoleum problems tell them to Mr. Perkins here at the Store.

County Auditor

RURAL ELECTRIC TO HOLD ANNUAL MEETING

The Hancock County Rural Electric Cooperative will hold its Seventh Annual meeting in the Avery Theatre, Garner, on February 11th, starting at 10 00 a. m.

In the morning, the reports of the President, M. C. James; Secretary, I V Rasmus, and Treasurer, C J. Wille, will be given and the minutes of the last annual meeting will be read Also, three directors for the Cooperative will be elected at this meeting to hold office for the next three years. The directors whose terms are expiring are Omar Maland of Kanawha, J. A. Huisinga of Woden, and Victor Loebig of Wesley

It is the patriotic duty of all the members to attend or cast their vote by mail for the directors who will be elected at this meeting.

A free lunch will be served in the Old Opera building over the Nesbit Cafe during the lunch hour.

During the afternoon, any unfinished business will be transacted. Earl Hall of the Mason City Globe Gazette will be the principal speaker. There will also be free entertainment.

ANOTHER BLIZZARD IN NORTH IOWA TODAY

After several days of comparatively mild weather which turned into light rain and sleet Tuesday afternoon, temperatures dropped to an 8 degrees above zero this Wednesday morning, with snow and high winds, whipping into another blizzard.

Klemme Schools were closed today because of the storm.

BRITT DEFEATS COUNTY CHAMPS IN OVERTIME THRILLER HERE

The Britt Eagles did it, they defeated the County Champions, the Klemme Shamrocks here Friday evening 22 to 17, but it took an overtime period to do the trick.

The first half of the game was a "free-throw contest" as referee Jim Barber of Belmond kept his whistle hot calling fouls on both sides.

The Shamrocks lead in the first quarter 3 to 1 on Jacobs' field goal and a charity toss by Bill Grosshuesch. Eiseman of Britt calked up a free toss.

A basket by Ford and a free toss by Trafford gave Britt three points in the second quarter to tie up the score 4-all as Kuduze got a free one in that quarter

Playing loosened up somewhat in the 3rd quarter when Grosshuesch and Kaduce each hit the net with two charity tosses by Jacobs to run the score to 11, while Britt ran it to 12 on two buckets by Peterson who also got a free throw; two charity tosses by Ford and one by Trafford The third quarter ended 12 to 11 with Britt in front.

The Shamrocks came right back with Kaduce hitting the net twice and Klitzbach getting a free one or a total of five points against 4 for Britt on Peterson's goal, one by Hartzel But the score was tied as the game ended, 16-16.

In the overtime Britt got the jump on the Shamrocks and rammed in two field goals while Klemme could only muster up one point on a free throw by Jacobs.

As the schedule now stands the Eagles have two wins over Klemme, and one loss, that being in the County Tournament

The teams are well matched and can give the fans a good game anytime

DENNY RIDDER HAD BIRTHDAY PARTY FRIDAY AFTERNOON

Saturday was Denny Ridder's seventh birthday, but the event was observed Friday when his mother, Mrs. L. A. Ridder invited his teacher, Miss Hardecopf, Miss Gueff and Mrs. Smith, Grandma Ridder and Grndma Koerner and a few other close relatives to spend the late afternoon and have supper with Denny

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE
Timely Information Prepared By Iowa State College Specialist

Because of its many uses and adaptations the disc harrow is almost a universal implement on Iowa farms Next to the plow it is one of the most valuable tools on the farm for the preparation of the seedbed, weed control and to firm the subsurface of the seedbed.

The first requirements in preparing the disc for the season's work is to determine the condition of the bearings. This usually requires taking them apart to find out if they are filled with hardened dirt and grease or are worn

The bearings on most discs consist of oil-soaked and hardened wood blocks carried on chilled or cast journals which also form the spacing spool. The wooden bearing parts can be replaced easily and very inexpensively if needed

Good control of the disc is dependent on reasonably close-fitting bearings. If it is not necessary to replace bearing parts, taking the bearings down and cleaning out the dirt and grit will aid substantially in lubrication.

Lubrication is ordinarily taken care of by grease cups or by pressure lubrication fixtures. If possible, the hard oil cups should be replaced with pressure-gun fittings to assure the frequent application of clean grease to the bearing parts.

Grease guns on Iowa farm machines may prove to be one of the big guns of this war.

The next point in need of attention is the sharpness of the discs and the tightness of the gang bolts. Dull or loose discs prevent good uniform penetration. Discs usually are sharpened by scraping the edges with a sharp hand tool, by grinding with an emery grinder or by drawing out in a special rolling device. The first two methods tend to reduce the diameter of the disc more rapidly than rolling, and the rolling process tends to work-harden the cutting edge, giving a little more durability to the sharp edges.

Another consideration in repairing a disc harrow is to make provision for changing the angle of the gangs conveniently and safely. Attachments, links or springs usually are provided for applying extra pressure at the center of the disc gang so the disc can be made to cut a uniform depth throughout the entire length of the gang.

Another Job Open for Women

(as well as men)

WOMEN can probably do this job better anyhow, because it is the women of America who raise most of the chicks.

We will pay \$1.50 per 100 to women (or men, glad to have them too) who take orders for our Insured Chicks. We will insure 90% of every order for 6 full weeks against death from any cause whatsoever. It makes a real selling advantage, emphasizes extreme livability of our sturdy chicks.

You and your neighbors probably order chicks anyhow. Get the facts. Make and save some money. Choose 12 leading breeds. Competitive prices. Puller tested. Rigidly culled. And the best R. O. P. bloodline.

SINK YOUR DIMES IN WAR SAVINGS STAMPS

Kidneys Must Work Well

For You To Feel Well 24 hours every day, 7 days every week, never stopping, the kidneys waste matter from the blood.

If more people were aware of how the kidneys must constantly remove plus fluid, excess acids and other matter that cannot stay in the blood without injury to health, there would be better understanding of why the whole system is upset when kidneys fail to function properly.

Burning, scanty or too frequent urination sometimes warns that something is wrong. You may suffer nagging backache, headaches, dizziness, rheumatic pains, getting up at nights, swelling. Why not try Doan's Pills? You are using a medicine recommended by the country over. Doan's stimulates the function of the kidneys and help them flush out poisonous waste from the blood. They contain nothing harmful. Get Doan's today. Use with confidence. At all drug stores.

Valentine Notes

Along about this time, even though isn't spring, there's a note of precious sentiment that gets into the atmosphere. Perhaps it's those bits of bright red and lacy paper the children have been pasting into their season and winning us over— even if only with a cardboard arrow springing out of a froth of red and white paper cutouts of hearts. Why not plan to give yourself up to party with a Valentine theme?

Let's make it simple but festive or even simple gayety will do loads for your morale. Except for the cake in today's column which is a wee bit party-ish, the rest of ingredients in the party are streamlined to save your time.

Our color scheme for the holiday runs into red-and-white, so our main dish is going to be a variation of the old favorite chicken and cranberry.

Jellied Chicken and Cranberry Loaf.
(Serves 6)
2 tablespoon gelatin
2 cups well seasoned chicken broth
6 small thin slices chicken
2 cups minced chicken
Cranberry mixture

Soften gelatin in a little broth, add remaining broth and heat until gelatin is dissolved. Pour a little into the bottom of an oiled quart loaf pan. Divide remaining gelatin between 1 cup dark and 1 cup light meat of chicken. Add alternating layers of chicken and cranberry, chilling each layer thoroughly until set before adding the next.

Cranberry Mixture.
(For Chicken Loaf)
1 pint cranberry juice
1½ tablespoons gelatin
½ teaspoon salt
Dash of cayenne
Juice of ½ lemon
1 cup minced celery

Soften gelatin in a little cranberry juice, dissolve over hot water. Add remaining juice and seasonings. Cool and add celery.

Since the main dish is a combination salad and main dish—if served with a lettuce or watercress garnish and mayonnaise if you want it, balance the menu with some attractive assorted sandwiches. Sandwiches should be light snacks for this type of party, so we'll fall back on the old standby, cream cheese.

Cream Cheese Rolls.
Mix 1 package of softened cream cheese with 1 tablespoon of mayonnaise and a dash of Worcestershire sauce. Blend thoroughly. Take thinly

Lynn Says:
The Score Card: It looks very much as though you will cook what you can find with more foods announced as to become rationed. Canned and frozen foods along with meats will be less easily available.

Fresh fruits and vegetables are to be unrationed so keep your budgetwise and marketwise eyes cocked for bargains. Turnips, carrots, beets, citrus fruits and apples will appeal to wise menu makers.

Canned soups which you obtain and pay more for now are usually more concentrated and you can get more food value from them. You'll like using dehydrated soups, too, the chicken-noodle combinations being winners.

Plan to pack whole wheat flours and dehydrated pancake mixes into your shopping bags. The former will help you get vitamin B in the diet, while the latter is a time-saver.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.

JESUS HEALS A MAN BORN BLIND

LESSON TEXT—John 9 18-38.
GOLDEN TEXT—"One thing I know, that, whereas I was blind, now I see"—John 9 25.

The love of Christ is seen in its full beauty against the background of man's hatred and unbelief. Last week we saw Him coming away from the stones with which his enemies sought to kill him. As He passed by He had the time and the compassion to stop and help a man who had been born blind. His disciples, afflicted in some degree with the speculative tendencies of their time, saw in this blighted life only an illustration of a theological theory about sin.

But Jesus, by a loving and gracious act, stirred in the heart of the man that faith which caused him to obey—to go, to wash, and to see (v. 7). The enemies of Christ were not willing to believe even what they now saw to be true. Their stubborn unbelief shut the door to blessing for them, but the blind man received three things by faith:

I. Healing (vv. 18-23).

The argument with the man's parents hinged on one point—he had been healed of his blindness. The parents were unwilling to risk excommunication by discussing the matter, but they did know that he had been blind and now could see. That was clear.

An experience like that is impossible to deny. The healing of the soul of man in regeneration is also a stubborn fact which deniers of God's Word and God's grace are unable to meet and overcome. The one who was blind and now could see had no questions about the deity of Christ and His saving power. What is more, he was not afraid to testify. He could "speak for himself" (v. 21).

Note the difference between the three classes here: Blind and stubborn unbelief (v. 18), faith too fearful to speak (v. 22), and the assured faith of the one healed. That is our next point.

II. Assurance (vv. 24-34).

The appeal of the Jews in verse 24 based on their statement: "We know that this man is a sinner," reminds us that there is no knowledge so absolute (and so absolutely wrong) as that of ignorance backed by self-conceit.

They said they knew, but did not. The man had complete assurance by faith and by experience. He did not argue (v. 24), he simply restated his healing. "I was blind—now I see." When they evaded that reply (for they dared not meet it), he thrust deep with the convicting fact that God does not perform His miracles in response to the prayers of a wicked man. That was too much for them, and they cast him out.

Even as the stupidity and stubborn willful unbelief of our Lord's enemies grew step by step, so also did the healed man's assurance grow as he testified. First he called the Lord "a man called Jesus" (v. 11); then "a prophet" (v. 17), and then at last, "the Son of God" (vv. 35-38).

Standing true to Christ and speaking for Him means growth in faith, in knowledge and in grace. It may mean persecution and even exclusion, but remember that when the man was cast out by the haters of Christ, he met Christ. "His excommunication was a promotion. He went from the synagogue to the Saviour" (Scroggie). And that is our third point.

III. Fellowship (vv. 35-38).

He did not know Jesus. He had heard His voice, but he was blind then and had not seen Him. He probably did not know where to find Him. Then, too, he was now an outcast under the disfavor of the authorities, and even his friends would fear to be seen with him.

But Jesus sought him. Ah, that's the glorious difference between our Lord and those who look at the outward appearance of things. He went to find the man who now needed fellowship, instruction and encouragement.

He had sought the man out to heal him, now He sought him again to help him spiritually. We need to learn of our Lord that we are not to wait until the sin and suffering of men force themselves upon our attention and force us to do something. We are to go out into the highways and the hedges and urge sinners to come to Christ. We have failed in this. We have built churches and expected the people to come, instead of going where the people are, and bringing them the gospel. The war is teaching us some lessons in that connection, but we are none too quick to learn and to act.

There is a beautiful touch in verse 37. Dr. MacLaren points out that when speaking to the woman of Samaria, Jesus said: "I that speak unto thee am he," but to the man who had just begun to see He said: "Thou hast both seen him, and it is he that speaketh to thee." The Christ who gave sight, now gives Himself to be seen.

THINGS for You TO MAKE

WE'VE borrowed April's tulips to bring you this irresistible little apron with its gathered skirt and cross straps. Short, medium

and tall tulips grow in applique from a strip of color to give a refreshing lift to an otherwise plain apron.

Order Z8528, 15 cents, for this tulip apron pattern—grand for making gifts. Send your order to:

To Good Use
"Your daughter has a great many admirers," said Mrs. Wilkins. "Oh, yes," replied Mrs. Bilkins, "she puts nearly all her window curtains on the rods with her old engagement rings."

Another Question
He (reading paper)—Scientists say there are over ten million germs on a dollar bill.
She—W'he, I wonder how many there are on a five.

The more a man has, the more he wants—with the possible exception of the father of twins.

His Choice
"Remember, my boy," said the wealthy uncle, "that money does not bring happiness."

But the young man was ready for that one.

"I don't expect it to," he replied; "I merely want it so that I shall be able to choose the kind of misery most agreeable to me."

Clashing Arms
The law speaks too softly to be heard amidst the din of arms.—Caius Marius.

Pull the Trigger on Constipation, with Ease for Stomach, too

When constipation brings on discomfort after meals, stomach upset, bloating, dizzy spells, gas, coated tongue, and bad breath, your stomach is probably "crying the blues" because your bowels don't move. It calls for Laxative-Senna to pull the trigger on those lazy bowels, combined with Syrup Pepsin for perfect ease to your stomach in taking. For years, many Doctors have given pepsin preparations in their prescriptions to make medicine more agreeable to a touchy stomach. So be sure your laxative contains Syrup Pepsin. Insist on Dr. Caldwell's Laxative-Senna combined with Syrup Pepsin. See how wonderfully the Laxative-Senna wakes up lazy nerves and muscles in your intestines to bring welcome relief from constipation. And the good old Syrup Pepsin makes this laxative so comfortable and easy on your stomach. Even finicky children love the taste of this pleasant family laxative. Take Dr. Caldwell's Laxative-Senna combined with Syrup Pepsin, as directed on label or as your doctor advises, and feel world's better. Get genuine Dr. Caldwell's.

The Answer
After all, the shortest answer is doing.

Older People!

Many Doctors Advise This Great Tonic
Older folks, take good-tasting Scott's Emulsion daily! Tones up your system, helps build resistance against colds, also promotes recovery from weakening after-effects of winter ills—if there is a dietary deficiency of Vitamins A and D. Even delicate systems take and retain Scott's Emulsion easily. Buy today!

TY SCOTT'S EMULSION
Great Year-Round Tonic

PATTERNS SEWING CIRCLE

Blouse and Jumper.

HERE'S a juvenile jumper outfit which has extra prettiness—in the soft, curving lines of the jumper and in the round Peter Pan collar and short puffed sleeves of the blouse. Any little girl will look "nice as pie" in it—yet it is very practical and can be made at next to nothing cost.

Pattern No. 8278 is in sizes 2, 4, 6, 8, 10 and 12 years. Size 4 jumper requires 1½ yards 36 or 39 inch material, blouse 1½ yards.

Slip and Panties.

IT IS sound economy to make your own underwear, in these times particularly! This pattern will guide you in making the type slip you have always sought . . . a slip which fits without a wrinkle.

The secrets of washing woollens successfully are: (1) plenty of suds; (2) luke-warm water throughout the washing and rinsing; (3) no rubbing or twisting; (4) drying at moderate temperature, avoiding both heat and intense cold.

When plain pillow slips made from tubing are partly worn, rip or cut off the seam at the bottom and sew the slips again with the fold in the center. It will double their life.

Furniture for a man's room is appearing in bleached and limed finishes rather than in the dark oak which used to hold sway.

When using an aluminum saucepan for boiling eggs, add a few drops of vinegar to prevent the pan from discoloring.

The first time the cork is taken out of a glue bottle, dip it in melted paraffin and allow it to dry before replacing—it will never be sticky and hard to remove.

Draperies that shrink may be remedied this way: Add a fold of contrasting color to the bottom of the old curtain, using a harmonizing color or cording between the two materials, and the effect will be very pleasing.

When clothing is spotted by rain, place a clean damp cloth on the material and press it with a moderately warm iron.

The popular wrap around turbans should be washed frequently because they are handled so much. Those made of silk, rayon or knit wool can be laundered with lukewarm water and mild soap if the color is fast.

A speck of salt greatly improves chocolate, caramel and white frostings and candies.

To clean a soiled felt hat rub it with a very fine grade of sandpaper.

Slip and Panties.

has a graceful top and offers control for the bust line. Panties to match are included!

Pattern No. 8261 is in sizes 12, 14, 16, 18, 20, 40 and 42. Size 14 slip and pantie take 4½ yards 39-inch material.

NEED UNIFORM TEXT BOOKS IN HANCOCK COUNTY'S RURAL SCHOOLS

The Hancock County Board of Education met at Garner last Tues-
day afternoon at the office of
County Superintendent Charles S
Whitney. The meeting was attend-
ed by W. E. Puffer, Corwith; G. A.
Robinson and Mrs. H. C. Meyer of
Britt, and Fred C. Missal, Garner.

The Board considered plans for
the election to be held on March 8
on the matter of using uniform
text books throughout the county.
Information will be sent from the
office of the County Superintendent
to members of the various township
boards of directors, secretaries and
rural teachers.

The proposition will be voted on
in rural schools on March 8th, and
special ballots are being prepared
for the rural voters.

Hancock is one of the few coun-
ties in this district not now having
a uniform text book in the rural
schools.

Word was received in Klemme
last week that Miss Irene Harms
slipped and fell on an icy sidewalk
and fractured her left arm above
the elbow. Miss Harms, who is a
niece of Mr. and Mrs. J. C. Thomas
and who makes her home with
them, is a teacher at Newton, Iowa.

Conrad Quandt was at Forest
City on business Saturday.

Ira Overholt was at Mason City
on business Saturday morning.

B. L. Prouty of Garner, was a
business caller in Klemme Satur-
day evening.

Henry Helps was seriously ill the
last of the week, but is reported to
be better at this writing.

Mrs. Leonard Swanson entered
the Mercy hospital last Wednesday
for treatment and an operation.

Mr. and Mrs. Orville Stokesbary
were at Garner on business Friday
afternoon.

Mrs. E. G. Gregory spent Friday
evening and Saturday visiting at
Hampton.

Mr. and Mrs. H. D. Ramsay and
children visited with relatives at
Marble Rock, Sunday.

Mr. and Mrs. P. M. Wilson drove
to Clarion Sunday afternoon for a
visit with relatives and friends.

Mrs. Earl Schaeffer was a supper
guest at the John Chambers home
Tuesday evening.

C. A. Larsen has recovered from
his siege with the mumps and was
able to come up town Tuesday.

Keith Albertson returned Friday
evening from Des Moines where he
attended a convention of lumber
dealers for a few days.

Miss Patricia Kudje spent the
week end visiting with her sister,
Miss Jacqueline Kudje at the State
Teachers College, Cedar Falls.

Miss Thelma Chambers, teacher
in the Britt high school, spent the
week end visiting with her parents
Mr. and Mrs. John Chambers.

Mr. and Mrs. C. G. Waterman,
Mrs. Lyle Wilcox and Mrs. John
Clements were Mason City visitors
Saturday afternoon and evening.

Mr. and Mrs. Verle Keraus and
baby son Mickey, of Garner visited
at the Ed Buntensch home Sun-
day afternoon.

Mr. and Mrs. Wesley Patterson
and baby daughter visited at the
Verle Keraus home at Garner Sat-
urday afternoon.

Mr. and Mrs. Verner McLaughlin
and family of Belmont were dinner
guests Sunday at the home of Mrs.
Daisy Lemke.

Co. Supt. of Schools, Charles S.
Whitney of Garner, was a caller in
Klemme and vicinity Tuesday fore-
noon.

George Lawhorn returned Satur-
day evening from the Veterans hos-
pital at Des Moines where he has
been for the past two weeks receiv-
ing examination and treatment.

John Day drove to Rock Falls
Sunday where he enjoyed dinner at
the home of his brother-in-law and
sister, Mr. and Mrs. John Baum-
gartner.

Mrs. James Carlson and son, Ar-
thur James, came Tuesday morning
from Ingram, Wisconsin, for a visit
at the parental Arthur Wellemeyer
home.

Walter Rosendahl and family
moved last Wednesday to the Car-
old Larson house at the farm west
of town. The Rosendahls have
leased the land and service station
for the coming year.

Mrs. Evert Barz returned Tues-
day morning from a visit with her
husband, Evert Barz, U. S. N. who
is taking special work at Purdue
University at Lafayette, Indiana.
The Barz children stayed at the
Mrs. Clara Barz home during their
mother's absence.

Mrs. W. C. Keraus was pleas-
antly surprised to receive a package
containing genuine Irish linen hand-
kerchiefs in the mail last week. The
package had been mailed by her
son, Cpl. Otho Keraus from Ireland
and postmarked Nov. 27. Mrs. Tom
Mitchell, Swea City, also received
handkerchiefs from Cpl. Keraus.

Have you paid your subscription?

Mr. and Mrs. C. G. Waterman,
and daughter Mrs. Lyle Wilcox;
and Mr. and Mrs. W. C. Keraus
visited Sunday afternoon and even-
ing with Mr. and Mrs. Tom Mitchell
at Swea City.

Mrs. Lewis Mau and little daugh-
ter, Bonnie Jean, and Miss Meryn
Pringnitz left Friday by train for
Lubbock, Texas, for a visit with
Mrs. Mau's son, Pvt. Lowell Mau,
who is an aviation mechanic at one
of the army flying fields there.

Wes Schuldt left Sunday evening
by bus for Davenport to look after
business matters. Mr. Schuldt is
the owner of a building in Daven-
port and was formerly in the gro-
cery business there. He sold out the
grocery business some time ago.

WEDDING ANNIVERSARY AND BIRTHDAY CELEBRATED

On Wednesday, February 3, was
the first wedding anniversary of
Mr. and Mrs. Mitchell Bock, and
also Mr. Bock's birthday. To prop-
erly observe the double event Mrs.
Bock prepared and served a supper
Wednesday evening, and had as
guests Mr. and Mrs. Wm. E. Bess-
man and son Harry of near Dows;
Mr. and Mrs. Ervin Meyer of Alex-
ander; Mrs. Naska Bock; Rev. and

to take home to read. The meet-
ing was adjourned and a tasty
lunch was served by the hostess.

Abraham Lincoln - -

Abraham Lincoln once said in speaking of
saving money for future security:

"Other Means May Succeed; This
Cannot Fail."

Today Lincoln would use the same phrase
in urging us to purchase War Bonds and
Stamps as a security for the future peace of
our Nation and the World in general.

Let's commemorate Lincoln's Birthday by
purchasing more War Bonds and Stamps for
Victory and Freedom.

More Details Regarding War Ration Book Registration

REGISTRATION WILL BE AT TOWN SCHOOLS IN COUNTY

Must Have War Ration Book One Before Book Two Can Be Issued To Consumer

Registration sites in Hancock County are the school buildings at the following sites: Crystal Lake, Woden, Hayfield, Miller, Garner, Britt, Corwith, Kanawha, Goodell, Klemme, Hutchins, Erin No 5, Liberty No 5, Twin Lake No 5 and at Duncan.

Anyone may register at any site regardless of county boundaries if he has ration book one with him. Everyone who has war ration book one (the sugar book) will be entitled to get war ration book two, the new point-ration book. One person should apply for all the ration books in his family or household. Anyone 18 years of age or over may apply for the family. Books do not have to be signed in the presence of the registrar.

Must Make Report Of Foods

To get the new ration book, the applicant must: (1) report how many cans, jars, or bottles, 8 ounces or larger, his household has of commercially packed canned fruits, vegetables, fruit and vegetable juices, canned soups, chili sauce and catsup, giving just one figure, the total number of cans; (2) report how many pounds of coffee he or his household has, one pound is allowed each person whose age is down on war ration book one was 15 years of age or older (the age has been lowered from 15 to 14).

There is a penalty of up to \$10,000 fine and 10 years in jail for reporting false figures on canned goods and coffee.

Bring Old Books With You

The person applying for war ration book two must bring in all the copies of war ration book one held by his family or household. He cannot get the new book for anyone else he brings in the old one. He must also list, in declaring goods on hand, the names of all persons for whom he is reporting and the total number of the book one of each. Coffee stamps will be removed from the old books for all coffee over the allowance.

Point stamps will be torn out of new ration books for the excess commercially canned foods on hand. One 8-point stamp will be removed for each 9-ounce or larger can, jar or bottle over the allowance. But no more than half the monthly ration will be torn out of any book. If that doesn't account for the total excess, a note of the number remaining will be made in the ration book and stamps will be torn out of the next canned food ration book when it is issued.

Five Cans Per Person

Each member of the family will be allowed five cans of food, regardless of size cans, at the time of registration. Cans below eight ounces will not be counted. For cans over that number, stamp will be removed but the applicant will pay the cost of food.

Old Book Will Be Returned

After registering, applicants will receive back their old ration books and also the new books. On the front cover of the new book there will be a large "validation" stamp, across which the person must write the serial number of his new book in ink or indelible pencil. The old book will still be used for sugar, coffee and shoes.

Sales of canned goods to be rationed will be frozen from Feb. 21 to Mar. 1 when rationing is scheduled to begin. The allowance of five cans per person, plus other foods which can be purchased, are expected to be ample for the freeze period.

After the beginning of rationing, persons must use their new point-

rationing books when they go to the store to buy any of the following processed foods: canned or bottled fruits, vegetables, soups or juices, frozen fruits and vegetables, dried fruits, baby food. There will be an official government list in every grocery store, listing every processed food that is rationed and the point value of each size.

The points system gives freedom of choice among rationed canned foods. The blue stamps in war ration book two are for control of other processed foods that are rationed. The red stamps will be used later for meat. The number on each stamp shows how many points that stamp is worth. The letters show when to use the stamps. All blue stamps marked A, B and C can be used during the first ration period, but not after that.

Different kinds of rationed foods will take different numbers of points. The government will set the points for each kind and will print an official table of point value, which each grocer must post so it can be seen. Scarce foods will take many points, foods that are not so scarce will take less points. Point values may be changed from time to time to take care of changing prices. All changes in points will be posted, and announced. Point value will be the same throughout the country.

Use Larger Stamps First

The buyer should use 8-point and 5-point stamps first whenever he can. Smaller point stamps should be saved for low point foods. Just enough stamps to make up the required number of points should be used. Every person regardless of age is entitled to a ration book and every person has a total of 48 points to use in each monthly ration period.

Persons should buy with care to make their points come out even because the grocer will not be able to give "change" in stamps. To help solve this problem about a week before the end of the ration period, when one may be running out of low point stamps, the government will announce the date when one may begin to use the next month's stamps. However, doing so will be using some of the next month's ration allowance.

Points lists will be published so that housewives may copy the lists for reference at home or to carry while shopping.

Stamps must be torn out in the presence of the grocer or delivery boy.

Persons who do not register on the designated time must wait about three weeks to register with the rationing board on a date to be set later.

Registration is being conducted throughout the schools in most places throughout the nation.

WOMEN TO SHARE HANCOCK COUNTY HONOR ROLL

Britt, Feb. 17: The Britt Commercial Club Tuesday evening passed a resolution to include the names of Hancock County women who are serving their country in the WAACS, WAVES, SPARS, NURSES, and other army and navy auxiliaries on the Hancock County honor roll at Britt.

There are now 930 names of men displayed on the honor roll. The board has a capacity of 1200.

Will folks kindly send in names of girls and women in the Service of R. R. Roberts, John Pritchard, Ernest Sheets or Guy McGinnis, at Britt.

INFANT DIED

The infant son of Mr. and Mrs. Bud Sampson died at the Lutheran hospital in Des Moines Saturday morning.

Mr. Sampson, a former Klemme boy, is in the army. Mrs. Sampson was formerly Miss Margaret Kenyon of Mason City.

OPA Form No. R-1301

UNITED STATES OF AMERICA
OFFICE OF
PRICE ADMINISTRATION

CONSUMER DECLARATION Processed Foods and Coffee

I HEREBY CERTIFY that I am authorized to apply for and receive a War Ration Book Two for each person listed below who is a member of my family unit, or the other person or persons for whom I am acting whose War Ration Book One I have submitted to the Board;

That the name of each person and number of his or her War Ration Book One are accurately listed below;

That none of these persons is confined or resident in an institution, or is a member of the Armed Forces receiving subsistence in kind or eating in separate messes under an officer's command;

That no other application for War Ration Book Two for these persons has been made;

That the following inventory statements are true and include all indicated foods owned by all persons included in this Declaration:

Coffee

1. Pounds of coffee owned on November 28, 1942, minus 1 pound for each person included in this Declaration whose age as stated on War Ration Book One is 11 years or older.

2. Number of persons included in this Declaration whose age as stated on War Ration Book One is 14 years or older.

Canned Foods

Include all commercially canned fruits (including spiced); canned vegetables; canned fruit and vegetable juices; canned soups, chili sauce, and catsup.

Do not include canned olives; canned meat and fish; pickles, relish; jellies, jams, and preserves; spaghetti, macaroni, and noodles; or home-canned foods.

3. Number of cans, bottles, and jars (8-ounce size or larger) of commercially packed fruits, vegetables, juices and soups, chili sauce and catsup owned on February 21, 1943, minus 5 for each person included in this Declaration.

4. Number of persons included in this Declaration.

The name of each person included in this Declaration and the number of his or her War Ration Book One is:

Print Name	Number
1. _____	_____
2. _____	_____
3. _____	_____
4. _____	_____
5. _____	_____
6. _____	_____
7. _____	_____
8. _____	_____

If additional space is needed, attach separate sheet

NOTICE: Section 35 (A) of the United States Criminal Code makes it a criminal offense, punishable by a maximum of 10 years' imprisonment, \$10,000 fine or both, to make a false statement or representation as to any matter within the jurisdiction of any department or agency of the United States.

CONSUMERS, USE THE ABOVE FORM

The above is the official declaration which consumers will be required to fill out before they receive War Ration Book Two, the point rationing book. To save time at registration the OPA asks you to clip out this declaration, fill in the answers, and bring it with you to the registration site at your local school next week.

Services For R. R. Lemke At Garner Thursday

PROMINENT FARMER DIED AT HIS HOME MONDAY AFTER LONG ILLNESS

Rev. Harvey Will Preach Sermon At Garner Methodist Church

Rhine R. Lemke, well-known Liberty Township farmer, died at his farm home northwest of Klemme Monday morning. Mr. Lemke had not been in the best of health for the past couple of years, suffering with a heart ailment.

Funeral services will be held at the Garner Methodist Church beginning at 2:00 p. m. Thursday afternoon. Rev. H. E. Harvey, pastor of the Klemme and Liberty Methodist churches, will deliver the funeral sermon, and will be assisted by Rev. Broberg, pastor of the Garner Methodist Church.

Mr. Lemke was a member of the Liberty Methodist Church and the Masonic Lodge at Garner.

Burial will be in the Concord Cemetery south of Garner and the Masons will conduct the last rites at the graveside.

Of his immediate family, besides his wife, Mr. Lemke leaves two sons, Walter and Reuben of Klemme, two daughters, Mrs. Carl Bohn of Garner, and Mrs. Leonard Swanson of Klemme.

The obituary will be published in the Times next week.

PETIT JURORS SELECTED FOR MARCH COURT TERM

The Petit Jury will report March 16th at 10:00 a. m. at the courthouse in Garner.

The following have been selected as Petit Jurors for the March Term of District Court in Hancock County.

Mrs. G. A. Robinson, Britt; R. H. McCallum, Britt; Wm. J. Kudje, Britt; Alice Schrader, Britt; Marie Conwell, Goodell; Chester Geddes, Hayfield; Mrs. Earl Ford, Britt.

Oscar Nyirus, Miller; Julia Nieman, Kanawha; Harry Thompson, Britt; Donald Butz, Garner; George Eden, Woden; John G. Huisinga, Woden; Ida Lewison, Kanawha; Mable Tanner, Goodell; Menno Eenhuis, Hayfield; Wilbur Johnson, Britt; Mrs. Casper Pannhoff, Garner; Lena Anderson, Britt; Mate Gillstrap, Crystal Lake; Mrs. Paul Mueller, Klemme; Mrs. Fred J. Arnold, Jr., Klemme; Fred Etchen, Goodell; Mildred Simmons, Garner; O. N. Johnston, Garner; Earl Terwilliger, Garner; Chas. Hoeft, Garner; Harley Holck, Corwith; Emma Suthers, Corwith; Albert Ruoss, Forest City.

CARD OF THANKS

We wish to thank our friends and neighbors for their kindness and sympathy and for the beautiful floral offerings during the illness and death of our wife and mother. John Christians and Children.

Red Cross War Relief Drive, Klemme's Quota Is \$300

Where And When To Register

REGISTRATION FOR WAR RATION BOOK TWO IN KLEMMME ALL OF NEXT WEEK

Registration Begins Monday, Runs Through Saturday At School

Beginning Monday, February 22, through Saturday, February 27, will be registration days for War Ration Book Two at the Klemme School gymnasium. Registration will take place each day from 1:00 until 8:00 p. m., except Saturday, when the hours are 9:00 a. m. until 4:00 p. m.

In order to handle registration as efficiently as possible the surrounding territory has been divided and you are requested to register on the day set for your particular location, as follows.

Monday, February 22
Residents of Klemme living north of Main Street 1:00 to 8:00 p. m.

Tuesday, February 23
Residents south of Main Street register from 1:00 to 8:00 p. m.

Wednesday, February 24
Avery Township residents register from 1:00 to 8:00 p. m.

Thursday, February 25
Eli Township residents register from 1:00 to 8:00 p. m.

Friday, February 26
Twin Lake residents register from 1:00 to 8:00 p. m.

Saturday, February 27
Liberty Township residents register from 9:00 a. m. to 4:00 p. m.

Please try to come for the date set for your particular place of residence. However, if it is impossible for you to come then, the board will endeavor to take care of you. **School Will Be Closed**

Supt. John Micklick, who is in charge of registration, announces there will be no school during the afternoons of next week.

SHAMROCKS DEFEAT DIOCESE TOURNAMENT CHAMPS

The Klemme Shamrocks made a trip to Bancroft Monday evening to meet the Catholic Diocese Champions of the Fort Dodge tournament, settling Bancroft back 50 to 37. It was Bancroft's second defeat of the season.

The Shamrocks were clicking on both field goals and free throws as Bill Grosshuesch piled up 26 points and Jacob 12. Bancroft's star ball shooter, Froehle, was held to 14 points.

IOWA'S RATION CALENDAR

Tires:

Class A Ration: First inspection deadline - March 31.

Class B, C, or bulk coupon Rations: First inspection deadline - February 28.

Commercial vehicles inspection deadline - February 28.

Gasoline:

"A" book coupons No. 4 (4 gals each) expire March 21.

Fuel Oil:

Period 3 coupons (11 gal. ea.) expire Feb. 22.

Period 4 coupons (11 gals. ea.) expire April 17.

Coffee:

Coupon No. 25 (1 lb.) expires March 21.

Sugar:

Coupon No. 11 (3 lbs.) expires March 15.

Shoes:

Coupon No. 17 in War Ration Book One expires June 15.

Registration:

Registration for War Ration Book Two will be held during the week of Feb. 22-Feb. 27 at the Klemme School House.

RED CROSS AND WAR RELIEF DRIVE WILL BE IN MARCH

Each Town And Township Organized For East Half Of County

The following is a list of Red Cross Workers who will form the organization for the 1943 War Fund Appeal which is to be held during the month of March. However, our drive should be concentrated during the week of March 8th to 13th, inclusive, states H. L. Ollenburg of Garner, chairman for the east half of Hancock County.

Mr. Ollenburg continues: "The quota for the east half of Hancock County is \$3,500.00, and individual quotas, as broken down, are therefore of necessity quite large. The workers will, therefore, be asked to suggest that a contribution of \$5.00 be obtained from each family."

"This should be kept in mind: there was no roll call in November, 1942. This drive is a membership drive plus a War Relief Drive."

The workers and quotas are as follows:

Klemme. Quota \$300.

Chairman, Mrs. Geo. Lawhorn. Co-Chr. C. G. Waterman, Ira Oviholt, Sumner Trumbull, R. A. Jorgensen, Walter Lemke.

Garner. Quota \$800.

Chairman, George Whitney. Fred Missal, C. V. Hamilton.

Goodell. Quota \$125.

Mrs. L. W. Wesenberg. Mrs. Mabel Burgess.

Hayfield. Quota \$50.

A. C. Taylor.

Miller. Quota \$25.

A. C. Halverson.

Madison Township. Quota \$275.

Chairman A. C. Taylor. Mrs. Harrison Taylor, Rudolph Bientert, John Kester.

Ellington Township. Quota \$250.

Chairman George Meinecke. Mrs. Howard Kester, Mrs. Arvid Westerberg, Mrs. Lewis Bergen, and Mrs. W. T. Roenfan.

Garfield Township. Quota \$275.

Chairman Mrs. O. N. Johnston. Mrs. Otto Holecsek, Mrs. George J. Ulrich, Mrs. Arthur Hanselman, Mrs. Donald Butz.

Concord Township. Quota \$300.

Chairman Mrs. John Love. Mrs. C. D. Daniels, Mrs. Elmer Yohn, Mrs. Ed. Boehnke.

Eli Township. Quota \$300.

Chairman Mrs. Harvey Goll. Mrs. Curtis Greiman, Mrs. Clark Lackre, Mrs. W. J. Anderson.

Liberty Township. Quota \$300.

Chairman Mrs. Ben V. Greiman. Mrs. Ralph Upmeyer, Mrs. Aaron Stromer, Mrs. Ben Riemer.

Twin Lakes Township. Quota \$250.

Chairman Mrs. Josh Montgomery. Mrs. John Chambers, Mrs. Howard Kudje.

Avery Township. Quota \$250.

Chairman Mrs. Joe Burgess. Mrs. Paul Veldhouse, Mrs. Carl Pearson.

SURPRISED ON TWENTIETH WEDDING ANNIVERSARY

Sunday noon, February 2nd, Mr. and Mrs. Carl Wille were pleasantly surprised as they returned home from church to find self-invited guests arriving with well filled baskets, honoring them on their twentieth wedding anniversary.

Mr. and Mrs. Wille were presented with an occasional table and table lamp as a remembrance.

Those present included Rev. and Mrs. C. Grosshuesch, Calvin, Jr., Ewald and Edward; Mr. and Mrs. G. A. Goll and Elizabeth; Mr. and Mrs. Paul Goll and Beulah; Mrs. Gretchen Schlawn; Mrs. LeRoy Johnson and Maurine; Mr. and Mrs. Alvin Goll and Lyle; and Miss Corine Merkel.

Classified
"I have a pain in my abdomen," the recruit told the army doctor. "Young man," said the doc, "officers have abdomens, sergeants have stomachs. You have a belly-ache."

Movie Director (about scene in script he is shooting)—"What's so tough about it, the way I want it? Give me four writers and I could write it myself."

First Come—
"Here, waiter, give me my hat."
"Yes, sir. What sort was it, sir?"
"A brand-new one."
"Sorry, sir, all the new hats have been gone more than half an hour."

A Dash of It
"Waiter, do you call this meat pie?"
"Yes, sir."
"Well, there's hardly enough meat in it to flavor it."
"It isn't supposed to flavor it, sir; it's just supposed to christen it."

An Oversight
The officer gazed sternly at the private who had been brought before him.
"Did you call the sergeant a liar?" he demanded.
"I did, sir."
"And a twister?"
"Yes, sir."
"And did you go on to describe him as a pop-eyed, knock-kneed stooge?"
The private hesitated. Then, with a note of regret in his voice, he replied:
"No, sir. I forgot that!"

How To Relieve Bronchitis

Creomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel germ laden phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Creomulsion with the understanding you must like the way it quickly allays the cough or you are to have your money back.

WEEKLY NEWS ANALYSIS

Allied Command Moves to Clear Africa And Secure Control of Mediterranean; Hitler Decrees Added Nazi Sacrifices In Effort to Bolster Failing Manpower

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

How the U. S. task forces apply what the high command describes as "Swift Massive Strokes" against the enemy is illustrated by the above photo showing troops going aboard an air transport in New Guinea, equipped for marching or fighting or both when the plane reaches a destination in front of the Japs.

TUNISIA: Activity Stepped Up

Indications that the long awaited offensive to drive the Axis out of North Africa might be near, were seen in reports of the recapture of several central Tunisian positions with which the enemy had sought to form a line of protection for the flanks of Marshal Rommel's army retreating into Tunisia from Libya.

Conferences of top American and British military chiefs in Casablanca even after the departure of President Roosevelt and Prime Minister Churchill had emphasized the importance of the next Allied moves.

Lieut. Gen. Dwight Eisenhower's American forces had driven the Germans back from six to nine miles in the Ousseltia Valley and had pressed steadily toward a pass through which Rommel's troops must pass in their effort to join German Gen. Von Arnim's army.

Rommel's widely strung out rear guard had been constantly under attack by General Montgomery's British Eighth army.

One of the heartening features of the American activity was that this drive had recaptured several positions of tactical importance previously lost by the French when German armored units had smashed through their lines.

AIR BLOWS: By 'All-American' Team

Ominously prophetic of more and deadlier blows at the heart of German industries and naval bases were the first "All-American" daylight bombing attacks in which swarms of unescorted Flying Fortresses and Liberators smashed at the naval base of Wilhelmshaven and industrial installations at Emden.

While three of the unescorted American bombers were lost on the Wilhelmshaven-Emden raids, United States headquarters said that a "number" of enemy planes were destroyed.

Hitler's northern flank was given a pounding when the shipyards in Copenhagen, Denmark, hitherto unscathed, were bombed by the RAF. The principal targets of this raid were U-boat engine factories which are working for Germany.

RUSSIA: Cause for Rejoicing

With President Roosevelt and Prime Minister Churchill's joint note in his hands promising decisive blows in the West, "Uncle Joe" Stalin could look with considerable satisfaction on affairs in the East.

How well the Russian offensives were going was indicated by a steady parade of Soviet communications reporting successes all along the line. The Red army had driven forward to within 60 miles of Rostov, with the recapture of the railroad towns of Ataman and Yegorlyk. To the north, the Ukrainian offensive westward from captured Voronezh had pressed on to within 80 miles of the big Nazi base of Kursk, with the reoccupation of Gorsechnoye.

The Russian Stalingrad trap had closed its jaws on all but a few scattered remnants of the 200 Axis divisions of 200,000 men who had besieged that industrial stronghold.

HITLER: Produce or Die

Significant of even sterner measures ahead on the Nazi home front was Adolf Hitler's decree imposing compulsory labor service on all German men from 16 to 65 and all women from 17 to 45 and hinting the death penalty awaited slackers.

Observers who had been puzzled for weeks over Nazi radio propaganda stressing the seriousness of the military situation in Russia now readily saw that this device had been employed to prepare the German people for new sacrifices of a most bitter and stringent nature.

Clearly Hitler was trying desperately to solve his manpower problem. Allied military experts estimated Germany must recruit at least 1,000,000 new men to fill the gaps in her army.

DRAFT CALL: Faces Fathers in '43

Evidence mounted that the drafting of married men with children would be under way before the end of 1943, following the U. S. high command's announcement that the nation's armed forces would total 10,420,000 this year.

Observers recalled a statement some time ago by Maj. Gen. Lewis B. Hershey, selective service chief, indicating that the supply of childless married men would last only about 10 months. The statement inferred that drafting of men with children would begin around next October if 10,000,000 or more were to be called without drafting 18 and 19 year olds.

Since General Hershey spoke, the minimum draft age has been lowered to include those age brackets, but the gain thus made in the number of draft eligibles has been offset by deferment of all men 38 years or older, apparently reinstating his forecast.

NAZI PEACE: Offensive Is Nipped

As political observers viewed in perspective President Roosevelt's historic North Africa conference with Prime Minister Churchill, the conviction grew that one of the most significant but unheralded results of that meeting was the forestalling of a prospective new German peace offensive.

For several months it had been evident in world chancelleries that Hitler would offer a compromise peace as part of his 1943 plans. Reports had indicated that his proposals would be made through non-belligerent Spain and would include an offer to withdraw from Western Europe while still retaining territories occupied in Poland, Russia and the Balkans.

In the light of these disclosures the Casablanca declaration that the Allied nations would be satisfied with nothing short of the unconditional surrender of Germany, Italy and Japan, definitely destroyed this spurious peace offensive.

President Roosevelt's visit with President Vargas of Brazil at Natal, en route home, was significant of the solidarity of South America's adhesion to the Allies. Observers believed Axis peace moves would make no dent in Latin America, even if made through still-neutral Argentina.

HIGHLIGHTS . . . in the week's news

CANBERRA: Prime Minister John Curtin told parliament that from the outbreak of the war to the beginning of 1943, total Australian battle casualties in all combat theaters were 52,148. The number comprised 8,226 killed, 23,892 missing, 9,059 known prisoners and 12,371 wounded. Australian casualties date back to early 1941 operations in North Africa under General Wavell.

NEW YORK: Pearl Buck, author, expressed the fear that "through political domination an international Fascist government may follow this war and seize the peace in the name of world order." Speaking at an India independence celebration here, Miss Buck said: "There are men of many nations who are thinking of world organization in terms of world military power."

SOUTH PACIFIC: Jap Casualties Heavy

From New Guinea came Gen. Douglas MacArthur's consoling announcement that American casualties in the victorious Papuan campaign were less than half the Japanese losses. Previous statements had said that a Japanese Papuan army of 15,000 had been wiped out. This indicated American casualties might have totaled 7,000, including those incapacitated by sickness.

As General MacArthur consolidated his forces for the drive to clear the enemy out of the rest of New Guinea, military activity was limited to continuous bombing of enemy bases. The raids included a heavy concentration on Lae, which is expected to be the next target of MacArthur's offensive operations.

The navy department disclosed that a new Jap air base established within easy raiding distance of Guadalcanal in the Solomons had been strongly attacked by American bombers. The new Jap airfield is on Ballale island, about 300 miles northwest of Henderson airfield on Guadalcanal.

The navy likewise announced that in air action over Wake island, a number of Jap Zero planes had been shot down, while all United States aircraft had returned safely to their fields.

CORN GROWERS: Reap Big Benefits

Corn belt farmers and western wheat growers will get the lion's share of the \$595,500,000 in benefit payments to be distributed among growers for complying with last year's federal crop control programs, it was indicated in a preliminary report of the department of agriculture on 1942 farm subsidies.

Southern cotton farmers will get the smallest amount since 1936, largely because of the improved price position of this crop.

The department's figures disclosed that payments to wheat farmers will total \$133,477,000, compared with \$107,353 for the 1941 crop. Corn payments will amount to \$188,219,000, which is the record for that crop. Payments on the 1941 crop totaled \$130,186,000.

Cotton payments for 1942 will amount to about \$78,833,000, compared with \$184,957,000 in 1941 and a peak of \$265,595,000 for the 1938 crop. Until the 1942 crop year, cotton payments exceeded those for any other commodity.

YANKEE FOOD: Aids Russ Offensive

That American lend-lease food shipments have helped the Russian armies deal their deadly blows to Hitler's Nazi legions was revealed by Claude R. Wickard, secretary of agriculture.

Food shipments to Russia which rose sharply as the winter offensive progressed went directly to the Red

FOOD ADMINISTRATOR WICKARD

army, Wickard disclosed. "In December, for the first time," he declared in a report to the war council of the National-American Wholesale Grocers association in Chicago, "shipments to Russia were larger than the combined shipments to the United Kingdom and other British destinations."

Discussing the 1943 outlook, Mr. Wickard said that "our armed forces and those of our Allies will require almost a quarter of all the food we produce."

RUBBER PROGRAM: Green Light on 55%

While a house of representatives naval committee ordered an investigation of charges made by Rubber Administrator William M. Jeffers that "army and navy loafers" were interfering with war production, WPB Chairman Donald M. Nelson disclosed that he had directed that 55 per cent of the synthetic rubber program for which Mr. Jeffers has been battling vigorously be carried through "as rapidly as possible."

In testimony before the senate rubber investigating committee, Mr. Nelson defended his curtailment of the rubber administration's demands and declared he was aiding Jeffers as much as possible without serious interference with other urgent war production.

The 55 per cent rubber plant construction program means that 25 synthetic rubber plants will be completed as early as possible, the WPB chairman indicated. Mr. Jeffers had been demanding right of way for 65 to 70 per cent of the original Baruch program.

TOUR OF DUTY:

Aboard a navy patrol plane over the South Atlantic (delayed): Some men are more fortunate than others. Some men are richer than many. Some men stay in love longer than most—and most men never experience the wallop that goes with being at the bow-gun of a Navy patrol plane (a PBV) a few feet over the submarine-infested South Atlantic.

How even a veteran bombardier can keep his eyes open or focused on a target out there in the open bow—with the fierce wind blinding and bayonetting him—is something I do not savvy . . . The powerful gun kicks the way Joe Louis punches and shakes you violently the way Lew Fields shook Joe Weber . . . At any rate, there you are out there under the huge propellers—several feet ahead of the pilot—alone . . . Except for the hurricane-tempo'd wind and perhaps a Nazi sub hiding below.

I was reminded of the time Senator Holman of Oregon and Senator Chandler of Kentucky flew to the Aleutians through heavy fog and storm most of the way. And picked up a soldier at some Alaskan base, who immediately took his battle station and trained his gun on the skies. "Son," said Senator Holman, "whatcha fussin' with that there weapon fer that-a-way?" . . . "I'm being ready," replied the gunner, "in case we meet some Jap planes" . . . The white-as-a-sheet Holman turned to the whiter-than-that Chandler and intoned: "Ain't it silly what some of us Senators will do to get into trouble—when we don't have to?"

My good break came from missing connections with the plane that was to take me to the next port on the tour . . . Had I made that plane I would have missed one of the biggest thrills of them all . . . That thrill was not my first flight in a PBV—a huge and comfortable Catalina (one of which helped sink the Bismarck); or firing the bow-gun—or circling low over oil specks that stained the beautiful aquamarine below . . . The big wallop came several hours later when we reached the base.

I am not permitted to divulge the excitement I witnessed at this place . . . The four paragraphs about it were blue-penciled even before I had the chance to correct the spelling . . . It was my first experience with an official gremlin, too . . . For the first time in 22 years of newspapering I realized how tame the toughest editors are.

All I was trying to jot down was that some fellows were luckier than other fellows . . . That some pilots had reasons for being happier than others and that the U. S. now has fewer enemies than it had.

And so I cannot reveal at this time what all that excitement was about . . . I cannot even elaborate that the excitement was enjoyed by a lot of very happy men, and that the reason they were so excited and happy was that certain other men, with dialects, were unhappy or dead.

The PBV on which I hitch-hiked was manned by the most youthful fellows I encountered down there . . . Most were only 21. Some were 23 or 25, and some were a little more seasoned . . . But all featured beards that must have been months in blooming . . . All the other fliers I met at various places were clean-shaven . . . "Why the whiskers?" I asked.

"They haven't been as lucky as other chaps," explained an officer, "and so they agreed not to shave until they got a sub."

I kept wishing that on this routine flight I would not prove a jinx to them—and that they could get—a shave.

At the Admiral's morning conference I was shown a dispatch that told of a merchant ship sunk the night before, and that a PBV patrolling the area had radio'd seeing two lifeboats with survivors . . . But when he returned to the scene later he saw only one . . . We were instructed to keep our eyes open for those survivors . . . That saving them would be even better than sinking an enemy sub . . . But there was no trace of them . . . I never learned whether they had been rescued or not . . . I kept thinking of them throughout the flight—knowing that brave men somewhere were suffering—not only from the suffocating humidity and heat—but from the blinding sun.

The Atlantic seemed as tame as any Florida lake . . . I was instructed to occupy one of the co-pilot's pews—handed a helmet containing earphones—and some dark specs . . . I just sat there wishing hard that they'd all get lucky . . . Now and then the Captain brought the plane down to a few feet over the water—to circle over oil specks . . . They are really huge gobs of scum from tankers and ships, they said . . . Sometimes it might be from an ill-fated merchantman, but I heard this is not always the case.

SNAPPY FACTS ABOUT RUBBER

Reclaimed rubber is the product resulting from the processing of scrap rubber. It is prepared from used rubber articles that are cleaned, purified and made plastic for re-use in rubber manufacturing.

Crude rubber in 1899 was selling at \$2,200 a ton. At the 1925 high was selling at \$2,755.20 per long ton.

Engineers have designed the tires for one of the army's leaps to resemble the camel's foot, nature's provision for support on shifting sand.

A commercial user of tires reported that an Ameripol synthetic rubber tire used on a light truck returned over 35,300 miles before it was replaced. This tire, with 51 others, was placed in test service early in 1941.

A 35,000-ton battleship required 168,000 pounds of rubber.

If Gen. George Washington and President Abraham Lincoln Were Living Today...

What Would They Say to Their America as It Enters Second Year of a Great War?

By ELMO SCOTT WATSON

Released by Western Newspaper Union.

THIS month, which finds America entering the second year of the greatest war in her history, also finds her honoring the memory of her two greatest sons—men who led her successfully through two other conflicts.

What were their prospects of victory as they entered the second year of those conflicts—the war for American Independence and the War Between the States?

If George Washington and Abraham Lincoln were alive today, what message would they give to the embattled America in 1943?

When the second year of the revolution began George Washington found himself commander-in-chief of what was little better than "rabble in arms." To the members of the Continental congress he had declared "Lest some unlucky event should happen, unfavorable to my reputation, I beg it may be remembered, by every gentleman in the room, that I this day declare, with the utmost sincerity, I do not think myself equal to the command now honored with."

Washington little realized then how soon "some unlucky event should happen" nor what a long succession of such misfortunes would devil him for the next six years. But he must have had a foreshadowing of them, for, within a week after he assumed command of the army, he was writing to his friend, Richard Henry Lee: "We are in an exceedingly dangerous situation. We have but about sixteen thousand effective men in all this department, whereas, by the accounts which I received from even the first officers in command, I had no doubt of finding between eighteen and twenty thousand; but of these are only fourteen thousand fit for duty..."

The smallness of his army was, however, only one of his many problems. Not only were the soldiers poorly armed, poorly clothed and poorly fed, but there was a shocking lack of discipline. Men accepted counties to enlist, then deserted immediately.

Low Morale.

Morale among the officers was not much better, for in their attitude toward each other they reflected all the jealousies and suspicions which had prevented unity of the English colonies in the struggle with the French and Indians.

"Washington had to face not only wholesale desertions and furious mutinies among the private soldiers, but also the most exquisitely embarrassing feuds among his officers with threats of wholesale resignations," writes his biographer, Rupert Hughes. "His prudence, fairness and devotion to the government were tested to the last degree... It seemed to him, and it seems to the later inspector of the records, that at this time Washington was almost the only man in America who had a sense of national entity and national duty. The rest talked of liberty, and indignation at tyrants, but their interests were almost altogether individual, municipal, or provincial."

Such was the situation as the year 1776 opened. Up in Canada Benedict Arnold's forces had settled down to their fruitless siege of Quebec. Washington's siege of Boston seemed equally futile until early in March when he occupied Dorchester Heights. Then on St. Patrick's day Lord Howe evacuated the city and Washington and his motley army marched in.

It was a victory for the Patriot cause, of course, but it was far from decisive. For Howe's army was still intact and there was no telling where it would strike next. Washington guessed correctly that it would be New York. So in April he marched his army there only to find himself in a nest of Tory intrigue and, two months later, narrowly to escape assassination at the hands of a member of his own bodyguard.

Meanwhile, outside of Quebec, Arnold's army was rotting away with cold, hunger and smallpox and by the middle of June its shattered remnants had been chased out of Canada. Thus ended in failure the expedition upon which Washington had counted so much—the addition of the Canadians to the Patriot cause.

While this was taking place, the

Continental congress was debating independence from the Mother country and on the immortal Fourth of July it took the decisive step. Up to this time Washington had been leading a fight for the rights of himself and his compatriots as Englishmen. Now the congress had given him something else to fight for. They called it Liberty—the king of England called it Treason. Witty old Ben Franklin had told his fellows that they "must hang together or assuredly we shall hang separately." If the Revolution failed, one of the first candidates for the hangman's rope would be that arch-rebel, the commander-in-chief of the rebels-in-arms.

That danger seemed perilously near soon after Washington had his troops drawn up on parade and the Declaration of Independence read to them. Up the bay came a British armada—400 transports and 32,000 soldiers, convoyed by 10 battleships and 20 frigates, manned by more than 10,000 sailors. A little later they were joined by 10,000 Hessian mercenaries. Against this aggregation of British might Washington had a motley horde of not more than 20,000 men, many of them unfit for service or unwilling to fight because congress had failed to pay them or even to provide them with enough clothing, arms and food.

A Series of Disasters.

Then followed the series of disasters which was to make the "Year of Independence" one of the blackest years in the whole struggle for liberty. In August General Putnam's army was cut to pieces at the Battle of Long Island and narrowly escaped capture. In September Washington was driven out of New York and his army retreated to Harlem Heights in panic rout.

In October he was defeated at the Battle of Red Bank. In November the British captured Fort Mifflin, one of the chief defenses of the Hudson, and forced the Ameri-

"... government of the people, by the people and for the people, shall not perish from the earth!"

cans to evacuate Fort Lee, the other. The last month of this dismal second year of the war found him retreating across New Jersey and, although his splendid victory at Trenton on Christmas night somewhat lightened the gloom, there was still many a discouragement and many a defeat ahead of him before the next year should bring the turning point of the war at Saratoga.

But despite the seemingly impossible nature of his task and the mountainous difficulties which he overcame, the record is clear that George Washington never lost his courage and his belief in the rightness of the cause for which he was fighting. If in this second year of our great struggle America suffers severe reverses and at the end of it victory may still seem far away, then may George Washington's fellow-Americans draw new courage from a sentence in a letter he wrote to his brother during the retreat across New Jersey. It was an expression of his unshaken faith that he would "be once more fixed among you in the peaceable enjoyment of my own vine and fig-tree."

A House Divided.

While the second year of the War Between the States was not so dark for Abraham Lincoln as 1776 had been for George Washington, there was many a reverse in 1862 that would have caused a lesser soul to despair. Not only was he the head

He looked forward to "the peaceable enjoyment of my own vine and fig-tree."

of a "house divided against itself" but even in his own "family" there was dissension and disunity.

When the war began many Democrats, among them Stephen A. Douglas, steadfastly supported the President but others violently opposed a war which they declared had resulted from the election of a Republican President. It was this group who brought into existence the Knights of the Golden Circle, the secret organization of the Copperheads, who criticized the conduct of the war, hoped to gain control of the government and make some sort of compromise peace with the South.

Even within his own party Lincoln had enemies who tried to thwart his efforts to save the Union. One faction induced congress to create a Committee on the Conduct of the War which was almost as damaging to the war effort as the activities of the Copperheads.

Stormy as was the political situation when the second year of the war began, the military situation was more encouraging. In the West Fort Henry had fallen, "Unconditional Surrender" Grant had taken Fort Donelson, and Farragut had captured New Orleans. But in the East, then regarded as the most important theater of war, a military genius named Robert E. Lee was threatening Washington and another military genius named "Stonewall" Jackson was outmaneuvering and outfighting every Union commander sent against him in the Shenandoah valley.

McClellan Fails.

In March, General McClellan, the Union commander, had begun his Peninsula campaign "which for numbers engaged and losses suffered surpassed any previous operation in North America." By June it was apparent that the campaign had failed and that the volunteer system could not produce the number of men needed for replacements after the blood bath McClellan had given the Union army. In a confidential message to the state governors Lincoln appealed for 100,000 new troops, saying "I would publicly appeal to the country for this new force were it not that I fear a general panic and stampede would follow, so hard it is to have a thing understood as it is."

This appeal brought him the troops he needed but, having lost confidence in McClellan, he placed General Pope in command. The result was the terrible defeat at the second Battle of Manassas and McClellan was again in the saddle. Thereupon Lee invaded Maryland and was stopped at the Battle of Antietam, after which he recrossed the Potomac. McClellan might have crushed Lee but failed to do so. Lincoln again removed "Little Mac" and gave command to General Burnside, whose attack on Fredericksburg resulted in the loss of 10,000 Union dead and wounded.

So the year ended in failure and a deep gloom settled over the North. Even greater was the depression in the White House, for the election of Horatio Seymour, the Democrat, in New York, was regarded as a repudiation of Lincoln's conduct of the war. He could not foresee that the next year would bring the turning point of the war with the victories at Vicksburg and Gettysburg—both achieved on the anniversary of the signing of the Declaration of Independence.

Four months later the Great Emancipator journeyed to one of those battlefields and there delivered an immortal address.

"If Abraham Lincoln were alive today," the message that he might give to an America engaged in a struggle with the most deadly enemy of freedom the world has ever known would be a quotation from the Gettysburg Address. It is the reassurance:

"That this nation under God shall have a new birth of freedom, and that government of the people, by the people, and for the people, shall not perish from the earth!"

Washington and Lincoln Speak to Their Fellow-Americans Today

"The time is now near at hand which must probably determine whether Americans are to be Free-men, or Slaves, whether they are to have any property they can call their own, whether their Houses, and Farms, are to be pillaged and destroyed, and they consigned to a state of wretchedness from which no human efforts will probably deliver them. The fate of unknown millions will now depend, under God, on the Courage and Conduct of this

Army. Our cruel and unrelenting Enemy leaves us no choice but a brave resistance, or the most Abject Submission; this is all we can expect.—We have therefore to resolve to conquer or to die."—Gen. George Washington in an order to the Continental Army on July 2, 1776.

"God knows, there is not a difficulty, that you very justly complain of, which I have not in an eminent degree experienced, that I am not

every day experiencing; but we must bear up against them, and make the best of mankind as they are, since we cannot have them as we wish. Let me, therefore, conjure you to lay aside such thoughts (re-signing from the army)—thoughts injurious to you and excessively so to your country, which calls aloud for a gentleman of your ability."—Gen. George Washington in a letter to Gen. Philip Schuyler, December 24, 1775.

Washington, D. C.

CROWN PRINCESS MARTHA

The crown princess of Norway is now a full-fledged member of the "Short-Shorters Club," with such other distinguished personages as Winston Churchill and Henry A. Wallace.

It happened as the Princess Martha was returning by clipper from England to her home in Maryland. The stewardess on the plane asked if she were a member of the club, which requires every member to carry a marked \$1 bill as a certificate of membership. She was not. Whereupon other passengers promptly presented their dollar bills—tokens of membership in the club—for the princess to sign.

She wrote her name in ink, "Martha, Crown Princess of Norway," across a dozen dollar bills that day, as the plane soared over the Atlantic. There were 14 passengers, and she signed for all except her lady-in-waiting, Ragni Ostgaard.

The plane had been some time out of England before the passengers realized they had a princess aboard. She appeared on the passenger list simply as "Mrs. Brown." But someone recognized her from pictures, and the word got around.

While most of the passengers played bridge, the princess read a book. At night she tucked herself into the little sleeping compartment, lower berth, while the lady-in-waiting climbed into the upper.

She chatted with passengers as if she were merely Mrs. Brown, and when the trip was over, passenger Fred Williams of the British air ministry remarked:

"She's quite the most charming lady I've ever met."

HURLEY AND TIMOSHENKO

When friends asked Brig. Gen. Patrick J. Hurley, just back from Russia, to explain the Marshal Timoshenko's mysterious disappearance from the limelight, Hurley dodged the question as follows:

Timoshenko is the George Washington of Russia. Washington retreated all the way from Boston to Yorktown. He lost one battle after another, but he figured that as long as he had his army intact, and the vast reaches of North America to retreat into, he might lose the battles but he would win the war.

And he kept on retreating until he was able to spring the trap on Cornwallis at Yorktown.

Timoshenko also followed the retreat strategy—from Kharkov to Rostov to Stalingrad—but kept his army intact. He is a tremendous figure in Russia. His name is stamped on the hearts of the people.

(Editor's Note: Marshal Timoshenko is now on the northern Leningrad front, it has been disclosed. A letter to Stalin from commanders on that front was headed by Timoshenko's name.)

LATINS LOVE RUSSIA

Latin American fear of Communism has long kept those countries from recognizing the Soviet Union. But Soviet military successes have persuaded the Latins that the Soviets will emerge among the victors in this war and will be a power to deal with.

Thus some of the countries below the Rio Grande are coming around to diplomatic recognition of the Soviet government.

Cuba is sending Dr. Aurelio Conchoso, ambassador to Washington, to Moscow to open a legation, which will later be in charge of Dr. Raoul Herrera-Arango, also from the Washington embassy.

Mexico is sending her minister counselor from the Washington embassy, Dr. Luis Quintanilla, to become minister to the U. S. S. R.

Foreign Ministers Gabriel Turbay of Colombia and Alberto Guani of Uruguay are in Washington today, where they will discuss with Soviet Ambassador Litvinoff the establishment of missions in Russia. Colombia recognized the Soviet in 1936, but has never sent a minister.

It's also reported that Ecuador and Venezuela plan similar action. Thus far, however, Colombia is the only country on the South American continent which has recognized the Soviet Union.

There are substantial possibilities for trade between Russia and Latin America after the war, and some of the Latins are getting on the band wagon.

Note: Argentina, the only Latin American country not to break with the Axis, is scared sick over the prospect of a Russian victory and the danger of communism.

MERRY-GO-ROUND

Spanish pressure on Paramount will cause some changes in the movie version of Hemingway's best seller "For Whom the Bell Tolls," but it will probably be released to the American public in April—despite Franco.

U. S. Chamber of Commerce President Eric Johnston will run for the senate in 1944 on the Republican ticket against Senator Homer Bone, Democrat. Johnston is one of the few politically minded men ever to sit in the crusty throne of the U. S. chamber.

The WAVES, gradually taking over more of the navy's paper work, are bringing in some smart officers, among them Lieut. Rebecca Gross, former managing editor of the Lock Haven (Pa.) Express and one of the few women managing editors in the country.

ON THE HOME FRONT

with RUTH WYETH SPEARS

YOUR rag bag contains the best possible material for making attractive pads for chairs and foot stools. These may be hooked in the same manner as rugs are made. Cut or tear old materials into strips and draw loops through either burlap or canvas with a rug hook as shown at the left. Either cotton, wool, silk or rayon may be used. The strips may be cut from three quarters to one and one-half inches wide, according to the weight of the material and how fine you wish the work to be. If some color is desired that you do not have on hand goods should be dyed to carry out your room color scheme.

You will find it easy to outline a simple flower design with wax crayon. Many people do successful hooking without a frame. Small pieces of work may be stretched

Left-over meat, minced, with cream or salad dressing makes a popular sandwich filling.

Keep leftover pancake batter and thicken it with flour for muffins. If it is kept several days, add one-half teaspoon of soda for each cup of batter.

Egg stains on table linen should be soaked with cold water, as warm water sets them.

Pipe cleaners are handy in the kitchen to clean gas burners, lemonade sippers, funnels, etc.

If a child's birthday is forgotten till the last minute, fix a novel gift for him this way: Stick pennies, nickels or dimes into a shiny red apple, tie a ribbon bow on the blossom end, and the gift is ready.

over an old picture frame and thumb-tacked. Flowers and leaves may be hooked in outline as at the upper right, or two or more tones may be used for a shaded effect, as at the lower right.

NOTE: BOOK 5, of the series of home-making booklets prepared for readers, contains directions for making your own flower designs and for hooking rugs. BOOK 6 contains directions for a hooked, a braided and a crocheted rug all made from old clothing. Copies are 10 cents each. Send requests for booklets direct to:

SENIOR CLASS NEWS

Anna Lee Brunes, Reporter

The First Aid Class had a test on
Friday consisting of five questions.
We also had to tie some bandage.
The U. S. History Class is study-
ing about Trusts and Holding Com-
panies.

The Literature Class is studying
Whittier and Whitman's works.
The Home Economics girls made
cake and cookies for the Primary
room's Valentine Party

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

In Biology we have been study-
ing Forest and Forestry. On Tues-
day we read themes on something
about trees. Thursday we describ-
ed a certain tree and the class had
to guess what kind of a tree it was.
Friday we had what is new in Sci-
ence. For some reason the whole
class was five minutes late Thurs-
day.

The Geometry class is studying
the circle. We wrote themes on the
circle and read them in class. All
of them were interesting, some
were humorous, while others were
serious. Circles play a very im-
portant part in our every day life and
the world owes it much.

We took up the executive part
of our government in American
Government. Our President re-
ceives a yearly salary of \$75,000.00
all traveling expenses and housing
expenses, and police protection.
The President must be at least 35
years of age, a natural born citizen
of this country, resident of this
country at least fourteen years. In
case the President is unable to fin-
ish his term of four years the Vice
President takes over and after him
members of the Cabinet would be-
come President.

The Business Arithmetic class
has two new members, Elwood Har-
vey and Lawrence Polsdofer.

"A Voyage to Lilliput" is the
story we are now studying in Eng-
lish Literature. It is part of Gulli-
ver's Travels written by Jonathan
Swift. We don't have to make out
any questions over this.

SOPHOMORE NEWS

Patricia Kudje, Reporter

Many of us received comic valen-
tines "Who done it?"
We had "What's New In Science
Reports" Friday, in Bio'ogy.

Wednesday we had questions a-
bout a certain tree and then the
class guessed what tree it was.

We had a review test over our
weeks work in World History Fri-
day. Makes us read our assign-
ment when we have tests.

We still have the same kind of
problems in Algebra, only harder

FRESHMAN CLASS NEWS

Ruth Bell, Reporter

In Algebra we are now on a
chapter of Linear Equations. We
had a short test Friday. We also
had work in solving longitude and
latitude problems which we found
were difficult.

In English we are now studying
Parts of Speech. We are trying to
increase our vocabulary by bring-
ing five new words to class every
day.

In Science we have just finished
the chapter on Transportation. We
had a difficult test over it Friday.

In Manual Training the boys are
making lamps, hall trees, and kit-
chen stools. Some are doing ex-
cellent work.

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher

In History we started Unit II. In
it we will learn about the Industri-
al Development and Government
1865-1896.

We are having a grade tourna-
ment in school. The Sixth Grade
have won over the Fifth Grade and
now they will play the Seventh.
The winner of this will play the
Eighth Grade.

Honor Roll

Those who have earned perfect
scores in Spelling are: Carol, Roger
B., Phyllis, Peggy, Dean, Marcole,
Clarence, Lois Ann, Roger R., Ed-
ward, Billy, Donald, Irene, Harold,
Ruth, Helen S. and Darwin.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

We have started reviewing for
six weeks tests which are next
week.

On Friday we enjoyed exchang-
ing Valentines of many kinds.

We have missed Marvin Schmidt
and Willis Bock, who have been ill.

Honor Roll

Those who made the Spelling
Honor Roll are:

Isabelle Gibbs	Iris Rosendahl
Marjorie Lau	Larry Ramsay
Robert Baack	Norma Early
Dorance Baack	Luella Priebe
Maurice Trumbell	
Merlin Brinkman	
Phyllis Kirkwood	

THIRD AND FOURTH GRADE NEWS

Evelyn Gueff, Teacher

This has been a short week for
us. We took State Tests Monday
and Tuesday.

We made some very pretty Val-
entine napkins.

Janice Stokesbary and Carol
Bridges were guests at our Valen-
tine Party Friday afternoon. Ev-
eryone received many nice Valen-
tines.

PRIMARY ROOM NEWS

Virgie Harcopf, Teacher

On Friday afternoon we had our
Valentine Party. We exchanged
Valentines, sang songs, and had
cakes and apples to eat. We all re-
ceived many Valentines. Berleen
Bridges, Ronald Trampel, Jimmy
Karsjens, and Miss Garrabrant
came to our Valentine Party.

Anna Lee Brunes taught our
room on Tuesday and on Thurs-
day forenoon we were in the Third
and Fourth Grade room.

We have a new Kindergarten
pupil in the Kindergarten. His
name is Merlyn Olson.

Graydon was six years old on
Thursday. He treated us to suck-
ers and candy hearts. Robert was
7 years old on Friday. He treated us
to candy.

Honor Roll

Larry, Sharon and Neva Ann had
perfect scores in Spelling.

GRAND JURY NAMED FOR YEAR OF 1943

The following Grand Jurors who
are selected to serve in 1943, are to
report for duty at the courthouse in
Garner at 10:00 a. m. March 9th:

Name	Township	Address
Herman Buns	Bingham	Woden
Frank Treca	Concord	Garner
Wm A. Engh	Magor	Kanawha
W. E. Burk	Twin Lake	Goodell
E. J. Schneider	Ell	Ventura
Walter Kester	Ellington	For City

John Buzicky	Liberty	Britt
Robert Holm	Orthel	Britt
Art Musgjerd	Britt	Britt
E. I. Brooker	Madison	Forest City

OLLENBURG HEADS RED CROSS WAR FUND DRIVE FOR EAST HANCOCK COUNTY

East Half Of Hancock County Asked
To Raise \$3,500.00

Herbert L. Ollenburg, vice presi-
dent of the Hancock County Nation-
al Bank at Garner, will be chair-
man of the 1943 Red Cross war fund
appeal, which will be launched in
March.

The quota set by national head-
quarters of the American Red Cross
for the east half of Hancock Coun-
ty is \$3,500.

Plans are being made for a house
to house canvas in every township
and in every town of the county.

HEMP FILM WILL BE SHOWN AT AVERY THEATRE

A sound film "Hemp for Vic-
tory" will be shown at the Avery
Theatre at Garner, February 19 and
20. This film is being shown along
with the regular program. It gives
a good clear picture of hemp pro-
duction and processing.

Hemp growers should plan to see
this educational picture.

Our Men In The Service

ANOTHER KLEMME YOUNG MAN ENTERS SERVICE

Eugene Kluckhohn, son of Mr
and Mrs. Clarence Kluckhohn, left
Sunday for Des Moines to enter the
Coast Guard Service.

"Gene" enlisted some months a-
go in the Coast Guard and had been
awaiting call. We will publish his
address as soon as he gets located.

KLEMME MEN MEET IN "SHANGAROO, PACIFICA"

Two young Klemme men, both in
the Marines and thousands of miles
from home, met a couple of weeks
ago in the pay office at "Shangaroo,
Pacifica"

Tuesday Wayne Pavey received
an airmail letter from Corporal
Glen Lewis, U. S. Marines, which
stated that he saw Lt. Byrnes Miss-
man one day, when both were at
the Marine base pay office.

You can guess the rest of this
story. It was great to meet a fellow
from your own home town!

The letter Pavey received came
through in exactly one week!

FORMER KLEMME YOUTH AT SAN ANTONIO, TEXAS

Dorance Grange, of Mason City
is stationed at San Antonio, Texas
where he is in preliminary training
to become a pilot. His address:
A-C Dorance S. Grange, 17097186
Squadron 112, Flight C,
S. A. A. C. C. - A. A. F. C. C.,
San Antonio, Texas.

LAYMAN'S DAY AT METHODIST CHURCHES HERE

Next Sunday, February 21 is Lay-
man's Day at the Methodist church
in Klemme and Liberty. Mr. E. B.
Stillman, Clear Lake will be the
guests speaker at both services. The
lay leaders of the churches, Emil
Blumer and J. Ira Overholt, respec-
tively, will act as chairmen of the
meetings. It is hoped that a male
chorus will furnish special music
for the day. Of course every lay
member of the church should make
a special effort to be in attendance
both places.

This service is initial to the week
of Dedication which begins Febru-
ary 28 and lasts through March 7th.
That week Dr. T. S. Bassett, Sioux
City, will be the guest speaker on
those two Sundays and through the
week day services to be announced.
Rev. H. E. Harvey

HELLO, FOLKS!

Mr. and Mrs. Paul Stromer of
Liberty Township, are the parents
of a baby boy born to them at the
Mercy hospital, Mason City, Tues-
day, February 9, 1943.

The Stromers also have a daugh-
ter in their family.

time to get the farm plow into
shape for the spring rush. The
plowshares should be taken to
the blacksmith for sharpening
during his slack season so that
he can do a better job. The shar-
es should be adjusted for down-
suck and side-suck while they
are being sharpened.

The down-suck can range
from 1/4 to 1/2 of an inch and the
side-suck about 1/4 inch. Farm-
ers should be careful not to
change the suck of the plow too
much since the height of the
hitch may be the cause of the
trouble instead of the plowshare.
If the hitch is too low the plow
does not go into the ground pro-
perly and if it is too high the
plow will tend to run too deep-
ly. Careful adjustment must be
made at the end of the beams to
insure easy draft and a quality
job of plowing.

The clutch and lifting mechan-
ism of the plow should have a
careful check before the work
season begins. The land wheel
can be removed and the clutch
and lifting mechanism thorough-
ly cleaned. Repairs must be or-
dered immediately to replace any
worn or broken parts to insure
delivery by spring.

The wheel bearings must not
be overlooked. They need to be
packed with fresh grease after
the dirt and other abrasive ma-
terials are cleaned and flushed
from them. If the plow has rub-
ber tires special care is neces-
sary to keep grease away from
them since it has a deteriorating
effect upon rubber. If any
grease or oil does touch the rub-
ber it should be quickly remov-
ed.

WAR

ON ALL FRONTS

A SERIES OF SPECIAL ARTICLES BY THE LEADING WAR CORRESPONDENTS

Gen. Arnold No. 1 Airman

By Corey Ford

(NU Feature—through special arrangement with Collier's Weekly)

Gen. H. H. Arnold, chief of the army air force, doesn't believe in the impossible. He defines the impossible, roughly, as something that hasn't been done yet. That's why he's not dismayed by his current task of creating overnight the greatest air force in the world: 125,000 planes this year, a hundred thousand more annually—an air force with an estimated total of 2,000,000 men. He isn't sure himself how many men and planes will be needed before the war is over. There's no precedent to guide him, even 2,000,000 may not be enough. But he's sure of one thing. It can be done, no matter how big the job. It may be impossible, but it's going to be done.

He takes his accustomed place in the front left-hand seat of the converted passenger plane as the expert fingers of Major Douglas takes off on the next leg of his rapid-fire flying. We flop into the seat opposite him, in considerable relief, and loosen our collars. This business of spending an average day with the general, we are beginning to find, constitutes a man-sized workout.

Off to an Early Start.

We were up at five-thirty this morning, and still he was ready long before we were. He's inspected half a dozen factories and airfields and training centers so far today.

You glance across the aisle at him—now—restless, alert, checking the schedule, calling notes over his shoulder to his aide (ten days later he'll recall every last word he said and ask if the job has been done), peering over a sheaf of papers, peering down through the window at a half-finished staging field, glancing around to make sure that everyone else in the cabin is comfortable. His face, silhouetted against the light, is smooth-checked, ruddy and as always, grinning. There's a white vertical scar on his chin; he got it in 1912, flying from Salem, Mass., down to Bridgeport when he made a crashing landing in the water.

Winner of First Mackay Trophy.

His story is virtually the history of military aviation in this country. He won the first Mackay Trophy ever given, in 1912, by flying a Wright airplane around a 30-mile course at the breathtaking speed of 43 miles an hour. The same year, he established an altitude record of 6,540 feet. Later in that crowded year, he carried the first air mail ever flown in the United States, a sensational five-mile hop from Nassau Boulevard airdrome in Long Island all the way to Hempstead.

He was likewise the first to mount guns and wireless on planes; he pioneered air reconnaissance; inaugurated the initial forest air patrol; was the army's first aerial engineer. In 1934, he won the Mackay Trophy a second time—a record in itself—by leading a flight of ten Martin bombers from Washington, D. C., to Alaska, proving his friend Gen. Billy Mitchell's oft-asserted contention that the United States was within easy bombing range of Alaska.

First, last and always, he's a flying general. He guides a ship with a veteran hand, and you recall the wording of his most recent citation, when he was awarded the Distinguished Service Medal for flying the Pacific from Brisbane to San Francisco in the record-shattering time of 33 hours and 53 minutes:

"As commanding general of the army air forces, he has given a conspicuous demonstration of leadership, the strategic mobility of long-range army aircraft, and the ability of the high air commander to maintain intimate contact with his units in the field."

He lives every job himself. He knows first hand the feelings and reactions of every pilot, every officer, every cadet, every enlisted man in the ground crew. He worked his own way up, a step at a time, and he hasn't forgotten a single lesson.

That's why the safety of the youngsters in his command is more important to him than anything else in the world. That's why he has refused to build planes that might gain a few hundred extra feet of altitude, at the sacrifice of essential armament, or leakproof gasoline tanks or other safety devices.

He's proud of the fact that the accident rate in our army air forces is so low today; and he intends to keep it that way.

His grin hasn't faltered, for all that he's faced with the toughest job in history. Creating overnight the greatest and most modest and fastest air force in the world—buying days with dollars, as he says—is a big job; it takes a big conception. It takes vision. Luckily he has that. All the incredible feats you see taking place around on a thousand scattered airfields didn't happen without a lot of preparation; don't fool yourself.

PRIVATE PURKEYS SYMPATHY WITH THE HOME FRONT

Dear Mom.—Well I heard on the radio a broadcast of news from the United States and it made me almost as much worried about you and dad as you are about me. About the only big difference between me and you now is that you can talk back. But you got to listen to just as many orders as me I guess.

Remember away back, mom, when you was just worried that I would not have enough comforts in the army and when you was always so afraid I would not be able to keep warm? Gee I never thought I would be worried over you for the same reasons, mom.

I guess them rules about jalopies is making it hard for you, although I know you ain't the kind to squawk. I hear you can't use the flivver for nothing now except in case of sickness, but I bet the rules make you sick enough to have a good alibi if he decides to take a ride. I seen one rule which says it is okay to drive a sick dog to a dog hospital and on account of I know what a little fresh air means to you, mom, I wish pop would pick up a dog what did not look too healthy and take you out for a little ride once a week.

It looks to me like between reading automobile rules, checking tire numbers, doping out new rashing systems, trying to keep warm, and keeping track of new rulings on what you can eat, mom, you ain't having no picnic. But cheer up, mom. Your troubles make me sorer at the Axis than ever and I will fight harder to break up this war now.

I am well and strong if a little muddy. I wood feel better if I knew who was on the level over here and who was not. Some Frenchman is double-crossing some other Frenchman or vices versa every few minutes and I guess General Eisenhower is having a time straightening out the line-up. Every day somebody else is arrested for trying to run the wrong way with the ball.

Well, I see there's a ruling you can not send me no more packages unless I ask for them and get the brasshats to okay it which makes me sore. It makes me feel silly making out a list of things I wood like and reading it to a officer like I was asking Santa Claus for some presents

The brasshat I wood have to ask is a sourpuss. He wood not okay nothing for me so I am going to tell him I want a player-piano, a barrel of beer, catcher's mitt and a polo pony from my folks. I got nothing to lose.

Love,
Oscar.

TIP TO SQUAWKERS

("Five sons of Mr. and Mrs. Thomas F. Sullivan of Waterloo, Iowa, were lost on the cruiser Juncos.")—News item.)

Kickin' about your rations? Squawkin' about the bans? Fussin' about the gas rules? . . . Think of the Sullivans!

Blue on account of edicts? Yellin' of more ahead? What of that Western home where Five of the group are dead?

Beefin' of sacrifices? Yawpin' about the costs?—Think of the home where parents Mourn for their five boys lost!

"The used-car dealers, admitting that many autoists had called about selling their autos, said that they wanted fortunes for them."—News item.

In the mind of a used-car dealer this means that a man trying to sell a 1941 sedan probably wants something a little above \$108.

An OPA official announces that baloney will soon be but a memory. Well, we just don't believe it. You can deprive us of a lot of things, but you will have the united opposition of the entire congress when you try to limit baloney.

"Meat of some kind and an unspecified amount of substitute, including soybeans," will be used, says one OPA man. Well, we don't know much about the soybean. But somehow or other we feel the same about a soybean hot dog as we would about a turnip-hamburger.

Hitler seems to be ignoring the slogan about never changing generals in mid-dream.

Elmer Twitchell says a soldier in this war has to be between 18 and 25 in order to stand all the changes of climate.

Well, the ban on automobiling certainly gives the last laugh to the fellow who always said the auto hadn't come to stay.

The WPB has decreed a cut of 50 per cent in the nationwide production of ice cream.

Another blow at the war effort. It means less work on "sundaes."

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D., of The Moody Bible Institute of Chicago. (Released by Western Newspaper Union.)

Lesson for February 21

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education; used by permission.

JESUS THE GOOD SHEPHERD

LESSON TEXT—John 10:1-18, 27-30. GOLDEN TEXT—"I am the good shepherd, the good shepherd giveth his life for the sheep."—John 10:11

Beautiful and meaningful as they are, none of the other figures or types of our Lord's redemptive work have a stronger appeal than that of the good shepherd. Even those who have never tended sheep nor yet seen them under the shepherd's care sense the telling aptness of the allegory of the Good Shepherd. We know how much we are like sheep needing the tender shepherd's care, and we soon learn to know and to trust Christ as the True Shepherd of the flock.

The center of the picture is the Good Shepherd, and it is around Him that we group our thoughts.

I. He Knows His Sheep (vv. 1-5).

At night, whenever possible, the sheep were brought into a fold, a walled-in enclosure with shelters and with a single gate. Many different flocks were kept together under the care of an undershepherd. In the morning the shepherds came to lead forth the flock. They came by the door, not as the thieves of the night, who sought to come in by stealth over the wall.

When the shepherd called, his own sheep responded. We are told that they would not come at the call of a stranger—not being ready to trust him.

The application is obvious, and yet a word is in order. We ought to examine ourselves and see whether we do indeed know our Lord's voice. Do we respond when He calls us? Then, too, let us be on the lookout against those who profess to be shepherds, who call themselves "pastor" or "reverend," and have only one purpose—to despoil the sheep. They are "thieves and robbers"—Jesus said so. They are only interested as long as it pays. The true shepherd cares for his sheep.

II. He Protects His Sheep (vv. 6-15).

Not only thieves, but wild animals would attack sheep, and it is said that often the shepherd died to protect them from harm. But the hireling, serving for what he can get out of it, is not interested any longer. When danger appears, he flees. He has not the real shepherd heart and cares not if the sheep be destroyed. Having stolen them to enrich himself, he will not defend them at the cost of his own life.

Note the sharp contrast of "I am the good shepherd" with the dark picture of the faithless hirelings. Not only does it magnify His goodness, but it deepens the blackness of their treachery.

We should recall that the Good Shepherd is able to protect His sheep; for while He lays down His life for them, He takes it again in victory over sin and death (see vv. 17, 18). The Saviour seemed to have been defeated at Calvary, but He arose again, and ever liveth to make intercession on our behalf (Heb. 7:25).

III. He Seeks Other Sheep (v. 16).

The other sheep Jesus had in mind were probably the Gentiles. The believers He then had were Jews, but the day was to come when the Gentiles were to hear and believe. His desire for them may well stir in our hearts an eagerness to go out and bring in all—both Jew and Gentile—who will, by believing in Christ, become members of His one fold.

Note the word "must" in verse 16. It does not say "if convenient," nor "when we can raise enough money," nor "after our local debts are paid" we will go out and seek others. There is a divine imperative here—it "must" be done.

Let us not fail to gather the full significance of the expression "one flock, one shepherd." We are not interested in any manufactured unity of man-made organizations. Certainly we will not accept union which means compromise of essential truth. But unity under Christ, the one great Shepherd, that we want—yes and will have. He makes that certain—"they shall be one flock."

Let us not put hindrances in the way of that kind of unity, and let us not be delinquent about seeking the "other sheep." Now a final word.

IV. He Keeps All His Sheep (vv. 27-30).

These words (said after a period of weeks had elapsed) stress the blessed assurance which comes to those who follow Christ. Jesus rebuked the Jews for their unbelief, telling them that they were not His sheep.

Those who are His have been given to Him by the Father—an eternal gift to Him—and He gives to them eternal life.

The power back of this whole matter is evident in verse 30. Christ is God. He who is in Christ's hand is also in the Father's hand, "and no man is able to pluck them out of the Father's hand." Instead of trying to modify that statement, or to quarrel with those who believe it, every Christian ought to accept it and shout "Hallelujah!"

PATTERNS

SEWING CIRCLE

Young Belle.

SHE'LL fancy herself quite a young lady in this lovable dress with V-neck and cute bodice treatment. The tiny puffed sleeves and sash will make her look still more feminine and irresistible.

Barbara Bell Pattern No. 1743-B is designed for sizes 2, 3, 4, 5 and 6 years. Size 3 requires 1½ yards 35-inch material 6 yards braid trimming.

1722-B

Wearable Two Ways.

PICTURE this dress in gingham with ric-rac around the neck, buttons to match and the belt of contrast. Thus you'll wear it for home duties. Picture it, too, in soft, solid color rayon crepe with a fresh white collar—this is the version you'll want to make to wear for business or for social events.

Barbara Bell Pattern No. 1722-B is designed for sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 36 requires, with short sleeves, 3½ yards 39-inch material, ¾ yard for contrasting collar.

Stationary Clouds

Clouds sometimes remain stationary for such long periods that they are given individual names. One example is a large, low formation that appears over the Rock of Gibraltar and does not move for as long as 12 days.

Because it is created by moist winds from the eastern Mediterranean, it is known as "The Levant."

Greatest Swindle

The greatest swindle in history was perpetrated by Germany in her payments of reparations after the First World war, according to Collier's.

Among the numerous absurd items chalked up as "payments" to the Allies to compensate in part for her devastations were the cost of the German warships which were scuttled by their own crews in Scapa Flow after being turned over to the British, and the interest on the \$7,500,000,000 lent her by the Allies after the war to enable her to get back on her feet.

Rather Late Hour to Be Changing Instruments

The street musician was tired, and the motorist agreed to give him a lift to the next town.

As they were racing at terrific speed down a hill, the motorist suddenly shouted above the noise of the car: "What instrument do you play?"

The musician shouted back: "The violin!"

The driver crouched over the steering wheel, peering ahead. He yelled: "That's a pity!"

"Why is it a pity?" demanded the musician.

"It's a pity you don't play the harp!" yelled the motorist. "The brakes won't work!"

TRY MOROLINE HAIR TONIC

Unseen King
The king of Oyo, head of the Yeruba tribe, in Nigeria, never shows his face in public. A veil of beads is worn to hide his features. He has 400 wives and some 600 children.

CONSTIPATED? TRY THIS GENTLER WAY

Many medicinal purges work on you—by prodding the intestines into action or drawing water into them from other parts of the body.

But KELLOGG'S ALL-BRAN—crisp, delicious breakfast cereal—works mainly on the contents of your colon. If you have normal intestines and your constipation is due to lack of "bulk" in your diet, you'll find ALL-BRAN a much gentler way to treat it.

Eat KELLOGG'S ALL-BRAN regularly and drink plenty of water—and you'll find wonderful relief. For this way, ALL-BRAN gets at the cause of constipation due to lack of "bulk" and corrects it. ALL-BRAN is made by Kellogg's in Battle Creek and sold by your grocer. Try it!

Noble Actions

Good actions ennoble us, and we are the sons of our own deeds.—Cervantes.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, dizziness, distress of "irregularities", are weak, nervous, irritable, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that's made especially for women. Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Pinkham's Compound is worth trying!

Keep the Battle Rolling With War Bonds and Scrap

MAD

When a cough due to a cold drives you mad, Smith Brothers Cough Drops give soothing, pleasant relief. Smith Brothers' contain a special blend of medicinal ingredients, blended with prescription care. Still cost only 5¢—yes, a nickel checks that tickle!

SMITH BROS. COUGH DROPS
BLACK OR MENTHOL—5¢

IN THE ARMY they say:

"HAY BURNERS" for cavalry horses

"JUGHEAD" for the Army mule

"CHICKENS" for the eagle insignia of a colonel

"CAMEL" for the Army man's favorite cigarette

COSTLIER TOBACCOS

Camel

FIRST IN THE SERVICE

The favorite cigarette with men in the Army, Navy, Marines, and Coast Guard is Camel. (Based on actual sales records in Post Exchanges and Canteens.)

I'LL TAKE CAMELS ANY TIME! THEY'RE THE REAL THING—PLENTY FLAVORFUL AND MILD!

RURAL SCHOOLS WILL VOTE ON UNIFORM TEXT BOOKS

The voters in the township school districts of Hancock County will vote on the proposition "Shall there be a uniform series of textbooks in Hancock County?" The date is Mar 8th, the voting will be in the afternoon starting at 1 00 p m Sites for the township district elections will be announced later.

Below are answers to a few of the most frequently asked questions about the proposition:

1. The County Board of Education will adopt not more than two series of textbooks in any one year. An adoption by the county board does not mean all township boards in the county must change books that year, but agree to use the uniform texts when the township board decides to change this particular series of texts.

2. Texts need not be changed by the township board until they feel there is a need for a change in a particular series. Series of books in the township that have been purchased need not be changed until the present texts are worn out or are outdated.

3. When a township changes to the texts, uniform in the county, all new textbooks of old series on hand will be paid for by the book company selling the new adoption. An exchange price is allowed for all used books. Usually about 10%.

4. Textbook uniformity applies to the township school systems only. However, if the independent and independent consolidated schools choose to use the texts adopted for the rural schools, they may buy them from the depositories.

Summary: Townships need not change to uniform texts, even though the uniform textbook law passes, until they feel there is need for a change in that particular series. New books of old series will be paid for in full and an exchange price will be allowed for the old used books. The township board does agree to use the textbooks adopted by the County Board of Education when a change is made. The township board, and the township board alone, decides when texts in their township are to be changed.

BOND SALES IN COUNTY OVER THE TOP FOR 1942, ECKELS CHAIRMAN REPORTS

Penn Eckels, chairman of War Bond sales for Hancock County reports that sales went over the top in Hancock County for 1942.

Hancock County's total for the year was \$1,125,000 and total sales were \$1,134,429.90.

Following are the sales reported for November and December:

Garner:

Hancock Co. National Bank
Previous sales \$173,490.50
Month of November 34,247.50
Month of December 40,861.00
\$248,599.00

Post Office

Previous Sales \$26,306.25
Month of Nov. 4,162.50
Month of Dec. 2,418.75
\$32,887.50

Britt:

First State Bank, Britt
Corwith, Woden, Crystal Lake
Previous Sales \$178,846.75
Month of Nov. 35,928.25
Month of Dec. 74,797.25

NOTHING WRONG WITH OUR FRIEND, CHRIS

Cedar Falls, Iowa, 2-5-'43
Klemme Times:

So many have written to us asking how Chris is, saying they read in The Klemme Times that he was very ill.

Well, there isn't a thing to that. Chris was ailing for a time last fall but is fine now and working every day at Viking's, defense work here and getting along o. k.

We closed the garage at Nora Springs and came to Cedar Falls for the duration of the war.

Hope everyone in Klemme are o. k. and hope The Times, Editor and family are fine.

Yours truly,

Chris and Bessie Gram,
109 Tremont St.,
Cedar Falls, Iowa.

Editor's Note: Glad you're o. k. Chris and working to help lick the Axis. Sorry we had you reported so sick, but we should have known you can't kill a Dane!

GAME LICENSES FOR HANCOCK COUNTY TOTALS \$3,661

County Recorder Fern Peck Katter reports that her office collected a total of \$3,661.90 for game licenses in 1942, approximately \$300 more than in 1941.

Number of licenses issued were as follows: Fishing, 1,264; hunting, 862; combination, 904; and trapping tags, 1,606.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189. to

Ira Overholt was at Estherville on business Friday.

Mr. and Mrs. Wayne Pavey were at Hampton on business Saturday.

Mrs. John Clements was at Estherville last Friday visiting with relatives.

Mr. and Mrs. Maurice Murray of near Britt, spent Sunday visiting at the parental Thieman home.

Don't forget the Home Talent Play at the Community Hall this Thursday evening.

Wallace Pavey and John Etchen of the Ankeny ordnance plant spent Friday in Klemme with their families.

We are glad to report that Henry Helps, who has been ill, is greatly improved at this time and will soon be able to be out of doors again.

Billy Bock, who is a patient at the Veterans hospital at Des Moines receiving treatment, is reported to making satisfactory gains.

Mrs. Eddie Epps and baby son of the Veterans spent Wednesday visiting at the parental Herman Paul home.

Supt. and Mrs. John Micklick and son Bobbie, spent the week end visiting with relatives and friends at Fenton.

Melvin Coobs, who is attending a technical training school at Des Moines, spent the week end visiting with his parents here, Mr. and Mrs. Ben Coobs.

Ruth Stille, who is employed in Des Moines, spent the week end in the community visiting with her parents, Mr. and Mrs. Lester Stille who reside west of town.

Mr. and Mrs. Art Kudje were Mason City visitors Friday. Friday was Lincoln's birthday and a legal holiday so Mr. Kudje did not work at the bank.

Mr. and Mrs. Henry Jost were at Garner Friday evening to attend a celebration in honor of Mr. and Mrs. Emil Kraus' silver wedding anniversary.

Mr. and Mrs. Carol Larson and children of Des Moines spent Tuesday and Wednesday visiting with Klemme relatives. Carol is employed at the ordnance plant at Ankeny.

Remember Andy Woolfries, the announcer at WOI, Ames? Andy was probably Iowa's favorite sports announcer. He is now serving overseas with the British army, according to reports.

Mrs. Merrill Wilcutt of Keokuk, Iowa, came Friday for several days visit with her parents, Mr. and Mrs. Herb Bailey. The Baileys are retiring from the farm March 1st, but as yet have made no plans for the future.

Theo Klemmesrud of Thompson, visited for a short time Friday evening with Editor Jorgenson. Mr. Klemmesrud, publisher of the Thompson Courier, is Representative from Winnebago County this year and was on his way home from Des Moines when he stopped here.

The fire department was called to Mrs. Fred Ridder's residence at about noon Sunday where a small blaze had started on the roof, perhaps caused from a spark from the chimney falling on the shingles. The blaze was extinguished with chemicals and the damage was not great.

O. W. Friedow, who lives near Britt, was a business caller in Klemme. Mr. Friedow recently held a thorough bred hog sale at Webster City that brought the average price of \$115 per head. Mr. Friedow will hold a combination farm and hog sale at his farm on March 4th.

Apple varieties that were proved by the November, 1940, freeze not hardy enough for Iowa are: Ben Davis, Grimes and Northwestern Greening. Delicious also is gradually being replaced.

Mrs. Earl G. Schaeffer returned to Des Moines Friday after spending a couple of weeks visiting with Klemme friends. She was accompanied to Des Moines by Mrs. P. M. Wilson and Mrs. Herman Paul and her two grandchildren. Mrs. Wilson spent a few days visiting with her son-in-law and daughter, Mr. and Mrs. Robert Risser, while Mrs. Paul visited at the home of her daughter, Mrs. Eddy Epps.

BIRTHDAY ANNIVERSARIES OBSERVED

Sunday was the birthday anniversary of Mrs. Henry Jost and Albert Etchen, and in honor of the event Mr. and Mrs. Albert Etchen entertained at a dinner Sunday evening the following: Mr. and Mrs. Henry Jost and Phyllis; Rev. and Mrs. Calvin Groschuesch and children, Carl Swanson and family; Mrs. Daisy Lemke and Miss Lydia Bock. After dinner the evening was spent in playing a variety of games.

Ceiling prices have been established on alfalfa hay.

PUBLIC SALE

On account of poor health I have decided to have a Closing-Out Sale my farm 1/2 west of Klemme on Highway 69 on:

Wednesday, Febr. 24
Sale Begins At 1:00 O'clock P. M.

46 Head Of Livestock

4 HEAD OF CATTLE: 4 Shorthorn Milch Cows, 2 Summer Calves
2 HEAD OF HORSES: 1 Bay Mare, 5 yrs. old; 1 Bay Horse, wt. 1600
38 HOGS: 16 Poland China Brood Sows, 22 Fall Pigs
FEED: 5 tons Alfalfa Hay in barn; 300 bu. Iowa R Oats; 400 bu. Corn
POULTRY: 350 Pullets. Leghorns and White Rocks

FARM MACHINERY AND TOOLS, ETC.

8-ft. Binder in good repair with tractor hitch; 14-wheel Disc, 18-in. Disc; John Deere Corn Planter, 80 rods wire; McCormick 5-ft. Mower; Row Cultivator, 6-shovel Single-row Cultivator; 4-shovel Cultivator; sec Steel Lever Drag and Cart; Steel wheel Running Gear, W. of W. Running Gear, Hay Rack, Broadcast Seeder; Moline Manure Spreader, good condition; McCormick Sheller nearly new; Emerson 16-in. S. Plow, Bob Sled, Potato Plow; No 15 DeLaval Cream Separator; power attachment, 1932 Chevrolet 5-pass. Coupe, 3 Hog Troughs; Gravel Box, 100-ft. New Sing Rope, 6-ft. March First Will Mark Many Changes In Locations

OF FARMERS CHANGE RESIDENCES MARCH FIRST

New Changes Will Also Take Place In Town

There are a number of farmers in this community who will move to new locations on March 1st. We have endeavored to get all of the changes and the ones we miss will be listed next week.

After Blumer and family who resided on the Dr. C. B. Tice farm one mile south of Klemme for many years, move to the Mrs. Trampel farm southeast of Klemme, which is now owned by Becker Mrs. Trampel and are moving to a farm which have rented, north of Dows.

Mr. Boland and family move to the Tice farm about 2 1/2 miles of town to the farm vacated by Blumer.

Mr. Bachman recently held a sale at his farm south of Klemme. Mr. and Mrs. Bachman are retiring from the farm and have purchased a modern residence in Belmond, which will be moved after March 1st.

Mr. Johnson, now farming on Christiance farm north of Lake, moves to the Bachman farm. Den Christiance, Klemme, with his family are moving to a farm vacated by Johnson.

Mr. Kaduce, Jr., who has been on the Albert Kehl place 1 1/2 miles north of Klemme, moves to the Gimer farm about 2 1/2 miles east of Klemme, now owned by the Albert Osborne family. Mr. and Mrs. Kaduce are moving to Herb Bailey farm a bit further southeast of Klemme.

Mr. and Mrs. Herb Bailey are moving from farm life and for the present will live at Belmond. They have rented a house.

Mr. Braund and son who have moved to the Dr. Reuber place north of Klemme are moving to the Kehl farm, vacated by John E. Jr. A. W. Ewing of Jewell moves onto the Dr. Reuber farm. Mr. Neuberger and family have leased the farm six miles east of Klemme which has been farmed by Walter Anderson and are moving after March 1st. The Neuberger have been on a farm about 5 1/2 miles east of Klemme.

Mr. Anderson and family are moving to a farm about 6 miles east of Klemme where Chris Back has been farming. Mr. and Mrs. Back purchased an 80-acre farm of Ventura to which they are moving.

Mr. Van Burkirk has already moved from the Joe Johnson farm to his own place, the old Webber farm four miles north east of Klemme. B. H. Peck and family from Belmond move to the Johnson farm vacated by Van Burkirk.

Mr. and Mrs. Oswald Evenson moved to Goodell some time ago. They are in the grocery business. Togo Matson and family are moving to the Evenson farm southeast of Klemme. The Matsons had been farming the Matson Estate of Goodell. A Benson family occupies the Matson Estate.

Mr. and Mrs. Wm. Meyer, who have their residence in Klemme for several months ago, are moving to their farm near Miller. Mr. Christians has purchased the Chas. Medaus farm 3 1/2 miles of Klemme and will move on the place March 1st. The Christians family have been residing on the father's farm northeast of town. Mrs. Christians moves on the Christians farm.

Mr. A. Hanon, who has farmed the Medaus place for several years, moves to a place in section 36, Conover township, vacated by William Meider, who moves to the farm-lake De Vries place which they have purchased.

Mr. and Mrs. Henry Nannenga are retiring from the farm and purchased a home in Meservey where they will live.

Mr. E. Gruis who has lived on the Haupt farm in the Kanawha

Flowers and Candlelight

(Photo by Kilgore.)

Pictured above are Mr. and Mrs. Burton A. Hanson and their attendants after nuptial vows had been exchanged at the Wellemeyer residence Monday evening, February 22, 1943. From left to right are Andrew C. Hanson of Titonka, Iowa, best man; Mr. Burton A. Hanson of Wesley, Iowa; Mrs. Burton A. Hanson, who was Miss Ruth Wellemeyer before her marriage; and Mrs. Donald L. Bacon of Thompson, Iowa, who acted as her sister's matron of honor.

Rev. H. E. Harvey, pastor of the Klemme Methodist Church, officiated. Miss Julia Hanson and Miss Lulu Hanson of Waterloo, sisters of the groom sang "I Love You Truly," and "Because." Mrs. James G. Carlson of Glen Flora, Wisconsin, sister of the bride, presided at the piano.

After the wedding, the twenty-seven guests were seated at a long table decorated with candles, daffodils, and a wedding cake baked by Mrs. John Waddingham, and partook of a good substantial chicken dinner.

The meal was served by the following friends of the bride: Miss Nellie Bredbenner, teacher at Adison, Iowa; Miss Zeida Kadel, and Miss Isabelle Miller, teachers at Titonka, Iowa.

The bride, a daughter of Mr. and Mrs. Arthur Wellemeyer, was born in Klemme, Iowa, is a graduate of the Klemme High School and a graduate of the Iowa State Teachers College at Cedar Falls, Iowa. She taught in the rural schools of Cerro Gordo County three years, in the Titonka, Iowa, Consolidated School is two years and this year she was teaching in the second grade in the Na-hua Iowa School.

The groom, a son of Mr. and Mrs. Julius Hanson, was born and raised on a farm north of Wesley, Iowa, and is now in partnership with his father, operating their two farms. He is a graduate of the Titonka High School.

The newlyweds left late Monday night for their farm home, 6 miles north of Wesley, where they had remodeled and furnished the new home ready to move in.

Other guests from out of town, besides those mentioned above included Mr. and Mrs. Julius Hanson and Burdine Hanson of Wesley, Iowa; Mr. and Mrs. Melbourne Heech and son David of Woden, Iowa; Mr. and Mrs. Andrew C. Hanson of Titonka, Iowa; Mr. and Mrs. Don L. Bacon and children Jo Ann and Charles of Thompson, Ia.; Mrs. James G. Carlson and children Arthur and Candace of Glen Flora, Wisconsin.

Mr. and Mrs. Richard Mohler of Dayton, Ohio; Mrs. Ruth Melcher of Charles City, Iowa; Mr. Herbert Shoemaker of Tama, Iowa; Mr. Irvin Beenen of Titonka, Iowa.

MR. AND MRS. EMIL BEIER MARRIED TWENTY YEARS

Mr. and Mrs. Emil Beier were given a surprise Sunday, which was their twentieth wedding anniversary, when after church several families arrived at their home in Liberty Township with baskets of food and invited themselves to dinner.

Those present were Mr. and Mrs. Will Riemer and daughter; Mr. and Mrs. Ben Riemer and Lois; Emil Baumer and family and Wilbur Haefner and family.

Mr. Ben Riemer had baked a wedding cake for the occasion and decorated it with a miniature bride and groom. Mr. and Mrs. Beier were presented with gifts of money.

TOWNSHIPS WILL VOTE ON TEXTBOOK UNIFORMITY MONDAY, MARCH 8

The proposition of textbook uniformity that is coming to a vote of the people on March 8 concerns only those persons living in township school districts. There are 16 such districts in the county. Patrons of independent, independent consolidated, and parochial schools will not vote on the proposition, unless they actually reside in a township school district.

It requires a majority to carry the proposition. The county total will decide the election for the whole county, even though an individual township should not carry. The election returns from the sixteen township school districts will be canvassed by the Board of Supervisors.

Almost 100% of the counties in the state have County Uniformity of Textbooks. It is interesting to note that there is no record of a county, once having it, ever having voted or even trying to vote it out. Our neighboring counties of Kosciusko, Cerro Gordo, and Wright have uniformity, and one of them has had it for almost a quarter of a century.

Voting Uniformity does not change any books, but commits the township boards to use the books adopted by the county board of education when the township board decides to change texts. The township board changes the texts, not the result of this election or the county board of education. The time for changing textbooks is a local matter for each township to decide.

CHAS. S. WHITNEY,
Co. Supt. of Schools

MORE HANCOCK COUNTIANS NOW IN SERVICE

The following men left Britt for induction at Camp Dodge on February 23rd:

Duane B. Joston, Garner; Stoffer Gremmer, Wesley; Allen K. Knox, Corwith; Ernest Iverson, Crystal Lake; James E. Shelton, Kanawha; Ronald T. Spangler, Britt; Winston B. Loomer, Britt; Orville L. Borg, Forest City; Frank Venzuela, Britt; Arthur R. Jackson, Loran L. Gar-nant, Kanawha; Henry H. Buns, Woden; Donald A. Hagen, Garner; Harold W. McWilliams, Britt.

Harold Albers, Klemme; Walter J. Liska, Robert W. Carothers, Garner; Gordon R. Foster, Kanawha; Charles W. Drake, Crystal Lake; Cyril E. Mozack, Robert D. Perkins, Britt; Donald J. Peterson, Goodell; Chester S. Barker, Britt; Lyle W. Stott, Garner.

The following of the Call went to Camp Dodge ahead of time and were inducted:

Lester G. Benner, Corwith; Wil-son B. Greiman, Emanuel C. Jacobson, Garner; Emmett L. Wood, Floyd L. Sweet, Calvin R. Wood, and Robert L. Schroeder, Britt.

Jay K. Omvig, Kanawha; Keith J. Myhr and Richard H. Helland, of Crystal Lake.

Tin Cans Are Next On Hancock County Salvage Drive

Our Men In The Service

COUNTY-WIDE TIN CAN SALVAGE DRIVE FRIDAY AND SATURDAY THIS WEEK

EVERT E. BARZ GRADUATES FROM NAVAL SCHOOL

Evert E. Barz, U. S. N. was home for a day the first of the week for a short visit with his wife and children and his mother, Mrs. Clara Barz.

Mr. Barz, having completed a 16-week intensive course in Electrical Theory and Practice, was graduated from the U. S. Naval Training School at Purdue University at Lafayette, Indiana and he is now eligible for advancement to a petty officer's rating of electrician's mate and will take his place as a technical specialist with the fleet or at a shore station.

Barz left for a base in Connecticut where he will be stationed.

LOREN GAST ATTENDING ARMY FLIGHT SCHOOL

Loren Gast, son of Mr. and Mrs. Herman Gast of Liberty Township, left Sunday for Jefferson Barracks, Mo. to begin training as an Aviation Cadet in the U. S. Air Forces.

Loren has been attending Morningside College at Sioux City, preparing for army aviation.

WAYNE CHAMBERS NOW IN THE U. S. ARMY

Wayne Chambers, son of Mr. and Mrs. John A. Chambers, has been inducted into the army and is stationed at Camp Lewis, Washington.

Wayne is a graduate of Iowa State College and for the past two years has been in Alaska as an engineer on army projects. Wayne was at Dutch Harbor at the time the Japs bombed the army base there and has seen war first hand.

Save your kitchen fats for the war effort.

There will be a salvage drive on Friday and Saturday, Febr. 26 and 27 and a salvage depot will be established in every town, its location can be learned by calling your local salvage chairman. Tin cans are to be taken there to aid the war effort.

Robert Sinclair, county salvage chairman is organizing the drive in cooperation with the following local chairmen: D. C. Dana, Woden; P. J. Kirkpatrick, Crystal Lake; J. I. Overholt, Klemme; Guy Judd, Kanawha; Harvey Enfield, Corwith; J. M. Townsend, Britt; Ed. Beck, Garner; Walter Boller, Goodell.

After the drive persons may leave tin cans at their grocery. Remember, tin cans must be clean and flattened out.

Stocking Needed, Too

Silk and nylon stockings are also needed for the war effort. Women may leave discarded stockings at any store selling hosiery.

Waste fats and greases should be collected and sold or donated to any meat dealer.

How To Prepare Tin Cans

Tin cans should be prepared as follows: cut off both ends, wash thoroughly, remove the label and step on can, flattening the body of it. The cut ends should be turned down or placed inside the can. Keep in a dry place. Rusty cans cannot be used.

W. S. C. S. WILL MEET NEXT WEEK THURSDAY

An all day meeting of the Methodist W. S. C. S. will be held next week Thursday beginning at 10:00 o'clock with a pot luck dinner at noon.

Devotions for the afternoon program are in charge of Mrs. Gerald Koerner, with Mrs. Harry Gibbs as Leader.

The hostesses are Mrs. August Baack, Mrs. Ben Coobs, Mrs. Art Wellemeyer and Mrs. Will Ax.

A quilt will be on the frame at 10:00 a. m. and members are asked to bring carpet rags to sew on.

FEBRUARY - MARCH IS BIRDHOUSE BUILDING TIME

With Very Little Effort Hollow Logs May Be Made Into Satisfactory Birdhouses

February and March are the best months to put up new birdhouses, and this year more than ever the cheerful song and bustling activities of birds around our homes will be welcomed.

The conventional bluebird and wren houses may be put up near buildings comparatively short distances from the ground, the former on posts in the open from five to ten feet high, and the latter under eaves of buildings and on open porches. The opening in wren houses should be about one inch in diameter or about the size of a quarter. The opening in bluebird houses should be about one and one-half inches in diameter. When erecting birdhouses, most people immediately think of bluebirds and wrens. However, many other birds welcome man-made nesting sites. Hollow trees are the nest sites of many different kinds of desirable birds, including the woodpeckers, nuthatches, chickadees, titmice, and the crested flycatchers. Even the beautiful wood duck nests in hollow trees. It is an exciting adventure to build a birdhouse and have one of the uncommon birds claim it for its summer home.

NEW HOME ECONOMIST

Miss Hazel A. Grimes

Miss Hazel A. Grimes, of New Providence, has been appointed County Home Economist for Hancock County and began her duties February 22. She succeeds Mrs. Eleanor E. Trummel, who resigned to be with her husband.

WEEKLY NEWS ANALYSIS

Russ Trap German Army in Caucasus; March 15 Remains Tax Deadline as Congress Plans Pay-as-You-Go Later; Labor Demands Increased Wage Scale

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

Three fighting American generals who led their forces against the Japs and were wounded in action in New Guinea are shown convalescing in an Australian hospital. Left to right are shown Brigadier Generals Hanford MacNider, Albert Whitney Waldron and Clovis E. Byers.

WAGES & PRICES: Labor Looks Upward

Organized labor's clash with the government over wage controls drew disquietingly closer as the American Federation of Labor, the CIO and John L. Lewis' United Mine Workers made known their stand.

Conferring at the White House, William Green, AFL president, and Phillip Murray, CIO chief, protested to President Roosevelt that the cost of living was "getting out of bounds" and said that there was increasing dissatisfaction among labor's rank and file.

Previously, bushy-browed Lewis had announced a demand for a \$2 a day pay increase in the bituminous coal industry, effective April 1.

The impending crisis in wage control was further emphasized when the War Labor Board beset by increasing demands for pay increases asked Stabilization Director James F. Byrnes whether the "Little Steel" wage ceiling formula should be revised upward. This yardstick which has been applied to numerous industries allowed the WLB to grant wage increases of 15 per cent above the levels of January 1, 1941, and was designed to match rising living costs between that date and May 1, 1942.

This problem was dropped in Mr. Byrnes' lap, because any upward wage revision would have consumer repercussions and jeopardize the administration's entire wage stabilization and price pegging program.

INCOME TAX: March 15 Still Deadline

Neither the Ruml plan to "forgive" all taxes on 1942 income, nor the U. S. treasury department's proposal to double up collections of both 1942 and 1943 taxes will be adopted, members of the house ways and means committee definitely indicated.

One fact appeared certain. Forty-four million American taxpayers will be compelled to file income tax returns by the March 15 deadline, on the basis of 1942 income.

A pay-as-you-go withholding tax procedure will be set up later. Most observers predicted July 1 as the date. This apparently would be a compromise measure embodying some but not all of the Ruml proposals and the treasury's recommendations.

FARM LABOR: Army to Help?

Many a Washington official has lain awake nights trying to find a solution for the critical farm labor shortage.

Latest suggestion for relieving the shortage is to apply a method used by Union and Confederate armies in the Civil war—furlough soldiers with farm experience to help with harvests and other seasonal farm jobs.

Observers believed that creation of this farm army would be undertaken jointly by the war department and the War Manpower commission and the department of agriculture. It was estimated that 500,000 soldiers might be detailed for this needed task.

Alternately under consideration by top manpower authorities was a proposal to utilize battalions of army men still on military assignment for farm work.

HIGHLIGHTS . . . in the week's news

CHICAGO: Paying its quarterly dividends in war bonds, stamps or cash is the novel method the Belden Manufacturing company is following to help promote the treasury department's drive. Since Whipple Jacobs, president of the company, introduced the plan last August, stockholders have invested 9½ per cent of their dividends in war bonds. This is well ahead of the national average.

WASHINGTON: Planes of the 12th U. S. air force sank or damaged 54 Axis ships in North African waters, ranging from light cruisers to freighters between November 8 and February 1, it was announced here in a report received from Allied headquarters in North Africa. The report disclosed that 13 ships had been sunk, seven severely damaged, and 34 others damaged.

AXIS STOOGES: Show Jitter Signs

Signs of political and economic crack-up at the northern and southern extremities of Germany's European front were indicated in reports hinting increasing unrest in Finland and Rumania.

Reports reaching neutral Stockholm, related that Finland, fearing further Russian offensives in the north, was growing desperate. The Finns' situation was further complicated because of food shortages and the inability of the Nazis to send them assistance. Public anger had been roused over a statement by Field Marshal Goering that Russia's 1939 war on Finland was only a bluff.

The Rumanian situation was said to be growing more critical because of heavy losses on the Russian front. Turkish sources reported that Marshal Ion Antonescu, Rumanian dictator, had begun to despair of his country's position. It was estimated that Rumania had lost 350,000 men killed in Russia and nearly 650,000 wounded and prisoners.

U-BOAT BASES: Concrete Is Solid

Ten feet of solid concrete separated RAF bombs from the German submarines they were dropped to blast in Germany's super-U-boat base at Lorient on France's Bay of Biscay. But British fliers kept up their dogged attacks night after night, for submarines remained the chief menace to Allied success in Europe.

British reports said that existing pens under concrete at Lorient could accommodate 20 submarines at a time, while another set of pens under construction could take 10 more.

Air warfare against submarine sources was not confined to the bases from which they embarked. Bomber attacks continued to be directed against cities where U-boat parts are manufactured, such as Essen, Duesseldorf and Cologne, as well as Copenhagen, Denmark, where submarine diesel engines are made. In addition, RAF bombers strafed other industrial cities, including Turin, seat of Italy's airplane engine industry.

7.4 BILLIONS SAVED: For Farmers Says OPA

Stung by frequent criticism of its policies by farm bloc leaders, the Office of Price Administration answered back in a statement contending that by the end of 1943 this agency will have saved American farmers \$7,400,000,000 or an average of \$1,213 a farm.

OPA made this estimate on the basis of a computation of how much money farmers would have been compelled to spend on things they buy and on operating expenses if there had been no government control over prices.

AFRICAN CRITICISM: Ebb-tide Approaching

The tide of criticism over America's handling of the tricky North Africa political situation had shown signs of ebbing. Significant of this trend was the statement of Foreign Minister Anthony Eden in the house

FOREIGN SECRETARY EDEN
"... cooperation beginning."

of commons that a "start has been made for reconciliation between Frenchmen and readjustment of internal conditions in North Africa."

Eden placed full responsibility for settling North African controversies upon Frenchmen themselves. That the French intended to follow this advice was indicated by the creation of a five-man commission by the imperial council in Algiers to undertake internal reforms. One of these was the restoration to their posts of officials ousted because they were Masons. Another was the release by General Giraud of 27 Communist members of the former French chamber of deputies.

A further step toward unity was a blunt memorandum by Lieut. Gen. Dwight H. Eisenhower warning American officers against unwarranted criticism of "any ally."

COFFEE AND BUTTER: Rations Are Slimmer

Less coffee in their morning cups and butter on their bread faced Americans for the remainder of 1943, as the OPA and the Food Distribution administration made known their newest rationing plans.

Coffee rations were reduced from one pound per person every five weeks to one every six weeks. This worked out to about 8.7 pounds per year per civilian.

Approximately 13 pounds of butter will be available for each civilian.

Washington, D. C.

NEW TOMMY CORCORAN

No announcement has been made yet, but the President has a new "Tommy Corcoran"—astute young Joe Casey, ex-congressman from Massachusetts. Make a note of him. He will play an important role backstage around congress.

But where Tommy the Cork and Ben Cohen frequently rubbed congress the wrong way, Casey's No. 1 job is to promote White House-congressional harmony.

Casey is also making some Q.T. surveys for the President. One of them is to see whether members of the War Production board are deliberately slanting their actions to smear the New Deal.

Another Q.T. probe is of Elmer Davis' Office of War Information. Casey believes that shrewd, public-minded Davis could be of great value to the administration if asked to pass on more government moves in order to gauge their effect upon public opinion. Casey, therefore, may recommend that FDR submit all directives and executive orders to Davis before release to the public.

On the congressional front Casey plans more visits to the White House by bi-partisan groups, which may be able to give FDR better advice than Harry Hopkins.

Note: So far Casey has refused to accept any salary, but is slated later for a post in Jimmy Byrnes' Office of Economic Stabilization.

WHY STALIN DECLINED

The diplomatic grapevine has brought a new reason why Stalin didn't want to join the backgammon party at Casablanca—the danger of being dragged into a political discussion over future boundaries of Europe.

One year ago Foreign Minister Litvinoff flew to London, took the initiative in discussing post-war boundaries. But the British were gun-shy.

Since then Stalin has reversed his policy of advance boundary agreements, has announced a policy of self-determination of nations. With large Russian and Slavic blocs in Poland, the Baltic states, Rumania, this means a good slice of eastern Europe would join Soviet Russia.

However, some U. S. plus some British leaders now have reversed themselves about not agreeing on boundaries in advance. Perhaps fearing that Russia might reach too far, they want to work out preliminary peace plans now rather than haggle over them at the conference table.

This advance dealing of the boundary cards, according to the diplomatic grapevine, was what Stalin wanted to avoid at Casablanca.

Note: What Russia wants after the war is a slice of Finland, one-half of Poland, the Baltic states, the Carpathian provinces of Hungary, the Dobruja from Rumania, all of Bulgaria, which is very pro-Russian, enough of Yugoslavia—also pro-Russian—to secure an outlet on the Adriatic, and an outlet on the Persian gulf. This would give Russia direct access to the Mediterranean and the Indian ocean. Obviously Churchill, who says he wasn't made prime minister to liquidate the empire, can't be enthusiastic about that.

RED ARMY

United States military observers explain recent Russian successes in terms of a development not generally realized in the United States—liberation of the generals from political domination.

Under the system which prevailed in Russia in the early months of the war, the Red generals were responsible to the political commissars. This made them overcautious, prevented daring, resolute action.

Then came the requirement that commissars themselves take military training and indoctrination. Simultaneously their authority over the generals was removed.

Now the Red army is run by the Red army.

THE RUSSIAN FRONT

Though the Russians admitted Brig. Gen. Pat Hurley to the front lines, they still have not revoked their ban on foreign military observers. Their explanation—for what it's worth—is that they would have to admit Japanese observers as well, since they are still at peace with Japan.

Most impressive to Americans who have been anywhere near the Russian front are the earnest but improvised supply methods. Across the Russian steppes come food and ammunition for the men at the front—behind a team of caribou, or oxen, or on the shoulders of men afoot. Any way and every way, the people of Russia keep supplies moving.

CAPITAL CHAFF

Keep an eye on Dick Patterson, ex-assistant secretary of commerce, now head of RKO, as next U. S. minister to Canada.

A secret session of U. S. senators sat with Chinese leaders the other day to try to drum up more aid to China—now virtually nil, despite Roosevelt's statement that more was being flown in now than went over the Burma road (FDR didn't let speech or he never would have said it).

Front Line In New Guinea

By Osmar White

(WNU Feature—Through special arrangement with Collier's Weekly)

Australia's front line in New Guinea is remote and mysterious, the most secret front line in a whole world at war. I was determined to find it.

After a week's canoeing into the interior, I saw the mountains at dawn one morning. They take your breath away. The tallest mountains I've ever seen. One mountain is in the 14,000-foot class. The track leads straight over a 9,000-foot pass.

I pity the men manning this foothill post on the way to the front line. They're tired—jungle-tired to the very bone. They're thin and yellowed and listless. They have had to dig a four-foot deep trench around their camp and block the bridges across it because death adders and rats pester them at night. When not working, they live in a huge mosquito net which covers the space for a table and chairs and a little bookshelf. They get mail once in two or three months.

From here I started the next morning, up the tough slope, through dense, damp jungle. The idea is to get the day's walking over before the afternoon rain sets in. What rain! Straight down, warm and steamy, drenching to the marrow. The first Kunds bridge swayed wildly over roaring rapids 40 feet below.

Where Sun Never Shines.

Next day more of the same. Up and up and up and up. The track is a cannibal path now, not nine inches wide. The high air's thin—not half a breath in a lungful. The sun has not shone on this mud in a hundred thousand years. Still up. Sometimes the trees thin a bit and one can see a glimpse of a breathtaking blue valley, utterly blanketed in treetops, sweeping down 4,000 feet onto the snake-like river, white with rapids and waterfalls. Here one may hold shouted conversation with a man a full day's journey away.

Another day and we're over the crest. Now down and down and down. Dry, comfortable camps overlooking a rolling, grassy valley. Fresh food to make your teeth water. The only fly in the ointment is the rats in the bedrooms. They run up under the blanket with their little cold feet.

Another day and I'm in a valley, hot and magnificent with richness. There are great stands of hoop pine. My boy brought me a spray of creamy orchids a foot long. Met some fellows from the front line, going out sick. Two of them had been in the Salamaua show. They had bad sores from mocka bites. Mockas are scrub ticks that carry Asiatic typhus. They call it Jap river fever up here.

They bit me pretty severely on the way over and this kunai grass is swarming with them, but the iodine bottle keeps them down. The fellows told grim stories of the Japs jubilantly relaxing in neat little grass villages among grinning, well-fed natives.

Ahead are more hills still, wetter and steeper, but this is the last stretch.

Hears a Jap Bomber. I camped under the skirts of a 12,000-foot mountain. About nine o'clock I heard the unmistakable high-low drone of a Jap bomber. I turned off my lantern from habit and went out. The forest was ablaze with eerie light; the ground under the hut a flickering mass of glow-worms.

Another day and I reached an army camp—four great huts, now housing a contingent of Commandos going to the front—lean, stooped youngsters already yellowed by fever. They are the first considerable body of troops I have seen in nearly 300 miles of walking.

These are the men who do quiet execution of every Jap patrol that dares poke its nose out. Only one is over 30.

And then finally, the next day, I was at the front. I went up by way of a cedar tree to have a look at the top story. The valley opened out and far off behind a cloud bank was the faint sheen of the sea. Then, like a cue in a stage play, it came—the distant rolling thunder of machine-gun fire. It was happening down there under that soft canopy of treetops.

I arrived in time to see the patrol come in, torn, caked with mud and sweat and jubilant. The red welt of a bullet coiled over the neck of one of them like a little dead snake. They had fought a patrol of 120 Japs. They stalked them for nine hours, then placed a machine-gun nest in a clearing and slashed them to shreds. The Japs fled through the jungle in twos and threes, howling.

I saw the battlefield by lantern light. Sodden heaps of clothing and equipment; little pools of blood which rain was diluting and blending with the earth.

Price Rule Planned to Prevent Inflation

Control of Wages, Costs, Prices Will Close Gap Between Bigger Income and Much Less Goods

TAXES AND BONDS TO ABSORB PART OF IDLE PURCHASING POWER

Step right over this way, ladies gentlemen," barks the Farm Auctioneer, "and we'll sell 25 of the best cattle in Brown county. Over to the feed lot moves the crowd of people who are milling around the farm auction. The auctioneer starts. "What am I offered for this prize-winning Guernsey cow? Do I hear thirty? Thirty-five? Do I hear thirty-five? Who'll make it thirty-five? Now who'll make it fifty-five? And so it goes. Maybe a cow sells for \$55 and maybe she sells for \$100. It all depends on how much money the bidders have, and how many cows there are for sale, and how badly anyone wants a cow.

badly anyone wants a cow. You have ever attended a farm auction sale, you can understand the greatest need of today is economic stabilization. For the principles which govern a farm auction sale are not much different from those that govern the buying and selling of all commodities.

Suppose that John Brown, who has a small farm at the edge of town, recently got a job in a defense factory. His wages, added to his farm income, give him more money than he has had for years. With that money Brown goes to get himself more good stock and he goes to the farm store to buy some cows. He can get more for cows these days than he used to, and he raises the bid. The true value of the animal. The farmers will either have to raise his price or go without cows.

Buying Urge Stimulated. Now, suppose that thousands of Browns get well-paying jobs in wages higher than they have ever drawn before. They don't all go on farms. Many of them live in small cities, big cities. And they want to buy many things besides livestock. They want to buy all kinds of clothing, furniture, luxuries of all kinds. With their newly acquired wealth they will pay fancy prices for anything they want, even though they may not need it at the time.

And then, just remember that all these people are wanting to buy things, the factories of the United States are forced to devote all of their facilities to making tanks, and tanks, and bombs, and guns. Other things must wait. Furniture, household goods, become scarcer and scarcer. Prices rocket. Wages can't keep up. Inflation is a dizzy spiral that goes higher and higher unless something is done to slow it down. The opposite of inflation is economic stabilization—which means that your dollar will buy about as much of any commodity tomorrow as it does today, as much next week as it does today. Everybody acknowledges the value of economic stabilization. So, the government is doing its best to apply the brakes to this inflation spiral.

These brakes are seven—seven on income and expenses. Heavy taxation to pay war

costs and reduce spending by every person.

2. Price ceilings for food, goods and rents.
3. Stabilization of wages and salaries.
4. Stabilization of agricultural prices.
5. Increased savings through buying of war bonds.
6. Rationing of scarce goods to insure fair distribution.
7. Discouragement of the use of credit or installment buying and the encouragement of the payment of debt.

Why Control Is Needed.

First, let's see why control of wages is necessary.

If history teaches us anything, it is that wages never can keep up with

JAMES F. BYRNES
Price Czar

In the hands of James F. Byrnes, former Supreme court justice, has been entrusted the job of stabilizing the nation's economy so as to prevent a runaway in wages and prices which would lead to the disaster of inflation.

prices. As a worker finds he has to pay more money for food, clothing, shelter and the other necessities of life, he insists on getting more money for his work. His employer has to raise his wages, because other employers are needing men and they, too, are paying more. Farmers lose workers to factories and to the armed services, and they also offer high wages. Some farmers, attracted by the high wages in factories, leave their farms. Thus it goes—higher prices, higher wages to pay those prices, then still higher prices, still higher wages, and so on in a never-ending inflationary hurricane. That's why wages must be controlled.

The present law says that wages cannot be raised without authority to do so. That doesn't mean that a man who does more work tomorrow than he did today won't get paid for it. He will. If he is capable of doing a more highly skilled job tomorrow he will also get more wages than he did today. If, under a merit system, he earns a raise,

he will get it. If he works for an employer with fewer than eight employees, he can get an earned raise. But, by and large, raises in pay for doing the same job with the same skills and the same output will not be allowed.

Salaries Limited.

Salaries, too, are limited. No man may draw more than \$25,000 a year, after deducting federal taxes, a measure designed to prevent anybody from profiteering on the war. You see, even the boss cannot raise his own salary when he wants to. So much for wages. They had to be stabilized to stabilize prices.

Then consider the necessity for price stabilization.

It would be unfair to workers to fix their wages if prices were not also regulated. Accordingly, the government began taking price stabilization measures as far back as May, 1940. At present around 90 per cent of the things people have to buy are under some form of price control. Obviously, there may have been some temporary injustices done to producers, manufacturers, and distributors of goods by the price control regulations. For that reason, there will undoubtedly have to be adjustments in some prices from time to time. But—in the long run—prices will be maintained at a reasonable level where every man, woman and child in the country will be able to get all that is needed.

Why all the other curbs on inflation?

More Money, Less Goods.

This year the total earnings of all the people engaged in war and civilian production will be about 130 billion. That much money will be available to pay taxes, to spend, and to save.

But we cannot possibly produce at present price levels 130 billion dollars worth of food, clothing, furniture, household utensils. As a result the rest of the money will not be able to buy any consumer goods. Federal and state taxes will take another 15 billion. The people will save possibly as much as 30 billion, including war bond purchases. But that still leaves about 85 billion dollars to bid for the purchase of not more than 77 billion dollars worth of things, at current prices that consumers want. If price controls fail to hold, people will resort to bidding against each other for the available goods on the market. If that happens, there will be "black markets," places where unscrupulous persons sell goods at exorbitant prices regardless of the laws.

Equal Distribution.

Rationing provides assurance that everybody will get his fair share of the goods that are earned by such programs. Otherwise, the person with the most money would tend to bid up the price and to secure an unfair share of the available supply. No one would deny that this must not be allowed to happen.

The success of this anti-inflationary movement rests jointly on the government, the law-enforcing bodies, and in the greatest measure, upon the general public. Unless the people in general realize that these brakes on inflation are their only guarantee of stabilizing the cost of living, it will be impossible to enforce them.

Through 1943, and as long as the war lasts, every man, woman, and child in America must try his level best to prevent the cost of living from rising. We can do it if we try. We can refrain from trying to "beat the ration" on scarce goods. We can get along with reasonable stocks of all goods. We can aid in salvaging everything that will contribute toward the winning of the war—rubber, metals, grease, paper, and other materials as they are needed. We can also save every penny and every dollar that we do not need for decent living and put it into war bonds immediately. And last, but not least, we can do without many things if we have to.

Last Report

Fulfillment of his duties as price administrator was claimed by Leon Henderson in a report to congress which marked his retirement from the office.

"I was directed to stabilize prices. That directive was obeyed," the report said.

"I was directed to establish prices alike to buyer and seller. That directive was obeyed.

"I was directed to stabilize rents. Rents have been reduced and stabilized.

"I was directed to distribute scarce goods on a basis of fairness to all. That directive, too, was obeyed."

Henderson's review of these directives and their execution no doubt was aimed at criticism of his activities as the OPA head. It was his task to impose regulation heretofore foreign to America.

Mr. Henderson warned that the "honeymoon" period of business expansion which has lifted profits far above normal peacetime levels has come to an end and that ahead lie increasing difficulties. Costs are increasing month by month with pressure on price ceilings.

While the extremely favorable profit position has provided industry with an ample cushion to absorb these pressures within the framework of stable prices, according to Mr. Henderson, "For the future, economic stabilization requires a more rigorous policy."

Farmers Pool Resources to Maintain Production. The tremendous increase in industrial activity in the big cities has created a corresponding rise in wages and attracted a large portion of the farmers' working force. To hold on to his help and to meet the record demands of the government for food, the farmer has been compelled to raise his wages. Rise in wages usually is followed by higher prices and demands for still larger wages. Unless the trend is checked, a disastrous inflationary spiral sets in. Price stabilization is intended to control both wages and prices and prevent the two from getting out of hand. Because of the labor from the farm to the factory and the demands of the armed services, many agricultural communities will be compelled to pool their working forces to keep up, let alone increase, their production.

Nation Will Have Textiles for Its Needs

Though textile to take care of the nation's needs will be available this year although a 10 per cent drop in production may occur, the Textile, Clothing and Leather division of the FBI has reported.

Conservation measures already in place should supply the increased military and foreign requirements, the division said. Last year, these agencies took almost one-third of the production of 13,500,000,000 yards.

The supply available for civilian use after other requirements last year fell about 11 per cent under 1939. The additional drop of 10 per cent this year is expected to reduce supplies to the level of necessity.

However, the supply and quality of textile should continue to furnish Americans with both durable and becoming apparel. Both trends and fashions undoubtedly will lead to neat and economical styles.

Notes of an Innocent Bystander:

The Magic Lanterns: Alfred Hitchcock's latest, "Shadow of a Doubt," is one of the most exciting melodrama masterpieces. . . . Nobody on the stage or screen is a better actress than little Margaret O'Brien. Most aren't as good. She tears the heart out of your throat in "Journey for Margaret," and in a patriotic short, starring J. Cagney, Margaret delivers The Gettysburg Address better, perhaps, than Lincoln himself. . . . The March of Time's "We Are the Marines" is the first release from that group that seemed dull. . . . Real marines in action at the front, too, but the actors in "Commandos Strike at Dawn" took your breath away with their phony war. . . . In that film Lillian Gish's bit-playing didn't hold me, at all. . . . I kept thinking: "Here she is appearing in a propaganda picture, although she attacked war a year ago, by accusing Hollywood of 'forcing' her into a film in 1917 to arouse hatred, etc." . . . "China Girl" is only entertainment when audiences kid it.

The Coast-to-Coasters: The big query in Brazil: "Why did your country stop letting us hear Lowell Thomas now and then?" . . . Please send that item to Mr. Nelson Rockefeller's Inter-American Committee, Washington, and help cement relations with South America. . . . Joe Besser's interruptions on Jack Benny's show are the most amusing gags in a long time. . . . The endless interruptions on Infopolez ("The best tunes of all go to Carnegie Hall") must have robbed that attraction of many listeners. Most irritating. And so you remedy matters by simply dialing to another program. . . . George Denny's "Town Hall Meeting of the Air" remains a radio must. . . . The claims here and there that certain radio news commentators "have the largest audience in the U. S." were debunked by the radio page in the current issue of Time, which lists the "first ten programs," and names only one reporter.

The Intelligentsia: "The Sergeant Says," a first effort by Sgt. James Cannon of Fort Dix and PM, is crowded with first-rate wordage—which is hardly news to all of us who said he could write long ago. . . . "Guadalcanal Diary," (Random House) by Richard Tregaskis of Int'l News, is the Feb. Book-of-the-Month—a literary monument to American heroism. . . . Another first effort is "The Listeners," a novel by Lt. Herbert Whiting (Appleton-Century). Critics predict a public for it. . . . Reporter Robert Casey's "Torpedo Junction" (we just caught up with it) is a Bobbs-Merrill corker.

The Magazines: The cunning and moxie of the Hitler huns inside the Reich are reported in "Spy at Work" in The Atlantic. Jon B. Jansen and Stefan Weyl thrill you with the adroit hoodwinkings. The stunt becomes all the more admirable when you know they operated with hardly any money. . . . This Week introduces the guy who did most to make a monkey out of Goebbels (excepting Nature, who made him look like one). He is, according to Curt Reiss, the Soviet propagandist's Lozovsky. His hooting on the Berlin newscastings choked lies in Nazi gullets, and his pamphleteering has caused Hitler to double his carpet devourings. Theatre Arts Monthly cites Katharine Cornell's tribute to Thornton Wilder. His translation of "Lucrece," in which she flopped, is described by Miss C. as "my favorite failure." . . . Rollin Kirby's cartoon page in Look should be pasted in every shop window in the U. S.—to remind gripers to jump from the tallest skyscraper. Kirby's is the best push-in-the-face yet.

The Front Pages: Alexander Woolcott's typewriter used to bite people, but it never showed as many fangs as the one that delivered the obit on him for the H-Trib. The piece lifted eyebrows all over town, so unsparing was it. Probably would have got plaudits from the victim—who hated drooling pollyanna fakery. . . . The day after Benito's empire died in Tripoli, the Italian rags started giving him sass. One Milan gazette spat in his eye. That's how it goes with losers. Old Baldy couldn't get a worse punishment than hoots from the crowds who once "vive'd" his balcony hamming. . . . Mostly you agree with Walter Duranty, but not when, in a mag piece, he calls himself a second rate reporter. They don't come any firster. . . . Walter Kerr filed some paragraphs to the Reid family's paper as "a Moscow gossip column." If he wants a title for it, how about "Sovietcetra"?

Quotation Marks-manship: Rupert Hughes: Her face was her chaperone. . . . Faith Baldwin: She was torn between love and booty. . . . Anon: When you talk, you only say something you know. When you listen, you learn what someone else knows. . . . F. O. Repploer: She sat up like an exclamation point. . . . W. L. McElvany: The whispered goody of one to never see again. . . . John Kennedy: A military expert is one who tells you what is going to happen tomorrow—and then tells you why it didn't.

DIALOGUE ON POSSIBLE INFLATION

"Hello, how's tricks?" demanded Elmer Twitchell who was paying 18 cents for a cigar that used to cost a nickel, and addressing Senator Dumm, who had just bought a box of headache pills for twice what they cost a year ago.

"Hello, Elmer," returned the Senator cordially.

"Keeping you pretty busy down in Washington?" asked Elmer. "Do you think we're going to have inflation?"

"I don't think so," said Senator Dumm, as he pulled on a pair of gloves worth about \$1.25 which had set him back \$3.98 the day before. "How about you?"

"I'm afraid we may get it in a mild form," said Elmer as he shifted to his other arm a box of new shoes which cost him \$16.50 as against the \$9 he paid for the last pair.

They left the drug store and walked down the street together.

"There's always a chance of inflation, but I feel that we will avoid it in America," continued the senator. "By the way, I think I'll drop in here and get a shave."

"They charge 75 cents for it in there," said Elmer. "There's a shop further on where you can get one for 60."

"As I was saying," resumed the senator, "we are spending a lot of money and we will have to be smart to avoid inflation, but I have every confidence we will do so."

Here they attempted to cross a street and were knocked back by a milk wagon delivering the same milk for 18 cents a quart that cost only 12 not long ago.

"We can avoid it if we are constantly on guard, I suppose," chirped Elmer, as he stopped and paid 15 cents for an apple from a vendor who had once made money by selling them for a nickel.

"Other countries did not take proper preventive measures and so inflation engulfed 'em. We are alert, I am sure," argued Senator Dumm as he dodged a barrel of beer being rolled into a cafe where a glass half the size of the old-fashioned five-cent schooner would be passed out for 15.

"I guess this country sees the danger and has taken steps in time," agreed Elmer, as he stopped to adjust his necktie by his reflection in a window full of eggs selling at about eight cents each.

The bartender rang up a check for \$1.20.

"Of course it may engulf us before we realize it," admitted Elmer, as they paid, and left.

"Yes, there's always a chance," admitted the senator.

"If we had a decrease of 50 per cent in absenteeism in factories we could get 10 per cent greater production of war needs. The largest percentage of absenteeism is in airplane shops. Much of it is on Mondays and is attributed to Monday morning sickness."—Donald Nelson.

The only cure would seem to be an alarm clock which would touch off, instead of a bell, a record which would scream, "Hey, you fellah! In Guadalcanal they work Mondays!"

"There is nothing in the book to confirm statements by starry-eyed vice admirals that one American can lick two Japs and that the war is as good as over."—Book critic of the New Yorker.

Ol starry-eyed Bill Halsey, as it were!

"The National Association of Restaurant Men has protested the abolition of pre-sliced bread. Having to slice it in restaurant kitchens involves waste, they say."—News item.

Oh, don't be ridiculous. Nobody can slice bread thinner than a restaurant man. (Except a delicatessen man. Ed.)

REJECTION

We can't adopt that Ruml plan—We want no part of it, Because it is so simple that It's made a great big hit.

We must not give it any chance—Our verdict must be "No!"—Because it would work easily And ease the public's woe.

We cannot pass the Ruml plan Just put it in the file! It doesn't complicate a tax In our accustomed style.

FURORE

"There's terrific excitement in Washington," said Elmer Twitchell today.

"What about?" we asked. "There's a rumor Mr. and Mrs. Roosevelt are going to visit the city," he replied.

HAD YOU NOTICED IT?

"Stoppage in Dress Industry Likely"—Headline.

The length of skirts had caused a widespread belief that there had been a stoppage all along.

IF THERE is one piece of furniture for which our own period will be famous it is the low coffee table. Our own generation has discovered that low tables are not only convenient but give a greater feeling of space in a room than high ones.

Here is a little coffee table that is as modern as tomorrow. You can make it yourself from a three by four foot piece of half inch ply-

wood with straight cuts of the saw. It requires not one scrap of hardware. Just cut the three sections according to the dimensions given here; place the slot of the narrow piece of the base through the slot in the wide piece; put the top on, and there you are! When not in use the pieces take up no more space than a large serving tray.

NOTE: Readers who have sent for copies of the series of booklets numbered one to eight, prepared by Mrs. Spears, will be pleased to know that BOOK 9 is now ready. This new book contains 32 gay and thrifty things for your home with illustrated directions. Send your order to:

By Jergie

By now most Iowans will have registered for War Ration Book Two, and the balance will have received, theirs by the end of the week. On March 1, buying of canned and processed foods will start under the point rationing system. On and after that day, take your War Ration Book Two with you when you go to buy any kind of processed foods.

Mails are dispatched at every opportunity, however, but facilities are often over-burdened. Some mail is lost by sinkings. Some mail is delayed by improper address. Transfers from one place to another require time for mail to catch up with the man in service. V-mail letters are given priority and should be used when possible. The post office department is doing all it can to keep mail moving to our men in the armed service, so you are asked to be patient.

Rev. H E. Harvey.

But, with a smile and words of
hope, gives zest
To every toiler. He alone is great
Who by a life heroic conquers
fate."

The Shamrock Times

SHAMROCKS DEFEATED GARNER 53 TO 27

The Klemme Shamrocks closed
their season on the home floor Tues-
day night by winning over Gar-
ner 53 to 27.

Jacobs broke his season's record
by kicking in thirteen field goals
and a free throw to lead the Sham-
rock attack, while Grosshuesch put
in nine points. Greiman, nine, Ka-
duce six and Klitzbach two, for a
total of fifty-three.

Chuck Schneider paced the Car-
dinals and dumped in five field
goals for ten points.

The Shamrocks enter sectional
tournament play at Belmont next
Wednesday night when they meet
Corwith.

SHAMROCKS UPSET BELMOND BRONCOS 40 TO 22 HERE

The Klemme Shamrocks rode
the Belmont Broncos to a 40 to 22
victory here Friday evening as El-
wyn Jacobs cut loose with a barrage
of six field goals and three charity
tosses for a total of fifteen points
to lead the Shamrock blitzkrieg.

Nelson led the Belmont attack
with ten points.

In the curtain riser the 3rd
and 4th graders dropped the game
to the 5th graders 6 to 3.

• MUSIC NEWS

Pat Kudje, Reporter

Since commencement will be
here before we know it, we are
getting pieces ready in Glee Club
and Sextette. Both groups will sing
several numbers.

We have band practice once a
week on Fridays from 1:40 to 2:20
p. m. Last week we had most or
all of the members present. We can
make noise if we have enough out.

• SENIOR CLASS NEWS

Anna Lee Brunes, Reporter

Another six weeks! Mr. Micklick
certainly surprised us in our Phy-
sics test. After cramming for the
last week for the test, we were told
to write all we know about Heat,
Magnetism and Static Electricity
and what we didn't know well,
we could write that down, too.

The Literature Class had a test
of true facts and completion ques-
tions to complete the six weeks.

The U. S. History class is study-
ing the different labor boards and
the tariff following shortly after
the Civil War.

The Senior Home Ec. Class has
been making some new and differ-
ent vegetable dishes, with good re-
sults. They report.

• JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

This week was spent in preparing
and taking six weeks test. We had
the American Government test on
Thursday and the Geometry test on
Thursday and Friday.

Wednesday we were shown class
rings and announcements, which we
will need for next year. We chose
the Hawkeye ring and we also sel-
ected our announcements.

• SOPHOMORE NEWS

Patricia Kudje, Reporter

We have lots of artists in our
class but Iva Christie can really
draw pictures of girls. She can tell
you just about everything about
any movie star, too.

Do Ewald and Wayne pin their
hair up every night? Their curls
always look just so and we wonder-
ed about it.

Who got the idea of flashing mir-
rors in the sunlight? It seems to
bother the teacher.

We had six weeks tests Wednes-
day and Thursday. It's more work
for the teachers than it is for us,
even if we do the complaining.

Our Class just has to have more
boys. This week Jerry Peck, who
came from Clarion, started here.
That makes four girls to thirteen
boys.

In Biology we are studying about
ferns and the fern-like plants.
There are some sixty-dollar ques-
tions in these chapters. An example
is "What is an antheridia, an ar-
chegonia, a sporophyte?" We have to
know all the answers, too.

Our class seems to be ahead in
the mark system which isn't too
good a record. Boys (and girls)

can you tame down a little? The
teachers ask us to do this, too. The
boys averaged them up and it comes
out eighteen marks apiece. That
is not good. Marjorie Hartbeck
hasn't any lucky!

• FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

The Algebra Class is encounter-
ing linear equations. They are very
difficult. We had our six weeks
test Wednesday.

In English we had our six weeks
tests. The grades were very poor.
We are now studying parts of
speech and their uses.

The Science class had a very
hard test for the six weeks. We are
now starting a new chapter on fly-
ing and the beginning of aviation.

The boys who have made some
very good chicken troughs in Manu-
al Training Class.

Grade News

• SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher

The total number of stamps pur-
chased in our room is \$27.95 worth.

Those having perfect scores in
Spelling were Phyllis, Peggy, Dean,
Marcele, Loui, Mary Lou, Roger
R., Edward, Donald, Irene, Ruth
and Helen S.

The Grades had a tournament
which ended this week. The Eighth
Grade were the champions.

• FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

Honor Roll

There were four persons who
wrote perfect papers in their six
weeks spelling tests. They were:
Marjorie Lau, Dorance Baack, Lu-
ella Priebe and Marvin Schmidt.

Those who missed only one out
of the 100 words were Iris Rosen-
dahl and Maurice Trumbell. Mer-
lin Brinkman missed only two.

In Geography, the Fifth Grade
are making the states out of stiff
paper. We are now studying the
Mountain States. When we finish
Geography, each person will have
a complete set of the United States.

The Sixth Grade have been
studying Africa in Geography.

• THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

Thursday morning we were sur-
prised to find seven baby snails in
our aquarium. It is fun to watch
them crawl about.

We are making pictures of Wash-
ington in Art Class.

We wrote letters to Peter and
Nancy to thank them for the Val-
entines they sent us.

Egon Weaver visited our room
Friday morning.

Our basketball team is going to
play the Fifth Grade team Friday
night before the game with Bel-
mond.

Honor Roll

Maxine, Beverly and La Nelle
received perfect scores in the re-
view spelling tests.

Maxine, Lucille, Delores T., Dar-
lene, Sandra, Jo Ann, La Nelle,
Beverly and Ruth received perfect
scores in last week's spelling test.

• PRIMARY ROOM NEWS

Virgie Harcopf, Teacher

The first grade are learning how
to write the capital and the small
letters. We are also learning the
sounds the letters make. Next Mon-
day we will start having spelling
lessons.

The Kindergarten are learning
new words every day. Some of us
can read in our books, too.

Garry was eight years old Tues-
day. He treated us to candy. Ron-
ald was eight years old Friday, and
he treated us. We sang the birth-
day song and spanked the boys.

In Art Class we colored pictures
of hatchets and cherries. We also
talked about Washington, and Miss
Harcopf told us the story of Wash-
ington and the cherry tree.

In Literature Class Miss Har-
copf read the book "Let's Play
Postman." We talked about differ-
ent ways in which letters travel,
and also the different kinds of let-
ters as V Mail and Air Mail.

Honor Roll

The following had perfect scores
in spelling: LuVerne, Neva Ann,
and Elaine.

HOME TALENT SHOW BRINGS IN \$3,000.00 IN BONDS AND WAR STAMPS

A crowd of about four hundred
and fifty people paid \$2,973.54 in
War Bonds and Stamps to see the
home talent play presented by the
business men of Klemme Thursday
night.

The play was a huge success and
everybody got plenty of laughs out
of it.

Those who took part can feel that
they did the job well and really
did a lot to promote the sale of
bonds and stamps.

During the day \$2,800.00 in War
Bonds were sold, and at the door
stamp sales amounted to \$173.45 or
a total of \$2,973.45.

An auction of merchandise was
held to defray expenses, but fig-
ures on that were not available.

Candy sales totaled \$20.00.

In all the stunt was very success-
ful.

KLEMME CREAMERY HELD ANNUAL MEETING HERE SATURDAY

The annual meeting of the Klem-
me Cooperative Creamery Co. was
held at the Community Hall Satur-
day afternoon, with President C. J.
Wille, presiding.

The annual report was read and
it was pointed out that the local
plant's business amounted to \$187,-
842.73 for the year and that cream
received totaled 1,448,731 pounds,
and 476,225 pounds of butter were
manufactured at a cost of 2.11 cents
per pound.

Three directors were elected: C.
J. Wille and Clarence Lenz were
reelected and Verner Priebe was
elected to succeed Otto Pringnitz.

Paul Mueller, manager, reports
that beginning February 1st, 30 per
cent of the butter made is purchas-
ed by the government.

Mueller is assisted in the plant by
Wayne Pavey, buttermaker, and
Walter Lemke looks after the busi-
ness end of the plant.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM
MACHINE

Timely Information Prepared By
Iowa State College Specialist

The repair of farm machinery
can be greatly speeded and im-
proved by observing a few rules
of metal carpentry. For instance,
metal sawing can be made easier
by using the proper kind of
blade for the work at hand.

Cast iron and softer metals re-
quire a coarse hack-saw blade
having 14 points per inch. Steel
or heavy sheet metal requires a
medium blade having 24 points
per inch; copper tubing and thin
metal are cut best by a blade
having 32 points per inch.

When cutting metal with a
hacksaw, press downward on the
forward stroke, but release all
pressure on the backward move-
ment. The teeth will be quickly
dulled if the blade is drawn
backward under pressure.

If sheet metal is to be cut, the
saw should not be held at right
angles to the metal. The angle
should be sufficient so that two
or more teeth will be in contact
with the sawed surface. Holding the
saw at right angles will
cause the teeth to catch and
break.

A difficulty often encountered
in the repair of farm implements
is the removing of rusted nuts
from bolts. A rusted nut often
can be loosened by heating.

Another method is to place a
heavy piece of iron under the
nut and strike on the top with a
hammer. Where rust is extreme-
ly heavy, soaking the nut and
bolt in oil and kerosene for sev-
eral hours may be necessary. If
none of these methods works,
the nut can be split with a chis-
el, one side sawed off close to
the bolt with a hacksaw or the
bolt cut off just under the nut
by striking hard blows on one
side with a heavy hammer.

When faced with the task of
riveting two pieces of metal to-
gether the job can be made to
last longer and be more service-
able by using a ball peen ham-
mer to swell the end carefully.
The first few blows should be
struck squarely in the center of
the rivet with succeeding blows
directed around the edge.

This produces a rounding head
with the rivet forced tightly a-
gainst the metal. A rivet set can
be used to give the riveted end
additional smoothness, but this
is not necessary.

One of the most common mis-
takes in riveting is to direct all
the blows directly at the center
of the rivet. Such a rivet will
soon work loose, and any strain
tending to force the two pieces
of metal apart will shear off the
riveted end.

Another mistake is failure to
draw the edges of the rivet a-
gainst the metal. Such a rivet
will soon work loose.

HOUSEHOLD HINTS

Clear hot water to which one teaspoon of baking soda has been added for each gallon of water brightens the gloss on enameled woodwork.

You can freshen up drab waste baskets by pasting on some gay motifs cut from wall-paper, then using a white shellac over the paper.

A small leak in an aluminum pan may be repaired by placing a flat piece of heavy iron on one side and lightly hammering the hole together on the other side.

Felt hats will last longer if brushed with a brush made of hair and not with a whisk broom.

Set a five-gallon pail of old crank case oil in the tool shed, into which small tools may be dipped after using, this to prevent rusting.

If thawed too quickly meat that has been frozen will likely be tough.

Smear soap on the threads of a screw cap of a jar in which odd bits of paint or varnish are to be saved. The joints will be airtight and the cap will not stick.

Save the water in which you have boiled rice. Pass any small articles through it after washing; it will semi-starch them.

Put the wooden salad bowl near the stove after washing, but never over direct or intense heat. Too much heat will cause the wood to warp and perhaps crack, but moderate heat is necessary to dry the bowl thoroughly before putting it away.

Pull the Trigger on Constipation, with Ease for Stomach, too

When constipation brings on discomfort after meals, stomach upset, bloating, dizzy spells, gas, coated tongue, and bad breath, your stomach is probably "crying the blues" because your bowels don't move. It calls for Laxative-Senna to pull the trigger on those lazy bowels, combined with Syrup Pepsin for perfect ease to your stomach in taking. For years, many doctors have given pepsin preparations in their prescriptions to make medicine more agreeable to a touchy stomach. So be sure your laxative contains Syrup Pepsin. Insist on Dr. Caldwell's Laxative-Senna combined with Syrup Pepsin. See how wonderfully the Laxative-Senna wakes up lazy nerves and muscles in your intestines to bring welcome relief from constipation. And the good old Syrup Pepsin makes this laxative so comfortable and easy on your stomach. Even trucky children love the taste of this pleasant, family laxative. Take Dr. Caldwell's Laxative-Senna combined with Syrup Pepsin, as directed on label or as your doctor advises, and feel world's better. Get genuine Dr. Caldwell's.

SNAPPY FACTS ABOUT RUBBER

The importance of group riding on a rubber conservation practice has been demonstrated in Pontiac, Mich., where today 20,000 workers roll to work in 4,000 cars instead of the 13,000 cars they used daily before this year.

In 1896 The B. F. Goodrich Co. made the first fabric clincher type automobile tire in the 36 x 4 size.

A ton of rubber a year is the collection of the average Brazilian wild rubber gatherer. This explains why man power is the crux of the South American rubber problem.

HOUSEHOLD MEMOS... by Lynn Chambers

Tea for You, With Delicious Cranberry Pastries!
(See Recipes Below)

... And Cookies, Too!

You may not serve tea, and you may not even have coffee, but you still like that pause in the afternoon with a few good friends, to mull over the happenings of the day, to get philosophical over the events that touch all of us. But have that pause whenever possible, even if you have just fruit juice and a few cookies or cakes. It's as important as the bigger things you do.

Have a hot or cold drink as the climate dictates, flavor them with honey if the sugar supply is low. Some supplies of tea are still obtainable for the hot or iced beverage, if you use the coffee ration at breakfast.

Chocolate and cocoa are obtainable now and then and make excellent hot beverages. Made with milk, they're nourishing, too. And if you make them with canned milk they're delightful. Somehow, the canned milks have an affinity with chocolate beverages.

Fruit juices have been a summer standby, but you should discover their winter uses, too! Hot lemonade is delightful as are combinations of lemon, orange, grapefruit and pineapple juice.

Those of you who like spending cold afternoons in front of the open fire will enjoy a small glass of a cool drink with a few tasty cookies. For this purpose, try mixing equal quantities of cranberry and orange juice or apricot and pineapple juice served in pretty glasses with cookies.

Small cakes and cookies are an attractive accompaniment with refreshing drinks. Our first one today is a sugar-saver, butter-saver, quickly and easily made:

Cranberry Fingers. (Makes 24 fingers)

4 tablespoons butter or substitute
2 cups sifted all-purpose flour
3 tablespoons sugar
1 egg
Milk
1 1-pound can jellied cranberry sauce

Grated rind of ½ orange

Work shortening and sugar into flour, and mix to a light dough with beaten egg and milk, using only enough milk to moisten. The mixture should be dry rather than wet. Divide into two portions. Roll one portion to an eighth of an inch thickness, place on a greased cookie sheet, and spread with crushed cranberry juice. Sprinkle with grated orange rind. Wet edges and cover with remaining dough, rolled to fit, pressing edges firmly together. Brush with milk, sprinkle with sugar and bake in a moderately hot (375-degree) oven about 30 minutes. When cool, cut into finger strip size for serving.

Oranges enter the picture again, this time combined with maple syrup.

Lynn Says:

Handy Hints: When a recipe calls for sifted sugar or flour sift the ingredient before you measure it, so you'll get an accurate measurement.

In mixing cakes, add flour mixture to creamed sugar, shortening and egg before adding the moist ingredients, then alternate and add dry ingredients last. You'll get a better grained cake. Muffins are beaten just enough to blend ingredients together. Don't overbeat.

Greasing cookie, cake and muffin tins with a mixture of pancake, made by blending ½ cup shortening with ¼ cup flour prevents sticking.

Beverage

up to make a drop cookie:
Orange Drop Cookies.
(Makes 60 cookies)
2 tablespoons grated orange rind
¼ cup butter or substitute
1 cup maple syrup
2 eggs, beaten
2 cups sifted flour
3 teaspoons baking powder
½ teaspoon salt
Cream together orange rind, shortening, maple syrup. Add beaten eggs then flour sifted together with baking powder and salt. Drop the batter by spoonfuls onto a greased baking sheet and bake in a moderately hot (375-400-degree) oven and bake about 10 minutes or until lightly browned.

Molasses 'n apple butter were favorite ingredients of cookies in grandmother's time, and now they come in for a grand encore:

Old-Fashioned Molasses Cookies.

3½ cups sifted all-purpose flour
2 teaspoons baking soda
½ teaspoon salt
1 teaspoon ginger
¾ cup butter or substitute
¾ cup sugar
1 egg
¼ cup apple butter
1 cup molasses

Sift together dry ingredients. Cream together butter and sugar, add egg and beat together until light and fluffy. Add apple butter and molasses and blend together thoroughly, then mix in sifted dry ingredients. Chill for 2 hours or more.

Roll as thinly as possible and cut into large cookies. Place on a lightly greased cookie sheet and bake in a moderate (375-degree) oven for 10 minutes. These cookies are crisp when baked, get soft if stored in tin for a day or so.

Honey and sour cream are an unbeatable combination in a cupcake, and here they are lined up with spices for an extra deliciousness:

Honey Spice Cupcakes.

½ cup butter or substitute
½ cup brown sugar
1 cup honey
3 egg yolks
2 cups flour
¼ teaspoon salt
2 teaspoons ground cloves
2 teaspoons allspice
2 teaspoons cinnamon
1 teaspoon soda
1 cup thick, sour cream
3 egg whites

Cream butter, add sugar and honey, creaming well. Add egg yolks, one at a time and beat well. Sift dry ingredients and add alternately with sour cream, beating after each addition. Fold in stiffly beaten whites of eggs. Bake in greased muffin tins in a moderate oven (350 degrees) 30 minutes or in two greased cake tins.

Your icing for the cupcakes should be a halo of white swirls of honey icing which will not crack—and can be whipped up in a hurry:

Royal Honey Icing.

1 egg white, stiffly beaten
½ cup honey
½ teaspoon vanilla

To the stiffly beaten egg white, add honey slowly, beating continuously until icing will stand in peaks. Fold in flavoring.

JESUS RESTORES LAZARUS TO LIFE

LESSON TEXT—John 11 32-35, 38-44.
GOLDEN TEXT—"I am the resurrection, and the life"—John 11 25.

Suffering, sorrow and bereavement are so common in our day that this lesson is peculiarly appropriate. Life, even to the Christian, finds its full measure of things which hurt and grieve. Many ask: "Why must I, a follower of Christ, bear such burdens?"

The answer is, that while the believer is not "of the world," he is "in the world," and here he must meet the problems of life, including the evils to which the flesh is heir because of sin. The fact that Jesus is our Friend and our Saviour does not exempt us from human sorrow, but it does assure us of the needed grace to bear the trial and makes us ready to trust Him even in life's darkest hour.

Lazarus, the friend of Jesus, was sick. The home in which Jesus had found rest and fellowship was in deep trouble. Jesus was no longer in Judea. In haste, word was sent to Him of His friend's illness. But He did not come.

Why does He delay? Such is the heart-cry of thousands today who call on Him in their hour of trouble. The purposes of God we cannot fully understand. We need only to trust Him and abide His time.

Notice that His failure to respond at once to the message of Lazarus' sisters did not mean that He had deserted them (John 11:4-6). Nor did it mean that He had denied them His help (v. 7).

Above all, note that He came. He always does. Jesus has never failed any child of His. The time and the manner of His answer to our prayers may not conform to our opinion of what should have been done; but let us remember that we know only in part. He knows all. Let us trust Him. Job, in his darkest hour, said: "Though he slay me, yet will I trust in him" (Job 13:15).

The steps from sorrow to victorious joy in this story are three in number.

I. Death and Tears (vv. 32-25).

By the time Jesus came, Lazarus was dead and his family and friends could only weep as they said: "If thou hadst been here—" Try as we may to temper its cruel blow, the fact remains that death is the enemy of man. It came into the world as the result of sin (Rom. 5:12), and only in Christ is it "swallowed up in victory" (1 Cor. 15:54). Until the glorious day of Christ's return, when the redemption of the body will be complete (Rom. 8:23), death will continue to bring sorrow to the heart and tears to the eyes.

But let us not fail to notice that as the friends of Jesus, we do not sorrow alone. "Jesus wept" (v. 35) with Martha and Mary. We know that He weeps with us in our trying hour. He is the "friend that sticketh closer than a brother." He is the one who gives grace to meet the deepest sorrow, and to bear it with grace because of His tender fellowship.

II. Faith and Hope (vv. 38-40).

"If thou wouldst believe, thou shouldst see the glory of God," said Jesus to Martha. She must look beyond the evident fact of the deadness of her brother and see God's glory in his resurrection. Thus faith assures us that those who believe in Christ have more than the comfort of His sympathizing presence—they have a sure hope (read 1 Thess. 4:14-18).

Sorrow and unbelief would becloud our faith and thus rob us of our hope. Martha needed to have her faith stimulated by the gracious words of the Lord; and then she triumphantly put her hope in Him, the Christ of God. Once we recognize Him as God, we have no hesitation in believing in His miraculous power.

III. Christ and Resurrection (vv. 41-44).

Majestic and authoritative are the words of Christ, "I am the resurrection and the life" (v. 25). He it was who gave life, for was He not "in the beginning with God"? And is it not said of Him, that "all things were made by him" (John 1:2, 3)? Paul tells us that "by him all things consist" (Col. 1:17). He is the only one who could say: "I lay down my life . . . I have power to lay it down, and I have power to take it up again" (John 10:17, 18).

So it can rightly be said that if we have Christ we have everything—both in this world and in the world to come. But if we do not have Christ, we have nothing; we are without God and without hope. "He that believeth in me, though he were dead, yet shall he live" (v. 25) is the promise of Christ to us. Let us believe it.

The resurrection power of Christ is at work in the world today raising the spiritually dead to newness of life in Him.

May we see many such a Lazarus called forth—loosed from the grave clothes of sin and set free.

PATTERNS SEWING CIRCLE

8299
14-16

Plain New Aprons

WHEN January fabric sales bring all sorts of serviceable, pretty cottons down in price, plan to rebuild your apron supply! You can turn out all you need rapidly with this simple apron pattern which is cut with just a few easy-to-put-together pieces. It is pretty, too, with its curved shoulder straps and gay pockets.

Pattern No. 8299 is in sizes 14, 16, 18, 20, 40, 42, 44. Size 16 requires 2½ yards 32-inch material, 9 yards bias fold, 2 yards ric rac.

A General Quiz

The Questions

- When did congress fix the number of stripes in our flag at 13?
- What name is given to the green coloring matter of plants?
- How many states were there in the Confederacy?
- What state is known as the "Mother of Presidents"?
- What is the only New England state having no coastal area?
- For every American and Briton who can read and write Japanese, how many Japanese can read and write English?
- The poinsettia was named after whom?
- How many states touch the border of Oklahoma?
- An elevator in London is called what?
- At what average age do writers reach their greatest literary ability?

The Answers

- The year 1818.
- Chlorophyll.
- Eleven.
- Virginia.
- Vermont.
- At least 10,000 Japanese.
- Joel Poinsett, American minister to Mexico in 1825, who brought the first plants back to the United States.
- Six.
- A lift.
- A study of the works of nearly 1,000 famous American and British writers shows that their masterpieces were written, on the average, when they were in their 46th year.

School Outfit
HERE'S the answer to the school outfit or every-day outfit you want to make your little girl. You can expect long wear from the gracefully shaped jumper—if you make it in rayon gabardine, corduroy, flannel or wool crepe. You'll have variety, too, if you make several blouses in white and colored broadcloth, flannel or pique.

Pattern No. 8232C is designed for sizes 5, 6, 7, 8, 9 and 10 years. Size 6 jumper requires 2½ yards 39-inch material, short sleeve blouse 1½ yards.

PATRIOTIC PROGRAM HELD AT AVERY CENTER

A patriotic program was given at the Avery Center school by the pupils Thursday evening, Feb. 11. Three special numbers were presented by Eva Marie Evenson who played "Ave Maria" on her marimba, Mildred Busse played "American Patrol" on the piano, while Maxine Bachman played and sang "There's a Star Spangled Banner Waving Somewhere". Money was taken in for a hot grill. Free lunch was served and a large crowd attended. Mrs. Floyd Franklin is the teacher, and Wm Sandrey the director.

Eunice Larsen and Evelyn Arnold visited at the home of Doris Johnson Sunday evening.

Mr and Mrs J. A Chambers and daughter, Thelma, were Mason City callers Saturday afternoon.

Mr and Mrs Henry Ludeke, of near Meservey, were visiting in our town Tuesday.

Ira Overholt was a dinner guest Sunday at the home of Rev and Mrs H E Harvey.

Mrs R A Jorgenson was at Mason City on business Monday morning.

Mr and Mrs Werner Schlawn and daughter La Vohn, and Mrs Louisa Rosendahl, were Mason City visitors Tuesday afternoon.

Mrs Wason, of Clarion, was visiting with her brother-in-law and sister, Mr and Mrs Henry Helps, Monday.

Mr and Mrs Herb Bailey and daughter Mrs Willcutt, were dinner guests Sunday at the C A Larsen home.

Ronald Barz and family are moving to Garner where Ronald will begin work Monday as electrician for the Central States Electric Co.

Mrs. Paul Cavitt and Mrs. Harman Trampel have returned from a trip to Texas where they visited with Harman who is in the army.

Mr and Mrs. W. F. Pavey and daughter, Mrs. John Clements, visited at the T. W. Pavey home in Albert Lea, Minn., Saturday.

Mrs. Edwin Medaus has returned home from the University hospital at Iowa City where she was receiving treatment.

Grandma Merkel is visiting at the home of her daughter, Mrs. Ed. Christians this week, and helping the family move.

Monday, February 22nd was the 26th wedding anniversary of Mr and Mrs. Louis Perkins, as well as Washington's birthday.

Mrs. Alvin Goll and Mrs. E. J. Schneider were at Garner Friday to attend a follow-up meeting on "Business" given by Miss Dorothy Simmons, specialist from Ames.

Mr and Mrs Ed Thompson went to Iowa City Sunday where Ed entered the University hospital for a check up.

Local Happenings Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mr. and Mrs. Art Polsdofer attended the funeral of a relative at Mason City Thursday, Febr. 18th.

We are glad to report that Henry Helps is making a good recovery from his illness and is up and moving around in the house every day now.

Mr. and Mrs. Stillman of Clear Lake attended services at the Methodist church Sunday. Mr. Stillman was a speaker on the Layman's Program.

Postmaster John Day has received word that his son, Durance, is confined to his home with mumps. Durance is employed at an aircraft plant on the west coast.

Mr. and Mrs. Lloyd Ames, of Swaledale were supper guests at the Art Polsdofer home Thursday evening.

Mrs. Keith Albertson and son Jimmie, left Sunday for Cedar Rapids, being called there by Mrs. Albertson's mother who had fallen and fractured her arm.

A farewell party for the Walter Blumer and Albert Ausborn families was held Saturday evening at the Avery No 3 school house. Both of these families are moving out of the school district.

P. M. Wilson drove to Des Moines Sunday to spend the day at the home of his son-in-law and daughter, Mr. and Mrs. Robt. Risser. Mrs. Wilson, who had spent a week in Des Moines, returned home with her husband.

Miss Novella Bredbenner, teacher at Allison, Iowa, spent the weekend and Monday visiting with her mother, Mrs. Martha Bredbenner.

Franklin Buseman, serving with the armed forces overseas, wants to take this way of saying "Thank You" to the Auxilliary Ladies for the Christmas package they sent him some time ago. He says the package arrived in good condition.

Mr. and Mrs. Wesley Patterson and baby daughter, drove to Missouri Valley Saturday for a visit at the H. W. Adams home, parents of Mrs. Patterson. Mrs. Patterson and the baby remained for a longer visit while Mr. Patterson returned to Klemme Sunday night.

Mrs. Matt Smith was called to Goodell Saturday when her mother, Mrs. Mary Ahrenkeil, 77, had fallen and fractured her hip. She was taken to the Iowa Falls hospital in the Wellemeyer ambulance. Mrs. Ahrenkeil has a daughter, Mrs. Bert Johnson at Iowa Falls.

Mrs. C. F. Keraus returned home this morning from Altadena, California, where she has been spending the winter with her sister, Mrs. Keraus cut her visit short on the west coast, being called home by the death of her son-in-law, T. F. Mitchel at Swea City.

Bruce Arnold, a student at State College, Ames, spent week end visiting with his parents, Mr. and Mrs. E. J. Arnold.

Mrs. James G. Carlson and children, James and Candace, left Wednesday noon for their home in Glen Flora, Wisconsin, after a visit at the parental Art Wellemeyer home. They were accompanied by Mrs. Karis Kropp, little daughter who will visit relatives.

Capt. and Mrs. H. G. Voetberg of Kansas City spent Friday evening visiting with Klemme friends. Visited for a few days with Captain's relatives at Grundy Center and with Mrs. Voetberg's parents, Mr. and Mrs. Will Barz, Garner, Iowa. Capt. H. Voetberg practiced veterinary medicine a few years ago.

Mr. and Mrs. Herman Gast of Mr. and Mrs. Ben Ridder were joined by Mr. and Mrs. L. Gast on a trip to Des Moines. Loren Gast was called to be inducted into the army and from where he left for Jefferson Barracks, to begin training as an Aviator. Mrs. Loren Gast returned to Sioux City where she has been as a student at Morningside College.

Vegetable Juices in containers over one gallon.
By-products of fruits or vegetables such as soy, bean oil, soy bean milk, fruit and vegetable dyes, and similar products.

INSTRUCTIONS.—To find the Point Value of an item:
1. Find out the net weight of the contents (from the label, if any).
2. In the line across the top of the chart, showing the weight in ounces and pounds, find the column in which this weight belongs.
3. Find the item in the listing of items in the column to the left.
4. The POINT VALUE of the item appears on the same line as the item and in the column listing the correct weight.
All Point Values must be determined by weight. If no weight is marked on the item, the item must be weighed.
In finding the Point Value of a container where contents are given in fluid ounces, consider the fluid ounce to be the same as the avoirdupois weight ounce. One pint is one pound; one quart is two pounds.

The Point Value of any item weighing over four (4) pounds shall be arrived at by multiplying the number of pounds of that item by the Point Value per pound of that item as given in the "Per Pound" column. Fractions of a pound should be figured in quarters-pounds. Fractions of a quarter-pound should be figured to the next higher quarter-pound. Thus, an item weighing 4 pounds 9 ounces would be considered as weighing 4 pounds 12 ounces for the purpose of getting the Point Value of the item.

This Chart Must Be Displayed in a Prominent Place

Klemme Asked To Raise \$300 For Red Cross War Relief

HALF OF COUNTY MUST BE \$3,500 FOR RED CROSS

In Klemme Will Be Launched This Week And Next

The Red Cross Drive for War Funds will get under way in Klemme this week end and next week. So have your money ready for a Red Cross solicitor calls at your door.

Klemme's quota is set at \$300, and this amount should be exceeded. It will be if every family will contribute its share.

L. Ollenburg of Garner, chairman for the east half of the county, has a contribution of at least \$100 per family will be necessary to meet the quota. People should keep in mind that there was no roll call in November, so should contribute heavily to drive which will be concentrated the week of March 8th to 10th inclusive.

Chairmen for Klemme are George Lawhorn and Mr. C. Waterman.

House to house canvass will be by a corps of workers.

Every town and township is organized for the drive and every family in the county will be asked to contribute liberally.

This is war and your dollars may make a difference. Think it over.

Other Quotas Named

Liberty township (outside of Klemme), quota \$300. Mrs. Harvey Gell is chairman.

Liberty township, quota \$300. Ben V. Greiman is chairman.

Liberty Lakes Township, quota is \$250. Mrs. Josh Montgomery is the chairman.

Liberty Township, quota \$250. Joe Burgess, chairman.

Goodell, quota \$125. Mrs. L. W. Goodell, chairman.

SERVICES HELD TUESDAY FOR MRS. ROBT. FLEMMIG, 80

Funeral services for Mrs. Robt. Flemmig, age 80 years, were held Tuesday afternoon in the Methodist Church at Rockford, Iowa, and cremation made on the family lot in Rockford Cemetery.

Mrs. Flemmig had been a semi-invalid for the past forty years and died last September had been bed-ridden.

The Flemmig family lived seven miles east of Klemme for several years, and were just moving to another farm three miles east of Clear Lake, Iowa, when death came to the mother on Saturday afternoon, February 27, 1943.

Mrs. Flemmig is survived by her husband, Robert Flemmig, age 84; son, Roy Flemmig, Clear Lake; two daughters, Mrs. J. A. Cooper, Rockford, Iowa, and Olive Flemmig, Clear Lake.

KLEMMME WOMAN JOINS THE WAACS

According to a news dispatch, Earl G. Schaeffer, Des Moines, formerly of Klemme, has entered into the service at Fort Des Moines.

Mrs. Schaeffer is the wife of Dr. E. G. Schaeffer, former Klemme dentist and now serving overseas in the Army Medical Corps. Since Dr. Schaeffer enlisted in the army a couple of years ago, Mrs. Schaeffer was with her husband until he went overseas. The last year she has been attending Drake University.

The protein of enriched biscuits and enriched bread helps stretch the nation's meat supply in a most economical, nutritious and delectable manner.

Nat'l Artist Paints War Poster

Urging Americans to "Keep 'em Flying" through the purchase of more War Bonds, the above poster will soon make its appearance in several hundred thousand stores and display spots throughout the country. It was painted by Georges Schreiber, internationally known artist, whose pictures hang in the Metropolitan and Whitney Museums in New York and other museums in various cities.

Point Rationing System Is Not Difficult To Understand

MOST POPULAR FOODS, SIZES AND POINT VALUES

Following is a list of the most widely sold canned foods with their approximate weights and point values of the most common sizes:

Item	Size	Point Values
Peas	1 lb 4 oz.	16 points
Corn	1 lb 4 oz.	14 points
Tomatoes	1 lb 3 oz.	16 points
Asparagus	1 lb 3 oz.	14 points
Beans	1 lb 3 oz.	14 points
Spinach	1 lb 2 oz.	11 points
Peaches	1 lb 14 oz.	21 points
Peas	1 lb 14 oz.	21 points
Sliced Pineapple	1 lb 14 oz.	24 points
Grapefruit	1 lb 4 oz.	10 points
Fruit		
Cocktail	1 lb 1 oz.	11 points
Grapefruit		
juice	2 lbs 14 oz.	23 points
Tomato		
juice	2 lbs 14 oz.	32 points
Pineapple		
juice	2 lbs 14 oz.	32 points
Tomato		
juice	1 lb 7 oz.	17 points
Grape		
juice	1 qt. or 2 lbs.	15 points
Scups	10 1/2 oz.	6 points

Although more than 200 different items are included in the processed foods rationing program, most housewives buy only about 18 different items and these are usually packed in the No. 2 or No. 2 1/2 cans.

To aid customers who may run out of ration stamps for processed foods before the first ration period expires, the OPA has provided a 7-day overlap period - the last week of March - during which time consumers may spend both their first period and their second period stamps.

Stamp: A, B, and C are valid for the first period and may be used from March 1 through March 31. Stamps for the second period may be used from March 25 through April 30. During the overlapping period of March 25 through March 31 stamps for both March and April may be used. After March 31, however, Stamps A, B, and C will not be valid.

N-8 CLUB MET AT THE LEMKE HOME

Mr. and Mrs. Clarence Lemke entertained the members of the N-8 club at their home to dinner Sunday evening, followed by bridge.

High scores for the evening's play were those held by Harvey Hubbert and Mrs. Orville Bridges. War Stamps were given as prizes.

Our Men In The Service

PVT LESTER NEUBERGER IN NORTH CAROLINA

Pvt. Lester Neuberger, who was inducted into the U. S. Army a few weeks ago, is now stationed at Fort Bragg, North Carolina. Pvt. Neuberger's address is: Ptry C, 9th Bn. 3rd Regt. Barracks 415, F. A. R. T. C., Fort Bragg, North Carolina.

OTHER ITEMS ABOUT THE BOYS IN SERVICE

T-5 John Clements has recently been transferred to Camp Beauregard, Louisiana. Johnnie does mechanical work on tanks and trucks.

Corporal Fred Pannhoff arrived from Tucson, Arizona Friday to spend a furlough visiting relatives and friends. Fred is a mechanic in the air corps and helps to keep 'em flying.

T-Sgt. Ed. Blanchard is home from a camp in Texas on a furlough.

MORE HANCOCK COUNTY MEN REPORTED FOR ARMY DUTY MARCH 2

The following Hancock County boys who went to Camp Dodge for physical examinations on February 23rd and were accepted and inducted, returned and reported for active duty on March 2nd:

Orville L. Borg, Forest City; Arthur Jackson, Kanawha; Robert W. Carothers, Garner; Gordon Foster, Kanawha; Duane B. Josten, Garner; Winston B. Loomer, Britt.

Walter J. Liska, Garner; Harold W. McWilliams, Britt; Cyril Mozack, Britt; Robt. D. Perkins, Britt; Donald J. Peterson, Goodell; James E. Shelton, Kanawha.

Donald T. Spangler, Britt; Lyle W. Stott, Garner; Ivan R. Valley, Woden; Ernest Iverson, Crystal Lake.

Donald A. Hagen of Garner will report back for active duty on March 4 as he was held over for a short time.

Rural Schools Will Vote On Uniformity Of Text Books

KLEMMME SHAMROCKS ENTER SECTIONAL TOURNAMENT AT BELMOND

The Klemme Shamrocks are entered in the Sectional Tournament to be held at Belmond and will play their first game against Cornwith at 7:10 this Wednesday evening.

Britt meets Alexander at 8:20, and Kanawha and Belmond tangle at 9:30 p. m.

Garner starts the tournament against Rowan at 6:00 p. m.

In the upper bracket of play are Britt, Alexander, Kanawha, Belmond, and Clarion.

In the lower bracket are Klemme, Cornwith, Goodell, Garner, Rowan and Dows.

In the sectional this year there are no classification of A and B schools as in past years. In fact, in the first round B schools are playing A schools.

Klemme and Britt are the two strongest teams in this sectional and will probably meet in the final championship game Saturday night at 8:00 p. m.

FARMERS URGED TO SELL SOY BEANS TO PROCESS PLANTS

Farmers should sell soybeans now to keep processing plants operating. Processing plants need the soybeans to relieve the soybean famine shortage. Farmers having beans that are not good enough for seed should ship them to market at once.

U-DELT-EM. BRIDGE CLUB MET WITH MRS. JORGENSEN

Mrs. R. A. Jorgenson was hostess to the U-Delt-Em Bridge Club last Friday afternoon.

First, second and third highest scores were won by Mrs. H. D. Ramsey, Mrs. Fred J. Arnold, and Mrs. P. M. Wilson.

Ell: Center School, Dist. No. 5.
Ellington: Center School, Dist. 5.
Erin: Center School, Dist. No. 5.
Garfield: Center School, Dist. 5.
Liberty: Center School, Dist. 5.
Madison: Center School, Dist. 5.
Magor: Center School, Dist. 5.
Orchel: Hutchins School, Hutchins.
Twin Lake: Dist. No. 8 (Closed school.)

CHAS. S. WHITNEY, County Supt. of Schools.

BROTHER OF A. WELLEMAYER DIED FRIDAY MORNING

Funeral services for Ernest E. Wellemeyer, 62, who died of a heart attack Friday morning at Patterson, California, were held Sunday at Patterson.

Mr. Ernest Wellemeyer, who was a brother of Arthur Wellemeyer of Klemme, is survived by his wife and two daughters.

He was superintendent of schools at Patterson for the past ten years. He began his teaching career at the Charles City, Iowa, high school as coach and mathematics teacher.

FIRST OPEN SPRING SEASON IN IOWA HISTORY ON RING NECK PHEASANTS

Iowa Hunters To Help Farmers Control Surplus Pheasant Population

The State Conservation Commission last week announced an eight-day open season on ring-neck pheasants in 11 north central Iowa counties, including Worth, Cerro Gordo, Franklin, Wright, Hancock, Winneshiek, Kossuth, Humboldt, Palo Alto, Emmet, and Pocahontas county north of Highways 221 and 10, from March 15 to March 22, inclusive. Daily bag limit has been set at five, possession limit at 10. Two hens may be taken in the daily bag, and four hens may be in possession. Shooting hours will be from 9:00 A. M. until 5:00 P. M.

The first spring pheasant season in the state's history is designed only to reduce pheasant populations in territories where heavy concentrations of birds are causing serious loss of crops. It is not designed as a sporting measure.

Although many farmers in the areas of greatest concentration agree that for the most part the crop damage to date has been minor, they express fear that at spring planting time pheasants will pull the germinating seed corn, and this at a time when seed corn is scarce, labor short, and the government asking for increased crop production.

Under the statute hunters will be permitted to keep the pheasants taken during the special open season 10 days after the close of the season, or until April 1st.

WEEKLY NEWS ANALYSIS

OES Opposes Increase in Farm Parity; Showdown in North Africa Prelude to United Nations Invasion of Europe; Reds Continue Ground-Gaining Drive

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

How momentous have been the results of the Russian winter offensive against the Nazis may be seen in the changes pictured on the above map. From the beginning of the Red drive last fall, through the relief of Stalingrad and the sweep of the Russian momentum westward and south, Hitler's forces have had to yield virtually all the land they gained in their 1942 spring offensive. The darkly shaded area indicates the approximate extent of the Russian gains.

TUNISIA:

Ready for Zero Hour

Only a continuance of the traditional African rainy season and the necessity of waiting until stores of supplies were sufficient, had prevented the long-awaited Allied offensive for final control of Tunisia.

Signs and portents had pointed unmistakably toward an early showdown. The elevation of Dwight D. Eisenhower to the full rank of general and his appointment as supreme commander in Africa had indicated a centralization of command preparatory to decisive action. At the same time Secretary of War Stimson had predicted the imminence of full-scale fighting in Tunisia and had warned the American people to prepare for heavy casualties.

Axis forces had been completely cleared out of Tripolitania, and the British Eighth army after a short rest had resumed movement by storming into southern Tunisia along the coastal road over which Marshal Rommel's retreating army had passed. When Rommel turned at last like an animal to fight back, Montgomery's men were ready for him. And although the Nazi commander threw in tanks, infantry and artillery, the British pounded his positions mercilessly.

RED RESURGENCE:

Regains Lost Ground

Prophetic of Rostov's fall had been the Russians' capture of Novochoerkassk, for in wars past and present any army that took the gateway town of Novochoerkassk had always succeeded in taking Rostov.

How far the Nazis' fortunes had receded since their peak at Stalingrad last autumn might be seen in the spectacular gains in territory recorded by the Russians. From Orel on the north to Voroshilovgrad and Rostov on the south, the Reds had already regained most of the territory they had lost in the German offensive last spring and summer.

Nor did the Red tide show signs of ebbing. Ahead lay the rich granary of the Ukraine which Hitler had hoped to hold. To the south lay the remains of the Nazis' Caucasus army trapped and facing possible dismemberment.

The speed of the Russian penetration westward caused some military observers to believe that not only the Caucasus, but the Nazi-held Crimea as well might be isolated.

One of the surprising phenomena of the Russian offensive was its frightening effect on Axis military morale. From a victorious invading host, the Nazis and their satellite allies had been reduced in many areas to chapfallen detachments glad to surrender.

FARM PRICES:

Parity Battle Brisk

Even as the administration threw down its battle gage against further advances in farm prices, the senate agriculture committee laid the ground for such price increases by voting to report a measure sponsored by Senator Bankhead of Alabama designed to revise the parity formula upward.

The administration's position was set forth in the speech of Economic Stabilization Director James F. Byrnes. Declaring that a change in the farm parity formula "would not be in the farmers' interest," Mr. Byrnes indicated that the administration would fight to preserve its present policies on farm and food prices and production. Recognizing that farmers need returns greater than parity to meet extra expenses involved in stepping up production of certain crops, the OES chief indicated that the government would make up that extra expense.

U-BOAT REPORT:

Better Than Expected

Out of the "hush-hush" and into the limelight came the subject of German submarines—a subject that has painfully worried many an Allied leader. Prime Minister Winston Churchill turned the light on the U-boats and his examination was optimistic. "We are more than holding our own."

Outranking in interest his prediction of an Allied invasion of Europe within nine months and his report that 500,000 British and American troops are now in Africa, was his survey of the submarine situation in a report to the parliament.

In the last six months, he pointed out, Anglo-American and Canadian shipbuilding exceeded all losses of the United Nations by over 1,250,000 tons. The rate of Allied destruction of U-boats has also improved.

DIES COMMITTEE:

New Lease on Life

The American people indicated clearly that they wanted the work of the Dies committee continued, even though some of them did not always agree with its methods of investigating un-American activities.

This was evident in the overwhelming congressional vote of 302 to 94 to extend the committee's work for another two years. In reporting on its achievements, Congressman Dies pointed out that the army, navy, Federal Bureau of Investigation and other government agencies had made 138,000 requests for information about subversive elements and that 1,600 federal agents had consulted the committee's files.

JAP REVERSES:

Spur U. S. Offensive

With Guadalcanal completely cleared of Japs, U. S. forces in the southwest Pacific had prepared for new offensive action.

How costly had been the Nipponese effort to hold this key island and their foothold in the Buna-Gona area of New Guinea was disclosed in estimates of enemy casualties. These estimates indicated that Japan had lost 90,000 men killed, 200 ships sunk or damaged and 2,000 planes destroyed in these defeats. More than two-thirds of these losses were sustained in the southern Solomons.

Allied air raid activity, strafed Jap-held positions on Kolombangara and Munda. Meanwhile in New Guinea American and Australian troops opened up a long-awaited drive on Salamaua. First activity had consisted of skirmishes in which enemy forces were pushed back in the Wau-Mubo area, 35 miles southwest of Salamaua. While this attack was on a minor scale, the tempo was being increased with the Allies definitely taking the offensive.

DEFERRED DRAFTEES:

Face Early Summons

As plans moved forward swiftly for enlarging the size of Uncle Sam's fighting forces, selective service made public estimates that 1,000,000 single men of draft age are now deferred on occupational grounds. This number would be sufficient to fill more than one-fourth of the requirements of the armed services for the remainder of the year if they are physically fit.

That many of these men would soon land in the army or navy was indicated by instructions to local boards to review deferments within six months after granting them and eliminate unnecessary ones so that their industrial places could be taken by women or other men.

Of the draft age deferrees, 370,000 are in class 2-A which covers occupants of essential civilian jobs; 570,000 are in class 2-B covering those holding essential industrial jobs; and 150,000 are in class 2-C, necessary men in agricultural pursuits.

PACIFIC BASES:

For Peace Insurance

Victory over Japan in the Pacific would not solve the problem of future aggression. Some other insurance was needed. And it became increasingly clear that such insurance must be the acquisition and maintenance by the United States of a chain of air and naval bases across the Pacific.

Immediate steps to implement this movement were taken when the house naval affairs committee

SEC. OF NAVY FRANK KNOX

appointed a subcommittee to investigate ways and means of acquiring these bases. Secretary of Navy Knox had previously recommended such a program, indicating that lend-lease aid might be the basis for negotiations for the bases. He said it probably would be necessary to locate some of the bases in territorial possessions of France, Holland and Japan.

SENATE PROBE:

To Study Food

As the threat of a possible food shortage loomed more ominously the senate agriculture committee ordered an investigation into the production, transportation and distribution of foodstuffs.

Stating that such a threatened shortage had been aggravated by executive department policies "directly contrary to the will of the people," the committee authorized an investigation of "all policies of government which appeared to imperil the production and distribution of adequate food supplies for armed forces, our civilian population and our Allies."

Chairman Smith of South Carolina said the committee intended to "acquaint the American people with the food situation," depending on public opinion to correct any inequities.

COAL & RAIL PAY:

OES Doooms Raises

Rejection of demands by John L. Lewis' United Mine Workers for a \$2-a-day raise for bituminous coal miners; of demands by the railroad brotherhoods for 30 per cent pay increases for rail workers and all other wage requests beyond the Little Steel formula of 15 per cent ceiling was clearly indicated in an anti-inflation statement by Economic Stabilization Director James F. Byrnes.

12-42

Plenty of Variety.

YOU'LL be tempted to make dummies in several colors to wear with this smart jacket suit. If you do you will find that the one suit will seem different every time you change dummies. The simple, comfortable lines of both jacket and skirt are ever so becoming.

When making pastry, use pastry flour made from winter wheat, as it makes pastry more tender than bread flour.

If adhesive or gummed tape becomes too stiff to use, soften it with two tablespoons of warm water and half a teaspoon of glycerin.

Make a definite place around the household to keep instruction booklets that come with appliances, then when directions are needed they can be quickly found.

To slip a cactus, break off slips at the joints. Break off three or four, as they do not always root, and stick them in fine sand. Keep them wet and in a warm place and they will root in about three weeks. These will make nice gifts for your flower-loving friends.

Cotton placed in the fingertips of your rubber gloves will keep sharp fingernails from cutting through the rubber.

Your lipstick will stay put much longer if you pat a little face powder over your lips before applying it for a firm foundation.

When knitting, don't leave your work in the middle of the row—this tends to leave holes in the work.

If you've spotted a little leak in the roof, get after it immediately. If water is beginning to seep into the cellar through a crack in the cellar wall, don't put it off until some future time. If you have noticed a brick that's beginning to work loose on the chimney, look up the stone mason's telephone number, and don't let it stop there, either; get him on the phone.

Pattern No. 8341 is in sizes 12, 14, 16, 18, 20, 40 and 42. Size 14, with short sleeves, takes 3 3/4 yards 39-inch material. Send your order to:

He Was It
"Ha! Ha!" laughed the recruit. "You can't fool me. I know they've got potato-peeling machines in this army."
"Yes, smart chap," replied the sergeant, "and you're the latest model!"

Name for It
"Grace tells me she's taking hot baths regularly to get her weight down."
"Yes, she calls it the scorched girl policy."

Matrimony is a partnership with one silent partner.

New Start
Erica—"Don't you think I am getting younger every day?"
Elsa—"Yes, I should not be surprised to see your name in the births columns."

A woman's dressmaker or her beauty parlor can top 20 years off her age, but you can't fool a couple of flights of stairs.

That Tickle
"He was kicked out of school for cheating."
"How did it happen?"
"He was caught counting his ribs in a physiology examination."

Hale and Hearty
Recently an old southern negro who claimed to be "having symptoms" went to see a doctor. The doctor plied him with questions. Among other rather personal questions, he asked, "And how are your kidneys, Uncle George?"

To which George replied: "Well, Doc, dey is all grown up now and some ob 'em is married."

He Was the View
Just as the train began to move a very stout gentleman scrambled into a carriage and sat down, breathing hard.

A small boy, perched opposite, gazed at him as if fascinated. After a bit this annoyed the plump party, so he snapped angrily: "What are you staring at me for?"

"Please, sir," said the boy apologetically, "there's nowhere else to look."

Pull of Moon
The gravitational pull of the moon upon particles on the earth is three times that of the sun.

PENETRO
Many users say "first use is a revelation." Has a base of old fashioned mutton sardines. Grandma's favorite. Gonerousjar 25¢, double supply 35¢. Demand stainless Penetro.

All Things Not Good
Temperance is abstinence from things that are not good.

FAMOUS NO-SUGAR ALL-BRAN MUFFINS EASY! DELICIOUS!

They really are the most delicious muffins that ever melted a pat of butter! Made with crisp, toasted shreds of KELLOGG'S ALL-BRAN, they have a texture and flavor that have made them famous all over America.

Kellogg's All-Bran Muffins
2 tablespoons shortening 1/4 cup milk
1/2 cup corn syrup 1 cup flour
1 egg 1/2 teaspoon salt
1 cup Kellogg's All-Bran 2 1/2 teaspoons baking powder
Cream shortening and corn syrup thoroughly; add egg and beat well. Stir in All-Bran and milk, let soak until most of moisture is taken up. Sift flour with salt and baking powder; add to first mixture and stir only until flour disappears. Fill greased muffin pans two-thirds full and bake in moderately hot oven (400° F.) about 30 minutes. Yield: 8 large muffins, 3 inches in diameter, or 12 small muffins, 2 1/4 inches in diameter.

War Stamp Sales Over Half Billion Dollars, Album Drive Opens

Spreading Margaret C. Russell of the War Savings Staff tucks up this new Treasury poster which will be seen from coast to coast. It pictures retailers' slogan, "SAY YES." A drive is underway for Americans to buy additional War Stamps to fill accounts and convert them into War Bonds.

WASHINGTON, D. C.—The nation's retailers from the tiniest hardware store to the mighty cities are active in a campaign in a great Treasury Department campaign to sell additional War Savings Stamps. A drive is underway for Americans to buy additional War Stamps to fill accounts and convert them into War Bonds.

According to a report released by the Treasury Department today, sales of War Savings Stamps totaled \$577,747,000 for the period from May 1, 1941 through November, 1942. Stamp sales have risen from less than one million dollars per month when they were first introduced to the public to an average of more than fifty million dollars per month at the present time.

The Treasury slogan, "A half-

HITLER'S CHILDREN

EXCITING DRAMA SEEN IN "HITLER'S CHILDREN"

This Sensational Picture Will Be Shown At Avery Theatre

Revealing for the first time on the screen the real "inside story" of the inhuman master race Hitler is endeavoring to create in Germany, RKO Radio's "Hitler's Children" comes to the Avery Theatre at Garner for three days: Sunday, Monday and Tuesday, March 7-9. Tim Holt, Bonita Granville and Kent Smith play in the uniquely unusual film which is based on Gregor Ziemer's provocative "Education for Death," a factual account of his ten years as head of the American Colony School in Berlin and what he saw from that ringside seat of Nazi educational doctrines. A great love story is interwoven with the theme of the production. The plot revolves around the plight of two young people who are baffled in their love for each other and are caught up in the relentless gears of the Nazi machine. Rebelling against the dictates of their superiors, they endeavor to escape but fail; and in a stirring climax they seek to warn their fellows against the evils of Nazism.

Simple as the story is, this very simplicity helps to make the picture an authentic and an intensely moving screen document. It reveals, far more clearly than any written account could do, the barbaric, ruthless ideology that proclaims the enslavement of the rest of the world under Nazi masters. It is a film that every American should see, for its very real entertainment value and its brave, stormy romance.

Young Holt and Miss Granville turn in splendid performances, and Smith, highly promising newcomer, has the role that Dr. Ziemer had in real life as the schoolmaster. Otto Kruger, H. B. Warner and Lloyd Corrigan deliver outstanding supporting portrayals, and Edward Dmytryk's direction of production by Edward A. Golden puts the finishing touch to this genuinely notable achievement.

WM. KOERNER FUNERAL HELD AT MINNEAPOLIS

A number of Klemme relatives drove to Minneapolis today to attend the funeral services of William Koerner.

Augusta

Augusta Travers—you know, the one who runs the little hat shop down on Main Street—she's always been dead set against gambling in any form. Never will forget when I was a kid and she found little Hammy, her youngest nephew, playing marbles for keeps out back of the shop. Took it on herself to give him a whaling and point out the evils of gambling. She's a strict woman, Augusta, real strict. Good as gold, of course. But mighty set against the lighter things of life.

Well, so you could have knocked us all over with a feather when Augusta started her gambling campaign for War Bonds and Stamps, right out in the window of her shop. First she got hold of the photographs of every boy here in town who's joined up, and pasted them on a big board in the window, with little American flags at the corners. Half the town was down there watching her do it. She left the middle empty. Then she brought out a placard she'd had printed up and put it in the middle, and this is what it said: "These are the Local Boys who have enlisted in America's War—They are betting that you are buying War Bonds and Stamps—Hitler and the Japs are betting you aren't—Place your bets inside."

My wife couldn't wait to get herself down there and inside Augusta's shop to see what in the wide world had happened to her, turning right around about gambling like that. You know my wife. She kind of likes to talk. She went right up to Augusta and said, "Augusta Travers, seems like something's come over you. Why, I never thought I'd see you running a gambling campaign in your own shop."

Mean to tell me it's a gamble whether this country buys enough bonds to win this war?" Augusta asked. I forgot to say. Wasn't just a hat my wife brought home. Was a hat and a \$25 bond.

(Story from an actual report in the files of the Treasury Department.) Remember: It takes both taxes and War Bonds (and more War Bonds)—to run the War and combat inflation! U. S. Treasury Department

Leonora

Leonora straightened the objects on her desk with great care. She had put her desk at the end of her room facing the door so that when her mother came in she would have to cross the whole room under Leonora's stern executive eye to get to her. From movies and pictures in the newspapers Leonora had gotten a good idea of how the desk of a busy woman of affairs should look.

With an important scowl, Leonora picked up a sheet of paper. Now she was two people—herself, the busy woman, and her own stenographer. "Miss Simpkins, take a letter to the Secretary of the Treasury, will you?" she murmured under her breath.

"Yes, immediately," she murmured back at herself.

Leonora cleared her throat and looked at the ceiling for inspiration. Miss Simpkins bent over the sheet of paper hanging on the words about to fall.

"Dear Mr. Morgenthau," — "Got that?" — "Yes, madam."

"I am — ahem — thirteen years old and anxious to be of all possible service to the country at this time, ahem!"

"I earn a weekly income of from \$1.37 to \$2.12 by helping with the housework and by shovelling snow. I am at present in possession of one War Savings Bond and am buying stamps weekly. I want to become a member of the 10 percent Club. I feel it to be — ahem — not only my duty, but my privilege?" ("How do you spell privilege?" asked Miss Simpkins. "Don't bother me with these details," said Leonora)—my privilege as an American to invest at least ten percent of my income in War Bonds.

Yours truly," "Get that off at once, Miss Simpkins," said Leonora. "Yes, Ma'am! You certainly are an important woman, ma'am," said Miss Simpkins.

(Letter from an actual communication in the files of the Treasury Department.) U. S. Treasury Department

They're 'Jeeps' to Public But 'Peeps' to Soldiers

Those fast-moving little reconnaissance cars that have won a place in Uncle Sam's fighting forces may be "jeeps" to the public, but they're "peeps" to the army.

And thereby hangs a tale, according to Delmar G. Roos, chief engineer at the auto plant, who created the "standard design" jeep for America's fighting men.

In the army, he explains, the name jeep applies to a larger vehicle of the scout car type; but because some of the first 1,500 smaller cars manufactured carried the model marking "G. W. P.," soldiers dropped the middle initial and contracted the name from "G. P." to jeep. And it's been a source of trouble ever since! In fact, there are several other military weapons known as jeeps—including a small airplane and an anti-aircraft detector device—and the confusion of terms became so great prior to U. S. entry into the war that an army officer in Tennessee put a ban on the term.

Our Freedom Is Priceless

By JOSEPH E. DAVIES
Former Ambassador to Russia and Belgium.

(Written for the Treasury Department in connection with the "SAY YES!" campaign to complete the nation's 100,000,000 partially filled War Stamp albums.)

What I myself saw in my four years in Europe gave me a new realization of the priceless rights which we here enjoy.

No secret police can in the night whisk us away, never again to be seen by those we love.

None of us can be deprived by any party, state or tyrant of those precious civil liberties which our laws and our courts guarantee.

None of us can be persecuted for practicing the faith which we found at our mother's knee.

None of us can be persecuted, tortured or killed because of the fact that an accident of fate might have made us of the same race as the Nazarene.

No American can be placed by any party or government in a regimented vise which takes from him or her either freedom of economic opportunity or political religious liberty.

What would the millions of unfortunate men, women and children in Europe give to be able to live and enjoy such a way of life?

Well, in this war, those are the things in our lives which are in jeopardy. Our boys are dying to preserve them for us.

Then we can do no less than to "say yes" and fill those war stamp albums. It is our duty and privilege to help the secretary of the treasury, Mr. Morgenthau, in his magnificent effort to do the tremendous job of getting the money to keep our boys supplied with the weapons with which to fight our fight.

Surely that is little enough for us to do on the home front.

U. S. Treasury Department

WILL BE HELD MONDAY

Three Directors And Treasurer To
Be Elected In Klemme

The annual Independent School
Election will be held Monday, Mar.
8th from 12:00 o'clock noon until
7:00 p. m. at the Klemme Com-
munity Hall.

Three directors are to be elected
as follows:

A director will be elcted for a
term of three years to succeed C.
G. Waterman, whose term expires
March, 1943; one director to suc-
ceed H. R. Gibbs whose term ex-
pires March 1943, and one director to
succeed E. F. Jacobs whose term
expires March, 1943.

A treasurer will be elected for a
term of two years to succeed F. A.
Arnold.

All of the above men are candi-
dates to succeed themselves. No
other candidates have filed.

E. F. Jacobs was appointed last
summer by the board to fill the un-
expired term of Dr. A. H. Dulmes
who resigned to enter the Army.

try's service.

CHANGE IN TIRE
QUOTAS ANNOUNCED

The quota of Grade 1 passenger
car tires for March has been prac-
tically doubled. The increase will
take care of accumulated applica-
tion, but will not be continued in
succeeding months. The quota of
truck tires for March was reduced
as compared with February but
the truck tire recapping quota was
increased.

Oat germination is spotty this
year and every farmer should
know whether the oats he is going
to seed will grow. Oats to make
satisfactory seed should germinate
85 percent, crops men at Iowa State
College, Ames, say.

Oats can best be tested for ger-
mination at home by putting a
counted number of kernels on
moistened sand and covering with
another lighter layer of sand. Keep
moist and at room temperature.
The test will be ready to read in a-
bout ten days.

It pays to treat all seed oats with
a fungicide before planting.

The Shamrock Times

SECTIONAL TOURNEY

Klemme will play Corwith in
Sectional Tournament at Belmond
on Wednesday evening of this week
at 7:10 o'clock.

REPORT CARDS

Report cards were given out on
Friday of last week. This was lat-
er than usual due to rationing of
Book Two. We would appreciate
having parents check over these
cards very carefully and signing
them so that they can be returned
as soon as possible. Reports show
the progress your boy or girl is
making in their school work. If
you do not think the reports are
satisfactory please come to the
school. The teachers will be glad
to talk over any problems. We must
cooperate in the education of our
young people. Both parents and
teachers must work together.

Humm, Humm!

A little bird told us that due to
reverses in major combat after
vainly struggling for six weeks, the
high school students have retreated
to a quiet front where they will
study for a few days until they
have gotten over the idea of re-
forming.

Attention. The Junior girls ask
Senior girls to please leave Junior
Romeos well enough alone. Pick
on someone your own size.

The war is bringing some drastic
change. "Kick Me" signs can't be
hung with Scotch tape any more
and nothing else is a convenient
Guess you Freshmen will have to
sacrifice that pleasure for the dura-
tion.

By Hum and Drum

SENIOR CLASS
NEWS
Anna Lee Brunes, Reporter

The past week was shortened as
the teachers worked on the ration
board, and classes were held only
in the morning. Each class was 20
minutes. There were very few ex-
tra-curricular activities during the
week because of the short class pe-
riods.

We had two short tests in Phys-
ics this past week over the differ-
ent kinds of cells.

The History class had a test on
Friday over our Financial System.

JUNIOR CLASS
NEWS
Larry Van Syoc, Reporter

We took up the Treasury De-
partment in American Government.
The Secretary of Treasury's main
duties are the collecting of revenue
and making out a budget for the
National Government.

Mr. Patterson made the Juniors
a very good proposition. Everyone
getting ninety percent or better in
their daily grades in American
Government, don't have to take a
six weeks test. It would be nice if
all the teachers would do this.

In Biology we are studying the
simple organisms which include
Hydra, Ameba, and Paramecium.

SOPHOMORE
NEWS
Patricia Kudje, Reporter

In Algebra we are studying cas-
es of problems. There are few dif-
ferent method of working a prob-
lem.

This week we finished two chap-
ters in Biology. Ferns and Fernlike
plants, and a glance at the simplest
organisms. Both were hard chap-
ters.

We are studying the different
marks of punctuation in English.
We learned how to use the dash,
colon, semicolon, apostrophe, quo-
tation marks, comma, and the peri-
od, correctly.

Since we had been having school
in the morning only the past week,
Mr. Gregory said our class period
was too short so we studied and
discussed Kings of England and
France, but did not study about
their reign a great deal.

FRESHMAN CLASS
NEWS
Elwyn Etchen, Reporter

In Algebra class we are having
our troubles on linear equations.
We have been studying them all
week. We don't make much pro-
gress.

We had a small test in English
Thursday. We hope for good re-
sults, for it was over parts of
speech.

We are covering our Science fast.

We must hurry if we expect to
finish it.

Some Manual Training boys sav-
ed strips for kites. For kite season
is just about here.

This week the Home Economics
girls haven't done any cooking be-
cause of the short classes. They
have studied Table Service and
Etiquette.

Judging by their laughs while
reading the book, "Behave Your-
self," it must be good.

Grade News

PRIMARY ROOM
NEWS
Virgie Hardcopf, Teacher

We did not have school any af-
ternoon last week because of regis-
tration for ration books. We all en-
joyed our vacation, but we tried to
work very hard while we were in
school.

Vernon Larson moved away this
week. Before he left he treated us
to frosticks. We shall miss Vernon
very much.

Honor Roll

Terry Koerner was neither ab-
sent nor tardy this past six weeks.

In the First Grade Dennis, Jan-
ice, Beverly, Roger, Gary, Robert,
Lois Ann and Daisy all received
perfect scores in spelling this week.

In the Second Grade Larry, Shar-
on, Neva Ann, and Billy received
perfect score in Spelling this week.

THIRD AND FOURTH
GRADE NEWS
Evelyn Guelff, Teacher

We received nice letters from
Peter and Nancy this week. We are
sorry to hear that Peter has the
mumps.

In Fourth Grade Geography we
have finished the Unit on Switzer-
land. We are studying about the
French in American History.

The Third Grade has finished the
Unit on "Foods from Plants and
Trees."

FIFTH AND SIXTH
GRADE NEWS
Esther Bolles, Teacher

This week has seemed rather
short since we have had classes
only in the morning.

Spelling Honor Roll

Luella P.	Marprie L.
Willis B.	Iris R.
Marvin S.	Robert B.
Dorance B.	Isabella G.
Mcrlin B.	Noima E.

In Fifth Grade Geography we
have begun to study the North
Central States, including Iowa.

In Sixth Grade English we have
been studying several parts of
speech.

SEVENTH AND EIGHTH
GRADE NEWS
Clara Smith, Teacher
Elizabeth Goll, Reporter

In History we have been cover-
ing The Industrial Revolution, in
the different parts of the United
States.

We have had no school in the af-
ternoons the past week and have
been having afternoon work every
other day.

The Eighth Grade has finished
the work on the poem "Snow
Bound," in Reading.

Both grades took their ninth self-
testing drill. Roger R. and Phyllis
got star ratings. The eighth grade
received a rating of nine, and the
Seventh grade received a rating of
six. This year the Eighth grade
lowest rating is seven, and the Sev-
enth highest is six.

Four persons of the Eighth grade
have a debate for Civics this week.

We are sorry to lose Phyllis
Christiance from our room. She is
moving to the country. Each of the
pupils brought a small sum of
money and the room presented her
with a farewell gift.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM
MACHINE

Timely Information Prepared By
Iowa State College Specialist

Although oil is not the great-
est item of expense in operating
a farm tractor it does amount to
a considerable sum. And because
engine wear, repair cost and op-
erating efficiency are closely re-
lated to the lubricant used, the
oil problem is more than one of
selecting the cheapest oil. There
is no positive pre-test for deter-
mining the quality of an oil.
The only true and final measure
of oil quality is its ability to
stand up and lubricate well in
the engine under actual condi-
tions.

Oil requirements vary with
different engines and with sea-
son and temperature changes.
Consequently, the same oil
should not be used the year a-
round, and it is not a good prac-
tice to use the same oil in an
engine that is worn and loose
as when the engine was new.
The new tractor or one recently
overhauled, is tight, clearances
are small and a light oil is re-
quired. As the engine becomes
loose and oil consumption in-
creases, it is advisable to use
heavier grades.

The most serious mistake
made by most tractor operators
is the use of too heavy an oil.
Heavy oils are especially damag-
ing to an engine in winter or
in cool weather operation. They
do not flow freely and will not
work into tight bearings or be-
tween small clearances. There
is a tendency for the pistons and
rings to rake off the thick, heavy
oil film, leaving little if any
oil between the piston and cyl-
inder surfaces.

The correct weight of oil for
each season of the year should
be determined from the instruc-
tion book recommended by the
manufacturer. It usually is a safe
practice to use an oil one grade
heavier than that specified, if
the engine is badly worn or is
loose.

Old oil should be drained out
and replaced after 60 hours of
running time under normal con-
ditions. However, if fuel is get-
ting past the rings and dilution
is high, more frequent draining
may be necessary. The purchase
of cheap oils from companies of
questionable reputation should
be avoided.

FARM-OYL is the oil we re-
commend and is guaranteed to
meet the engineering require-
ments established by the build-
ers of the famous Farm-All line
and costs no more than any other
high grade oil. We have a
generous stock on hand in all
grades for your convenience.

ASK ME ANOTHER?

A quiz with answers offering information on various subjects

The Questions

1. What job does Hideki Tojo hold in Japan?
2. What year contains the official birthday of the Dominion of Canada?
3. What is the meaning of "status quo ante"?
4. What vice president of the United States was a violinist and composer?
5. What is the name of a dock used for holding a ship for cleaning the bottom?
6. Who and on what occasion sent the message "Stars and Stripes nailed to the Pole"?
7. Two of our states were originally instituted as palatinates; which ones were they?
8. At what temperature will mercury freeze?
9. What is meant by 39 gauge stockings?
10. What is the difference between a postal card and a post card?

The Answers

1. Premier.
2. The year 1867 (July 1).
3. The state existing before.
4. Charles G. Dawes.

5. A graving dock.
6. Commodore Peary, September 5, 1909, on discovery of North Pole.
7. Maryland and South Carolina.
8. At 38 degrees below zero F.
9. Gauge means fineness of knit; 39 gauge is relatively coarse, 51 gauge is fine.
10. A postal card has a stamp printed on it, a post card (illustrated) has not.

Mixing of Cups Had Evil Effect on Lead Soprano

The final session of a musical competition was drawing to a close when the chairman noticed that the trophies had not arrived. Summoning his chauffeur, he gave him instructions to drive home and ask the butler to give him six cups off the sideboard. The cups were duly delivered, and the presentation proceeded. The conductor of the winning band was handed a beautiful trophy; another was presented to the winning tenor. When the leading soprano received her cup she glanced at the inscription and fell in a faint. The inscription read: "Open competition for the best pig in the show."

AROUND THE HOUSE

A varnished surface which has turned white from water or hot dishes may be restored by rubbing it lightly with a piece of flannel dampened with spirits of camphor or essence of peppermint, followed after a few minutes by an application of furniture polish. A drop or two of ammonia on a damp cloth may be used in place of camphor or peppermint.

Lemon juice, salt and strong sunlight are cures for stains on white materials.

A pinch of salt added to hot starch will give a high gloss.

If the string for tying packages for mailing is dampened before using, it will stay in place because it shrinks as it dries. Excelsior is excellent for packing glass or chinaware if it is dampened as it clings closer to articles.

Cool Flames

Flames vary tremendously in temperature, some producing little heat. For example, a flaming piece of cotton that has been soaked in a certain formula of carbon tetrachloride and carbon disulphide can be held in the bare hands without injury or pain.

LOST

Lost, a cough due to a cold—thanks to the soothing action of Smith Brothers Cough Drops. Smith Bros. Cough Drops contain a special blend of medicinal ingredients, blended with prescription care. And they still cost only 5¢ a box. Yes, a nickel checks that tickle.

SMITH BROS. COUGH DROPS

Washington, D. C.

ARMY VS. NAVY

The Selective Service system isn't advertising it, but there has been some fierce rowing behind the scenes over the induction standards of the army and navy.

Though the army has liberalized its physical and mental requirements to increase the number of draft eligibles and likewise keep the induction of married men at a minimum, the navy still clings to the higher standards in effect while it was taking only enlisted men.

Virtually all physical requirements are higher for the navy, but the biggest difference is in the mentality tests for the two services. Navy induction doctors won't pass a man unless he has a fair I.Q., whereas army doctors are required to approve lower standards.

Result is that thousands of inductees who express a preference for the navy are turned down and find themselves in an army uniform instead. The fact that the army has to take these navy "castoffs" is bitter medicine to war department highups; and Brig. Gen. Lewis B. Hershey, selective service director, made a strong protest about it behind closed doors recently to the War Manpower commission's management-labor policy committee.

The standards for both services should be uniform, Hershey declared, adding that if the navy's standards were brought down to conform with those of the army, it would help offset the need of inducting married men, especially those with children.

The navy has been turning down a large number of single men for physical or mental reasons, Hershey pointed out.

"How has the difference in standards affected the army?" the draft director was asked.

"It's affected us plenty," exploded Hershey. "The navy selects whom it wants and the army gets all the lower element."

The committee agreed with Hershey, promised to recommend to WMC Boss Paul McNutt that he endeavor to have the navy's standards lowered.

FRANK NAVY TALK

Vice Admiral Fred Horne, assistant chief of naval operations, has been holding some quiet blackboard talks with the house and senate naval affairs committees, and these talks have been a real step toward congressional-executive co-operation. Horne, by his frankness and willingness to admit navy mistakes, made a better impression than any other navy man appearing before congress.

Horne was high in his praise of our naval officers and men, but frankly admitted that the navy was caught off guard in the Savo Island battle of August 9, just after the marines landed at Guadalcanal. He said there was no excuse for this defeat; that a board of inquiry was now investigating; and there probably would be heavy penalties for the guilty.

Horne said that apparently the captains of the cruisers sunk had not ordered their men to battle stations. He also revealed that an Australian admiral that night was in command of the "screening force" of cruisers and destroyers supposed to be protecting the main task force.

Horne admitted that the Australian officer and Admiral Kelly Turner, chief of the Allied task force, knew a Jap scouting fleet was in the vicinity, but didn't figure it would risk an attack. The commanders calculated that the earliest possible time the Japs could reach Savo island was after daybreak next morning.

Therefore, the Australian admiral left his flagship, the Canberra, and spent the night on Admiral Turner's flagship 25 miles from the scene of battle. No orders were given meanwhile to Australian and American officers under Turner and the Australian, and they were caught completely off base when the Japs struck at about 1:50 a. m.

Japs Cornered in Aleutians. On the more optimistic side, Admiral Horne reported the United States had sunk a great many Jap cruisers, and that despite the defeat at Savo island we had been definitely superior in operational strategy.

In the Aleutians the Japs are so completely bottled up, Horne reported, that we probably could wipe them out at any time. Our submarine patrol has been especially effective in these waters, with the result that the Japs are desperately hard up for food, aviation gasoline and other supplies.

Horne also made no attempt to minimize the seriousness of the submarine menace.

CAPITAL CHAFF

Interesting question: Why is it that army air crashes during training and operations right here in the U. S. A. are military secrets? Could it be that some persons are trying to protect themselves from public indignation?

One of the roads running through the woods around Ft. Benning, Ga., is labelled "Burma Road," another "Chungking Approach." But most popular among soldiers is "The Road to Singapore," because at the end they hope to find Dorothy Lamour.

SPECIALLY BUILT FOR WAR-TIME DRIVING

THE SENSATIONAL NEW

Firestone

Perma-Life BATTERY

To meet today's slow-speed, low-mileage war-time driving conditions, Firestone introduces the new Perma-Life Battery.

Because of its special construction features, this new battery is packed so chock-full of power that with reasonable care it will retain its charge for several years. And should your Firestone Perma-Life Battery require recharging at any time within two years after you buy it, this service will be performed without cost to you.

If your battery is weak or worn or lacks starting power, don't take chances! Go to your nearby Firestone Dealer or Firestone Store today and have a new super-power Firestone Perma-Life Battery installed in your car.

2-YEAR Guarantee FREE RECHARGING IF NECESSARY

Should any Firestone Perma-Life Battery require recharging during the first 24 months after date of purchase, it will be recharged by the seller, without cost to the owner.

You May Be Eligible to Buy the New Firestone WAR TIRE

If your present tires wear smooth and cannot be recapped, you may be eligible to buy the new Firestone War Tire, built with exclusive Firestone construction features.

FIRESTONE METHOD OF RECAPPING IS Factory Controlled

If your present tires can be recapped, insist upon Firestone Factory Controlled Recapping with these advantages:

- Factory Trained Experts
- Exclusive Firestone Rubber Formula
- Application and Curing Controlled by Rigid Inspection

These features mean longer tire mileage and greater safety. Firestone Factory Controlled Recapping costs no more than ordinary recapping.

WE WILL GLADLY HELP YOU FILL OUT AN APPLICATION FOR A TIRE RATIONING CERTIFICATE

The factory provides us with 24-hour-a-day service on genuine repair parts for Green Colonial furnaces.

NEW FURNACES? If your present furnace is beyond use or repair you can still buy a new Green Colonial. Ask us about it.

Jacobs Hardware Phone 13 Klemme, Iowa GREEN COLONIAL FURNACE SERVICE

MORE RUBBER FOR RE-CAPPING

Owners of tires smaller than 750x20 will soon be able to get their casings recapped with reclaimed rubber "camelback" without applying to their rationing boards for certificates. This does not relax the need for continued observance of rubber conservation measures. The change was made to reduce the demand for replacement tires by encouraging recapping, which takes less than half as much reclaimed rubber as a new war tire.

MAY HAVE DIFFICULTY IN GETTING "PEST" AMMUNITION FOR FARMERS

E. F. Jacobs, local hardware dealer Tuesday received a letter from a distributor of "pest" ammunition stating that they could not furnish the ammunition which farmers had applied for, due to the fact that the forms used had been declared "obsolete."

About two hundred farmers had signed forms at the Jacobs Store in applying for ammunition with which to shoot pests.

Mr Jacobs is taking the matter up through his hardware association in an endeavor to get the ammunition required by the farmers.

Rev. and Mrs Grosshuesch visited there in the afternoon. The Christians family now reside on the former Chas. Medaus farm, which they purchased.

New Arrow and Noreast Neckware for Spring has just arrived at Gildner - Paulson, Garner, Ia. 1tc

METAL JAR LIDS WILL BE AVAILABLE FOR HOME CANNING

Manufacture of metal lids and rubber rings for home canning is now under the control of the War Production Board. This is the first time these articles have been included in the order to conserve critical materials.

The new provision need not limit home canning. One-fourth more top seal metal lids may be made in 1943 than were made between October, 1941, and September, 1942. The number of bands for sealing the lids has been reduced one-fifth since they may be used over and over and over again.

Production of bands for glass lids and small-size metal lids is unlimited, and there is no limit placed on the amount of wire that may be produced for wire-sealed glass lids. The amount of rubber available for jar rings will be determined by a separate order.

Gildner - Paulson, Garner, are still featuring All-Wool Suits for men and boys. 1tc

MORE PEOPLE ON MOVING LIST THIS WEEK

The Henry Morlan family are moving on the farm 5 1/2 east of Klemme vacated by the Wm. Neuberger family, who moved to the Walter Anderson farm which they purchased.

Henry Heitland and family who lived on the farm six miles east of Klemme near the school house, moved to a farm east of Hampton. A Mr. Delamy moved to the farm vacated by Heitland.

Warren Bier starts up farming on the Dr. Tice farm south of Klemme which was vacated by the Henry Boland family, who moved to the Tice farm nearer Klemme.

Mrs. Emma Medaus and daughter have moved to Grafton. Mrs. Medaus has rented her home to the Clifford Adair family, who are moving to Klemme from Ventura. Mr. Adair is employed as mechanic at the Northern Implement Store.

In the near future Mr. and Mrs. Otto Lemke will move to town to the house occupied by Mr. and Mrs. Clarence Lemke, while Clarence and his wife will take over the operation of the Lemke farm for this coming year.

Wm. Reuben and family, who side on a farm east of Klemme visited at the George Albers and shopped in Klemme Saturday afternoon. While in town renewed his subscription to Times for another year

Klemme Goes Over The Top In Red Cross War Relief Drive

KLEMMME'S QUOTA OF \$300 OVER-SUBSCRIBED FIVE SATURDAY

Contributions Promised To Swell Final Total

Klemme has again come through over the top in the Red Cross Relief drive with more funds pledged to swell the final total. Workers were organized by Mrs. George Lawhorn and Mr. Waterman, co-chairmen of the drive and a canvass was all swing Saturday when most of the funds were gathered. A canvass Monday revealed that the drive was successful and \$318.30 was contributed to the First National to credit of the Red Cross. More contributions are promised and there are some persons who have been missed in the canvass and these have the opportunity to contribute and their names will be printed. The amount they give will be printed and printed.

Shamrocks Nose Out Britt To Win Sectional Tournament

ENTER DISTRICT PLAY THIS WEEK AT MASON CITY

Will Meet Iowa Falls, Class A, In First Game At Mason City

The high-powered Klemme Shamrocks, coached by Pat Patterson, sailed through the sectional tournament at Belmond and came out of the battle with another championship and trophy and was one of the sixty-four survivors of the first round of tournaments to decide the state champion for 1943.

The Shamrocks bowled past Corwith, Goodell and Garner to meet the fast Britt Eagles in the final game. Britt earned the right to meet the Shamrocks by defeating Alexander, Meservey and Belmond. The championship game between Britt and Klemme was the thriller of the tournament. Both teams are evenly matched and it was a see-saw game from start to finish with everything in doubt until the final gun. The Shamrocks managed to nurse along a three point lead in the closing minutes of play to win the tournament 32 to 29.

Both teams played a clean, hard-fought game throughout.

Britt and Klemme are now even as far as games are concerned. The Eagles have defeated the Shamrocks twice, and the Shamrocks have defeated Britt twice, but the two defeats were costly to Britt. The first defeat cost them the Hancock County Championship, and the last defeat cost them a Sectional Championship, so the Shamrocks have the best end of the deal for the season.

BOX SCORE FINAL GAME

Klemme Shamrocks—32	fg	ft	pf	tp
B. Grosshuesch	1	3	1	5
E. Jacobs	4	3	2	11
L. Kaduce	3	2	2	8
L. Klotzbach	1	0	3	2
V. Greiman	3	0	1	6
	12	8	9	32

Britt Eagles—29

	fg	ft	pf	tp
V. Beaman	2	0	2	4
D. Hartzel	1	0	3	2
C. Peterson	5	3	2	13
D. Eiseaman	2	2	0	4
B. Trafford	2	0	4	8
L. Steinhoff	0	0	1	0
	12	5	12	29

Klemme made 8 free throws out of 13 tries. Britt made 5 free throws and missed 5. Each team scored 12 goals from the field. In the final analysis, the Shamrocks won the ball game on their higher percent-

age of free throws made.

FIRST ROUND

Garner 3, Rowan 217.
Klemme 51, Corwith 29.
Britt 37, Alexander 9.
Belmond 33, Kanawha 22.

SECOND ROUND

Garner 36, Dows 13.
Klemme 37, Goodell 13.
Britt 42, Meservey 15.
Belmond 26, Clarion 22.

SEMI-FINAL ROUND

Klemme 36, Garner 22.
Britt 24, Belmond 17.

FINAL ROUND

Klemme 32, Britt 29.

Shamrocks Begin District Play Thursday Night

The Klemme Shamrocks will begin District play at Mason City on Thursday evening of this week against Iowa Falls. The game begins at 7:30 o'clock.

The schedule at Mason City is as follows:

Bancroft vs Whittemore (Wed 7:30 p. m.); Charles City vs. Northwood (Wed 8:45 p. m.); Clear Lake vs. Mason City (Thurs 8:45 p. m.); Iowa Falls vs. Klemme (Thursday 7:30 p. m.)

The sixty-four sectional champs go to eight district meets at Ames, Atlantic, Cedar Rapids, Mason City, Ottumwa, Rockwell City, Sioux City and Waterloo. There are eight teams playing in each district, and the winner of each district goes to the state tournament where the remaining eight teams will battle for the state championship.

If the Shamrocks defeat Iowa Falls (which they are hoped to do) then they will meet Mason City on Friday evening, as Mason City will have no trouble putting Clear Lake out of the running.

Mason City is hoped to take the state championship this year, but the Shamrocks will give them all they have if they meet.

Bancroft, whom the Shamrocks defeated a few weeks ago, have a good chance of going to the finals at Mason City as they are in the upper bracket with Whittemore, Charles City and Northwood.

In the lower bracket are Clear Lake, Mason City, Iowa Falls and Klemme.

PAVEY WILL RE-OPEN HIS SHOP HERE IN APRIL

Wallace Pavey, who has been working at the ordinance plant at Ankeny for the past six months, will resign his position the first of April and will re-open his blacksmith and repair shop here the first week in April.

Reformed Church Scene Of Wedding Ceremony

SON OF MR. AND MRS. LOUIS PERKINS MARRIED SUNDAY TO TERRILL, IOWA, GIRL

The Lutheran Church at Terrill, Iowa, was the scene of a wedding ceremony Sunday, March 7, 1943 at 3:00 o'clock when Miss Margery Keel, daughter of Mr. and Mrs. William Keel of Terrill became the bride of Vic Perkins, son of Mr. and Mrs. Louis Perkins of Klemme, Iowa.

The young couple were attended at the altar by Miss Darlene Perkins, sister of the groom, as bridesmaid, and Clifford Keel, brother of the bride, acted as best man.

Immediately following the ceremony at the church a reception was held at the home of Mr. and Mrs. William Keel where thirty guests were entertained. Those from a distance who attended the wedding and reception included Mr. and Mrs. Bert Hinton, of Fort Dodge, grandparents of the groom; Mr. and Mrs. Lee Stuart of Webster City; Miss Olive Hinton of Chicago and Mr. and Mrs. Louis Perkins of Klemme.

The bride attended and graduated from the Terrill school and the groom is a graduate of the Estherville schools. The couple will reside at Estherville where Mr. Perkins is employed in the Iowa Trust & Savings Bank.

HANCOCK 4-H MEMBERS URGED TO GIVE TO AMBULANCE FUND

The members of the Hancock County 4-H Clubs are urged by Paul Henderson, County Extension Director and Miss Hazel Grimes, County Home Economist, to give one nickel per member to their 4-H leader who will in turn send the donation to the County Extension office. The total county contribution will be sent to the State 4-H Club Office, to be added to the State 4-H contribution toward paying for the ambulance that has already been presented to the Army by one and one-half million 4-H members.

MISS RUBY WILLE IS BRIDE OF CPL. EDMOND BLANCHET IN CEREMONY MARCH 3

A quiet wedding took place at 1:00 o'clock Wednesday afternoon, March 3d, 1943 at the Immanuel Reformed Church of Klemme, Iowa when Miss Ruby Wille, daughter of Mr. and Mrs. Cornelius J. Wille of Klemme, was united in marriage to Corporal Edmond J. Blanchet, son of Mr. and Mrs. E. C. Blanchet of Ventura. Rev. Calvin Grosshuesch performed the wedding rites.

The bride wore a light blue suit with accessories to match and wore a corsage of white carnations with pink roses.

Miss Adala Wille, sister of the bride and her bridesmaid wore a light blue street length dress and a corsage of pink carnations with yellow roses.

The groom appeared in his army uniform. Mr. Aaron Wille, brother of the bride, was best man. He wore a blue tweed suit with white carnation boutonier.

Mrs. Blanchet was born here and attended the Klemme Schools and is a graduate of that institution. She was active in 4-H Club work and is well known all over the county in 4-H circles.

Mr. Blanchet has been in this community for several years, being employed on farms near Klemme.

The young couple left Thursday evening for Camp Hulen, Texas, where Cpl. Blanchet is stationed. Mrs. Blanchet will remain in Texas for the time being to be near her husband.

KLEMMME WATER O. K'D BY THE STATE OF IOWA

Samples of Klemme city water sent to the State Dept. of Health some weeks ago were analyzed and found to be very satisfactory.

The Town of Klemme was also given an O. K. on the sewer system.

Dairy cows should be fed grain at the rate of about 2½ pounds of grain to each gallon of milk produced.

INCREASED ACTIVITY IN ROUGH FISH REMOVAL

Scene Crew Foreman Weighs Tough Fish At Site of Operations

Reflecting the increased activity in the rough fish removal program is the 40,588 pounds of carp and buffalo added to the national food supply by conservation seining crews during the week ending February 13. Recently the Fisheries Coordinator of the United States Fish and Wildlife Service requested the State Conservation Commission to bend every effort to increase both the production and utilization of rough fish for food locally. During 1942 Conservation Commission seine crews removed over two million pounds of rough fish. This year it is anticipated that the total poundage will be much greater. Prior to beginning seining operations, local newspapers are informed the dates and locations of seine crew operations. Residents in the territory may purchase rough fish in large or small quantities at the site of operations.

Many Deductions Allowed by Treasury On Income Tax; Every Worker Can Claim Credits Under the New Levy

By ALFRED SINGLER
Released by Western Newspaper Union.

Although wartime necessity demands that Uncle Sam collect the highest income taxes in history, there is nothing unpatriotic in taking advantage of legitimate ways to lower your payments, as provided by law.

Tax laws are carefully written instruments. In writing them, congress included a list of deductions which taxpayers may claim. These deductions were included for excellent reasons and with the expectation that all taxpayers who could honestly claim them would do so.

The big taxpayer usually finds it advantageous to hire an expert who is familiar with each permissible deduction. The smaller taxpayer is not so likely to secure outside assistance. The latter would do well to determine for himself the deductions he can make legitimately.

For the person who makes not more than \$2,000 of taxable income—which means a single man earning not more than \$2,500, or a married man or head of a family earning not more than \$3,200—every \$100 of deductions claimed will mean an \$18.40 reduction in income taxes paid. Where larger incomes are involved, savings are proportionately greater.

The following are important deductions which will aid the average taxpayer.

You Can Deduct

License Fees, Business Expenses,
Contributions, Interest, Taxes.

All contributions, for public purposes, made to the United States, any state, city or town, are deductible, as are contributions to a domestic nonprofit organization operated exclusively for religious, charitable, literary, educational or scientific purposes or for prevention of cruelty to children and animals. Church contributions include pew rent, assessments, etc. Organizations such as USO, Army and Navy Relief, Red Cross, community chests, etc., come under the charitable heading. Literary and educational organizations include such institutions as nonprofit colleges and schools, the Boy Scouts, voters leagues, and study groups. The scientific heading includes all nonpartisan scientific societies.

It is not permissible to deduct contributions made to a bar association, a medical association, a prohibition association, political campaign committees, volunteer fire companies, social fraternities, athletic clubs or gifts to needy friends or relatives.

Generally speaking the taxpayer may deduct any interest paid on borrowings, including business, personal and family debts. Because interest paid on behalf of a relative or friend is not a legal obligation on the taxpayer, such interest is not deductible.

As a broad general rule, the individual can deduct all taxes he personally pays to the tax collector, except federal income, estate and gift taxes and state and local benefit, inheritance, estate, legacy or gift taxes.

Federal taxes which are deductible include those on admissions, dues, telephone, telegraph, transportation, auto use, safety deposit boxes, etc.

Admission taxes collected at theaters and other places of amusement during 1942 amounted to 10

per cent. A 50 cent theater ticket, which cost the customer 55 cents, represents a 5 cent deduction.

Automobile owners are entitled to deduct state and local license fees, the federal use stamps (which cost \$7.09 in 1942), driver's license fee and state gasoline tax. Automobile owners may not deduct the federal gasoline tax because it is constituted as a tax on the manufacturer and not on the consumer, even though it was passed along to him.

It is the general rule that the taxpayer gets credit only for those taxes levied directly upon him. For that reason state and federal taxes on cigarettes and liquor are not deductible. They are stamp taxes levied on the manufacturer or dealer.

The transportation taxes paid on railroad, airline and other personal transportation last year is deductible. The rate was 5 per cent of the fare for the first 10 months; 10 per cent for the last two months. The tax on transportation of goods, amounting to 3 per cent on all freight and express bills, is deductible.

Taxes imposed by the federal government on jewelry, furs and toilet goods are not deductible. They are excise taxes levied on the maker or dealer and are not collection taxes levied on the taxpayer.

Also deductible are traveling expenses required by one's employer when such expenses are not reimbursed by anything over salary, wages or commissions.

When your car is used partly for business and partly for private purposes, deduction is allowed only for the portion used for business, and then only when the driver is not reimbursed. The loss on the sale of a car, used partly for business and partly for private purposes, is divided similarly, but only when actually sold and not when used as a trade-in.

In addition to deducting the three-cent state tax on all gasoline used in your car, you can also deduct the cost of the gasoline and other supplies for business use of the machine.

Due to labor unions, assessments by unions for out of work benefits, but not for sick, accident or death benefits, cost of indemnity of fidelity bonds required by your employment, and cost of tools and patterns necessitated by the type of work, are deductible, but only if their life is less than one year. If their life is longer than one year the owner can discount depreciation only.

No deduction is permitted for medical and dental expenses, including accident and health insurance pre-

miums, unless they exceed 5 per cent of your income. Any expense over 5 per cent of income, and up to a maximum of \$1,250 for a single person or \$2,500 for a family, may be deducted. This includes hospital bills, treatment, diagnosis and everything connected with medical and dental care.

Farmer Deductions

Wages, Seed, Repairs, Tools,
Fertilizers, Depreciation.

In general, a farmer who operates a farm for profit is entitled to deduct from gross income as necessary expenses all amounts actually expended in carrying on the business of farming. The wages paid for hired labor are deductible. The value of products furnished by the farm and used in the board of hired labor is not a deductible expense, but food purchased and furnished to hired hands is deductible.

Farmers may deduct the cost of grain and hay, amounts paid for grinding and processing feed, amount paid for hire of machinery, cost of farm supplies, gasoline for farming, repairs and upkeep of cars.

Amounts expended for repairs and maintenance of farm buildings, (except the dwelling), fences, drains and other farm improvements, and for repairs and maintenance of farm machinery and equipment are deductible. Amounts expended for replacement of, or additions to, farm machinery, farm buildings, or other farm equipment of a permanent nature are not deductible as such expenditures are regarded as investment of capital which is returned to the owner through depreciation allowances during the useful life of the property.

The cost of small tools of short life may be deducted. The cost of commercial fertilizers and lime, the benefit of which is of short duration, is deductible as an expense. The amount expended in the restoration of soil fertility preparatory to actual production of crops and the cost of liming soil to increase productivity over a period of years are capital expenditures, and thus are not deductible.

Fees paid for advertising farm products; expenditures for stamps, stationery, account books and other office supplies purchased for farm use; expenditures for travel in connection with the farm business and other similar miscellaneous expenditures are deductible.

An allowance for depreciation of buildings, improvements, machinery, or other farm equipment of a permanent nature is deductible. The amount claimed on account of depreciation should not exceed the original cost of the property.

Repairs on depreciation on the dwelling occupied by the farmer or on his personal or household equipment are not deductible. It is not permissible to claim as a separate item depreciation on livestock or any other property included in the farmer's inventory, as such depreciation is taken care of in the reduced amount of the inventory at the close of the year. However, depreciation may be claimed on livestock acquired for work, breeding or dairy purposes which are not included in the inventory of livestock purchased or raised for sale.

Washington, D. C. THE AGRICULTURE DEPARTMENT

In the last few days the President himself has silenced administration critics of Claude Wickard, and decreed that he remain as secretary of agriculture.

The President's stand came at the height of an increasing storm brewing round the amiable Indiana corn farmer, whom everyone likes but whose all-important food program is lagging.

White House advisers have told the President that Wickard's program was inadequate, that it must be drastically revised, that there would be shocking deficiencies of food. Some have urged that Wickard be replaced.

The President, however, has defended his secretary of agriculture. But also he has appointed White House Secretary Lauchlin Currie—whose regular field is Chinese relations—to act as umpire on the farm program. Currie has given Wickard a nine-point program for revamping American agriculture and among other things has pointed out that England increased her food production 50 per cent with little additional manpower. Why, he asks, cannot the United States do the same?

AGRICULTURE'S PROGRAM

Here are Currie's proposals, advanced with the blessing of the White House:

1. The goals of agricultural production should be higher.
2. A new production program, possibly with a new budget, should be presented to congress.
3. All acreage allotments and other restrictions on production should be removed to encourage the more efficient farmers.
4. The 1,000,000 farm operators of second rate efficiency should be brought into full production with the aid of seed, fertilizer, livestock, machinery and even land.
5. Cotton and tobacco acreage should be reduced, corn acreage, allotments removed entirely, and more wheat should be fed to livestock.
6. Profiting by British example, a new "land army" should be organized, to use town and city dwellers, especially women, for farm work.
7. Truck farmers who produce such luxuries as iceberg lettuce should be converted to more essential crops.
8. Facilities for processing and drying foods should be increased.
9. Local direction of the farm program should be shifted away from Farm-bureau-minded agents, toward agents more responsive to federal direction.

WICKARD'S FARM PROGRAM

Wickard's response to this sweeping proposal was to accept part of it, reject part.

He believes the production goals are already high enough that it's too late to present a new program for 1943, that cotton goals have already been substantially lowered, and tobacco reduction would require change of the law.

He agrees to removal of acreage restrictions on most crops, but not on cotton and wheat, which still yield embarrassing surpluses.

Claude is a little touchy on the question of county agents and committeemen, insisting that federal representation is adequate.

FULL PRODUCTION

On other points, however, he agrees with the White House proposals, declaring some already are in effect. He wants to bring the 1,000,000 less efficient farmers into full production, to increase dehydration of foods, convert truck farmers from iceberg lettuce, etc., and organize a new land army from towns and cities. In fact, he already has a plan well advanced for the "land army."

Wickard, who had hardly been heard of before his elevation to Wallace's place in the cabinet, has had clear sailing for two years, thanks in part to good weather.

Now, however, he is facing just as tough a job in trying to produce more, as Wallace faced ten years ago in trying to produce less. No secretary of agriculture ever faced more opposite and more difficult problems. The average person realizes the problems confronting the secretary of agriculture. They are exceedingly complex.

Wickard knows his position is shaky. But he is on his mettle, fighting to meet the established production goals.

CAPITAL CHAFF

Mr. Munro Leaf, who wrote Ferdinand the Bull, hailed as a children's classic on pacifism, has now got himself a captain's commission in the army, and is more belligerent than any West Pointer. He even believes that it is sacrilegious to criticize anyone in the army, or anything the army does—especially the services of supply, to which he is detailed.

When Postmaster General Frank Walker was shown a recent news photo of himself, he said, "Is that Herbert Hoover or me?"

New York Heartbeat:

The Wireless: Eric Severeid, analyzing the news the other midnight, got pretty bold. He mentioned that the British were more outspoken than we are—more articulate. He doubted that the articulate Britons would stay mum if they found as much Fascism creeping into its official places as goes on over here. . . . Wm. Shirer also got tough—wanted to know how come that Edgar Mowrer, one of our best Fascist-haters, couldn't get a passport to North Africa.

The Magic Lanterns: "The Siege of Leningrad" is a testimonial to the heroism and courage of the Russians—and, better yet, plenty of proof that the Nazis blundered when they tackled the Soviets. Any nation that takes it like that can't be licked with armies. The facts of how the Nazis failed to take the town even with hunger, disease and suffering on their side are familiar. But the facts don't rob this documentary film of its mighty wallop. . . . The Rooney kid shows up in another Andy Hardy installment, called "Andy Hardy's Double Life." It's a sprightly enough account of Andy and his lady friends, cornered on an Iowa farm, but what of it? . . . The West Coast-ers are laying bets that "Stand By for Action" will ring all the best bells. It's a Navy tale. . . . "Forever and a Day," which has everybody in the world in the cast, is another supposed to be heading for hurrahs.

The Magazines: Clifton Fadiman has found a swell title for the war. He has monickered it Germany's First War Against Mankind. It would look good on the memos of the peace arrangers. . . . The New Republic's paragrapher figures it out that Hitler isn't really dead—but only wishes he were. . . . Just how tough a job Elmer Davis undertook when he headed the OWI is described in Harper's by Michael Darrock and Joseph P. Dorn. He has succeeded admirably, they write, in providing what the agency was established for: information. The ironical part of it is, the authors, both employed in Washington, chose to by-line the piece with pseudonyms. . . . You have to like C. B. DeMille for his shrug-off of the critics' opinions of his super-colossals. John Durant quotes DeMille in the SEP: "Every time I make a picture, the critics' estimation of the public drops another ten degrees." . . . Collier's K. Crichton has a good tongue-in-the-cheek version of H'wood's headaches under rationing. "Apparently movietown is worried that it might have to live normal, ordinary lives." . . . Recommended: Jimmy Young's: "Japan's Fatal Weakness." In American Legion mag. . . . Howard Brubaker in The New Yorker: "It is reported that 'Putzi' Hanfstaengl, once Hitler's personal piano player, is giving our State Department helpful hints. Mr. Hull would naturally want to know what kind of music Adolf cannot face."

Memos of a First-Nighter:

John Barrymore was one of the few actors who had a mind just as alert as those of his severest critics. . . . Some of his admirers enjoy recalling the time a famed actress, sitting down front, annoyed him throughout his performance. . . . Her audible remarks to her companion distracted the audience's complete attention, when she wasn't demonstrating some point by waving her arms. . . . Barrymore waited until the play ended to punish her. . . . In a brief curtain talk he mentioned that a famed actress had honored him by attending the play. . . . "Please stand up," he cooed, "and take a bow." . . . Which she did. . . . Then he bowed to her and sang: "I want to thank you for co-starring with me this evening."

This one has been pinned on many plump persons, but when Alexander Woolcott was tipping the scales in the 300s he liked telling it on himself. . . . Two actors, who had suffered from Woolcott pannings, saw him bathing in the Atlantic City surf. . . . "Let's go swimming," said one. "How can we?" asked the other. "Woolcott's using the ocean."

Mark Twain was once guest of honor at an opera box-party given by a dowager. . . . She was talkative throughout the performance, much to Twain's irritation. . . . When the opera was almost over she gushed: "I so want you to be with us Friday, Mr. Twain. I'm certain you will like it. The opera will be a great favorite of mine, 'Tosca!'"

Twain coldly replied: "I never heard you in THAT!"

Quotation Marks-manship: Ed Morrow: Rationing means that everyone has bread before anyone has cake. . . . O. Henry: Their angry eyes met, each containing an invisible clenched fist. . . . Punch: For three-quarters of an hour he lay awake all night. . . . Heywood Brown: Trouble had scribbled its autograph all over her face. . . . H. Klurfeld: Oh, for the good old days when the only ism we had to worry about was rheumatism. . . . Wm. O'Dell: He felt as deserted as a cigarette butt.

This Portable Stand Handy for Mending

HERE the lid of a record phonograph cabinet is turned upside down and screwed into a wooden box to make a portable container for your mending. The time required for mending is usually taken up in getting everything together at a convenient time. This portable is equipped and ready to be placed beside your easy chair in a

with everything handy to mending for victory a pleasant task.

If you can't find a pair of metal drawer handles there are many designs at the dime store made of composition and wood. The lid may be painted or stained as desired and the box will be masked by the full skirt tacked under the part of the lid edge. You wish to line the upper part cut pieces of cardboard to fit sides and bottom. Cover with chintz; add a strip of binding ribbon to the side section catching it down to make hold for equipment; then glue the sections in place.

NOTE: If you missed the article illustrated how the body of the graph cabinet was used, it is contained in BOOK 9, together with thirty-one conservation plans. Copy of BOOK 9 is sent to you for 15 cents in cash.

Trotsky Was Not Prince

Leon Trotsky was not a Russian prince who changed his name, has been reported time and again. He was a Russian Jew who came from the middle-class. He had university education, and changed his real name—Bronstein—to Trotsky because it was L. D. Trotsky that he fled to England with a forged passport at the beginning of this century.

How To Relieve Bronchitis

Oreomulsion relieves promptly because it goes right to the seat of the trouble to help loosen and expel the phlegm, and aid nature to soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell you a bottle of Oreomulsion with the understanding you must like the way it quickly allays the cough or you will have your money back.

CREOMULSION
for Coughs, Chest Colds, Bronchitis

Well-Gloved
Fad of glove-wearing reached incredible heights during the reign of James I of England. As many as three pairs, all richly ornamented, were worn at one time.

Here's One Gang That Can Come Along!

As burdensome as the income tax may first appear, it allows for many deductions. Mr. Taxpayer pictured above is seen with a host of exemptions, including state gasoline tax, state sales tax, license fees, amusement tax, communications tax, charitable and religious contributions, etc. For every \$100 the taxpayer can legitimately deduct, he saves \$18.40 in taxes.

Record Income Reported for Nation in '42

How much money did everybody make in the United States in 1942? With the factories of the nation being thrown into high gear and the farmers producing record crops, national income jumped to almost 114 billion, the department of commerce reports. This was approximately a 20 per cent increase over 1941.

The department of agriculture figures that farm income reached 16 billion in 1942. That would represent an intake of \$2,800 for every one of the 6 million farmers.

A total of 79 billion dollars was paid out in wages and salaries. At the end of 1942, it was estimated that 58 million people were gainfully employed.

300 Kin Serve

Auxiliary Olivia Eubanks of the Second WAAC training center has 300 relatives in service but she is the only WAAC. There are enough members of her family, counting in-laws and third cousins, to make two companies.

Chief among those in service from Auxiliary Eubanks' viewpoint is her husband, Technical Sgt. Sidney J. Eubanks, who is overseas in the signal corps.

Ink Spots
And Spatters

By Jergie

EDITOR VICTIM OF A
NEW RACKET

Yep, this Scribe was "taken in"
and fell for a new racket!

But we also chuckle as a few
other business men along the Main
Drag also fell for the gag.

Here's how the thing works. A
very ordinary sort of man, posing
as a hobo or tramp, drops in and
asks if we might have an old pair
of shoes. We ask him "How
come he needs another pair?" He
explains he left them at a filling
station over at Garner and some-
one stole them. So we dig up an-
other pair, and feeling sorry for the
poor fellow we even dug up two
pairs, and he thanks us from the
bottom of his heart and tells us
what a swell fellow we are and
walks out the door and down the
street.

A few days pass. The man ap-
pears on the scene again and asks
if we might have another pair of
old shoes. We ask him "How
come he needs another pair?" He
explains he left them at a filling
station over at Garner and some-
one stole them. So we dig up an-
other pair, and feeling sorry for the
poor fellow we even dug up two
pairs, and he thanks us from the
bottom of his heart and tells us
what a swell fellow we are and
walks out the door and down the
street.

We have since learned that the
whole thing is a racket. The man
who poses as a tramp is really a
shoe repair man from not too dis-
tant a city. He gets the old shoes

for nothing; puts on new soles and
heels, dyes the leather and makes
them look like a million bucks.
He finds a ready market for "our
rebuilt" shoes because of the ration-
ing now in effect.

Anyway, it gave us something to
write about!

FIRST AIDERS TRY OUT THERMOMETER

The Advanced Class in Red Cross
First Aid had finished their course
and Tuesday night had a party for
their instructor, Wayne Pavay.

Later in the evening after lunch
had been served, Mr. Pavay was
presented with a First Aid Kit and
a fever thermometer, a gift from
the class.

A couple of the smart boys in
the class, John Micklick and Har-
vey Barz of course had to try out
the thermometer. First one would
stick it in his mouth, and then the
other. Something was wrong. It
registered both temperatures be-
low normal. They concluded the
thermometer was either wrong, or
their temperatures had dropped be-
cause of eating ice cream.

However, next morning, Pavay
examined the thermometer. There
was nothing wrong with it, Harvey
and John had merely used it in the
wrong manner. On the side of the
instrument was stamped: "Rectal
Thermometer."

What You Buy With WAR BONDS

The Women's Auxiliary Volunteer
Emergency Service, more fami-
liar known as the WAVES, has been
established as a part of our Navy.
They are doing a great work and
relieving many men from office to
active service.

Cost of a WAVE uniform, exclu-
sive of accessories, is approxima-
tely \$137.35. This includes suit, skirt,
hat, overcoat, raincoat and service
bag. Your purchase of War Bonds
helps pay for the uniforms for these
patriotic women. Buy War Bonds
every payday with at least ten per-
cent of your income.

Hancock County Board Proceedings

7TH ADJOURNED JANUARY MEETING

Garner, Iowa, March 3, 1943
The Hancock County, Iowa, Board of
Supervisors met in session on above date
with Frank J. Schoun, Penn Eckels and
John Chambers present.

The minutes of the last meeting were
read and approved as read.
On motion and second the bond of Nor-
man Hanson, Township Clerk, is approved.
Supervisor Schoun is appointed a com-
mittee to investigate and cause repairs to
be made in D. D. No. 1 and 2, Lat. No. 1A.

On motion and second the Boiler Policy
No. W. U. 19014 and the Fire Policy No.
O. C. 529 are approved.
This being the 3rd day of March, 1943,
a date heretofore set for a letting on the
printing of the 1942 Financial Report of
Hancock County, Iowa, the hour for said
letting having arrived, the Chairman of
the Board proceeded to open all bids on
file and did find the bid of the Garner
Leader & Signal to be the lowest and best
bid therefor.

BE IT FURTHER RESOLVED by the
Board of Supervisors of Hancock County,
Iowa, that the bid of the Garner Leader &
Signal be accepted and they be awarded
a contract to print the 1942 Financial Re-
port of Hancock County, Iowa. All other
bids are hereby rejected.

On motion and second Dr. C. V. Ham-
ilton is hereby appointed to furnish medicine
and medical care for the Hancock County
Home for a period of one year from and
after the 1st day of April, 1943. His fees
as such to be \$3.00.

BE IT RESOLVED that the claims here-
inafter set out be allowed in amounts de-
signated thereon, and the County Auditor
be and he is hereby directed to draw war-
rants on the several funds of Hancock
County, Iowa, in payment of such claims
in amounts set opposite each claim.

2 BUILDING PROBLEMS
Come in and talk
them over!

SELF-CLEANING
NESTS No. 1401

WASH FEEDER FOR
POULTRY No. 1402

ALCO BROODER HOUSE No.
1403

WATER STAND FOR
POULTRY No. 1404

ALFALFA FEED BACK FOR HOGS
No. 1405

Nearly every farmer today has
important building problems.
First is to get the small buildings
equipment to carry out 1943 pro-
tection; the second is planning for
improvements that will be built in
future. . . We believe we can help
with both these problems.

While some materials are al-
most impossible to obtain, this isn't
of all items. Even though we may
have the exact materials you want,
can probably figure out some way
which you can get the small build-
ing the repair and maintenance, or
lumber-built farm equipment as
fers for poultry, hogs, cattle, or
troughs and other items.

Your second job is planning to
for the structures you're thinking
building in the future. Careful
planning now can assure better build-
ing suited to your needs and bud-
get.

In planning tomorrow's building
you'll find the designs of our 4-Sq.
Farm Building Service very help-
ful. These designs cover a wide
of farm buildings and equipment
developed after careful field study
every one farm-tested. When you
amine the working drawings, you
see how advanced construction
edge gives you better buildings
out increasing cost.

The Shamrock Times

HMM! HMM!
The Junior Class has a tongue-twister menace in English Literature, Allan Lau read "John Milton died with the goat in 1694" The word was supposed to be "gout!" Oh well, everyone to his own taste. What would school be without Sophomores? (Quieter, maybe.) Their latest is truly original shoe decoration with chalk. Prize winner is A Donald Schaefer who's right shoe claims a yellow tongue, pink heel, egg-shell blue front with a yellow toe!
The following is contributed by a Senior They aren't so perfect after all
"Now I lay me down to sleep. The topics long, the subject's deep. If Micklick stops before I wake, Give me a poke for goodness' sake!"
—Hum and Drum.

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter
The Algebra Class had a test on Thursday on linear equations. We have finally finished that chapter. It was a very difficult chapter. We had a test Friday in English Class and we hope for best results. Most of us thought it was easy.
"Whew!" Also a test in Science. We are literally burdened down in Science. We are hurrying. Some of the pupils brought parts of radio to school for we are now studying a chapter on communication.
The Manual Training boys are making hog waterers, chicken feeders and other items. Anybody want a house, barn or garage built, call the school house and we'll call out the gang.

SOPHOMORE NEWS

Patricia Kudje, Reporter
Our news reports have been getting longer and more interesting in World History class. We keep up with the news that we otherwise wouldn't have time for.
We finished our chapter and are reviewing it.
We are also reviewing in Biology. We are studying the ten necessary factors of life and what certain animals do about them.
In English II we are reading out of other books. After reading the stories we discuss them. Miss Edahl is having a quiet period for five minutes and she reads different things.

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter
The American Government class took up the war, navy, justice, post office, interior, agriculture, commerce, and labor departments of our government Thursday. Mr. Patterson gave a test. By the looks of the grades very few have been studying.
In Biology we are studying Bacteria. Bacteria is both helpful and harmful in many ways. We would probably enjoy this part of Biology a little better if we could pronounce a few of the words. Tuesday we had a two page test over Bacteria.
In Geometry we are working on the number of degrees that are in angles and arcs of circles. These problems are both very interesting and helpful.
The Typing Class is improving, as almost everyone gets from twenty to forty words a minute in speed test. We are still typing letters and also learning to type other things.
This week in English Literature we have been reading letters written by Chesterfield and Johnson. We also have read and made questions over "The Life of Samuel Johnson," and "The Return of Sentiment in Poetry."

SENIOR CLASS NEWS

Anna Lee Brunes, Reporter
Two experiments were the object of interest to the Physics Class this week. They were over Static Electricity and Voltaic Cell.
We find that an electrical current can be made by placing a zinc plate and a copper plate into a mixture of water and Sulphuric acid and by hooking these plates by means of wire to a galvanometer.
The English Literature Class has been studying essays.
In U. S. History we are studying transportation and communication.

We had a short test for review. Junior Girls attention! What Romeoos?

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher
Irene Menage, Reporter

The Eighth Grade took their 10th Self Testing Drill

Honor Roll

Those who earned 100% in Spelling are:
Irene Menage Helen Suckow
Shirley Stille Velma Tiggerman
Ruth Smith Helen Pringnitz
Edward Grosshuesch Peggy Coobs
Elizabeth Goll Marcille Josten
Lois Ann Lau Mary Lou Netland
Betty Lacey Darwin Wille
Dean Jacobs Roger Bock
Roger Ridder

In History we finished the chapter "Big Business Government Regulation"
In Civics we finished the chapter "Laying up Wealth"

We are having our Literary Club meeting again. We had dropped it because of short periods.
We are having short tests in History and Civics today.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

In Art Class this week, we made plaques and figures from clay and painted them with different colors. Many of them were patriotic.
We started reading, "Lasse Come Home" for our Literature period.

Spelling Honor Roll

Luella Isabelle
Merlin Larry
De Vera Iris
Dorance Norma
Marvin Marjorie
Willis Robert

THIRD AND FOURTH GRADE NEWS

Evelyn Gueff, Teacher

Mrs. Barz visited in our room Wednesday morning. She brought some pretty hand-painted dishes for us to see because we were studying about chinaware.
In Third Grade, we are learning to divide. We think it is fun.
Every one in the 4th grade gave a report on some topic about the life of the Dutch people.
For Art we are drawing pictures of Dutch children.

Honor Roll

The following received perfect scores in Spelling this week:
La Nelle Harley
Audra Jo Ann
Sondra Norene
Dolores Darlene
Vaxine Iris
Maralee Lucille
Delores T.
Maxine, Janice, Iris, Delores T.
Sondra, Jo Ann, La Nelle, Delores K., Ruth, and Beverly received perfect scores last week.

There are three members in the Spelling Club this week.

PRIMARY ROOM NEWS

Virgie Hardcopf, Teacher

The Second Grade are reading in new books. The name of them is "Our Friends and Neighbors." The First Grade have new books too. The name of the book is "Round About."

In Art Class we made kite pictures and put them on the bulletin board.

The Second Grade dramatized several stories this week. They were Red Riding Hood, The Three Bears, The Three Billy Goats, Gouff, and The Wee Woman.

We bought \$6.40 worth of War Stamps this week.

Honor Roll

The following First Graders earned 100% in spelling:
Tommy Janice
Ronald Lois Ann
Gary Denny
The following Second Graders earned 100%:
Billy Miriam
Neva Ann Larry

RURAL SCHOOLS VOTE FOR UNIFORM TEXT BOOKS

In the special election held in the rural school districts Monday, the vote in favor of Uniformity of Text Books was 231 votes for and only 14 against the proposition.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE

Timely Information Prepared By Iowa State College Specialist

Whether this year's corn yield will compare favorably with last year's record production will depend partially upon the condition in which planters are put this winter. Accurate planting is important. If hills are crowded, barren stalks and small ears will result. If hills are missed—or if less seed is dropped than desired—time, labor and power are wasted and yields are reduced.

The first step in repairing a planter is to check the spools and rocker shaft wire forks to see if they are badly worn. Spools that are too badly worn usually must be replaced. Badly worn rocker forks which cause the wire to catch and break usually can be improved by reversing the forks. The spools can be built up by welding and grinding down to shape if new parts cannot be obtained.

Clutch parts, including the driver, stop arm and dog and dog springs also may be badly worn or their action sluggish because of hardened dirt and old grease. Thorough cleaning and tightening will improve performance. Badly-worn parts should be replaced if possible.

The runners, or shoes, should be checked next to see how much they are worn on the lower edge. Badly-worn runners frequently cause the planter to clog with the result that hills are scattered or "strung out." Such shoes may be reconditioned by having the lower edge drawn out or a piece welded on.

Valve action must be positive and snappy. It may be sluggish because of a weak or broken rocker shaft spring, bent or worn parts. This will cause missed hills, scattered hills and uneven dropping. Valves should open at the same time and may be timed or set by twisting the rocker shaft.

Planter frames also should be checked. If the frame is twisted it will cause uneven depth of planting. And if the check row frame is twisted so that shoe shanks are not aligned the planter will not check accurately.

Drive-chain sprockets must be secure and properly aligned. Worn or stretched chains tend to climb or run off the sprocket.

Household Hints

Add two teaspoons of coffee to your chocolate. This frosting is delicious on namon cake.

If you would have your last, do not stand it on the ties; hang it up or rest it handle.

Coins are hard on a change pocket. Should a hiccup, an emergency repair made by sticking a piece of adhesive tape on both sides of the pocket.

In watering hanging plants, an oiled silk cover over the top of the pot. The water then drip through onto the floor.

If you want your artificial flowers to stay the way you want them, half fill the vase with sand. Press the stems into the sand and they will remain in place.

Frequently powder clings to the necks of dark silk dresses. Rubbing gently with a piece of dark silk will usually remove marks. If stubborn, try a just dampened slightly with cleaner.

To prevent too rapid yellowing of piano keys leave the keys open by day to admit light. This hastens yellowing. The never use soap when washing keys. Use a cloth very moistened with clear water. Better still, a cloth dipped in alcohol.

A small pair of sturdy keys found in a kitchen drawer will find aid in many tasks, as removing small caps from fruit jars and in pulling nuts or pie tins from the oven.

Pull the Trigger on
Constipation, with
Senna for Stomach, too

When constipation brings on discom-
fort, after meals, stomach upset, bloating,
headaches, gas, coated tongue, and bad
taste, your stomach is probably "crying
out" because your bowels don't
move. It calls for Laxative-Senna to pull
the trigger on those lazy bowels, com-
bined with Syrup Pepsin for perfect ease
of your stomach in taking. For years,
many doctors have given pepsin prepa-
rations in their prescriptions to make
digestion more agreeable to a touchy
stomach. So be sure your laxative con-
tains Syrup Pepsin. Insist on Dr. Cald-
well's Laxative-Senna combined with
Syrup Pepsin. See how wonderfully
the Laxative-Senna wakes up lazy nerves and
moves in your intestines to bring well-
desired relief from constipation. And the
Syrup Pepsin makes this laxative
so comfortable and easy on your
stomach. Even finicky children love the
taste of this pleasant family laxative.
Dr. Caldwell's Laxative-Senna com-
bined with Syrup Pepsin, as directed on
the box or as your doctor advises, and feel
a better Get genuine Dr. Caldwell's.

HOUSEHOLD MEMOS... by Lynn Chambers

Fish Fulfills Protein Needs of the System

Fish filets served with juicy lemon
wedges and generous garnishes of
radish roses and parsley make an
attractive main dish.

Fish Is Flavorful

One very direct and effective way
of meeting the meat shortage is by
serving fish in its
many delectable
ways. Few fam-
ilies have been
initiated into the
many ways of
preparation for
fish, few know
how succulent are

their steaks when baked, or how
tart and crisp are filets when fried.
Bones have been removed from
many types of fish so this need con-
cern the cook little. If they have
not already been removed, this can
be done easily since they are usu-
ally together.

French Fried Fish Filets.

Desired number and kind of fish
filets
1 egg, well beaten with 1 table-
spoon water
Crumbs, corn meal, flour or po-
tato meal
Salt and pepper
Salad oil for frying
Wash filets in cold water, drain
on absorbent paper. Sprinkle with
salt and pepper; dip first in dry
coating—(crumbs or other if pre-
ferred), then in egg mixture and
again in dry coating. Place in deep
salad oil—(375 to 385 degrees)—or
hot enough to brown a 1-inch cube
of bread in 40 to 50 seconds.

Fish is good when baked—espe-
cially with tomatoes and green pep-
per:

*Baked Whitefish, Creole.

(Serves 5 to 6)
2½ pounds whitefish, cleaned and
boned
Salt and pepper
3 tablespoons butter
1 small onion, chopped
¼ cup green pepper, chopped
1 tablespoon flour
1½ cups tomato soup
½ teaspoon salt
½ teaspoon Worcestershire sauce

Place fish in greased baking dish,
skin side down. Sprinkle with salt
and pepper and brush with one ta-
blespoon of the melted butter. Bake
in a moderately hot oven (400 de-
grees) for 15 minutes. Melt 2 ta-
blespoons of butter in saucepan and
add chopped onion and green pep-
per. Simmer five minutes. Add
flour and blend thoroughly. Then
add tomato soup, salt and worces-
tershire sauce. Cook until mixture
thickens, then pour it over the par-
tially baked whitefish. Return to
oven for 20 minutes more or until
fish flakes easily.

Halibut is another good, substan-
tial dish. Mild in flavor, it needs a
tart sauce to pick up its delicate
flavors:

Lynn Says:

Sauces for Fish: They're a
must with fish because they make
it most delicious dish. You'll
like browned butter with lemon
juice and Worcestershire sauce.
Or, just cream the butter and
season with lemon juice.

Horseradish is popular with
fish. Take ½ cup drained, pre-
pared horseradish, season with
salt and pepper and one table-
spoon vinegar, then fold in ½
cup of whipped cream.

Tartar is not just another name
for sauce, it's an affinity with fish
filets. Make it by adding 1 tea-
spoon minced onion, 2 teaspoons
chopped, sweet pickle, 1 teaspoon
chopped green olives, and 1 ta-
blespoon vinegar to ¾ cup may-
onnaise.

Make a cup of medium-thick
white sauce and add to this ½
cup grated cheese and let the
cheese melt. Or, 2 chopped, hard-
boiled eggs added to white sauce,
make a golden crown for baked
or fried fish.

This Week's Menu

*Baked Whitefish, Creole
Parsleyed Potatoes Broccoli
Watercress and Endive Salad
Oatmeal Bread Butter
Broiled Grapefruit
Beverage
*Recipe Given

Halibut Steaks.

Have center cut slices of halibut
steak cut one inch thick, salt and
pepper them and dredge lightly with
flour. Fry to a light brown in but-
ter. Remove to a platter and cover
with sliced sauteed mushrooms, us-
ing about a pound for 2 steaks. Over
this pour the following sauce

Stew 1 No. 2 can of tomatoes with
1 cup of chopped celery, ½ chopped
green pepper and 1 large chopped
onion. When vegeta-
bles are tender, run all through a
coarse sieve. Into
this melt ¼ pound
of grated cheese.

1 tablespoon of
butter, and salt and pepper to taste.
Heat fish thoroughly in oven and
just before serving sprinkle with
cheese and run under flame to
brown.

There's distinction in salmon when
it's combined with discreet season-
ing—lemon juice and tomato:

Baked Salmon Slices.

Salmon cut in individual servings
2 tablespoons oil
2 tablespoons lemon juice
1 teaspoon salt
Dash pepper
1 onion
1 tomato
Bacon strips

Brush slices of fish on both sides
with the oil. Place in a baking
dish, sprinkle with the lemon juice,
salt and pepper. Then lay a thin
slice of onion on each piece. Cover
onion with a ¼-inch slice of tomato
and top with a strip of bacon cut in
two. Place in moderate oven (350
degrees) for 45 minutes.

Salmon Fondue.

(Serves 6)
5 slices bread
1 cup milk
2 tablespoons butter
1 cup flaked, cooked salmon
3 eggs, separated
½ teaspoon salt
¼ cup grated American cheese

Trim crusts from bread and cut
into ½-inch cubes. Heat milk in
double boiler, add
bread cubes, but-
ter, liquid from
salmon, and well-
beaten egg
yolks. Season with
salt and cook un-
til thickened, stir-

ring constantly. Remove from heat
and stir in cheese. Cool for 10 to 15
minutes. Beat egg whites stiff and
fold into mixture. Pour into greased
baking dish. Place dish in pan of
warm water and bake in a moder-
ate (350-degree) oven for 1 hour or
until a knife when inserted comes
out clean.

Note Chopped shrimp, flaked tuna
or minced clams or oysters may be
used in place of the salmon.

A platter of fish with broccoli and
corn fulfills a good portion of daily
dietary requirements.

An early touch of spring goes into
the menu with a fresh green salad:

Toss-Up Salad.

(Serves 6)
½ head lettuce
1 cup diced celery
2 fresh tomatoes
2 hard-cooked eggs
1 clove garlic
½ bunch radishes
½ bunch watercress
1 cup raw spinach leaves

Shred lettuce, dice celery, cut to-
matoes and slice radishes. Cut eggs
into slices. Rub salad bowl with
garlic and add vegetables. Serve
with French dressing.

Cake Making? Bread Making? Cookie

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

BY HAROLD L. LUNDQUIST, D. D.
Of The Moody Bible Institute of Chicago.
(Released by Western Newspaper Union.)

Lesson for March 14

Lesson subjects and Scripture texts se-
lected and copyrighted by International
Council of Religious Education; used by
permission.

IN THE UPPER ROOM

LESSON TEXT—John 13:12-20; 14:1-6.
GOLDEN TEXT—Jesus saith unto him, I
am the way, and the truth, and the life: no
one cometh unto the Father, but by me.—
John 14:6.

Calvary and crucifixion were just
ahead. Jesus gathered His disciples
for a time of communion and in-
struction as they spent their last
evening together. On the morrow
would come betrayal, but now they
and their Lord were together in the
upper room.

But even here strife and dissen-
sion had apparently come in. There
was probably some difference of
opinion as to who should have the
place of honor. To teach them the
virtue of humility Jesus gave them
an example, after which He contin-
ued with the precious counsel and
prayer which are found in John 14
to 17.

Our lesson presents three things
which our Lord gave to His disciples
and to us (see John 17:20).

I. His Example—"Do as I Have
Done" (13:12-20).

The act of Jesus in washing the
disciples' feet placed Him, their Lord
and Teacher, on the level of the
most menial servant. It was an as-
tonishing thing that He did, lower-
ing Himself below their level to
serve them.

His application of the object le-
sson was equally startling. "Ye call
me Teacher and Lord, and ye say
well," said He. Then as learners
and servants He required of them
the humility which would make
them eager to do lowly service in
His name.

There are more than enough folk
who are willing to do the nice, pleas-
ant things in the church, where they
will be given recognition and praise.
All too scarce are those Christlike
folk who will serve in the hidden
places where darkness, suffering,
disease and sin make the natural
man recoil in distress or fear.

II. His Assurance—"If I Go I
Will Come Again" (14:1-3).

Following His resurrection Jesus
was to go to the Father. He wanted
them to be prepared for that time
by making known to them the fact
of His coming again. In that day
His own shall be received unto Him-
self to abide with Him forever.

The second coming of Christ is
not a strange doctrine held by
little groups of people who are rid-
ing a theological hobby. It is one
of the most blessed truths of Scrip-
ture. The hope of the Christian—
yes, the only real hope of this dis-
ordered world—is the coming of
Christ to reign. The New Testa-
ment is full of plain and helpful
teaching on this subject.

While we await His coming, then,
is there any encouragement for us
as the burdens bear down and the
way seems long? Yes, He says:
"Let not your heart be troubled"
(v. 1). There is little question that
this passage has comforted more
people than any other word in Scrip-
ture.

Countless bewildered and broken
souls in all lands and times have
here found the steady assurance
of the one who has the power to
give them rest and comfort.

There is good foundation for their
composure of heart in a troubled
world. They believe in God, and in
Christ, who is one with the Father.
Here is real security—infinite su-
perior to aught the world can give.

Then at the end of the road are
the eternal dwelling places. What
they are like is sufficiently revealed
in the fact that they are in the Fa-
ther's house. How shall we reach
them? That is our last point. We
have

III. His Guidance—"I Am the
Way" (vv. 4-6).

To Christ's declaration that they
knew the way, Thomas responded
with a request for a definite state-
ment. He wanted to be sure, and
Christ responded by reminding him
that He, their Lord, is the "way,
the truth, and the life." Surely there
could be no more complete provi-
sion for the guidance of the heavenly
pilgrim.

Christ is "the way." If one takes
the right road he will reach the
right destination though he "cannot
at first see it clearly. Perhaps this
is the commonest mistake of the
Christian. He frets too much about
what lies ahead . . . and not enough
about taking the right road" (Lesson
Commentary).

He is "the truth." He is the final
and complete revelation of God, and
is therefore the One who will lead
all those who walk the way by faith
into the fullness of the truth. To
know Christ is to know God.

He is "the life." He is life, and
He alone can give eternal life to
man. There is none other to whom
man may turn for life, but in
Christ it is found, and from Him it
may be received by faith.

We have only touched the briefest
beginning of what took place on that
remarkable evening in the upper
room. It was a time of richest spiri-
tual significance, of dark betrayal,
but also of closest communion. We
continue next Sunday.

Spanish Colonies Revolt Caused Monroe Doctrine

In the days of President Mon-
roe there was considerable appre-
hension that European interests
might so interfere with South
American states as to menace the
security of the U. S. So Monroe
declared that, in the American
continents, any attempt to exploit
any territory for European coloni-
zation would be held an unfriendly
act.

Spain was the country directly
concerned, because of the South
American Spanish colonies that
had revolted. It was feared that
Spain might transfer her claims
to a "Stronger Power."

So the Monroe Doctrine has
come to mean that Europe must
never interfere in the Americas.

COLDS' MISERIES
PENETRO
For colds, coughs, nasal congestion, muscle
aches get Penetro—modern medication in a
mutton suet base. 25¢, double supply 35¢.

Logistics
A new word is cropping up these
days owing to the war. It is "log-
istics." It refers to that branch of
the military art which embraces
the details of transport, quarter-
ing and supply of troops in active
military operations.

ASK ME ANOTHER?

A General Quiz

The Questions

1. What is a fanon?
2. What is the plural of index?
3. In the western hemisphere
what country ranks next to the
United States in population?
4. Is steam visible?
5. What is the second longest
river in the world?
6. What is in the clay from
which bricks are made to make
them red?

The Answers

1. A small banner.
2. Indices.
3. Brazil.
4. No. What we see is steam
condensed into water by contact
with the colder air.
5. Nile.
6. Iron.

HANCOCK COURT TERM OPENED MONDAY

Hancock County District Court opened at Garner Monday with Judge Henry N. Graven of Clear Lake presiding. Eleven civil cases have been filed for this term.

The grand jury which was drawn some weeks ago, reported for duty Tuesday at 10:00 o'clock. The petit jurors will be called for Mar. 16 at 10:00 a. m.

The new cases filed for the present term are:

O. R. Sweeney vs. Peter H. Lewerke and Viola Lewerke, suit for \$179.95 claimed due for farm rent. Hancock County vs. Lou Bailey in which the County asks judgment for \$182.22 for hospitalization. Beulah E. Grimm vs. Homer E. Grimm, petition for appointment of plaintiff as guardian of defendant's property. Betty Jean Kelsh vs. Albert Kelsh, divorce case. E. L. Reese vs. Jerry Willis, suit to quiet real estate title. Hancock County Cooperative Oil Association vs. Truels Stefan, suit on account, total of \$92.09 on two counts.

George Kelch, Jr. vs. George Kelch, Sr., suit for \$330.44 claimed due as his share from sale of hay. Elaine Electric Products Corporation vs. Lyle Gourley and Harold Ordway, asking \$93 on account. G. L. Scervens vs. C. L. Bunting, \$205.74 on note. T. K. Jacobson vs. Iver Brown and Newell Brown, \$29.52 on account. Bernice Smith Buse vs. Axel Trulson, et al, foreclosure of a real estate mortgage.

ELL TOWNSHIP FARM BUREAU MEETING MAR. 11

The Ell township Farm Bureau will meet at School No. 7 Thursday evening. Every Farm Bureau family is invited to attend.

The Young Married Group is planning the program.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Ira Overholt and "Stub" Lewis were at Des Moines on business last Thursday.

Mrs. John Clements started work at the Central Iowa Telephone Co. office here as operator last week.

Mrs. Lyle Wilcox visited at the Verle Keraus home in Garner Saturday evening.

Mrs. Quentin Stille has been confined to her home nearly all winter with an injured knee.

Mrs. C. F. Keraus is spending a few weeks visiting with her daughter, Mrs. Tom Mitchell at Swea City.

Mrs. R. W. Elder went to Ames Tuesday afternoon for a few days visit at the home of her son, C. R. Elder and family.

Mr. and Mrs. Fred Wilson, who live on a farm south of Clear Lake were shopping in Klemme Monday morning.

Mrs. Emma Larson, of Centerville was visiting at the E. J. Arnold home and with other Klemme relatives the past week.

Mr. and Mrs. Elmer Beier and their triplets were at Forest City on business the later part of last week.

Miss Thelma Chambers and the kindergarten teacher in the Britt Schools spent the week end visiting at the John Chambers home.

Neva Ann, daughter of Dr. and Mrs. D. P. Anderson, was absent from school the past week because of a severe cold.

Bert DuSold of Mason City and John Day were dinner guests Saturday noon at the R. A. Jorgenson home.

Grandma H. L. Suckow has been seriously ill the past week at the home of her daughter, Mrs. Herman Paul. At this writing she is greatly improved.

Mrs. C. A. Arnold, and Mrs. Emma Larson of Centerville, were dinner guests at the home of Mr. and Mrs. C. A. Larsen Saturday noon.

Mrs. James Schneider, of Goodell, whose husband died some time ago, is now staying at the Elmer Arnold home southeast of Klemme. Mrs. Schneider is a sister of E. J. and F. A. Arnold.

Mrs. E. F. Jacobs went to Rochester, Minnesota last Friday morning, being called there by the illness of Mr. C. J. Papousek of Belmond. Mrs. Papousek is a sister of Ed. Jacobs.

Rev. and Mrs. H. E. Harvey were at Ames Monday and Tuesday to attend an invitational Seminar of about 25 ministers and sociologists who met at I. S. C. to discuss problems of the rural pastor's work in the rural churches of Iowa.

Mr. and Mrs. Lyle Liebendorfer of Forest City were visiting at the R. A. Jorgenson home Monday afternoon. Mr. Liebendorfer is manager of the Mason City Production Credit Association office at Forest City and was here on business.

F. A. Arnold took his sister, Mrs. Emma Larson of Centerville, to Mason City Saturday afternoon for a visit at the Dr. C. B. Tice home. Mrs. Larson had been visiting with relatives in this community for the past week.

Mrs. John Day returned home this morning from El Segundo, Cal. where she had been since the first part of December visiting at the home of her son, Durance and family. Mr. Day drove to Ames where he met Mrs. Day and brought her to Klemme.

Mr. and Mrs. Wesley Patterson and baby daughter drove to Bancroft Saturday night for a visit at the home of his parents and to see his brother-in-law, Bill Gilchrist, who was home from the navy on a furlough. Mr. Patterson returned to Klemme Sunday afternoon and Mrs. Patterson and the baby stayed at Bancroft for a longer visit.

UNITES OF REV. WM. KOERNER HELD LAST WEDNESDAY

On Monday of last week, March 1st, occurred the death of the Rev. William Koerner of St. Paul, Minn. About one year ago Rev. Koerner suffered a stroke of paralysis that left him weakened, but he was able to carry on in his parish until the yearly conference held in June of the past year. At that time he had reached the age of seventy years, which is the limit of active work for Methodist pastors, and he retired.

Funeral services were held last Wednesday afternoon in the Asbury church, which congregation had been his last charge. The prelude was arranged and played by Mr. Arthur Koerner who presided at the pipe organ during the service. The prelude began with the familiar hymn "Open the Gates of the Temple," and then consisted of other hymns, reaching the climax in "I Know My Redeemer Liveth." Bishop Cushman of Minneapolis preached the funeral sermon. After the obituary had been read Bishop Cushman and the pastors around the altar joined with a group of other pastors from St. Paul and Minneapolis who were seated on one side of the church in singing "Oh Hallelujah, Be Thou Forever Blest."

The last few words of the service were those of Dr. Horn, who is over eighty years old and Chaplain of the Senate in Minnesota.

Rev. Koerner was buried in the small, quiet Woodbury cemetery, seven miles from St. Paul, where other relatives and long time friends of Rev. and Mrs. Koerner are buried.

Rev. Koerner leaves to mourn his passing, his wife and two sons, Allan of Rochester, N. Y., and Robert of Washington, D. C., and three grand children.

Mr. Arthur Koerner, who was in charge of the music is a first cousin of the deceased. He is a composer and authority on music of long standing and well known in the state of Minnesota, and also in New York City where he played in the Capitol Theatre for a number of years.

Those attending from here were Mrs. J. E. Stille, Mr. and Mrs. A. G. Koerner and Mr. and Mrs. Lester Stille.

—Contributed

IOWA LEGISLATURE COSTS \$4,344 A WORKING DAY

The 1943 Iowa legislature so far has cost \$4,344.52 per working day, records in the state comptroller's office show. The lawmakers have been in session 34 days since opening day, January 11, at a total cost of \$147,613.63. Of the total, \$80,500 has been for pay to the 158 members of the house and senate, each of whom receive \$1,000 for the session, and for salaries paid to the speaker of the house and the lieutenant governor, who receive \$2,000 each.

What You Buy With WAR BONDS

Military motorcycles, for couriers, for speeding light guns from one section to another, are an important part of America's mechanized army. Many are equipped with sidecars for use of staff officers. They cost from \$400 to \$450.

We need thousands of these small maneuverable machines in our Army today. You and your neighbors, all buying War Bonds and Stamps, can help buy them for the Army. Invest at least ten percent of your income every payday in War Bonds and Stamps and become a member of the patriotic "Ten Percent Club." It is rapidly becoming the largest club in the world.

U. S. Treasury Department

Use the Times Want Ads.

Miss Marcelle Josten, daughter of Mr. and Mrs. Edwin Josten, provided special music at the Methodist church last Thursday and Friday evening when she played on her marimba. She was accompanied by Miss Irene Becker at the piano.

Mr. and Mrs. Arthur Wellemeyer were dinner guests Sunday at the home of their son-in-law and daughter, Mr. and Mrs. Burton A. Hanson at their farm home north of Wesley. Don Bacon and family of near Thompson were also dinner guests at the Hanson home.

Mrs. D. O. Turgasen, who returned to Klemme when her husband, T. H. Sgt. D. O. Turgasen left for over seas service, is now finishing out the year teaching history in the high school at Wapello, Iowa. The young man who's position she is filling, was drawn into the army about a month ago.

Mrs. Herman Peterson and Mrs. Arnold Tesdal of Morris, Illinois, came Thursday for a visit with relatives. On Saturday they were accompanied to Waterloo by Mrs. A. E. Duthridge and daughter, Mrs. Harold Shoafstall, and Mr. and Mrs. Ernest Helms to attend the wedding of Miss Alice Kauth and Stephen B. Kleinmaier. The ladies of Stephen Kleinmaier. Mrs. Petersen and Mrs. Tesdal left again Tuesday.

Ira Overholt will leave this Wednesday evening for a three weeks visit in the east. His first stop will be at Arlington, Virginia, just outside of Washington, D. C. where he will visit with his son-in-law and daughter, Mr. and Mrs. John Lamont and children. A new granddaughter at the Lamont home will receive special attention. Mrs. Overholt has been at the Lamont home and will accompany her husband to Palmerton, Penn. where they will visit their son, John Overholt and family.

Beautiful silk-like Service Flags, the new government approved V-flags with one of two stars, gold hanger cord and fringe for \$1. At the Times office.

Mrs. Ben Coobs received a telegram Tuesday morning that her father, Mr. George Wilson, was sick at Columbus, Indiana. Mrs. Coobs left Tuesday evening for Indiana to see her father.

Strange Faces

and New Names--

IT IS MARCH, and many new families have just moved in to the Klemme Community.

Our faces will be strange to you, and we Klemme people have such funny names, hard to pronounce and harder to spell. You will find our names altogether different from those you were used to in your old home town.

But, People are pretty much the same the world over. Klemme people are mostly hard-working, fun-loving, prosperous families. . . you will like them as neighbors.

We wish to extend a hearty welcome to all "New Comers" in our Community, and feel sure that you will like it here when once you get settled and acquainted.

Call at the Store for anything you need in HOME FURNISHINGS, and ask us anything you want to know about this community. We ought to know some of the answers since we have been here 36 years!

Banquet For Shamrocks Britt Eagles Mar. 25

COMMUNITY IS INVITED TO
AND EVENT IN HONOR
BASKETBALL BOYS

ponsored By Civic Club, Senior
Girls Will Sell Tickets

A special meeting of the Civic Club Tuesday night, it was decided to stage a community banquet in honor of the Shamrocks basketball boys who have concluded a most successful season by winning a county sectional championship and a town in which only two games were lost, and those to Britt.

The Shamrocks and to the Britt Eagles and their coach. The banquet will be served in the high school gym and will be served and served by the Methodist Church. Plates for the banquet are 5 cents per person and tickets may be purchased in advance of the banquet which will be held on Tuesday evening, March 25th, at 7 o'clock.

Everybody Invited

Every basketball fan in the community, parents of the boys—all invited. Tickets will be sold by the senior girls of the Klemme high school, and will also be on sale at the store. Procure your ticket Tuesday, March 23rd at the late date. Those who live in the country have not been solicited may have their tickets at Thada's, or a high school Senior.

Remember, if you are a basketball fan, you are invited. This is for the men, women, boys and girls in the community. You must buy a ticket to be admitted. Tuesday is the deadline on ticket sales. The date is Thursday, March 25, 7:30 p. m. sharp.

ELMER KLEMMME TEACHER ANNOUNCES MARRIAGE BE SATURDAY

Invitations are out for the marriage of Miss Marion Irvine, of Traer, to Asa Arnold of Camp Adair, Iowa.

The wedding will be exchanged at the Presbyterian Church at Traer, on Saturday, March 20.

Miss Irvine is a former Klemme teacher and this past year has been teaching at Northwood.

Asa Arnold is the son of Mr. and Mrs. F. A. Arnold of Klemme.

U S N. T. School,
February 28, 1943

Dear "Jergie":

I have a little time on my hands tonight and shall spend a few minutes writing to you I've been getting your Klemme Times every week and I sure enjoy getting it and hearing what all the boys are doing.

I spent a couple of weeks in the hospital at Great Lakes with the mumps, but now I'm back in the "groove" and have my work all made up. I have twelve weeks left here and then I'll be transferred to another base, I suppose. I've been learning all about sheet metal. We have ten weeks of that. Next we get seven weeks of welding, then a couple of weeks on the line and there we get actual work on planes. We get wonderful instruction here and I like my work fine. As far as I know now I'll get a leave in June and will probably get home for a few days then.

They have changed the name of the station here from "training school" to "Aviation Technical Training Center," and I am now in Company 17.

Calvin Schaefer is here at the Pier, too, and I get to see him quite often.

Well, I have to write a couple of more letters, so I'll close.

Sincerely,

Marvin Stokesbary, S 2c,
Co. 17-277, Section J,
US NATTC, Navy Pier,
Chicago, Illinois.

P.F.C. WM. HAACKE WRITES FROM NEW GUINEA

Feb 17, 1943

The Klemme Times,
Klemme, Iowa.

I wish to send my sincere thanks to all the people of Klemme and vicinity who sent me parcels and greetings while I was on the front line in New Guinea. Keep up the good work and keep 'em flying. I am, always your friend,

P. F. C. William Haacke,
Somewhere in New Guinea.

WILL GET 48 POINTS FOR THE MONTH OF APRIL

Second Series Of Ration Stamps
May Be Used Starting Mar. 25

WASHINGTON—The housewife's total of food ration points for April will be the same as it is in March. 48 of them on the blue stamps lettered D, E, and F in war ration book No. 2.

In making that announcement late Monday, the office of price administration also said there will be one week of overlap, during which both the March and April stamps will be good.

This month's stamps, the blue ones lettered I, B and C, will be good from March 25 through April 30, OPA said.

While urging consumers to budget their 48 ration points for April where possible, OPA explained the overlapping week was to allow them to make "the best possible use" of whatever small desirable use of whatever stamps they might have left at the end of the current month.

Keep salt before livestock at all times.

THE UNHOLY CROWN

Klemme Basketball Team Went Down In District Tourny

IOWA FALLS PUT SHAMROCKS OUT OF DISTRICT TOURNY IN 33-32 THRILLER

In the district tournament last Thursday night at Mason City the fans got their money's worth in the thriller staged by Iowa Falls and the Klemme Shamrocks, which the Iowa Falls Cadets won 33-32 to move into the semi-finals against the Mason City Mohawks.

The Klemme Shamrocks seemed rather nervous in the first half of play as Iowa Falls stepped into a 12 to 5 lead in the first quarter and stretched their advantage to 18-11 at the close of the half.

However, it was a transformed Shamrock five that faced the Cadets in the second half and it was here Klemme began to roll along and out-play the Iowa Falls boys at every turn.

The Cadets managed to advance the score 28-20 at the end of the third quarter. At this point Kaduce flipped in two free throws, no a field goal by Greiman sailed the score up to 24 to 28 with Iowa Falls ahead. O'Malia (I.F.) hit for 2 points which Klotzbach evened up with a bucket making the score 30-26.

A pair of charity tosses, one for each side, moved the score to 31-27. Then Bill Grosshuesch swished one through which brought Klemme to within 2 points, 31-29. Again it was balanced as Allen (I.F.) found the hoop. As the final seconds ticked away Greiman and Grosshuesch hit on a goal and free throw, respectively, bringing the score up to its final count of 33-32.

A desperate last second try by the Shamrocks had the crowd holding their breath, but the shot fell off the hoop as the signal ended the game.

Grosshuesch lead the scoring by chalking up 16 points for Klemme, and O'Malia had 10 for the Cadets.

Mason City Won District

The Mason City Mohawks won the right to go to the state tournament by eliminating Clear Lake, and Iowa Falls to meet Bancroft in the final, easily winning that game 52 to 25.

Bancroft, in the upper bracket, advanced to the final by eliminating Whitemore and Charles City.

The Shamrocks were forced to play most of the game without the services of "Jake" Jacobs, star at the forward post, who accumulated three fouls early in the contest and later went out on the fourth. Shamrocks to see service in the game against Iowa Falls were Bill Grosshuesch and Klotzbach at the guard positions; Jacobs and Greiman at forward; Kaduce at center. "Red" Buntensch did a fine job of filling Jacobs' position and Lau also saw service with the regulars.

MORE CONTRIBUTIONS TO RED CROSS WAR RELIEF

Since publishing the list of contributors to the Red Cross War Relief drive in The Times last week the following contributions have been received:

Capt and Mrs Earl G Schaeffer	\$25.00
Mr and Mrs. George Schoenwetter	\$15.00
Edwin Tiggerman	\$5.00
Vic Schenwetter	\$5.00
Wort Leger	\$5.00
Wm. Velau	\$5.00
Dwight Hummell	\$3.00
Mrs Elizabeth Smid	\$2.00
Keith Albertson	\$2.00
Mrs Lew Neuberger	\$1.75
Mrs Dick Swale	\$1.50
Mrs Louisa Rensdahl	\$1.50
Lippo Wessels	\$1.00
Mrs. Gertrude Carpenter	\$1.00
Martin Karsjen	\$1.00
P J Paulson	\$1.00
Mrs Fred Nagel	\$1.00
Mrs Ed Rall	\$1.00
Bernard Smid	\$1.00
Mrs Geo. Ulrich	\$1.00
Martin Brinkman	\$1.00

ELL TOWNSHIP SPELLING CONTEST WAS HELD

The spelling contest for the Ell township schools was held Friday afternoon, March 12th at the No. 5 School of which Judith Eness is the teacher.

The three winners were Esther Hartbeck, first; Maxine Grossbeck, second, and Melvin Howard, third. The two highest will represent Ell township at the county spelling contest at Garner on April 3rd.

Judges for the contest were Mrs. Menno Albers, Mrs. Alvin Goll and Mrs. Clarence Greiman. Mrs. Vernor Stromer pronounced the words.

JANIS STOKESBARY HAS BIRTHDAY DINNER

Mr. and Mrs. Orville Stokesbary had twenty-two guests at their home Sunday evening for dinner, honoring their daughter Janis' 4th birthday anniversary.

Janis had a fine time and enjoyed receiving many gifts.

A repairable, serviceable field machine, regardless of age or vintage, is a better producing unit than a "shiny" new hoe or spade.

It was the last high school game for Jacobs, Grosshuesch, Greiman, and Klotzbach, as all are seniors.

Town Election Will Be Held Here Monday, Mar. 29

NO CLOTHES SHORTAGE SAYS ELMER DAVIS

Pointing out that there have been "unfounded rumors of impending rationing" of clothes, Elmer Davis, Director of the Office of War Information, makes the following statement:

"There is no shortage of clothing now, or of the textiles of which clothes are being made.

"After consultation with Donald Nelson and Prentiss Brown, I can say that no rationing of clothes is in present prospect.

"Whether or not clothing may some day have to be rationed no one can now say with certainty. But if that should happen, the purpose of such action, as of all rationing, would be to distribute equitably the quantity available; to see that everybody has enough and that nobody takes an unfair advantage over his fellow-citizens. People who buy up excess supplies of clothing now are taking unfair advantage over their more patriotic neighbors, and by their actions are doing their best to create a scarcity that does not now exist.

"Total war is fought on the civilian as well as on the military front; everything you do either helps or hurts the enemy. When you buy more than you need now, you help Hitler!"

ANOTHER COUNTY-WIDE DRIVE FOR SCRAP METAL SOON

Robert W Sinclair of Garner advises that Hancock County will have another drive for heavy scrap metal soon.

Sinclair says "We do not want wire, galvanized tin or similar light scrap material." The scrap drive will be nationwide and farmers are asked to begin collecting their heavy scrap iron now for the drive.

Steel mills are running at top speed but scrap is still needed for the "arsenal of democracy."

For the first six months of 1943 the quota for Iowa is 183,000 tons; and Hancock County's quota is set at 999 tons, which is an average of 1,000 pounds per farm.

Detailed plans of the coming scrap drive will be published soon.

Farmers who need rubber boots or rubber work shoes may still obtain them but they must first have a certificate from the War Price and Rationing Board.

NOMINATIONS FILED FOR TOWN OFFICIALS

Regular Town Election Will Be Held Here Monday, Mar. 29

The regular town election, which is held every two years, will be held in Klemme on Monday, Mar. 29th. The Community Hall will be the place of voting, and the polls will open at 7 00 a. m and close at 6.00 p. m.

At the town election the voters will name one Mayor, one Treasurer, one Assessor, and five members of the Town Council.

Unless there are some withdrawals, the following names will appear on the ballot:

For Mayor:

J. E. STILLE.

For Town Treasurer:

C. G. WATERMAN.

For Town Assessor:

ORVILLE BRIDGES.

For Councilmen:

(Five To Be Elected)

D. P. ANDERSON

CLARENCE KLUCKHOHN

HENRY LEWIS

E. H. PATET

HERMAN PRIEBE

JAMES THOMAS

ED THOMPSON

ART WELLEMAYER

Two nomination blanks were circulated, one being headed by J. E. Stille for Mayor, and the other by E. F. Jacobs for Mayor. Mr Jacobs however, withdrew his name.

POINT VALUES ARE CHANGED ON SOME ITEMS

Dried Fruits Lowered To 12 Points,
Beans Lowered To 4

The lowered ration point values on prunes, raisins and other dried fruits as well as peas, beans and lentils.

The point value of prunes and raisins has been cut to 12 points a pound, and all other dried fruits to 8 points a pound, except figs and dates which are no longer rationed and do not require any points.

The point value of peas, beans and lentils has been cut to 4 points a pound.

If the 1942 Iowa cash farm income had been divided equally among all farmers, each would have received about \$6,500. Of this about \$3,000 would be net income.

TROUT HATCHING REACHES PEAK

Batteries of Hatching Troughs at the Backbone Trout Hatchery

Trout hatching in the various state hatcheries has reached a peak, and the hatcheries now contain thousands of eggs and fry in many stages which will be legal size and planted in 1944. Eggs for the 1944 catch have been secured from commercial breeders and from stocks of trout held at the various state nursery ponds. The fish include Brook, Rainbow and Brown trout. Because of high, muddy waters, and in some locations impassable roads, the 1942 trout season was only fair. The State Conservation Commission expects to begin stocking soon the more than 150,000 legal size trout now being held in the nursery ponds.

Help your Grocer

Let's Get Behind Him and Make
Rationing a Success—Start Now to
use more of the plentiful
NON-RATIONED FOODS

THE man who runs your grocery store has his headaches these days. For months, in the face of shortages and lack of experienced help, he's been trying to carry on... trying to give you the kind of service you've always expected of him.

Now he has a brand new problem—point rationing. He has to collect the stamps from you as well as the cash.

It's a burden for him—sure—and for you. But he knows and you know that it's got to be done. It's the only fair way of making sure that everybody gets a fair share. That's our way of doing things.

So it's his job—and your job—everybody's job—to make point rationing work... as smoothly, as efficiently as possible. Traffic jams in food stores aren't going to help anybody.

Now there are a number of ways in which you can give this grocer of yours a real hand... in a good, neighborly American way. You can shop early in the day, early in the week. You can shop as infrequently as possible—once a week only, if you can manage. You can always make sure to have a shopping list, and to have your "point values" added up before you go to the store.

And you can help yourself as well as your grocer by using the plentiful, non-rationed foods as much as you can, instead of the scarce, rationed foods. Foods such as cereals, fresh fruits and vegetables, home-

cooked soups, home-canned fruits and vegetables are not rationed and they deserve an important place in your wartime meals.

Because cereals are one of these abundant unrationed foods, we here at the Kellogg factory in Battle Creek have been doing everything we possibly can to meet the unprecedented demand for our products. We're sending millions upon millions of packages of crisp Kellogg Cereals to the boys in our armed forces. We're packing K-rations for troops in the front line of fighting. Even our machine shop is making gun parts! And we're short of help, too. There are 423 stars on the big service flag hanging in the lobby of the Kellogg building.

Other ways to help your Grocer...

1. Shop early in the day.
2. Shop early in the week.
3. Shop only once or twice a week.
4. Prepare a shopping list.
5. Add up total "point" values before going to the store.

But in spite of these wartime difficulties, we've doubled our efforts to be sure that we can supply Kellogg Cereals to the millions of American families who are depending on cereals more than ever.

Always famous for marvelous flavor, every Kellogg Cereal is made of WHOLE GRAIN or is restored to WHOLE GRAIN NUTRITIVE VALUES through the addition of thiamin (vitamin B₁), niacin and iron. With milk alone, or with milk and fruit, a bowl of crisp, delicious Kellogg Cereal gives you vitamins, minerals, protein, food-energy in one dish!

And remember this about cereals in your daily meals. They're quick and easy to prepare. No cooking, no pans or skillets to clean up. Even the dishes are easier to wash.

Cereals save time—work—fuel—other foods. Used in hamburger, meat-loaves, croquettes, etc., they help you stretch your meat... and they make milk go farther, too.

Think of cereals as one of your best, most nutritious, non-rationed foods and think of Kellogg Cereals as the finest you can buy.

FROM O.P.A. CONSUMER INSTRUCTION SHEET

"EAT MORE CEREALS—There is an abundance of cereals and, as you know, they are mighty economical. They are nourishing and delicious—what's more, cereals can be used to stretch your rations when mixed with vegetables and fruits."

DEAD !!!

Records show that only 60 per cent of the pigs farrowed each year reach the market. A mortality loss of 40 percent is too high at any time, but in time of war, when food is so vital to Victory, that loss is unthinkable.

We don't claim to be an authority on diseases of pigs or on hog raising in general, we leave those subjects to the veterinarians, and specialist who have made a study of it.

BUT

We do know that we have a great many customers who use . . .

LIME

to combat diseases of livestock and poultry . . . and they keep using it year after year . . . SO IT MUST DO THE WORK. They use LIME in barns, hog houses and chicken houses to cut down losses from the ravages of disease.

LIME

is used for sanitary purposes. Disease germs just don't thrive in lime. Flies don't care to hang around barns, hog houses and chicken houses that are kept sanitary with lime.

LIME

is inexpensive, too. It is one product that has not risen in cost because of the War. It still sells at a reasonable price.

Make use of this time-tested, inexpensive aid in fighting disease.

Northern Lumber Co.

FIRST HAND PROOF THAT THE RED CROSS IS DOING A SPLENDID JOB

The following letter received by Mrs. Sumner Trumbull should be ample proof that the money contributed to the Red Cross is well spent:

Des Moines, Iowa, March 13, 1943.

Dear Mrs. Trumbull: I wanted to go over to your place while I was in Klemme and give you some money for the Red Cross, but I never got around to it. Now I am glad I waited as I received orders this week to begin my active duty (in the WAACS) on March 16, 1943 That is exactly the same day Earl was called two years ago, and so I am enclosing a check dated March 16 (for \$25.00) for the Red Cross. "Doc." thinks there is nothing like that organization. He was very enthused over what they are doing in army camps all over the U S and is even more enthusiastic about them since he has landed on foreign soil. Some of the money I am sending is what I saved during Christmas shopping, and the rest is for our army anniversary.

Sincerely, Mrs. E. G. Schaeffer.

THE "FIRST" ROBIN HAS BEEN SEEN HERE

The honor of being the first to report having seen a robin in this community this spring goes to Herbert Mueller "Herbie" called the Times office early Monday morning to report he saw a robin Sunday.

With the first robin arriving on Sunday, along with thunder and lightning during the night, a thick fog Monday forenoon and a real rain Monday afternoon, made it appear like Spring was here at last. But not for long; Tuesday morning the mercury had dipped down to 8 degrees above zero, with a high cold wind blowing, with sand mixed in with snow flurries.

The "first robin" was last seen wearing a pair of skis, ear-muffs and high-tailing it toelloutofhere. Spring might be "just around the corner," but we are keeping our fingers crossed!

A BOUQUET FOR THE KLEMMER SHAMROCKS

Earl Hall, editor of the Mason City Globe-Gazette pays his compliments to the Klemme Shamrocks and small school teams in general n his "Eye-Observing" column on Monday.

"To all basketball teams which participated in the high school district tournament in Mason City this past week. The sportsmanship of the athletes has been of the highest order. In this I'm thinking as much of the losers as of the winners. I'm thinking particularly of the teams from the smaller schools. The high point of the tournament from my point of view was that magnificent last-half rally made by Klemme's Shamrocks against Iowa Falls Thursday night. My confidence in the youth of America has been fortified anew

HOW TO GET MORE SHOE MILEAGE

If you're singing the "shoe rationing blues" just stop, read and act. Here's the way to get the most miles out of your present shoes, and make sure you'll not go back into the ranks of the "bare-foot boy (or girl) Shoe repair men have been telling you these things for a long time . . . but America has to learn the hard way!

First, when you buy new shoes, make sure they fit. If you get them too big the leather wrinkles and cracks. If you get them too small, the leather has to stretch, so the shoe loses its shape.

Next . . . alternate wearing your shoes, so the leather gets a chance to dry out and let shoes return to their original shape

Weatherproof your shoes. This keeps leather flexible and helps it resist dampness. And be sure to keep your shoes clean and well-polished. Brush gently with saddle soap if unusually dirty. And do the polishing slowly and evenly. Fast polishing heats the leather and is not good for it.

If shoes get wet, dry them at a good distance from stoves or radiators. Packing the insides with

newspaper absorbs the moisture and helps them dry in proper shape.

And finally . . . see your shoe repair man. Let him keep the heels straight, and replace worn soles without delay. Shoe repairing and shoe repair materials are not yet rationed. Your shoe repair man is the man of the hour . . . let him help you get maximum shoe mileage.

SPRING WINDS DOTH BLOW

The devil sends the wicked wind, To blow the skirts knee high, But Heaven is just, and sends the dust

To fill the bad man's eye!

MRS. ART KUDJE HOSTESS TO BRIDGE CLUB

The U-Delt-Em Bridge Club met last Thursday afternoon at the home of Mrs. Art Kudje.

Contract bridge was played and the highest score was made by Mrs. George Lawhorn, second highest by Mrs. Edna Thada, and Mrs. Jacobs held third high score.

If vegetable garden seeds have been held over from last year, they should be given a test for germination, for they might not be good now. This can be done in the house by placing the seeds on a moist cloth on a plate, covering with another moist cloth, and placing another plate, upside down, facing the bottom one.

Planting small fruits this spring: strawberries, raspberries or grapes, is one way of assuring a supply of fruit until the war ends. These come into production relatively early.

Limed soil is best for soybeans, tests at the Ohio Station show

Spring is an ideal time to get rid of rats by poisoning because during the mating season they are hungry and will take bait readily.

KEYS TO VICTORY

The Moravia school students recently conducted a drive to obtain old keys in the neighborhood. The total number of 2,785 keys was collected. The freshmen collected the largest number by turning in 807 old keys.

MOVED IN

March 1st moving time helped the Ogden rural school district in Warren county. The enrollment of four grade pupils has been increased to 21 during the first days this month. It has been necessary to borrow seats from a neighboring school building to take care of the overflow.

BECAME ACQUAINTED

For over a month, two cousins, nephews of Mrs. Etta Thompson of Guthrie Center, drilled side by side in a training camp in Florida. All this time they did not know that they were cousins and did not become aware of the fact until one day each received a letter from another cousin asking that they contact each other. The two boys had never seen each other as they lived in different states.

LILY OF INDIA

H. H. McVey has on display in his store window in Tama a sacred lily of India that is now blooming. The lily itself is 4 feet 10 inches high and measures 12 inches in diameter. The four-year-old, dark-wine lily is blossoming for the first time and many residents of Tama are seeing for the first time such a flower.

SHELLS SCATTERED

A number of loaded 155-mm artillery shells were found along the right-of-way of a railroad near Corning and Villisca. One of the shells had been thrown about 50 yards.

BEAUTIFYING PARKS

The U. S. Forest Service is supplying 15,000 seedling trees to be planted in the Cedar Rapids city parks. They consist mostly of five-year-old white pines, but 3,000 small hardwoods are included.

GOOD PRICE

Richard Brownell of Wyoming, sold a load of 80 hogs on the Chicago market one day recently, obtaining \$15.75 per cwt. This was the highest market price paid for 245 pound hogs on that market for the past 22 years.

TO KEEP WARM

Men in a number of Marine service camps will be thankful for the work of Unit 96 Iowa United States Service Women n Algona. The group has finished 156 quilts and forwarded them to camps.

If Iowa produces the 350,000 acres of flax which the government is asking, it will be the largest acreage in history.

WOLF

Capture of a 26-pound wolf brought to three the number caught by Ira Eaton of Decatur this season.

Rosebud

Rosebud is eight, and the most beautiful shade of caramel fudge. To her loving Mammy and Pappy she is known, on approximately alternate days, as "Angel" and "You devil child". It was on her devil-child days that Rosebud tied the knots in the shirts that Mammy had taken in for washing, and poured the whole of the vanilla bottle into the lamb stew, just, she said later through bitter tears, to "flavor it up some".

On her angel days Rosebud is equally imaginative even if a more restless occupant of the little shack down on Vinegar Hill. Once when Mammy was out doing day work, Rosebud got a wave of cleaning fever and scoured every pot and pan in the kitchen so that they literally glistened. Another day, left alone, she tied up

Mammy's and Pappy's room to such a point of apple-pie order that it was a week before Pappy could find an undershirt.

Rosebud is a great reader of the newspapers. Mammy and Pappy don't take one, but there are plenty of perfectly good newspapers blowing round Vinegar Hill. It was out of one of them that Rosebud got her idea for spending the ten cents the Bunny had put under her pillow the night her tooth came out. After breakfast Rosebud disappeared down the Hill and reappeared soon after with a beautiful ten-cent War Stamp pasted firmly into a brand-new book with neat little squares for more stamps. She displayed her investment to Mammy. "I declare you're an angel child," Mammy said. Rosebud went on sitting on the kitchen floor staring with large brown eyes at the empty squares in her book. From time to time she took hold of one or another of her teeth and wiggled it, gently.

Mammy was engrossed in a particularly big washing. Rosebud was as quiet as a mouse and Mammy forgot about her until, coming in from the yard with her arms full of dry sheets, she encountered her child with a large hammer in her hand. Scenting the devil in her angel child, Mammy shouted at her, "Rosebud! Come yere with that hammer! What you planning on doing?"

But what was done was done. In Rosebud's other hand was another tooth. Her mouth was stretched in a broad if slightly bloody smile. "I ain't doing nothing, Mammy," she said, "I'm just filling up my stamp book."

(Story from an actual report in the files of the Treasury Department.)

Say yes. Take your change in War Stamps. Your investment in War Bonds today will save a payday for tomorrow. U S Treasury Department

LEAKAGE

A leak in a gas line occupied by Clarence W. Springdale, caused a fire recently. Roy Berg of pipe line, unaware of knocked the ashes from immediately gasoline on caught fire. Fumes went to the farm buildings where was done to them. were immediately sent to damaged pipeline

SENIOR CLASS NEWS

Anna Lee Brunes, Reporter

The assignment for the week in History was a theme of 500 words on "Transposition, Past and Present," to be handed in on Monday.

The Physics Class worked last Thursday on motors, which we are to have done by April 1st, or else!

Mark Twain has been the entertaining figure in the American Literature Class this week with his sketches from Life on the Mississippi.

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

This week in American Government we studied the Judicial Department of our Government. We learned about the different kinds of courts, laws, and the Bill of Rights. The Bill of Rights are the first ten amendments to the Constitution.

In English Literature we have been studying the works of Scott, Wordsworth, Burns, Keats, Coleridge, Shelley. No poet has ever equalled Burns as a writer of love songs.

The Typing Class has learned how to type addresses on envelopes, and also how to type on a post card.

A few of us have been absent from Geometry Class this week.

The Junior Class is beginning to prepare for the Junior-Senior Banquet. The theme and some of the committees have been chosen.

SOPHOMORE NEWS

Patricia Kudje, Reporter

In Biology we studied "Heredity and Variation" and learned how various traits are inherited. We had to trace the family tree back to our grandfathers and tell how they, our aunts and uncles and our cousins look and resemble each other. That's quite some job when your "family tree" is large.

We are writing essays on the French Revolution in World History.

We are reading "Silas Marner" in English II. We have already read and reviewed the first chapter. We enjoy Silas for he is a rather queer character.

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

The Algebra Class is encountering difficult binomials. The Sophomores are having a difficult time for they are taking the same course.

In English we wrote themes on Monday. They were very much better than the ones we wrote before. We are glad to hear that.

The Science Class is studying the beginning of the world. Some of the pupils brought rocks and other items to study.

The Home Economics girls are cooking. They have made many tasty dishes. The aroma has floated throughout the school house.

In Manual Training the boys are making a large assortment of items. Some are very good.

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher

Ruth Smith, Reporter

We have finished Unit VI in History and are now on Unit VII, of "World Problems."

In Seventh Grade we are learning to read gas and electric meters in Arithmetic.

Honor Roll

Those who received perfect scores in Spelling were:

Peggy	Roger R.
Betty	Edward
Donald	Irene
William	Harold
Ruth	Helen S.
Esther	Darwin

Both grades wrote self-testing drills this week.

In English the Seventh Grade are learning about antecedents.

We plan to have our spelling contest in our room next week.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

Monday we had a birthday surprise. Larry brought us treats to help celebrate his anniversary.

In Art we have been carving figures from soap.

Spelling Honor Roll

Norma Early	Isabelle Gibbs
Marjorie Lau	Larry Ramsay
Dorance Baack	Willis Bock
Luella Priebe	Marvin Schmidt

THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

We received some new story books for our library. They look very interesting.

Jimmy brought a goldfish and some sea-weed for our aquarium.

We had an unusual visitor on Thursday afternoon. "Jiggers," Jimmy's dog was here for play practice for the assembly program.

We are reading "Beautiful Joe," a story about a dog.

Honor Roll

The following received perfect scores in Spelling this week.

Lucille	Maralee
Iris	Maxine
Janice	Delores T.
Jimmy	La Nelle
Harley	Audra
Ruth	Sandra
Dolores K.	Darlene
Beverly	

PRIMARY ROOM NEWS

Virgie Hardcopf, Teacher

Friday morning, we went to a program in the gymnasium. We all enjoyed it very much.

We colored kites this week in Art Class.

The boys and girls had a peanut shower Friday afternoon for Miss Hardcopf. We all had a lot of peanuts.

Honor Roll

The following Second Graders received 100% in Spelling this week:

Larry	Billy
Sharon	Garry
Neva Ann	

LARGE GROUP LEAVE FOR CAMP DODGE THURSDAY

The following boys will leave for Camp Dodge, Iowa, for physical examination and induction on Thursday, March 18th.

Garner:
Lawrence M. Juhl, John A. Schmidt, Paul H. Macke, LeRoy Romp, Gordon M. Haes and Merle R. Hall.

From Britt:

Anthony C. Kloster, James H. Denney, John R. Lowman, Vernon N. Nelson, Floyd A. Miller, Belden G. Larson, Paul E. Cosgriff, Robert L. Foster, Harold F. Gayken, Eugene C. Sweet, Lewis W. Thomas, Frank P. Dodson.

Kanawha:

Forrest L. Rowley, Arthur M. Omvig, Alfred P. Assink, Carl J. Westin.

Others Are Listed:

Edward Hall, Forest City; Robt L. Drake, Crystal Lake; Dan B. Johnson, Hancock; LeRoy K. Berhow, Goodell; Henry W. Gerdes, Wenden.

The following boys were transferred here for induction:

Cecil L. Larson, Long Beach, California; Glen H. Beaman, Seattle, Washington; Francis Sten-hoff, Seattle, Washington.

The following of the Call have already been inducted into the service:

Robert L. Schroeder, Calvin R. Wood, Floyd L. Sweet, Emmett L. Wood, Earl T. Johns, and Charles E. Seebeck, all of Britt.

Jay Kenneth Omvig, Kanawha; Cecil Kiekel, Woden; Emanuel C. Jacobson, Garner; Keith J. Myhr, and Richard H. Helland of Crystal Lake.

TWINS APLENTY

O. V. Bishop has been visiting his twin brother, O. A. Bishop in Churdan. The two are 79 years old. In their immediate family are nine sets of twins.

A Kernel of Corn Has Very Complex Structure

A kernel of corn is not just a sort of triangular bit of yellowish grain. It is a complex structure having five distinct parts, each of which stores a different material or mixture of materials. The hull, or outer skin, is fiber. Next is a shallow layer of gluten, a substance rich in protein. On the sides and back of the kernel, inside the layer of gluten, a mixture of starch and gluten bulges in toward the center. Filling the upper portion of the kernel, and extending downward to partially surround the germ, is the white starchy part of the kernel. The germ itself is level with the flat "front" of the kernel. It contains protein, most of the oil and a large share of the minerals. The five parts can be seen clearly in a kernel that is softened in water and cut open with a razor blade. From 15 to 20 per cent of the kernel is water, while 80 per cent of the remainder is starch and other carbohydrates, 10 per cent protein, 4.5 per cent oil, 3.5 per cent fiber and 2 per cent ash, or mineral content. Mother Nature has thus stored many of her chemurgic materials now being used by the modern miracle man, the chemist, to make "better things for better living."

Want Marriage Success? College Students Tell How

A selected group of 350 students at the Pennsylvania State college have just formulated a list of rules for increasing the number of successful marriages.

According to Dr. Clifford R. Adams, assistant professor of psychology, the rules they agree upon are:

1. The couple should have saved at least 10 per cent of their expected annual income before they marry; that is, if their income will be \$1,800, they should have saved \$180.
2. Both the man and the woman should have certificates indicating proficiency in some vocation.
3. No remarriage should be permitted for a person with a record of two or more divorces.
4. Pronounced neurotics, dipsomaniacs, drug addicts, insane or feeble-minded persons, those with a criminal record of three or more offenses (excluding traffic violations), and those with venereal diseases should not be allowed to marry.
5. Candidates for marriage should be able to show a certificate from a course in home management and child care.
6. The couple should have birth-spacing information.

Charcoal Being Used Again

The use of charcoal in making light-weight alloys for aircraft construction has resulted in a substantial increase in the production of charcoal in Canada.

Before the war charcoal was used in Canada principally for kindling fires and as a fuel for charcoal cookers. On this continent charcoal was at one time employed in the manufacture of steel but has been largely replaced in that industry by metallurgical coke. In several parts of Europe, in Australia, and in other countries where the price of gasoline is high, charcoal has been used extensively in recent years as a source of producer gas to replace gasoline in the operation of internal combustion engines for buses, tractors, trucks and motor cars. With further reduction of supplies of gasoline such use may assume importance in Canada.

Charcoal may be made from any species of wood but in Canada it is generally made from the heavy hardwoods—maple, beech, and yellow birch.

Pennsylvania Big Game State

The nation's population of big game has been estimated at 5,964,000 animals. This was a 2 per cent increase over 1939 estimates.

The leading big game animals were white-tailed deer, with an estimated population of 3,526,000. Mule deer came second with 1,523,000 and Columbian black-tailed deer third with 323,600. Elk were in fourth place with 207,000, and pronghorn antelope fifth with 176,600. Black bear ranked sixth with 160,900.

Of the 15 groups and races catalogued, woodland caribou were in last place with 15 individuals, all in Minnesota, and grizzly bear second lowest with a population of 1,250 in six states.

Pennsylvania was cited as the leading big game state with 777,300 animals of five species. Michigan was a close second with 743,500. Others in the "big ten" were California with 535,800; Wisconsin, 406,000; Colorado, 313,300; Oregon, 306,700; Texas, 295,000; New York, 251,000, and Utah, 210,000. Idaho took eleventh place with 205,700.

Trailers Helping Uncle Sam

More and more trailer camps of a new type are springing up daily near defense industrial plants. Camps, not of vacationing families but camps filled with families whose men are keeping Uncle Sam's production wheels going and whose women are busy making homes even though they be in miniature. They are discovering that their homes, though small, can be very attractive.

The up-to-date trailer contains everything the modern housekeeper desires or requires. Every square foot is utilized to the best advantage and put to some practical use.

ELEPHANTS IN IOWA

A tin elephant, very life-like in appearance, has been on the E. H. Koehler farm near Hawkeye for 38 years. Mr. Koehler obtained the elephant from a merchant for whom he worked. The animal was taken to various communities and set up in a store front to draw attention to the fact that the merchant was in town and clothing could be ordered. A coat of paint has been given the elephant every other year and this has preserved it very well.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE

Timely Information Prepared By Iowa State College Specialist

Electric motors play a major part in lightening chores for farmers. Their pump water, grind feed, shell corn, milk cows and perform many other jobs. But a little extra care is needed to keep them running smoothly during cold weather, and to make them last for the duration of the war, and longer.

An electric motor should be kept clean, dry and properly lubricated at all times. Cold weather calls for a lighter motor oil than that used during the summer. A good grade S.A.E. 20W light mineral (petroleum) oil is best for below freezing temperatures. Most small motors have a small yarn packing that needs to be oiled only two or three times a year.

Dust or dirt may injure the bearings, or if it clogs the vent holes or slots on the motor, it may cause overheating and possibly fire. Milking machine motors should have a protective cover to keep chaff, straw and cobs from falling on them and an air hose should be used to blow the dust and ground grain out of motors on feed grinders at least twice a year. A vacuum cleaner may also be used to suck dust out of motors.

Water system motors are too important to leave unprotected, for rain and snow can put a good motor out of order in a short time. A house should be built for the motor to keep it dry and in good working order.

Safety demands that electric motors be wired properly. The use of ordinary lamp or extension cord is hazardous and should be avoided. Permanent connections should be made by an electrician, making sure that no bare wires or knife switches are present.

Electric motors require special fuses for protection. A 30-ampere fuse will not protect a 1/4 horsepower motor, as the motor will usually burn up before the fuse blows. A 15-ampere fuse or smaller will give some protection, but special fuses especially made for electric motors are best. One such fuse, known as the Buss Fusetron, is available at most electrical stores. It will give more protection to electric motors than the conventional type of fuse.

WEEKLY NEWS ANALYSIS

Parity Vote Heralds Farm Price Rise; Allies' North Africa Strength Grows As Yanks Wipe Out Rommel's Advance; RAF Raids Strafe German U-Boat Nests

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union

On their way to continue the offensive against the Japs at Salamaua in New Guinea, Australian troops pass through a group of Americans who had been in action earlier. This photo was made after the successful close of the Papuan peninsula campaign against the Japs.

TUNISIA: Rommel Pays Dearly

The 50-odd miles that Marshal Rommel had originally advanced against American forces in Tunisia had cost the "Desert Fox" dearly. For not only had most of that gain been lost in retreat, but the Axis offensive had been converted into a first-class Axis setback, with heavy casualties.

Pell mell through the Kasserine pass Rommel's Afrika Korps tank forces had retreated to the southwest under powerful Allied gun and aircraft attack. Seasoned observers termed Rommel's maneuver, a typical Axis hit-and-run action. The Axis had found the American forces overextended and trying to man untenable positions. The Axis had struck hard. When the American high command met this offensive with a more powerful counteroffensive, the Axis ran for cover.

Thus Rommel's first major bid to cut Allied communications lines had been thwarted.

As the Allied fortunes in Central Tunisia thus turned brightly upward, reports disclosed that General Sir Bernard Montgomery's British eighth army had been on the move in North Africa and had struck with augmented power in southeastern Tunisia. Smashing with tanks into the Mareth line, General Montgomery had seriously threatened Rommel's rear.

HITLER BOASTS: Nazis Not Yet Beaten

Adolf Hitler's absences at key Nazi party gatherings had caused speculation as to his health and reasons for remaining under cover. But wherever he was, his remote-control message to the German people via a Munich proclamation was as harsh and fanatical as if der fuhrer had delivered it personally.

Ominous to the people of occupied Europe was Hitler's declaration that "we shall not scruple about foreign lives when such hard sacrifices are exacted from our own lives."

Germany's future and the future of Europe, he said, will be decided on the Eastern front. He boasted that enemies who believed they almost had Germany down would be "terribly disappointed."

"No matter how great the coalition of our enemies may be," his proclamation added, "it is smaller in power than the strength of the alliance of our peoples."

4,403 NEW SHIPS: To Help Beat Axis

Funds for the construction of 4,403 ships for the Maritime commission were approved when the house appropriations committee reported an appropriation bill providing \$6,298,530,435.

The current shipbuilding program to thwart the Axis submarine peril and provide transoceanic facilities for men and supplies has been mapped through 1943, according to Admiral Emory Land, director of the Maritime commission. The schedule called for construction of 2,242 ships of which 554 were delivered before January 1, 1943. In addition, he said, it was proposed to extend the program to provide for 2,161 additional ships to be contracted for during 1943.

FARM PRICES: Wickard vs. Senate

When Secretary of Agriculture Claude R. Wickard requested congress for a "clear mandate" to proceed with his 1943 farm production program, he asked for sanction to attempt the difficult feat of increasing farm prices without raising prices to consumers. The "clear mandate" was appropriation by congress of \$100,000,000 for incentive payments.

But the senate farm bloc had ideas of its own about solving the farm income riddle. Legislation providing higher ceilings on prices of some farm commodities passed the senate by a 78-2 vote. Under the terms of the new act, the government no longer would deduct benefit payments from ceilings.

How much this measure if finally approved by all branches of the government would add to the food bills of consumers was a question neither the department of agriculture nor the OPA was prepared to answer immediately, because of technical factors involved.

OPA officials, however, expressed the view that increases in living costs would be considerable.

AIR OFFENSIVE: Allies Harass Europe

Although Allied land operation offensives against Hitler-held Europe were still in the blueprint stage, the offensive by air continued to gather momentum.

Wilhelmshaven, the major Nazi naval base, and Lorient, the vast Axis submarine base on the French coast, were repeated targets. The RAF celebrated its 16th raid on Wilhelmshaven by bombing key objectives without the loss of a single plane. In one of the raids on Lorient Allied fliers dropped more than 1,000 tons of explosives.

In a summary of operations, an RAF spokesman revealed that 100,000 tons of bombs had been dropped on German objectives to date in the war and that 2,000 daylight sorties had been made by the bomber command in 1942 alone.

CAFE RATIONING: Streamlines Bill-of-Fare

Diners-out in restaurants and hotels faced slimmer helpings on their plates and a streamlined bill-of-fare reducing the variety of foods offered, as enforcement of the food administration's rationing orders for commercial eating establishments was undertaken.

Aimed primarily at food waste, the orders governing restaurants, hotels and other institutions did, however, provide a larger proportionate allotment of canned and processed foods than individual householders were permitted to have. Because allotments were based on the number of persons served in December rather than on the amount of rationed foods actually served, small cafes and stands would get a proportionately larger share of canned and processed foods than places that serve for the most part complete meals.

Restaurant and hotel allowances were set at a minimum rate of 13 per cent larger than those for households.

EASTERN FRONT: Russians Roll On

All along the eastern front the Russians had continued a series of blasting offensives. Each offensive was a battle unit in itself, but added to all the others it formed a pattern that was inexorably moving westward across the map toward the Dnieper river.

Military observers were asking whether the German defenses on the Dnieper line were as strong as the anchors the Axis had lost further east in the Don and Donets river basins. If sufficient time had not been available to strengthen this secondary line, then the Nazis faced a crisis more serious than anything that yet confronted them.

In the upper Ukraine the Red armies had moved steadily forward on a wide front toward the Moscow-Kiev railway, their offensive based on a triangle formed by recaptured Sumy, Lebedin and Akhtyrka.

To the south the Germans had fought violently in an effort to halt the Russ maneuver for enveloping the remainder of the Donets basin from which hundreds of thousands of Axis forces were seeking to retire in some semblance of order.

SOUTHWEST PACIFIC: To Have and to Hold

Three activities had continued to occupy the attention of American and other Allied forces in the Pacific war theater. These were 1—To hold the territorial gains they had already exacted from the Japs; 2—To destroy enemy aircraft installations, dock facilities and ships in nearby occupied territory; 3—To gather strength and momentum for further full-scale land and sea blows at the Japs.

In unremitting "softening up" tactics, heavy American bombers in attacks on the Jap base of Rabaul in New Britain scored hits on two Japanese warships, drove a third onto a reef and damaged a 10,000-ton cargo vessel. U. S. planes scored hits on a Jap barge at Rekata bay in the northern Solomons and strafed enemy positions at Munda.

Indications appeared that the British drive against the Japs in Burma was gathering steam preparatory to a major movement to retake Burma and open the supply road to China. The strength of the British was indicated by the fact a Jap effort to raid Assam airfield resulted in the loss of 30 planes.

TURKEY: Watches and Waits

A watchful waiting policy based on a determination to stay out of the war if possible but to enter the fight if necessary was enunciated by President Ismet Inonu of Turkey. Inonu pointed out that the final decision might not be in Turkish hands.

Calling all Turks to intensify their preparedness against any eventual-

PRESIDENT INONU
... 'decision not Turkey's'

ities, President Inonu declared: "We are grieved by and suffer from the global disaster. We shall do our utmost not to be entangled in it nor contaminated by it, but we know that it is not entirely within our power to stay out of the war."

Turkey has spent more for defense in the last four years than at any time in her history, he declared.

4 TO 1 RECORD: For U. S. Airmen

Americans learned with pride that their fighting airmen had destroyed four enemy planes for every one of their own knocked out of the skies in 1942.

An official tabulation covering complete operations for the last year showed that army, navy and marine fliers shot down at least 2,587 of their foes. This total did not include hundreds of planes listed as probably destroyed.

Aircraft losses by all American armed services last year totaled 609. Some of the fliers were shot down by anti-aircraft fire, others simply did not return from combat missions for reasons unknown. A majority of the 609 losses, however, resulted from actual combat with enemy airmen.

4TH FDR TERM?

As informed observers were predicting that the war would still be in progress in 1944, politicians were prophesying that the Democrats would draft President Roosevelt for a fourth term.

In the van for the "fourth term for Roosevelt" movement were Governor Neely of Maryland and Congressman Adolph J. Sabath of Illinois.

Dean of the house, Sabath said he had discussed the proposition with the President and told him "he owe it to the country to run again."

Washington, D. C.

RUSSIAN SOCIALISM WANES

The Russians are doing more than reversing the direction of Nazi military movement. They are also reversing certain important political and social directions.

Americans in Russia now report the reappearance of shoulder insignia on the officers of the Red army—for the first time since the dark days of the Revolution.

In those days, officers who supported the Bolshevik movement wore the epaulets from their uniforms as a mark of democracy. Those who failed to do so were regarded as enemies of the Revolution, and in some extreme cases, mobs attacked them, drove nails through the epaulets into their shoulders.

There is also a change in official awards or decorations, indicating that Bolshevik scorn for heroes of the past is vanishing. Three of the most coveted decorations of the Soviet Union today are the award of "Nevski," who was a 13th century prince, and the awards of "Suvorov" and "Kutuzov," who were Czarist generals at the time of Napoleon.

Also the St. George's cross, which would have been torn from the breast of the wearer a few years ago, has made its reappearance at official functions.

The U. S. public has the impression of modern Russians as dressed in coarse, formless clothing, but reports from the USSR today state that Red army officers dress with such punctilio as to make American officers look shabby by comparison.

LITTLE AID TO CHINA

Just back from Chungking, General "Hap" Arnold, chief of the air forces, gave a glowing report to Secretary of War Stimson regarding Chinese resourcefulness in battling the Japs. He was amazed and full of praise for Chinese ingenuity in repairing planes, landing in cow pastures and conserving fuel.

As far as General Arnold is concerned he would like to send the Chinese a lot more planes—though in the past he has not been too keen about it. (Incidentally, one reason for sending him to China was to win him over to the Chinese cause.)

However, despite Madame Chiang Kai-shek's graceful appearance here, despite Hap Arnold's enthusiasm, despite the President's public statements, China is not going to get anything much in the way of supplies.

Reasons Listed.

Reasons are: (1) the impossibility of opening the Burma road now with the monsoon season only a few weeks off; (2) the absolute necessity of cleaning up Africa and preparing for a drive against Hitler in Europe; (3) Chinese political dissension which requires too many aims for personal armies.

Some war weapons will be flown over the Himalayas, but not much more than in the past.

SECRET RUMML PLAN VOTE

The vote of the house ways and means committee on the Ruml plan was secret, but inside fact is it never had a chance of getting more than five votes.

The flood of mail reaching committee members, at first favorable, turned round and showed conclusively that the country was against outright postponement of taxes. Underlying sentiment expressed in the mail was that although high taxes hurt, it was unfair to postpone too much of the war cost to the next generation.

Also the committee became more and more convinced that the Ruml plan was largely cooked up for the benefit of top bracket incomes, and if taxes were forgiven one year, it would mean shifting a much greater burden to lower income groups to make up the deficit.

This, they concluded, was just what Mr. Ruml's war wealthy clients wanted.

CURE FOR TYPHUS

By way of London has come word that the Germans have evolved a cure for the dread disease typhus. If so, it is a discovery meaning the lives of thousands of men in the eastern front. In 1914 "General Typhus" was responsible for more lives than machine gun fire, and from time to time it has ravaged the Balkans, Russia and eastern Europe ever since.

The German cure was discovered by a Dr. Van Meerdoek and is a combination of atabrin and plasmo-chin. U. S. Public Health officials have their fingers crossed regarding the cure, but British medical circles seem to be favorably impressed.

CAPITAL CHAFF

General Eisenhower has sent word to Washington that there are too many news correspondents running around North Africa.

Budget Bureau has prepared a plan for consolidating all picture-making branches of war department—signal corps, air corps, special services, and strategic services.

The senate's 75-year-old athlete, Theodore Green of Rhode Island, eats a buttered muffin and coffee for breakfast, a bowl of soup and a glass of milk for lunch.

Building A Peaceful World

By Mrs. Franklin D. Roosevelt
(WNU Feature—Through special arrangement with Collier's Weekly)

One of the great lessons we Americans will have to learn if we ever hope to build a better foundation for peace is that human beings the world over have to be approached as human beings and not as members of a race or as adherents of a certain religion—but just as people whom you may like or dislike according to their individual characteristics.

I may be a Chinese, an Arab, a Jew, an Indian, a Negro, a German, a Frenchman, or a Britisher—still I must be evaluated, if I am to be fairly judged, on the basis of being just a human being.

We have never done this in the world before—and we have never had peace in the world thus far.

Freedom From Fear.

One of our four freedoms states that we shall have "freedom from fear." Freedom from fear, of course, means that the world over, people will be protected from aggression, people will be protected from persecution because of their race or their religion.

People will be safeguarded from hunger and want, too, by an economy which takes into consideration the basic needs of all the people, the world over.

If that is going to become a reality, then the first thing we have to do is to learn to meet our fellow human beings, recognizing the fact that we will not love all of them, but we will love some, and we must get on with all, regardless of difference of race or creed.

Those who are evil will have to be restrained. We do that in our own countries everywhere.

The Chinese philosopher, Lin Yutang, says in substance, in a recent article, that our moral attitudes the world over are the important factors, not what we know or what we have, but our ability to choose between right and wrong. This may be the basis on which we shall have to develop some of our future cooperation.

Our boys in Africa and in the Solomon Islands deal with natives who haven't yet had a chance to develop a very high type of civilization. These boys are going a step beyond their first contacts in Great Britain and Australia, and wide differences will develop, but the beginning of the development is in Great Britain.

If we can build on the good will which Great Britain has toward us at the moment (largely brought about because, in the trials through which the British have gone, the generosity of the American people has made them grateful) we will be beginning a new era in the world.

Generous, Not Sacrificial.

Over here, it is hard to understand just what certain things have meant to Great Britain, because while we have given money which has sent mobile canteens, ambulances, medical supplies, clothing, food, etc., in great quantities to Great Britain, we were only being generous, not sacrificial.

We have sent old clothes, but they were things we could do without. However, the people who received them over there could not do without them.

A woman in a London crowd, for instance, one day plucked at my sleeve and said, "My little girl would have been cold if it had not been for the warm clothes the children of America sent us."

The British people show their gratitude by wanting to do things for our American soldiers. They realize that our coming into the war is a great help to their own boys who have fought in all parts of the world for the past three years. But their gratitude goes deeper than that: it touches the lives of everyone in that group of islands.

It calls out a traditional feeling which I think is ingrained in the people of the United States and in the people of Great Britain—if we have received something, we want to make a return, at least in good will.

This is a basis on which I believe we can readily and permanently build.

Well, to be really effective, the United Nations will have to build among the people of all the nations an understanding such as is now growing between the people of Great Britain and the people of the United States.

It will be slow, but the building of a peaceful world is not something to be accomplished by the writing of a treaty. It takes time to work out the relationships of men and women, but if we hope for peace, it must be done. And I think a good beginning has been made.

Paper Parachute
has been perfected which can
load up to 50 pounds.

Relief At Last For Your Cough

Creomulsion relieves promptly cause it goes right to the seat of trouble to help loosen and soothe and heal raw, tender, inflamed bronchial mucous membranes. Tell your druggist to sell a bottle of Creomulsion with the understanding you must like the quickly allays the cough or you to have your money back.

CREOMULSION for Coughs, Chest Colds, Bronchitis

NERVOUS? No Pep or Vitality? INDIGESTION? Feel All In? Rundown?

All this—and even serious illness may be due to B Complex Vitamin deficiency. Play safe! Take GROVE'S B Complex Vitamins and get all medically recognized B Complex vitamins. Quality—potency—absolutely guaranteed! Unit for unit, you get finer quality at any price. GROVE'S B Complex Vitamins only 29 cents for regular size...only a dollar for the large size—over a month's supply. Get GROVE'S B Complex Vitamins today!

RESINOL

I WAS A SLAVE TO CONSTIPATION

Talk about being in bondage! I felt as if I were walking around in chains. Purges only helped me temporarily. Then I learned the cause of my constipation. It was lack of "bulk" in my diet. So I took a friend's advice and began eating KELLOGG'S ALL-BRAN. It sure is a grand-tasting cereal—and did just what he said it would do. It got at the cause of my constipation and corrected it!

If your trouble is like mine, why don't you try ALL-BRAN? Just eat it regularly, drink plenty of water and—"Join the Regulars!" Made by Kellogg's in Battle Creek.

The Heart Remembers

Gratitude is the memory of heart.—Massieu.

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, dizziness, nervousness, irritability, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that made especially for women.

Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms. Follow label directions. Pinkham's Compound is worth trying!

Use at first sign of a COLD

666 TABLETS, SALVE, NOSE DROPS, COUGH DROPS
Try "Rub-My-Tism"—a Wonderful Little

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and worry, irregular habits, improper eating, drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess and other impurities from the life-blood.

You may suffer nagging backache, headache, dizziness, getting up at night, leg pains, swelling—feel constantly tired, nervous, all worn out. Are some of kidney or bladder disorders are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful waste. They have been used for more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

DOAN'S PILLS

HIGHLIGHTS . . . in the week's news

WASHINGTON: More than 3,000,000 babies were born in the United States last year, the census bureau estimated. This was the largest number of births in any year in the nation's history. The previous record was in 1921 when 2,950,000 were born. The 1942 record compared with an estimated total births of 2,715,000 in 1941 and 2,550,000 in 1940. Officials estimated fewer 1943 births.

NEW YORK: Unless certain merchandisers cease encouraging mailing of an excessive number of parcel post packages to the overseas navy personnel, the mailing privileges may be restricted, according to a navy statement. While army personnel abroad must obtain prior permission from commanding officers to receive parcel post packages, navy men do not.

Gardens on Home Front

Efficient Vegetables Can Be Raised for Entire Family on Small, Fertile Sites

Beginners Told to Plan Plots Before Starting Seeding

Variety for Everybody.

they will still have to face the Axis agents known to gardeners as weeds, insects, and diseases. But they will know at least that their own home-front offensive is under way and that the seeds of Victory are in the ground.

The gist of garden fundamentals has by now been reduced to terms so simple that they make gardening seem easier than it really is—so easy in fact that a great emphasis has been put on perseverance. No one reading how-to-do-it garden instructions, it is pointed out repeatedly, should set his foot to the spade unless he is determined to stay by his job without wasting seed, fertilizer, or effort.

The first requirement that the new gardener will find in the specifications written by the experts is for a garden spot that is both sunny and fertile. And for his help in judging fertility he is given the rule-of-thumb: "If the weeds grow rank, the soil is fertile." Good soil, moisture and sunshine are three essentials. If they are missing, no gardener can expect to grow enough crops to justify his use of seed, fertilizer and effort.

The home gardener this year is advised to grow just as nearly all the fresh vegetables for his family as he possibly can. A garden 50 feet by 100 feet tended and kept growing all season is, for example, expected to produce enough vegetables to give each member of a family of five at least three servings a day, which comes about as close to providing the needed four to seven daily servings of fruits and vegetables as many gardeners can come. Smallest garden size for which a garden plan is suggested by the department of agriculture is 30 by 50 feet, but even smaller areas will grow a worthwhile crop of tomatoes and a few other crops, if greater space cannot be obtained.

Choose Vegetables You Like

With the area located, the Victory Gardener's next step is putting the garden on paper, an exercise not only interesting but also especially helpful for the inexperienced. Arranging the garden properly includes attention to a few general principles. Rows, for example, should not run up and down hill if the garden slopes very much, but if the area is level the rows should run the long way for convenience. First plantings are generally best placed along the south or east side of the garden, with later crops being sown progressively across the area, and whenever possible the tall growing plants should be on the west or north side of the garden so they will not shade other plants.

The main item in planning a garden is, of course, choosing what to plant. One thing is certain. There is little to be gained in growing vegetables that the family does not like, but within the family taste there are many garden products from which to choose. Green leafy vegetables—leaf lettuce, cabbage, spinach, chard, collards, kale, and turnip greens—should be well represented in every garden. Tomatoes and beans are also likely to be grown generally. All these are rich in vitamins. Potatoes and corn are among the best energy foods, but they require considerable space and are thus not recommended for very small gardens, which should specialize on the valuable vitamin, or protective, vegetables.

No garden plan, of course, is suitable for all tastes or all localities, but an example of one balanced garden is provided by Dr. Victor H. Boswell in his "Victory Gardens." For the 30 by 50 "very small garden," Dr. Boswell suggests 13 vegetables planted in 14 rows. Those planted in spring include two 50-foot

rows of pole snap beans, two rows of pole lima beans, two rows of tomatoes, half a row of lettuce, half a row of chard, and one row each of beets, carrots, turnips, cabbage, onions, radishes, and spinach. When these are harvested, the "succession" crops include two rows of collards as well as later plantings of the other vegetables.

Need Only Four Tools

Inevitably, gardening on paper leads to the real thing, and that means tools. Fortunately, however, at a time when metal is scarce, nothing elaborate is needed. There are many garden implements, but four of them will serve all purposes very well—a spade or spading fork, a steel rake, a common hoe, and a strong cord.

Spading can start as soon as the land is sufficiently dry in spring and the garden has been cleared of debris. Eight to ten inches is a good depth for spading if the top soil is deep. On thin layers of top soil experienced gardeners are careful not to turn up too much of the infertile subsoil. To increase the soil's fertility, the spade should mix in some well-rotted leafmold, manure, or other decayed organic matter if these fertilizers are available. Every 25 square feet of the garden can well take as much as a bushel. Commercial fertilizer will also be needed on most gardens, but its application can best be delayed until after the spaded clods have been broken up and the whole garden worked up with the rake and smoothed out for planting. Then the fertilizer is applied in bands along the planted rows.

This year Victory Gardeners will have a special fertilizer with 3 per cent nitrogen (about 85 per cent of it organic), together with 8 per cent of phosphoric acid and 7 per cent potash. Described as the best formula that can be made available to victory gardeners during the wartime emergency, when war calls for so much chemical nitrogen, this 3-8-7 mixture comes in packages of 5, 10, 25, 50, and 100 pounds net weight, labeled "Victory Gardener Fertilizer—for Food Production Only."

This fertilizer is best applied along the garden rows in a band about three or four inches wide, about two inches from the line where the seeds will be sown or the plants set. A wide furrow about two inches deep is scooped out with the hoe. The fertilizer is spread uniformly along this furrow, at the rate of 1 pound per 24 or 25 feet or row, mixed with the soil, and covered about two inches deep. It should not touch the seed. Broadcasting fertilizer is easier than applying it in bands, but unless the rows are very close the broadcasting brings less efficient results. If the Victory Garden fertilizer is broadcast, it should be used at the rate of three or four pounds per 100 square feet and then mixed thoroughly with the soil.

Don't Sow Too Thick

Common to all gardeners at planting time is the danger of sowing seed too thickly—a mistake that is wasteful not only of precious seed but also of time. For seed that is sown wastefully produces seedlings that must later be thinned at the expense of time and sometimes backaches.

Bean and pea seeds should be spaced as the plants are expected to stand, for these vegetables should never be thinned in the rows. Beet and chard "seeds" are really fruits containing several seeds and should thus be sown no thicker than the plants are to stand, although some thinning will be needed. Cabbage and tomato and onion plants and onion sets are also placed where they will remain.

Plants Should Be Spaced.

Marines Get Coffee And Sugar in Tropics

Uncle Sam's Leathernecks stationed in Puerto Rico do not worry about two of the most important staples rationed in the United States—sugar and coffee.

Although the coffee crop in Puerto Rico is not what it used to be, nobody, including United States marines, goes without coffee. It is still part of life on the island.

THE SHE-MARINES

From the halls of Montezuma
To the shores of Tripoli
We will fight our country's battles
Any way the rules decree;
Though we cannot leave the country
In far places we'll be found—
In the spirit that the ladies,
When aroused, can toss around.

Oh, we can't get into battle—
That is what the rules now say,
But it wouldn't be surprising
If we somehow found a way;
We will do all we are asked to—
We will help 'em everywhere
In a way to make our buddies
Feel that we are with 'em there.

The Marines are noted scrappers—
This their slogan "Give 'em H—!"
And the "She-Marines" will surely
Have that quality as well;
Oh, we can't do foreign duty—
On this point the book is clear—
But we'll have that certain something
That will keep us pretty near.

WAACS and WAVES and SPARS...
they're dandy!
And we know they'll bravely score
But Marines are legendary
And they do a little more;
Oomph and wallop are traditions
When the male ones stage a fuss,
And before this war is over
They will say the same of us.

"First to fight!"—Well, now a lady
Doesn't stress that point a lot,
But the spirit may be catching
When the Leathernecks get hot;
Work behind the lines is scheduled—
Foes we're not supposed to
smack—
But when Nell's a Devil-Doggie
Who is gonna hold her back?

Play that "Halls of Montezuma,"
And we'll proudly take our place;
(With a very little training
We'll be singing it in bass);
We're Marines—we have our
papers—
We are in a conflict grave;
If it helps we'll get a haircut—
And we'll even get a shave!

Shoot the works and call us buddies!
That's our plea to the Marines;
They can always count upon us
Even if behind the scenes;
And when they get in there swinging
They may find us at the bat;
All the foe need do is bellow,
"Girls, where did you get that
hat?"

We've a uniform authentic
With a scarf of flaming red
And it helps provide the color
That will knock the Axis dead;
We are not equipped with weapons
In the strictest sense, that's true,
But a woman is a woman—
And she's bound to have a few!

Ad similes: As self-conscious as
a playboy in Miami Beach this
winter.

New York laundries may close as
a result of an oil shortage. From the
way our shirts come back we assumed
they were all using soft coal.

A Washington bureau has now issued
a list of directions to the public on
how to make a pair of shoes last longer.
It says in part that they should be
kept dry, clean and in repair. And
Washington says there is a paper
shortage!

"Washington is a most astounding
place. Early in the morning I think
there is no one in town and then I
discover that the editorial writers
are having a dinner in the evening
and gradually I accumulate six or
eight people at lunch. I want to see
them all but sometimes I wonder if
they will get enough to eat."—My
Day.

Would you mind going over
that again, please, a little more
slowly?

Archibald MacLeish has left the
OWI and gone back to his old job

MOVE OVER!

Elmer Twitchell wants to know if
he must take his shoes in for a
monthly inspection to prove they are
wearing out evenly.

Bombers are now rolling off the
production lines of the Ford plants.
And this fact won't make the Axis
feel any better. We can imagine
nothing so alarming as the air full of
Fords.

Well if you can't send your son to college
these days you can be fairly certain
the army or navy will.

Sewing Machine and Table Combination

NO SEWING machine should be
idle today. No matter if yours
is not the newest model, keep it
in good repair and include it in
your decorating scheme. This
sketch shows how one was fitted
into a living room to look very
smart and to do extra duty as a
table.

Plywood or composition board
may be used for the removable

top, (see sketch). The top cover
is of blue felt with a scalloped
band stitched around it. This is
quick and easy to do as it is not
necessary to finish raw edges of
felt. The full skirt is made of the
best part of old sheets dyed a soft
ecru tone. This is sewn to the
seam allowance of the felt and all
is tacked to the back of the re-
movable top so that it may be re-
moved easily. A pair of kitchen
stools are painted cream color and
topped with blue felt for lamp
stands. Scalloped felt also trims
the lamp shades and the cover of
an old side chair to match the
table.

NOTE—Directions for making the spool
lamps illustrated together with 31 other
conservation plans are in the new BOOK 9
which Mrs. Spears has just prepared for
readers. Copies are available at 15 cents
each. Send your request to:

Household Hints

Homemade biscuits will be different
if tomato juice or fruit juice
is used instead of the liquid called
for in the recipe.

Peroxide of hydrogen will remove
perfume stains from linen
bureau scarfs.

There are 60 drops in an ordinary
teaspoon.

Keep matches out of reach of
the baby's hands.

Frocks worn constantly always
get grubby-looking inside the collars
and across the shoulders. Sponge them
lightly but frequently with a little
eau-de-Cologne and they will keep
beautifully fresh and fragrant.

that shine.

CALOX TOOTH POWDER

Napoleon Said It
America is a fortunate country.
She grows by the follies of the
European nations.—Napoleon.

SNAPPY FACTS ABOUT RUBBER

Scientists have determined that
rubber latex as it drips from the
trees is about 60 per cent water,
28 per cent chemically pure rubber,
the balance resins, minerals,
proteins and sugars.

Clothing made water-proof by the
use of rubber was being sold in England
as early as 1791.

Beads of the five and ten cents
variety have a stronger influence
than ordinary currency in
encouraging the Yumbo Indians
of Ecuador's Oriente jungle to
haul rubber out from the waters
of the Amazon. Next to beads,
guns and machetes put the "go"
in the Yumbo.

The first rubber to be imported into
the U. S. was in the form of water
bottles. They came direct from the
Amazon district.

A full grown Hevea rubber tree
averages 30 to 60 feet in height
and its average life is 40 years
or more.

Crop Prospects Favorable

Prospects are favorable for another
record-breaking year of food pro-
duction, the department of agricul-
ture has pointed out in a summary of
agricultural developments. Howev-
er, the demand for farm products is
expected to increase more than pro-
duction.

Moisture conditions were favor-
able at the beginning of 1943 and
with only average weather from now

until harvest, crop yields per acre
are likely to be about equal to the
general level in 1940 and 1941, and
higher than in any earlier year.

Stocks of feed grains and of wheat
and numbers of cattle on feed Jan-
uary 1 were at an all-time re-
cord. Numbers of sheep and lambs
on feed for market were only slight-
ly below the record set a year
earlier.

Run Rows Long Way.

Vegetables that should be planted as early as the ground can be tilled are potatoes, lettuce, cabbage, carrots, beets, parsnips, peas, Swiss Chard, onions, spinach and radishes.

Gymnastic as well as Music should begin in early years.

C. A. Larsen and Martin Barz were at Des Moines on business Tuesday.

Lloyd Anton arrived Wednesday from Randolph Field, Texas, for a 10 days visit with Klemme friends.

Miss Harriett Gibbs of Mason City, spent the week end visiting with her parents, Mr. and Mrs. H. R. Gibbs and family.

Robert Schulz, who has been employed in the Twin Cities is home with his parents, Mr. and Mrs. Frank Schulz, east of Klemme.

Mr. and Mrs. Gerald Keorner, Mrs. Albert Keorner, and Mrs. Glen Bridges were Mason City visitors Saturday.

Mr. and Mrs. Will Barz and daughter, Mrs. H. G. Voetberg of Garner, were visiting with Klemme relatives Sunday afternoon and evening.

Bruce Arnold, freshman student at Iowa State College, Ames, spent the week end visiting with his parents, Mr. and Mrs. E. J. Arnold and family.

The Liberty and Klemme Methodist Brotherhood will meet Monday night, March 22 at the Klemme Methodist Church at 7:30 p. m. A program is being planned.

Mrs. John Bock went to Mitchellville the latter part of the week for several days visit with her son-in-law and daughter, Mr. and Mrs. Lyle Burr and family.

Sgt. Asa Arnold, who is stationed at Camp Adair, Oregon, arrived in Klemme Tuesday forenoon for a visit with his parents, Mr. and Mrs. F. A. Arnold and other relatives in the community.

Mr. and Mrs. Matt Smith and daughter Ruth spent Sunday at Iowa Falls visiting with Mrs. Smith's mother, Mrs. Ahrenkeil, and other relatives. Mrs. Ahrenkeil fell a few weeks ago and fractured her hip.

At the annual school election last week Monday 21 ballots were cast. C. G. Waterman and H. R. Gibbs were re-elected for the three-year term and E. F. Jacobs for one year. F. A. Arnold was re-elected treasurer for two years. No other candidates were filed.

Rev. and Mrs. Wm. Zabilka and son Billy, of Sanborn, Iowa, spent Monday and part of Tuesday in our community. They were guests at the E. J. Arnold home for supper Monday evening, and spent the night at the C. A. Larsen home. Billy Zabilka has received notice to report for army duty in about a week. He did not attend college this semester as he was awaiting his call to the service.

Herman Paul, accompanied by Bernard Smid, drove to Des Moines Sunday to assist Mrs. Eddy Epps, daughter of Mr. Paul, to move and store her household goods. Mrs. Epps is now taking a refresher course in compometer machine operation and will be employed in that line of work. Le Roy, grandson of Mr. and Mrs. Paul, accompanied his grandfather home. Their little granddaughter, Tally, has been in Klemme for several months. Mr. Epps is in the armed service.

Official Service Flags at Times Office. \$1.00 each.

BETTER IOWA

GARDENS

(A special column prepared for The Klemme Times by Iowa State College Specialists)

Folks who want more than 10 ounces of fruits and vegetables a week this year will have to acquire it from a home garden. Present rationing permits the purchase of only a little more than an ounce of processed food per day.

The need for mobilization of gardens to meet a goal of 125 quarts of processed vegetables and fruits per person each year is essential to civilian health. Thus, the immediate decision and determination to garden is the patriotic duty of every family.

A successful garden takes careful planning, and in this effort the whole family—especially children of high school age—can help.

The most important part in the garden plan is the provision for successive plantings of fast-maturing vegetables during the spring weeks. This avoids the accumulation of surpluses and reduces waste to a minimum.

Sowing part of the seed of bush beans and sweet corn at 10- to 15-day intervals from the first planting time until July 15 is a highly recommended procedure. The total number of rows of such vegetables needed for the family should be reserved with the seed sown in blocks at regular intervals until all the rows are completed.

Having small quantities of vegetables mature at frequent intervals over a period of several months provides fresh vegetables for table use over longer periods and lightens the burden of canning. Two or three successive plantings of lettuce, radishes and other cool-season vegetables can be made at weekly intervals.

The next important item is to make the garden efficient from the standpoint of arrangement and planting. The ideal half-acre family-sized farm garden should be rectangular with the rows running lengthwise for most efficient cultivation.

Rows in small gardens should run the short way.

Efficient gardens, too, are ones in which small fruits, rhubarb, asparagus and other perennials are all together in a block at one end or side. Such vegetables as tomatoes, corn, pole beans, chard, should occupy the ground all season in another block. And fast-maturing vegetables such as peas, bush beans, carrots and beets should be together in another block.

HAWKEYE PRESS CLUB MET SATURDAY EVENING

Mr. and Mrs. R. A. Jorgenson attended a meeting of the Hawkeye Press Club, held at the Hanford Hotel Saturday evening.

The club will hold their next meeting at Des Moines on Friday noon, April 16th during the annual meeting of the Iowa Press Association.

The Club voted to present the name of Lester Benz, publisher of the Sheffield Press, and President of the Hawkeye Press Club as their candidate for director on the Iowa Press Association board.

Publishers and their wives were present at the meeting and banquet Saturday night from Greene, Allison, Sheffield, Nora Springs, Clear Lake, Northwood, Mason City, Thompson, Manly, Thornton, Rockford and Klemme.

FATHER OF MRS. BEN COOBS DIED SUNDAY

Mr. George Wilson, father of Mrs. Ben Coobs of Klemme, died at Columbus, Indiana, Sunday evening after an illness.

Mrs. Coobs left early last week for Indiana and arrived at Columbus last Thursday to be with her father.

APPLICATIONS WANTED FOR SCHOOL JANITOR

The Board of Education of the Klemme Independent School District will receive applications for Janitor of the Klemme Public Schools up to and including Saturday, March 20, 1943, for the vacancy beginning April 1, 1943.

Applications will be received by the Secretary of the Board and should state salary desired.

The Board reserves the right to accept or reject any or all applications and bids submitted.

A. J. KUDJE,
Secretary of the Board.

BIRTHDAY ANNIVERSARY

Mrs. Fred Nagel observed her 74th birthday anniversary Monday, March 15th.

Mrs. Della Christie, mother of Mrs. Sumner Trumbull, celebrated her 81st birthday at the Trumbull home today.

Mrs. Edward J. Schaefer celebrated her birthday Sunday. She received many cards from her friends.

As a salable crop, soybeans appear much more attractive now for 1943 than oats.

MARION IRVINE AND
ASA ARNOLD WED
KLEMMME, IOWA

Ceremony Took Place At
Presbyterian Church
Saturday Afternoon

Three o'clock Saturday afternoon, March 20, 1943, the wedding of Marion Irvine, eldest daughter of Mr. and Mrs. John Irvine of Adair, Oregon, formerly of Iowa, was solemnized in the Presbyterian Church at Klemme, Iowa, with the Rev. Thompson officiating. The ceremony was aided by pipe organ music by Whannel, and two vocal solos by "You," and "I Love You" by Mrs. Thompson.

Ushers were Mr. William Irvin, brother of the bride, and Mr. J. Gibbs, cousin of the groom. Maid of Honor was the Misses Jean and Elizabeth McElhinney, and cousin respectively of the bride. They were dressed in floor length dresses of blue and carried bouquets of yellow roses. Another of the bride, Miss Margarette, was Maid of Honor. Her dress was of pink and she carried a bouquet of red roses. The bride, seated on her father's arm, wearing a white satin dress with finger-tip veil held in by a tiara, and a necklace was the gift of the groom. The groom's brother, Fred J. Arnold, served as best

Man's Wedding March was played by Mr. Whannel at the ceremony. The bride and groom entered the church and the recessional. The double ceremony was read by the Thompson.

Following the wedding about 100 guests were entertained at a reception in the church parlor.

This week the young couple are on a wedding trip, following which Sgt. Arnold will return to Adair, and Mrs. Arnold to Klemme.

Those from this community who attended the wedding, besides Ron-Gibbs and Fred J. Arnold were Fred J. Arnold and Bobby, and Mrs. F. A. Arnold, Mr. and Mrs. E. J. Arnold, Mrs. Emelia Arnold, Mrs. C. B. Tice of Mason City, Mrs. Lena Schroeder, who had several days preceding the wedding at the Irvine home.

On Saturday the above guests were entertained at a delicious turkey dinner at the farm home of Mr. and Mrs. Irvine.

\$3 COLLECTED IN RED CROSS DRIVE HERE

Mrs. George Lawhorn, chairman of the Klemme drive for Red Cross Relief, reports that the total \$491.53 was collected and turned in up to Tuesday morning. Since the last list was published the following contribution has been received.

Mr. and Mrs. Harvey Barz \$5.00.
Methodist Standard Bearers \$5.00.
Ben Buehlmeier \$1.00.
William Buehlmeier \$1.00.
Martha Bredbenner \$1.00.
Mrs. Christina Olson \$1.00.
Pringnitz Bros. \$15.00.
Levi Klotzbach \$1.00.
J. W. Haefner \$2.00.

MR. AND MRS. ART KUDJE HAVE ANNIVERSARY

Saturday, March 20th was the twentieth wedding anniversary of Mr. and Mrs. Arthur Kudje. On Friday evening Mr. and Mrs. Kudje, accompanied by Mr. and Mrs. H. D. Ramsay and Mr. and Mrs. Ed. Jacobs drove over to the ballroom to enjoy an evening of dancing to celebrate the event.

Our Men In The Service

KLEMMME YOUTH AWARDED SILVER BARS

Promotion of Raymond A. Jorgenson, Jr. of Klemme, Iowa, from Second to First Lieutenant has been announced at the Advanced Twin-engine Bomber Pilot Training School at Lubbock, Texas. Lt. Jorgenson received his wings and commission May 20 of last year from the same Lubbock School at which he is now serving as a Flying Instructor. He and Mrs. Jorgenson, the former M. Juanita Vaughter of Amherst, Texas, now reside at 2408 Thirty-second Street in Lubbock.

A son of Mr. and Mrs. R. A. Jorgenson, Sr., and a graduate of the Klemme High School, Lt. Jorgenson attended Mason City Junior College, the U. S. Naval Academy, and Simpson College, Indianola. He was a basketball letterman and a member of the Alpha Tau Omega fraternity. Accepted as a flying cadet Nov. 3, 1941, at Fort Des Moines, Jorgenson took all of his flying training in Texas Primary at Stamford Basic at San Angelo, and Advanced at Lubbock.

ANOTHER KLEMMME YOUTH IN NORTH AFRICA

For four months Mr. and Mrs. Levi Klotzbach had not heard from their son, Walter, but Saturday they were overjoyed to get a letter from him stating that he was well and with the army in North Africa. Walter also wanted to thank the Auxiliary ladies for the Christmas box they sent him.

VICTOR GREIMAN RECEIVES ADVANCEMENT

Lt. Victor Greiman, son of Mr. and Mrs. Wm. H. Greiman, has recently been advanced from Second to First Lieutenant.

Lt. Greiman is an aviation engineer at an aircraft factory at Dayton, Ohio.

Mrs. Greiman, the former Miss Marjorie Wicks, is employed as an assistant in a dental clinic. Both say they are happy and enjoying their work.

HAROLD WICKS' ADDRESS CHANGED

Aviation Cadet Harold Wicks is now at another field taking academic work preliminary to primary flight training. His new address: A-C Harold Wicks, Sqd. 2, Group 1, 7th AAFB Td., Oxnard, California.

COUNTY FARM GIRLS GET INCREASE IN SALARY

The Hancock County Board of Supervisors voted a pay increase for girls working at the Hancock County home. The new schedule grants wages of \$50 per month, an increase of \$10 a month over last year's pay.

HELLO, FOLKS!

Mr. and Mrs. Cecil Bridges, of Sturgeon Bay, Wisconsin, formerly of Klemme, are the parents of a baby boy, 1 1/2 ounce, born to them on Sunday, March 21, 1943. The new son has been named Rockney James. The Bridges have one other small son, Stanley, in their family.

Election Of Town Officials Will Held Monday, Community Hall

JOHN LEMKE WILL HAVE
CLOSING OUT FARM SALE

This week John Lemke, Liberty Township farmer, is advertising his closing out farm sale in The Klemme Times.

Mr. Lemke will hold his sale on Tuesday, March 30th beginning at 12:30 p. m. and will sell to the highest bidder 3 head of horses, 20 head of cattle and a fine assortment of farm machinery in good condition, including an F-20 tractor and some power equipment for same.

Turn to his large advertisement in this issue for a complete description of the sale.

LUCILLE HARTBECK, PHYLLIS SWANSON ON WALDORF HONOR ROLL

Lucille Hartbeck and Phyllis Swanson of Klemme, together with thirty-four other students at Waldorf College, Forest City, Iowa, were placed on the honor roll for the second quarter, ending February 24. No student is eligible for the honor roll who does not maintain a grade average of "B" or better.

WILL ATTEND CONFERENCE OF EDUCATORS IN CHICAGO

County Superintendent of Schools, Charles S. Whitney plans to go to Chicago on March 28 to attend the national regional conference of educators to be held at the Sherman hotel on March 29, 30 and 31. Mr. Whitney will go to Des Moines where he will be joined by four other county superintendents and Paul Norris, rural school supervisor in the department of instruction.

GEORGE LAWHORN WILL BE JANITOR AT SCHOOL HOUSE

George Lawhorn has been hired by the Klemme School Board as janitor to take the place of Clifford Montgomery who resigned.

Mr. Lawhorn begins his new duties on April first.

POLLS OPEN UNTIL 8:00 P. M.
FOR TOWN ELECTION

Monday, March 29th is town election day in Klemme and the polls will be open until 8:00 p. m.

Since the list of candidates have been filed Henry Lewis has withdrawn as councilman, which now leaves five to be chosen from the following: D. P. Anderson, Clarence Kluckhohn, E. H. Patet, Herman Priebe, James Thomas, Ed. Thompson and Art Wellemeyer.

Other candidates are J. E. Stille for Mayor; C. G. Waterman for Treasurer, and Orville Bridges for Assessor.

Spaces will also be provided on the ballot for those who desire to write in names.

GARNER COUPLE PROCURES LICENSE TO WED

Elmer Raw, clerk of the district court has issued a marriage license at Garner to John Abele, 27, and Irvadell Reemtsma, 21, both of Garner.

EAST HANCOCK COUNTY OVERSUBSCRIBES

Herbert L. Ollenburg of Garner, chairman of the war fund appeal for the Garner Chapter of the American Red Cross, which comprises the east half of Hancock County, advises that all towns and townships in the district have oversubscribed their quotas.

STANDARD BEARERS MET LAST THURSDAY P. M.

The Standard Bearers of the Methodist Church held their monthly meeting last Thursday afternoon at the home of their leader, Mrs. H. D. Ramday.

A lesson program was given and supper was enjoyed.

The number of stock sheep on farms Jan. 1, 1943, in the United States was about 3 percent less than a year ago.

SAILBOATS ALLOWED ON SIX ARTIFICIAL LAKES IN '43

Sailboat On Artificial Lake

More Iowans are planning to spend their vacations this year in Iowa than for many years, and there has been an increased demand for information regarding the use of private sailboats on Iowa's artificial lakes. Iowa statutes prohibit operation of sailboats on any artificial lake under the jurisdiction of the Conservation Commission except lakes specifically designated. During the 1943 season the Commission has okayed operation of sailboats on Lake Wapello near Ottumwa, Lake of Three Fires near Bedford, Lake Macbride, Iowa City, Lake Ahquabi, Indianola, Lake Manawa, Council Bluffs, and Union Grove Lake near Gladbrook. All privately owned sailboats on these lakes are subject to inspection by the state boat inspector. The use as sailboats of sailing canoes, row boats with sails, and all other boats not specifically designed for sailing is prohibited. To meet the approval of the state boat inspector, sailboats must be of the catboat type, with just a main sail in either gaff or Marconi rig, with the type of boat and amount of canvas subject to approval. For further information on boating on artificial lakes, consult local conservation officers or write the State Conservation Commission, 10th and Mulberry, Des Moines, Iowa.

NO SHORTAGE OF TEACHERS AROUND KLEMME

A survey is being made in Hancock county to procure a list of former teachers who could be called upon to take over teaching positions during the emergency. The Times office, at the request of the County Superintendent made a survey of the Klemme territory and we were quite surprised with the result. Many of those contacted indicated they would accept a teaching position to help out in case of an emergency.

Here is the list we compiled, the date last taught and the grade:

Art Wellmeyer 1900	Rural
J. N. Day, 1902	Rural
Mrs. J. E. Stille 1903	Rural
Mrs. Ro. Tanner 1904	Rural
Miss M. Lenz 1906	Rural
Mrs. W. F. Visman, 1911	Rural
Mrs. Ench. Arnold, 1912	Grades
R. H. E. Harvey, 1919,	H. S.
Mrs. R. A. Jorgensen 1919	H. S.
Rev. C. Groshuesch 1920	Acad'y
Mrs. Edna Thada 1920	Rural
Mrs. J. C. Thomas 1921	Rural
Mrs. Tom Roths 1923	Rural
Mrs. Lester Stille, 1923	7th-8th Gr.
Mrs. Ben Riemer 1920	Rural
Mrs. Paul Mueller, 1927	Rural
Mrs. Martin Barz, 1928	Rural
Mrs. John M. Mckick, 1932	Rural
Mrs. H. E. Harvey, 1932	H. S.
Mrs. Dwight Helps, 1932	Rural
Mr. Fred J. Arnold, 1933	H. S.
Mrs. Kenneth Zwald, 1936	Rural
Ed. J. Thompson, 1936	H. S.
Mrs. Ernest Lewis, 1936	H. S.
Mrs. Harvey Hubbard, 1936	R'l
B. H. Tanne, 1937	Grades
F. E. Neuberger, 1938	Rural
Mrs. Glen Lange 1940	Rural
Mrs. Quentin Stille, 1926	Rural
Mrs. M. M. Albers, 1926	Rural
Mrs. Eugene Groman, 1940	Rural
Mrs. M. E. Neuberger, 1941	R'l
Mrs. Carol Brager, 1942	Rural
Mrs. Wesley Patterson, 1942	H. S.

OUR PRESIDENT COULDN'T TAKE IT

Around the White House the President and First Lady of the land follow the rationing program religiously and are setting an example for the rest of the nation to follow.

The coffee evidently was running a bit low a couple of weeks ago so President Roosevelt suggested a way to conserve coffee. He ordered the coffee grounds be saved and baked again.

But Franklin couldn't take it, he is now drinking milk!

A BOUQUET TO ALL OF THE RED CROSS WORKERS

A great big applause to all of the chairmen and their corps of workers who did such a splendid job of soliciting funds for the Red Cross War Relief.

The east half of the county went far over its quota, thanks to your loyal and patriotic workers, and a bouquet to all who donated so liberally to the cause.

Our fighting men will feel proud of the folks back home.

IOWA'S RATION CALENDAR

Tires:

Class A Ration: First inspection deadline - March 31.

Class B Ration: Second inspection during four month period, March 1 - June 30.

Class C Ration or Bulk Coupons Second inspection required for three month period, March 1 to May 31.

Commercial Vehicles: Every 60 days or every 5,000 miles, whichever occurs sooner.

Gasoline:

"A" book coupons No 5 (4 gallons each) expire May 21.

Fuel Oil:

Period 4 coupons (11 gals. ea.) expire April 17.

Period 5 coupons (10 gals. ea.) valid Mar. 11, expires Sept. 30.

Coffee:

Coupon No 26 (1 lb.) expires April 25.

Sugar:

Coupon No. 12 (5 lbs.) expires May 31.

Shoes:

Coupon No. 17 in War Ration Book One expires June 15.

Point Rationing:

A, B, and C stamps valid Mar. 1 through March 31.

Hancock County Board Proceedings

8TH ADJOURNED JANUARY MEETING

Garner, Iowa, March 16, 1943
The Hancock County, Iowa, Board of Supervisors met in session on above date with F. J. Schoun, Penn. Eckels, and John Chambers present.

The minutes of the last meeting were read and approved as read.

On motion and second the wages for girls employed at the Hancock County Home is hereby fixed at \$50 per month until further notice.

Supervisor Schoun is hereby appointed a committee to investigate and cause repairs to be made in DD No 3 and 4, lateral No 26.

On motion and second the report of the Grand Jury is approved.

The Hancock County, Iowa, Board of Supervisors proceeded to organize as a Board of canvassers to canvass the result of the special election on the proposition "Shall there be a uniform series of school textbooks in Hancock County, Iowa." The official canvass recorded 239 votes favoring the proposition with 14 votes opposed.

WHEREAS, Chas. S. Whitney has made payment in full for the NE¼ of Section 36, Township 97, Range 24, land formerly owned by the Permanent School Fund of Iowa.

BE IT THEREFORE RESOLVED by the Board of Supervisors of Hancock County, Iowa, that the County Auditor send a copy of transcript of all proceedings in the matter of the sale of the NE¼ to Chas. S. Whitney together with certificate of final payment to the Secretary of State, at Des Moines requesting that a patent be issued to Chas. S. Whitney, of Garner, Iowa, as provided by law. Said proceedings are hereby approved.

On motion and second the Board adjourned to April 5th, at 9 o'clock A. M.

ATTEST:

Fred C. Missal, County Auditor
F. J. Schoun, Chairman.

PROCEEDINGS OF THE TOWN COUNCIL

Klemme, Iowa, March 8, 1943

Meeting called to order by Mayor Keraus, with Wellmeyer, Thomas, Lau and Priebe, members of the Council present.

Minutes of the previous meeting were read and approved.

On motion the following bills were allowed:

Central States Electric Co. Feb. lights	\$ 37.31
Klemme Times, Publishing Council Proceedings	1.52
Klemme Co-op. Grain Co. Coal	10.23
Arthur Wellmeyer, Salary	11.00
J. C. Thomas, Salary	11.00
Lloyd Lau, Salary	12.00
Herman Priebe, Salary	11.00
John Etchen, Salary	6.00
W. C. Keraus, Salary	50.00
C. G. Waterman, Salary	20.00
A. J. Kudje, Salary	60.00

Bill of Central States for power not allowed at this meeting due to high meter reading.
Members of the Council to act as clerks and judges of town election to be held on March 29th.
Meeting adjourned.
A. J. KUDJE, Clerk.

Rock Island

Story speeds out of the night

Lonely watchers it may seem just another train speeding through the night.

Another train? Hardly! Today there's no such thing on the ROCK ISLAND LINES right-of-way. For our trains haul the products essential to victory; carry, too, the men who fight so that some of the nations of the world may be at peace.

It has been our job ever since the call "To Arms!" was sounded and will be our job until America's foes are vanquished.

Battles are still to be fought—battles on the transportation front less than battles on some far-distant alien shore.

Courage and resourcefulness were ever American traits. They are our fighting forces to overcome the enemy, just as they help our railroads to do the seemingly impossible in transporting vital war power and the equally vital materials of war. And of great importance, too, is the splendid cooperation of patrons.

That train speeding through the night is a harbinger of the peace that is to come. Whether or not it carries the ROCK ISLAND symbol means little—all of America's railroads are united in this war-to-victory. We of the ROCK ISLAND are happy that we are privileged to have a part.

Story will speed out of the night . . . into a dawn of peace.

The Shamrock Times

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

In Algebra we have had four rules. We are working on the last one now. We were promised a test Friday, but received none.

We are studying the simple sentence in English class. We had a small test Wednesday, which wasn't so difficult.

In Science we had a test Wednesday. Some of the grades were low. We are preparing a debate on daylight saving time.

The Manual Training boys are making many items. Ivan Blumer gave us an idea. He put on his cap while using the lathe.

The Home Economics girls are cooking. They had dinner Friday in the Home Economics Room.

SOPHOMORE NEWS

Patricia Kudje, Reporter

What's this we hear about Harlan? Has somebody else taken his place with TWO sisters? Don't feel bad, Harlan, there's more girls in the world.

Marjorie Meinders went to a wedding Thursday night. Nope, wasn't her's but she's supposed to get married first in our class.

We feel proud of our Sophomore basketball boy, Red Bunterbach. He was one of the eight boys to go to the tournament at Des Moines.

Why did Miss Eidahl change our seats in English II? Maybe it was because Laurice was too good at pestering people.

Our new Sophomore sure isn't bashful any more!

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

The English Literature Class is studying the works of Byron and Shelley. They were both very good poets and we enjoy reading their poems. We started studying Political Parties in American Government. This chapter should prove quite interesting, because of the coming Presidential Election next year.

In Biology we are studying "The Biology of the Human Body." This is very interesting as it shows us

the different stages in man's development. We each had to discuss one of eight topics in class.

Circles are still the objective of the geometry class. We are learning to master more difficult problems dealing with finding the number of degrees in arcs and angles of circles.

Most of the First Aid class passed their Artificial Respiration test on Tuesday. To give artificial respiration correctly you have to keep your arms and hands stiff, not press too hard, and do from twelve to fifteen strokes per minute.

SENIOR CLASS NEWS

Anna Lee Bruner, Reporter

Our class is proud to say that six of our boys went to the tournament at Des Moines: Bill, Elwyn, Louis, Glenn, Leonard and Elmer.

The Physics Class spent most of the week on motors. We want to congratulate Ben Neuman on being the first to have success with his motor.

The Literature Class has been very quiet this past week due to the absence of six boys who journeyed to Des Moines. We have now started on poetry again.

The Senior Home Economics class have been trying their luck at Angel Food cakes and pies. The results were good. Thursday they demonstrated to the Freshman class how croquettes were made. We also made doughnuts.

The History class has been studying the policies of isolation, imperialism, and international co-operation. Bill lead the class discussion Thursday.

Grade News

PRIMARY ROOM NEWS

Virgie Hardecopf, Teacher

The First and Second Grade are making a farm. We are making the building, animals, and machinery out of different colored construction paper.

In Art Class we colored bluebirds and pussy willows. On Friday we colored robins.

The Second Grade are learning to read Manuscript writing. We will soon know how to write Manuscript.

Honor Roll

Almost every First Grader received a perfect score in Spelling this week.

Bonnie	Robert
Lois Ann	Daisy
Tommy	Janice
Beverly	Richard
Dennis	Ronald

All of the above had perfect scores in Spelling.

Those having perfect scores in the Second Grade were:

Billy	Sharon
Neva Ann	Elaine

THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

Norene celebrated his 10th birthday on St. Patrick's Day. He treated us to candy bars.

We have been studying for the Spelling Contest. We will have the contest to choose the ten best spellers in our room Friday afternoon.

Honor Roll

The following received perfect scores in Spelling this week:

Beverly	Dolores K.

Farm Machinery Preparedness Tips

A BLUE TAG FOR EVERY FARM MACHINE

Timely Information Prepared By Iowa State College Specialist

Electric motors are a hardy lot and can stand a lot of punishment, but replacements no longer are easily available. They are built of critical materials needed in the war effort, so existing motors must be kept in the best possible shape. The four major enemies of motor sin their workings are dirt, moisture, overload and improper lubrication.

Dust settles on the housing and working parts of motors. It acts as a layer of insulation, confining heat in the windings until it may reach a dangerous temperature. Dust and dirt also may plug ventilation spaces and interfere with the normal cooling. Oil and moisture may mix with the dust until the dust becomes a gummy layer.

Dust may be sucked out of the motor with a vacuum sweeper or blown out with an air hose. Too much air pressure should not be used since large particles of dirt or grit may be blown into the air gaps or windings. A motor operating in a barn or feed room should be watched carefully and cleaned probably at least every 30 days or 60 days, depending upon the amount of use. Once a year may be enough for motors operating in relatively clean places.

Water will soften the insulation on wires and absorb harmful acids or compounds to become an active destructive agent. If a motor becomes thoroughly wet it should be dried out as soon as possible. The best method is to place the motor in an oven with the temperature slightly above the boiling point of water, 212 degrees Fahrenheit.

An overloaded motor may mean an overheated or burnt-out motor. It can be produced quite accidentally by error in application, but obstruction in the drive or driven machine, or by excessive friction within the motor itself. The most simple way for protection in motors not having automatic over-load preventive devices is the use of special fuses built for motors, called fusetrans.

A 5 ampere fusetrans is recommended for a ¼ horsepower motor and a 6 ½ ampere for 1-3 horsepower; 8 ampere for the ½ horsepower, and a 15 ampere motor for a 1 horsepower motor.

Either too much or too little lubrication on motors may often cause difficulties. Oil spilled on the motor will collect dirt and cause deterioration of insulation materials. Lack of oil will result in excessive friction wearing down bearings. Manufacturer's recommendations on lubrication should be followed. All motors should have some oiling once or twice a year.

WEEKLY NEWS ANALYSIS

Meat Ceilings to Check Black Market; Bismarck Sea Triumph Forecasts U. S. Drive to Sweep Japs From New Guinea; Small Firms Get Billions for War Work

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Even the most advanced air base in Tunisia gets its mail, as pictured above. This photo of the mailman arriving and being welcomed at an advanced U. S. air base of Gen. Dwight Eisenhower's army, should be an incentive to those on the home front to write and keep writing to loved ones no matter how far away on Uncle Sam's service they may be.

BLACK MARKET: Action on Meat

Action rather than words was the keystone of a program sponsored by the OPA and the department of agriculture to smash the black markets in meat.

First barrage laid down in this offensive was Price Administrator Prentiss M. Brown's order imposing specific retail price ceilings on meat, beginning with pork products. Second attack came in the announcement by Secretary of Agriculture Wickard of orders licensing livestock slaughterers as well as those who buy and sell livestock for slaughter.

Effective April 1, the meat ceilings were expected to check black markets and end an "unjust squeeze" on packers. Mr. Brown said they would also lay the groundwork for the start of meat rationing about April 15. Pork ceilings were to be followed by uniform regulations on beef and lamb.

When red meat rationing is undertaken, the order will include bacon, butter, cheese, lard and other cooking fats.

With prices uniform throughout a community on all cuts of meat, Brown said, it would be difficult for dealers to get rid of illicit meat at higher prices.

RUSSIANS: Repeat Old History

Back over the snowy Russian steppes where Napoleon's army perished long ago reeled the retreating German legions.

While the collapse of Nazi resistance at Rzhev had been of high immediate strategic importance to the Red command it was prophetic of further Nazi reverses, for with the whole German salient west of Moscow unhinged, the fate of Orel and Vyazma to the east virtually sealed.

The rapidity of the Russian advance was indicated by the capture soon afterward of Olenino 35 miles west of Rzhev giving control of the railway running from Moscow to Velikie Luki.

While German spokesmen described the Rzhev defeat as a strategic withdrawal to shorten Nazi lines, Allied military observers saw in it a threat to all Axis defenses from Smolensk to the Baltic sea.

In the South the Russians had moved forward more slowly, impeded by the first thaws of oncoming spring. But Red forces were reported driving forward from recaptured Lgov, important railroad center west of Kursk.

WAR COST: Exceeds 43 Billion

More than \$43,830,452,651 was spent for war purposes in the first eight months of the current fiscal year, it was disclosed by the treasury department.

The war department spent the most for war—\$27,303,243,684. The navy spent \$11,502,653,956, the maritime commission \$1,685,143,236 and the war shipping administration \$733,211,740.

Expenditures by the government for all purposes during the eight-month period totaled \$17,600,944,727, while net revenue totaled \$9,512,808,497. The government's deficit for the eight months was \$33,034,682,608.

NORTH AFRICA: Rommel in Reverse

As Allied troops continued their drive in Tunisia, it became increasingly clear that Marshal Rommel's short-lived Kasserine Pass offensive had been a gamble. If he succeeded, he would follow it up. If he failed, he would waste no time in retreating. This was emphasized by the rapidity with which American and British forces had regained the ground lost in Rommel's first push.

Reports disclosed that some units of the British Eighth army had made contact with American troops in the Gafsa area of central Tunisia after circling the Mareth line from the south and advancing through the Chott Djerid marshes which had hitherto been regarded as impassable.

American forces pressing Rommel's retreat from the Kasserine pass were reported well beyond Sbeitla on the way to the Faid Pass, the key to German north-south communications.

In the northern mountains west of Axis-held Bizerte heavy Nazi attacks had bent the British lines back. The Allied air arm remained dominant over North Africa, however, and in the Mediterranean, sharp enemy losses to British submarines were reported. Seven Axis ships were sunk and nine others damaged.

ABSENTEEISM: Wage Docking Urged

"Hit them in the pocketbook. If you dock their wages you are hitting them where it hurts."

This was the prescription for curing the problem of persistent absenteeism by war plant workers proposed by Secretary of Navy Frank Knox. Testifying before the house naval affairs committee, Knox advocated remedial legislations covering both draft-age and non-draft-age workers.

A large share of the absenteeism is caused by men safe from the draft, he told the committee which was studying measures to require periodic reports to local draft boards on absences of military age. Best results in curbing absenteeism would be to deprive such workers of earnings for part of the time they were actually at work, he added.

DRAFT: Fathers Go Soon

Draft boards will begin inducting fathers into the armed forces in many areas of the United States about May 1, informed officials in Washington indicated. These officials added that they expected drafting of married men with children to be general throughout the country by early summer.

Acknowledging that some married men with children have already been inducted, selective service officials declared that most of these had acquired their dependents after December 8, 1941. Other fathers, it was said, may not be inducted without authorization from selective service headquarters. It was predicted, however, that such authorization would be forthcoming this spring.

PIPELINES: Relief for East

Blunt-spoken Harold L. Ickes, petroleum administrator, served notice that he had decided to build a 20-inch pipeline from Texas to the Middle West, despite the objection of

PETROLEUM BOSS ICKES

Midwest senators who had urged that any new pipeline construction should be instead, from the Middle West to the East Coast shortage area. This will be in addition to the recently completed 24-inch line.

Mr. Ickes assured the Middle West senators in testimony before a committee in Washington that he also hopes to complete a 20-inch pipeline from the Midwest to the East coast this year.

Meanwhile, he insisted, building the western end of the second pipeline first would speed the job and increase deliveries to the East coast of from 3,000,000 to 5,000,000 barrels during the most critical period of the shortage. This would provide the most effective method.

CHILD LABOR: 2,780,000 Employed

Reflecting the war's impact on the nation's labor supply, a report by the National Child Labor commission revealed that 2,780,000 youngsters of less than 18 years of age are employed either full or part time in industry and agriculture.

Citing a noticeable increase in illegal child labor, especially in night work, the report said that 580,000 of the group were in the 14 to 15-year age class and the remainder 16 and 17.

Washington, D. C.

ENDING ABSENTEEISM

Undersecretary of War Patterson's labor advisers have a one-point program for ending absenteeism in war plants. Here is the one point: Communities should adjust themselves to the hours of the factories. Stores, banks, doctors, lawyers, plus other services should be available not merely for one shift of workers but for all shifts.

At present workers on the swing shift, beginning at midnight, find themselves out of gear with the life of the community. The greatest absenteeism is among workers on the odd shifts, and can be attributed not to indifference to winning the war but to the inconvenience of trying to live and buy food and get Johnny to the doctor, while the swing shift turns night into day.

Absenteeism is higher among women than men, which may mean nothing more than trouble with the ration board. A woman will take a day off from the factory because she has to register for canned foods, or because a child is sick in the family, or because she hasn't had time to buy a new dress at the store. Remedy for this is nothing less than two or three shifts on the part of the services that serve the workers. The ration board, it is suggested, should come to the factory.

In many cases, war department advisers say, absenteeism is caused not by loafing but by overwork. In certain machine-tool areas, such as New England, men have been working 50 and 56 hours a week for years. They are simply exhausted.

Incidentally, this factor is the principal cause of absenteeism in Germany, where workers are worn down by unremitting labor and long hours.

Note: There is little sympathy in Undersecretary Patterson's office for the Rickenbacker crusade against labor. It is regarded as useless and unsound to try to appeal to workers over their leaders.

NO RUSSIAN HURRAHS

American observers in Russia report that the public is not throwing its red cap in the air over current military successes. The reaction is not much different, in fact, from the reaction to losses.

"The mood of the Russian people," says one report, "hasn't changed much since last summer when they were being driven back to the Volga. Nor has it changed much from the years of peace."

It is explained that Russians have become accustomed to tumult and personal danger. For 25 years they have lived in an atmosphere of revolution, purges, and starvation. War has brought no sudden shock to them as to us.

Even in the face of the terrific losses Russia has suffered in this war, the losses forced upon Russia by her own government ten years ago remain almost unsurpassed. When the Soviet government was imposing on the people, the unwelcome system of collective farming, farmers were denied seed for planting, and a vast number of people, estimated between two and five million, starved to death.

The Russians are stolid, taking defeat or victory in their stride.

SPANISH DAGGER AT U. S. BACK

Here is the lowdown on the visit of Franco's special representative, ex-Spanish Foreign Minister Beigbeder, to this country.

Franco's regular representative, Ambassador Juan Cardenas, has been sending him what he wanted to hear, rather than the truth about the way the American people have put their hearts into the war. Cardenas has emphasized the clash of personalities and inefficiency of war production which get into the headlines but is not the general rule.

When U. S. officials learned of this, they conceived the idea of bringing a special Franco envoy to the U. S. A. to get the real picture. Actually it was the war department, not the state department, which hatched the inspiration and which is taking him on a tour of war plants and army posts to drink in the real spirit of the war effort.

Note: Many high-up officials here believe Franco is an opportunist who, regardless of pledges, will jump whichever way he sees the war is going in the spring. He could, if he wished, plunge a dagger into the back of U. S. forces in North Africa. Beigbeder has a background of friendship for the United States.

CAPITAL CHAFF

It is said of Woodrow Wilson that he was a professor surrounded by politicians, and that FDR is a politician surrounded by professors.

It is said of Madame Chiang Kai-shek's huge reception that it outcavared the Baruch party for Mrs. Harry Hopkins.

Captain Eddie Rickenbacker is making it clear to friends that he has no presidential ambitions despite the fact that Gerald K. Smith is hurrahing for him. Incidentally most people don't know it, but Rickenbacker saw the hand-writing on the wall as far as isolation is concerned and resigned from the America First committee on January 18, 1941, nearly one year before Pearl Harbor.

BURMA

By Daniel De Luce

(WNU Feature—Through special arrangement with Collier's Weekly)

Greatest reservoir of fighting manpower to whip the Japanese lies in free, unoccupied China. For five years the Chinese soldier has proved himself every bit as courageous and clever as his Japanese enemy. He has hung on in the face of discouraging odds, lacking modern weapons and an air force.

Anglo-American arsenals should eventually be able to furnish him with these new arms and give him the support of a combined armada of airplanes.

However, "the day" is indefinite. In 1943? Perhaps longer. There is a lot of spade work to be done, for a great Allied offensive on the Asiatic continent.

It is required chiefly in Burma. And it is being planned right now by Generalissimo Chiang Kai-shek, General Wavell and General Stilwell.

Allies Need Burma.

The transfer of a thousand bombers and a thousand fighting planes from America to China could be made in seven days. But once having got the air fleet to China, the Allies would be little better off than before, unless they had Burma.

For the air force would need fuel—not a few thousand gallons flown laboriously over the Himalayas, but many thousands tons.

And where is the oil for the future planes of China? In Burma. "Oh," you say, "weren't the Burma fields scorched by the British? Or was that just another newspaper story?"

Yes, the Burma fields were scorched, thoroughly scorched. At the moment they're useless. But listen to the man who did the scorching.

"If the Japanese brought in 15,000 specialists and 50,000 tons of equipment and machinery, they could get Burma producing again within a few months. But they have neither the specialists nor the equipment. We have both. We can soon have the wells flowing—if and when we recapture Burma."

Scorching of Burma.

For the story of the scorching of Burma, let's begin looking into a little red cloth-covered notebook which this itinerant war correspondent bought in Mandalay for ten annas, before the ships were bombed and burned down on Good Friday last year. I had it in a sweaty pocket of my khaki shirt when I jumped through Yenang-tuang, oil capital of Burma, on Thursday, April 16, 1942.

Yenang-tuang in Burmese, means "stream of the smelly waters." Some centuries ago, silk-skirted natives scooped up the pungent black liquid and burned it in crude lamps at home.

Came the white man. In the last 60 years thousands of derricks sprang up on the drab hills. Burma oil, a million tons every 12 months, began lighting many a lamp in greater Asia.

Then came the Japs. He was about 30 miles south of the oil capital and pressing hard last April when I walked into the main oil-field headquarters and met a lean, hard, eagle-nosed English civilian loading his 33 army revolver.

He was Walter L. Forster of the Shell Oil company at Cairo. He had supervised the demolition of the Rangoon refineries the previous month, then calmly departed and was now in central Burma to finish similar assignments here.

At work or play, Forster likes dynamite. Knowing his specialty, the British government had sent him late in 1941 to Russia, to advise the Soviet engineers in their program of scorching the earth. He quickly decided that the Russians knew more than he did, but he stayed to learn their methods, and visited secret areas of the Caucasus.

He remarked afterwards that the Reds had carried out factory wrecks in one day that Anglo-American experts had forecast might take six months.

"But I wish the Russians could have seen our job at Rangoon," he mused. "Smoke up to 15,000 feet. Vapor up to 19,000 feet. Not a drop of oil left for the Japs, nor a piece of workable machinery."

After Rangoon was gone, Forster tackled the pipe line which had run more than 300 miles down-country from the Burma oil fields. He plugged the pipe with cement at river crossings, smashed the section pumps, wrecked bridges. Then he turned to the oil fields.

The last job, he said, was blowing up the big powerhouse.

"I've got 6,300 gallons of oil in drums stored above the transformers," he said. "Got oil piped in here to the main room, too. And the jets will turn on after the explosion. Nice fire we're cooking up!"

Timely Samplers Beautify Your Home

TWO samplers—elegant thought, simple in execution—combine cross stitch with shield and bell are the dominant figures on one; on the other flag and eagle. Each is 8 1/2" size, and both come on one fer Z9477.

This pattern also brings outlines distinctive spear type hangers—cut from wood and painted. A red or blue adds the final touch. Gifts or your own use. The price transfer is 15 cents. Send your order.

DOAN'S PILLS

HIGHLIGHTS . . . in the week's news

LONDON: "Take a towel with you when you go visiting" was, in effect, what Britons were told in a new set of rationing regulations. In announcing towel concessions for factory and medical workers, Hugh Dalton, president of the Board of Trade, said that in future "we must be prepared to take our towel with us if we go away to stay, or if asked to do so, to the hairdresser."

LOS ANGELES: Canned baby food is becoming more popular—particularly with adults, according to Sam M. White, secretary of the Southern California Retail Grocers' association. The reason, he says, is the present rationing system. The low ration point value of canned baby foods constitute their chief appeal. A purchaser can get a 4 or 5 1/2-ounce can for one point.

M. Lyle Wilcox, who has been teaching in the Groesbeck school north east of Klemme, has resigned her position and Mrs. Harvey Hubbard began teaching Monday to first year the school year. Mrs. Wilcox will leave Tuesday, March 31, for Chicago to meet her husband who will then be Lt. Lyle Wilcox. He is now completing his flight training and will be home on a leave from army duties. Lt. and Mrs. Wilcox will visit relatives in Chicago, Minneapolis, Mason City and Klemme. Mrs. Wilcox expects to accompany her husband to his new post of duty after his leave.

Congratulations Shamrocks!

You have a mighty fine team and all of Hancock county is proud of the record you made this past season.

We are confident that had there been a Class B division this year you would have had a State Championship to add to your trophies.

We think all of you Shamrocks are a fine bunch of boys, you play a clean, hard game and your sportsmanship of the highest type.

To each of you personally, offer our congratulations:

"Bill" Grosshuesch
"Jake" Jacobs
"Lindy" Kaduce
"Lois" Klotzbach
"Slick" Greiman

Up to the rest of you fellows backed them up from in the bench and substituted in when the going got tough. And to Coach Patterson for bringing you through successful season.

Now is the time to plan your garden. One-crop gardens are no longer suitable. Successive plantings, planned to make garden space produce as much as possible, are necessary for war garden goals.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mrs. George Lawhorn was at Garner on business Thursday.

Erick Josten is reported to be on the sick list since Sunday.

Mr. and Mrs. Ed. Becker and Mrs. Dwight Helps were Mason City visitors Tuesday.

Mr. and Mrs. John Day were at Forest City on business Monday afternoon.

Mrs. Ernest Lews spent several days of the past week visiting with her mother at Grundy Center.

Mr. and Mrs. R. W. Elder were dinner guests at the C. A. Larsen home Sunday.

Fred Bachman, who is now a resident of Belmond, was a Klemme visitor Monday forenoon.

Mrs. C. G. Waterman and daughter, Mrs. Lyle Wilcox, spent Sunday visiting with Mrs. Tom Mitchell at Swea City.

Mrs. C. B. Tice of Mason City, and sons Drs. Arnold and George Tice of Rochester, Minn., visited at the E. J. Arnold home Sunday.

Mrs. Ben Coobs returned Tuesday morning from Columbus, Ind. where she was called by the serious illness and death of her father.

Mrs. Wesley Patterson and baby daughter spent the week end visiting at the James Barber home at Belmond.

Clifford Montgomery has resigned as janitor of the Klemme school to take a job as truck driver for Lloyd Lau.

Mrs. Joe Burgess and Mrs. Paul Velhouse of Avery township were at Garner on business Thursday afternoon.

Mrs. Lena Schroeder spent several days the past week visiting at the farm home of Mr. and Mrs. John Irvine, near Traer, Iowa.

Mrs. Fred Nagel desires to take this way of saying "thank you" to the many people who sent her remembrances on her birthday.

Mr. and Mrs. Lyle Liebenborfer of Forest City, and Mr. Wilbur Nelson of Ames, were dinner guests at the R. A. Jorgenson home Sunday.

Mrs. John Clements was a dinner guest at the home of Mr. and Mrs. Gerald Koerner Sunday. The occasion was Mrs. Koerner's birthday.

Carl Heginger and family have moved to the tenant house at John Chambers farm as Mr. Heginger will work for Mr. Chambers this coming year.

This part of the state had another big snow again Friday. About eight inches fell, so winter is still in North Iowa even if the calendar does say it is Spring.

Wilbur Arnold returned from Chicago Wednesday where he attended the Polled Shorthorn Congress Show and Sale. While there he purchased the Grand Champion bull of the show.

PFC Marvin Lemke of Camp Maxey, Texas, arrived home Sunday morning to spend a ten day furlough visiting with his mother, Mrs. Daisy Lemke and other relatives.

Mr. and Mrs. Clarence Lemke moved to the Otto Lemke farm on Monday and Mr. and Mrs. Otto Lemke are moving to town. Clarence will operate the Lemke farm this year.

Herman Schuldt and daughter Mabel moved to Garner Saturday and Mrs. Bertha Schlei moved in from the farm to her house vacated by Herman Schuldt. Dale Schlei will continue to operate the Schlei farm.

A spelling contest for the pupils of Avery township was held at the Avery No. 1 school Friday afternoon. Winners were Erdene Nelson, first; Betty Ann Kramer, second; and Ben Katuin, third. Mrs. Harry Boelman pronounced the words and judges were Mrs. E. J. Arnold, Mrs. Herb Marshall and Irene Marshall.

If you have news, phone 12. We are glad to get it.

Since returning from California where she had spent most of the winter, Mrs. Day had not been well for a couple of weeks, but at this writing is again able to be out of doors. The change from a warm climate to zero weather did not agree with her.

Relatives and friends gathered at the C. J. Wille home Monday afternoon for a miscellaneous shower in honor of Mrs. Edmond Blanchet a recent bride. Games and stunts were enjoyed after which a nice lunch was served. Mrs. Blanchet received many nice gifts.

Wayne Lemke, of Des Moines, was here on business Thursday and visiting with his parents, Mr. and Mrs. Otto Lemke. Wayne was here to make arrangements to go to Alaska with a construction crew for the summer if jobs were still available in that line of work.

Mr. and Mrs. Carter's April Fool Marriage. The strange influence that rules the first day of April, their wedding day, turned their domestic life topsy-turvy, that finally they had trouble telling who was who. In the American Weekly with next Sunday's Chicago Herald-American.

Pvt. Fay Smock, who has been stationed at Fort Hancock, New Jersey for about seven months, was given an honorable discharge from the army and returned home Monday morning. Fay spent about 3 months in an army hospital. He will work at the Swanson Leghorn Farm.

Coach "Pat" Patterson and Levi Ridder accompanied by the following Shamrock basketball players took in the state basketball tournament at Des Moines Thursday, Friday and Saturday. Bill Grosshuesch, Elwyn Jacobs, Louis Klotzbach, Vern Greiman, Leonard Kaduce, Glenn Wille, Ed. Buntentbach, Jr., and Allan Lau.

Klemme friends have received letters from Capt. and Mrs. A. H. Dulmes stating that they are now located at Brigham City, Utah. They are living temporarily at Bill's Motel, where mail will reach them, or addressed to Capt. A. H. Dulmes, M. C., Bushnell General Hospital, Brigham City, Utah. The Dulmes family have been residing at Olympia, Washington, since they left Klemme last summer.

There were quite a number of pheasant hunters from many points in the state who came to shoot pheasants last week. There are thousands of birds around here but they are exceedingly wild and we did not hear of any hunters getting the bag limit, which was three cocks and two hens per day, or a bag of five cocks a day. Many outsiders went home with but a few birds.

Herman Paul left last Wednesday night for Denver, Colorado for a few days vacationing in that vicinity. Mr. Paul enjoyed a trip into the mountains and visited the scenic places of interest while at Denver. He returned home Monday morning. During his absence J. E. Stille, Herman Priebe and Donald Schaefer took charge of the filling station. It was Herman's first vacation in about 12 years and he says he enjoyed every minute of it.

Charles Gibbs of Big Lake, Minnesota spent the past week in this community visiting with his brother, Harry Gibbs, and his sisters, Miss Anna Gibbs and Mrs. Fred A. Arnold and other relatives. Charles says they have had plenty of cold weather in his country with the thermometer quite often registering 40 degrees below zero. They also had a lot of snow but roads were kept open. Charles also invites his Klemme friends to come up and fish next summer and guarantees they will get plenty of nice walleyes.

In spite of the huge corn crop of last year, we are feeding up corn as fast as we raised it, Iowa College economists observe. With normal yields this year, they say our production will not be large enough to fill our needs.

INFANT BAPTIZED SUNDAY AT REFORMED CHURCH

Merlin Paul, infant son of Mr. and Mrs. Paul Stromer was baptized Sunday morning, March 21, at the Klemme Reformed Church by Rev. Calvin Grosshuesch.

Begin now to plan for fuel for next winter because labor shortage and congested transportation then may make conditions entirely different from this winter. One of the things that can be done now is to cut wood where it is available.

Please phone 12 or send in your news items. Thank you.

E. Stille Elected Mayor In Town Election Here

THOMPSON, KLUCKHOHN NEW
MEMBERS ON COUNCIL

Man And Bridges Re-Elected
Treasurer And Assessor

The town election held in Klemme Monday turned out to be one of the most lively elections seen for several years. With J. E. Stille for mayor, and with D. P. Thompson, C. E. Kluckhohn, E. H. Herman Priebe, J. C. Thompson and Art Weller for councilmen appearing on ballot would make it appear that most of the voting would be for councilmen.

However, circulars were gotten from Ed. Thompson for becoming Ed. Thompson for mayor, supported by W. H. Kimball, Walter Lemke for councilmen, and the above names. To it even more interesting the names of W. C. Keraus, mayor in 1932, also conceived the idea of having his name for the office of mayor. The result was that the for mayor looked like a toss-up, but Stille nosed out with 55 votes while Thompson, who came through with 39. Above results could easily have changed as quite a number of voters wrote in the names and forgot to mark a cross in front of the name for mayor.

Councilmen Named

The following were elected councilmen and the votes each received:

W. H. Kimball	129
James Thomas	127
E. Kluckhohn	127
Herman Priebe	108
J. Thompson	71

The latter also received 44 votes for mayor, or a total of 115 votes. The other candidates for councilmen were: H. H. Patet with 62 votes, D. Anderson, 51; Walter Lemke, 38; W. L. Kimball, 28. The names of Lemke and Kimball were written on the ballot.

Two Others Re-elected

G. Waterman for Treasurer, Orville Bridges for Assessor were re-elected without opposition. Waterman polled 143 votes and Bridges 140.

There were a few scattered votes for various candidates.

It was considered that the turnout of voters was fairly good, as there were 164 ballots cast. Of number 18 ballots were spoiled. Most of the errors were in voting for mayor by the writing in the name and then marking in a cross in the square front of the candidate's name. Otherwise, the same thing happened in voting for councilmen.

The women turned out good as there were 70 women who cast a ballot Monday.

Retiring town officials are W. C. Keraus as mayor, and Lloyd Lau as John Etchen, councilmen.

DRAFT BOARD WILL MEET THURSDAY EVENINGS

The Hancock County Draft Board changed its meeting date from Monday afternoons to Thursday evenings, commencing April 8, 1943. The Board will continue to meet on Thursdays.

HELLO, FOLKS!

Mr. and Mrs. Ed. Neuhring, of Klemme, are the parents of a baby girl born to them on Friday, March 19th. They have one other daughter in their family. Mrs. Neuhring was formerly Miss Bon-Bachman of this community.

Our Men In The Service

LYNDON E. KILGORE IS NOW SECOND LIEUTENANT

FORT BENING, GA. (Special) Lyndon E. Kilgore of Klemme, Ia., was commissioned a second lieutenant in the Army of the United States, Saturday, March 27, upon successful completion of the Officer Candidate Course at the Infantry School at Fort Benning, Ga. Lt. Kilgore is the son of Mr. and Mrs. C. C. Kilgore of Klemme, Iowa.

The new lieutenant was inducted into the army on June 26, 1941 and served with the I R T C and Reception Center at Camp Wolters, Texas before going to Officer Candidate School three months ago. He held the rank of Sergeant before being commissioned.

The new officer is a graduate of the Klemme high school and was later employed as linotype operator at the Times office and as a printer at Moline, Illinois.

MORE HANCOCK COUNTY MEN INDUCTED INTO ARMY

The following boys who went to Camp Dodge, Iowa, for physical examination on March 18th, passed and were inducted into the Army:

Forrest L. Rowley	Kanawha
Arthur M. Oving	Kanawha
Rollin M. Oxley	Corwith
Alfred P. Assink	Kanawha
Vernon M. Nelson	Britt
John F. Kloster	Britt
Floyd A. Miller	Britt
Birdeen G. Larson	Britt
Harold F. Gayken	Britt
LeRoy K. Berhow	Goodell
Paul E. Cosgriff	Britt
Robert L. Foster	Britt
Henry W. Gerdes	Woden
Carl J. Westin	Kanawha
Lewis W. Thomas	Britt
Gordon M. Haes	Garner

The following registrant was selected for the Navy:

Merle Robert Hall . . . Garner

The following were transferred here for induction:

Cecil L. Larson . . . Long Beach, Cal.
Glen H. Beaman . . . Seattle, Wash.
Francis Steinhoff . . . Seattle, Wash.

(They reported back for active duty on March 25th.)

The Draft Board has changed its meeting date from Monday afternoons to Thursday evening, commencing April 8, 1943.

If all small grain seed sown this spring is properly cleaned and treated, it might boost yields as much as 10 percent, crops men at Iowa State College say.

PARTY HELD HONORING PVT. MARVIN LEMKE

About forty-five relatives and friends gathered at the home of Mrs. Daisy Lemke Sunday in honor of her son, Pvt. Marvin Lemke, who was home on a furlough.

All brought baskets of food for a big dinner at noon. Marvin was presented with a nice gift.

Those present included Wm. H. Greiman and family; Ben F. Greiman and family; A. S. Greiman and family; H. C. Greiman and family; Albert Carl Swanson and family; Mr. and Mrs. Etchen; Henry Klinge and family; D. Anderson and family; D. H. Lemke; Herbert Geriman and family; V. V. McLaughlin and family. Marvin left Monday for Camp Maxey, Texas.

AMERICAN HEROES BY LEFT

Marine Pvt. 1st Class M. G. Hoffman, survivor of the U. S. S. QUINCY, was a leader on one of her big guns until she was sunk during an engagement with the Japs off Savo Island in the Solomons. Hoffman is typical of the crew. You are helping Hoffman and his buddies when you buy bonds during the Second War Loan Drive. They give their lives—You lend your money.

U. S. Treasury Department

New Bond Drive To Start In County Next Week

BRITT MAN APPOINTED BOND SALES CHAIRMAN

Township Committees Appointed To Make Canvass Soon

H. C. Armstrong of Britt, has been appointed County Chairman of the War Savings Staff of Hancock County, and is in charge of the sale of War Bonds in this county.

The Township Committees are being appointed this week, and next week are expected to make the drive or pledges to purchase bonds. All bonds bought after January 1st will apply on the pledges for 1943. The County, Township and Individual pledges are much larger than they were last year, and a thorough and careful canvass will be made to be sure that everyone has signed up and for the amount apportioned to him.

Be ready to sign for the amount apportioned to you when a committee member calls on you.

C. G. Waterman has been named chairman of bond sales in Klemme. He has not as yet appointed his committee to make the canvass in Klemme.

HUNTING, FISHING LICENSES EXPIRE MARCH 31

All hunting and fishing licenses in Iowa expire March 31 and are now obtainable from county recorders, the Conservation Commission, and various depositories throughout the state. The 1943-44 licenses are printed in the same form as last year; however, it is impossible to obtain the cellophane envelopes in which they have been enclosed during the past two years. The 1943 game law leaflets will not be printed until after the adjournment of the State Legislature. However, as soon as they are printed they may be obtained from the same source as hunting licenses.

RULES RELAXED ON ELECTRIC WIRING FOR FARMERS

The government has relaxed regulations governing the sale of electric wiring and equipment to farmers, providing these supplies are needed in the food production program. You can get wire for your brooder house or your barn by obtaining the O. K. of your Triple A county board, which will furnish you a certificate to present to the War Production Board. The new regulations, however, do not relax restrictions on electric supplies for farm houses.

A good garden needs at least 6 hours of sunshine a day. Don't put it where it will be shaded by trees.

KLEMMME AND BRITT CAGE TEAMS FETED AT BANQUET HERE

With the Britt high school basketball team and its coach, G. L. Woodward, and Supt. Thies as special honor guests, the Klemme community, under the leadership of the Civic Club, feted the Klemme high school Shamrocks and Coach Wesley Paterson, who went through the recent basketball season to the district tournament, with but three defeats against 20 wins.

During the season Klemme lost two games to the Britt Eagles, but in two tournament games, the Shamrocks were victorious and won the trophies.

About 125 people were at the banquet Thursday evening at the high school gym. The meal was prepared and served by the ladies of the Methodist WSCS.

W. Earl Hall, managing editor of the Mason City Globe Gazette was the guest speaker. His talk followed after members of the Shamrock quintet had been introduced and the seniors on the squad, Elwyn Jacobs, Bill Gresshuesch, Louis Klotzbach, Leonard Kaduce and Glenn Wille gave talks.

Ed. Thompson, president of the Civic Club acted as master of ceremonies. The Britt basketball team was introduced by their coach, G. L. Woodward and Capt. Calvin Peterson spoke for the Eagles. A duet was sung by Maxine Bachman and Vivian Harberts and two marimba solos were played by Miss Irene Becker and Patricia Kudje gave a saxophone solo.

VICTORY GARDEN BULLETINS AVAILABLE AT F. B. OFFICE

The free Victory Garden Pamphlet No. 60 is available to anyone in Hancock County. Write or call for it at the office of the County Extension Director at Garner.

The pamphlet contains suggestions on the amount of seed to plant and the approximate yield, varieties that store best in refrigerated lockers and those that are best for canning purposes. The new disease resistant varieties are recommended. Insect and disease symptoms and treatment are outlined.

Be sure you have this pamphlet for a reference and guide in planting, growing and preserving your 1943 garden.

AUXILIARY WILL MEET TUESDAY, APRIL 6

The American Legion Auxiliary will meet Tuesday evening, April 6 at 8:00 o'clock with Mrs. Martha Bredbenner, Mrs. John Chambers, and Mrs. Elmer Arnold as hostesses.

County Spelling Contest Will Be Held Saturday At Garner

SPELLING CONTESTANTS WHO WILL COMPETE IN COUNTY SPELLING EVENT

Following is a list of contestants to date who will take part in the annual county spelling contest to be held at Garner on April 3:

Crystal Lake Consolidated:	Helen Anderson, Crystal Lake.
Garner Independent:	Dorothy Kupke, Garner.
Goodell Independent:	Lucille Wilson, Goodell.
Hayfield Consolidated:	Doris Holecsek, Hayfield.
Kanawha Independent:	Jean Kurtz, Kanawha.
Klemme Independent:	Roger Ridder, Klemme.
Miller Independent:	Mary Jane Bleick, Miller.
Amsterdam and Twin Lake	Townships:
Jerry Ruka . . . Twin Lake No. 9	
Richard Severson . . . T. L. No. 9	
Avery Township:	
Erdene Nelson . . . Avery No. 2	
Betty Ann Kramer, Avery No. 1	
Bingham Township:	
Kathryn Schutter, Bingham No. 3	
Donna Mosher . . . Bingham No. 8	
Boone Township:	
Bonnie Cockrell . . . Boone No. 6	
Phyllis Smith . . . Boone No. 2	
Britt and Crystal Townships:	
John Burgardt . . . Britt No. 5	
Loren Chizek . . . Britt No. 5	
Concord Township:	
Edna Robinson . . . Concord No. 8

Olive Hines . . . Ellington No. 2	
Erin Township:	
Walter Johnson . . . Erin No. 3	
Shirley Ann Hoover . . . Erin No. 5	
Garfield Township:	
Francis Young . . . Garfield No. 7	
William Malek . . . Garfield No. 9	
Liberty Township:	
Abigail Huenemann . . . Lib. No. 6	
Gloria Haefner . . . Liberty No. 7	

KLEMMME FOOD MARKET RE- MODELING SHOP ROOM

There was a lot of activity at the Klemme Food Market the past week when the back room of the store was remodeled.

Part of the back room was partitioned off to form a separate department for the processing of meat for the locker system.

When remodeling is completed the new processing room will be finished in white enamel and will house the power saw, grinder and other equipment.

The space formerly used as the office is now an egg receiving and egg candling room, and the balance of the room will be used for storage and unpacking merchandise.

The office is now in the front of the locker plant and is the room last occupied by the Gerardi Music Store.

TEST OATS

Recent reports received from the Iowa State College Seed Laboratory by the Hancock County Farm Bureau ranged from 1 percent germination to 98 percent germination. This indicates the necessity of having a test on all oats. Testing your oats is a good way to save time and labor. Test and you will eliminate one of the uncertainties that might require replanting this spring. Run these tests at home, use a box of dirt or sand.

Madison Township:

Mildred Nuehring . . . Mad. No. 3
Richard Faber . . . Madison No. 6
Magor Township:

Leland Davis . . . Magor No. 7
Theresa Oxley . . . Magor No. 5
Orthel Township:

Gladys Redenius . . . Orthel No. 6
Clarence Trafford . . . Orthel No. 6
The Britt Independent, Corwith Consolidated and Woden Independent had not reported in their contestant as The Times went to press.

SPRING PHEASANT SEASON RESULT

Cock Pheasant Startled By Spring Opening

Hunters, pheasants, farmers, and game officials are still in a spin caused by Iowa's first spring pheasant season. The weather was more than typically March, with mud, heavy rain, high winds, snow, and near zero weather all contributing. The opinions of hunters about the success of the season are more divergent than is common even during the fall duck hunting season. Certain definite facts, however, may be brought out.

The shotgun shell situation was comparable to the close of the 1942 season. Many sportsmen were absolutely without shells; other hunters seemed to have an inexhaustible supply. It is noteworthy that many local hunters did not hunt because of the lack of ammunition.

In most areas birds were extremely wild, the explanation for this wildness being that all birds in the field were veterans of the fall campaign. This, coupled with the fact that cover was very thin, caused the birds to flush far ahead, sometimes from a quarter to a half mile away.

In areas of greatest concentration farmers feel better because the concentrations of birds were cut down or dispersed, and this was the sole purpose of the spring season.

It is the consensus of opinion of game officials, hunters, and farmers that there is still an abundance of birds of both sexes left to enter the breeding season.

Ink Spots And Spatters

By Jergie

SCRAP METAL FROM FARMS BADLY NEEDED

A half ton of scrap iron and steel is needed from every farm in Iowa if the state is to make its quota. Throw in that old gang plow and that antique cultivator to help the cause along. Remember that for each one percent of steel production lost in 1943, we will lose the equivalent of 225 Liberty ships. To furnish some idea of the scrap needed by the government to blast the Axis it requires 51,000 railroad cars each month to haul the collected scrap to the United States steel mills.

GIRLS SOCK THE AXIS WITH YOUR SOCKS!

older and every woman brings in just one silk or nylon stocking a month, the state can easily make its quota, salvage department officials have figured out. It takes 1,500 pairs of stockings to make 100 pounds.

There is a box at Thada's Store where you can deposit your socks.

MEAT RATIONING

STARTED

Iowa is taking the new meat rationing program in stride, just as it has all the other government programs designed to help win the war and give every family an equal opportunity to share in needed commodities, regardless of wealth. A few slaughterers have violated their quotas on killing livestock, but the Iowa OPA legal department quickly broke up the black market through permanent injunction against the offenders, and it is expected the meat situation will soon be adjusted to the new rationing program. Don't help the Axis by patronizing a black market operator. Your boy in the army will not be very proud of you if you do.

BETTER IOWA GARDENS

(A special column prepared for The Klemme Times by Iowa State College Specialists)

It is wise to test vegetable seed that has been held over from last year. Germination may be too poor to waste time in planting saved-over seed. The germination is likely to be poor, particularly if the seed was stored under conditions of either high temperature or high humidity or both. Several dozen tested seeds of a variety should be tested between moist paper toweling or flannel in closed containers or inverted plates.

About 6 ounces of bush beans are needed to plant 100 feet of rows. The Stringless Green Pod variety is outstanding in quality and production. One of the most dependable bush limas is Henderson Bush. The climbing limas are not recommended for our climate because they are not as dependable as the bush form. Kentucky Wonder pole bean is outstanding in its productiveness. Early May when the soil becomes warm is the time to plant them. Do not sow all the seed bush beans at one time. Make successive sowings at about 15-day intervals up until July 15.

Carrots and beets can be stored over winter in closed containers set in a cold place, and it's a lot easier than canning them. Sow just a small amount of beet and carrot seed as early as the soil can be worked. (Remember soil worked when too moist will clod.) All that will be needed will be enough for table use. Then make the big sowing of beets and carrots in the summer garden about July 1. The really good root crop will be available to store.

Deep plowing or spading (8 to 10 inches) is essential to growing of good root crops. Root crops do better on light soils than on heavy ones. Gardeners who had trouble with growing carrots last year should be sure to consult Victory Garden pamphlet No. 60 for control of carrot rust fly and carrot weevil.

Naturally seeds for tomato plants should not be started as early as for cabbage plants because cabbage plants are set out about five weeks earlier. Be sure to sow the seed of "yellows-resistant" varieties of cabbage in the garden where they are to develop, or set out the plants of such varieties. Complete loss of cabbage plants may result unless such varieties as Marion Market and Wisconsin All Seasons are grown.

Do not make the mistake of sowing Chinese or celery cabbage this spring. Sow the seed after July 15 and you will have grand success. Turnips also are better sown Aug 1 for a fall crop.

Parsnip seed should be planted as early as the soil can be worked. It is desirable to mix radish and lettuce seed with parsnip because parsnip seed is slow to germinate and develop.

Was Central States' Tax Bill For 1942

That Is \$700 Every Day In The Year and Amounts to 19c Out Of Every Dollar You Pay Us For Electric and Gas Service.

"WHY NOT TELL ALL?—Recently, the Secretary of the Interior of the United States, in publicizing the federal government's Bonneville-Grand Coulee electric project, said: 'It is no idle assertion to say that the great war output from the northwest—planes, metals, chemicals and ships—virtually would have been impossible had it not been for this progressive power system.'

"It would have been more gracious and accurate if the Secretary had added that without the generating capacity of private electric companies throughout the United States which furnish upwards of 90 per cent of the electric power required by our country, the war output of the nation would actually have been impossible, and that in the Pacific northwest, without the private electric companies the war program would have been stymied. Also, the private electric companies are furnishing hundreds of millions of dollars in tax revenue to help maintain our government and war activities, while federally owned and operated plants are tax exempt, thereby adding to the tax load the hard-pressed general taxpayer must carry.

"It would have been good sportsmanship for the Secretary to have said that in sections where no federally-owned power plants have been built, private electric companies have met the full war load and production has not been retarded for lack of electric power. A public official is supposed to represent all of the people and he should not be biased in giving them the facts." —Reprinted from "Plain Talk," Des Moines, issue of March 11, 1943.

Uncle Sam Wants GARDENS!

Uncle Sam insists that we all
grow victory gardens this year
and small ones, in
back yards and country.
Grow your garden now, or
the plans of your neigh-
bors. Grow your own vege-
table because the chances are
you won't be able to buy them
at the corner grocery. Gardens
grow fresh food all summer and
can be stored away for
winter. Gardens mean Health

—lowered food costs—and
practical PATRIOTISM!
Ask us about International
Harvester's 84-page booklet,
"Have a Victory Garden." It's a
dandy—packed with helpful
information on soil, seedbeds,
fertilizers, hotbeds, cold frames,
planting, cultivating, weed con-
trol, insect and disease control,
harvesting, winter storage, etc.
Let's all garden for Victory
and save all we raise.

The Shamrock Times

MUSIC NEWS

The "Shamrock Shindig" the
Girls Glee Club gave last Tuesday
night was a big success. Every-
body came out on the floor to
"show 'em what they could do."
The refreshments served were
sandwiches and punch.

During the intermission Vivian
and Maxine sang and tap-danced,
and Boots Brinkman played the
harmonica. We had a juke-box for
the music and it had all good pieces.
"Abraham" was the favorite
one and was played the most. The
most fun was the paddle dances.
Several girl and boys had paddles
and would hit the girl or boy whose
partner they wanted to dance with.
Very few stood at the side-lines
when the dances were in progress.
The Girl Sextette sang at the
Methodist Church for the Brother-
hood meeting last Monday evening.
They sang three numbers "Little
Glowworm," "The Willow Tree"
and "Glad Song."

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

The Algebra Class is reviewing
five cases of factoring trinomials.
It is very difficult but we seem to
be coming through.

The English class is diagraming
sentences. Miss Erdahl gave us a
new seating arrangement. I wonder
why?

In Science we were gifted with
a test Friday. It was over a chap-
ter of the Universe.

The Home Economics Class has
finished cooking and will begin on
Sewing.

The Manual Training boys are
bringing furniture to school which
is broken and needs to be mended.

SOPHOMORE NEWS

Patricia Kudje, Reporter

In Biology we had to draw pic-
tures of man, one showed the skele-
ton and the other the circulation
of the blood. Some of the men
had movie star figures, while some
did not. Laurence was too big, he
had to have two sheets of paper to
finish it.

Mr. Gregory said he didn't dance
Tuesday night, but he had a "kink"
in his leg anyway the next day.
Did he slip on the ice, or on the
waxed floor?

Our class gave the accident first
aid Friday. The school was
supposed to have caught fire and
we had to get four burned people
out of the building. It really was
fun, but of course, all make-believe.

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

A great mistake was made in this
column last week. I forgot to men-
tion that our class had two basket-
ball players who attended the state
tournament at Des Moines. Our
representatives were Verne Grei-
man and Allen Lau. From the
news we gather, Allen saw more of
"Rise O' Day" than he did of "Fats"
and "Pewee" Day.

We are studying about our State
Government, in American Govern-
ment. We had a test on Friday.

In Geometry we have taken up
Locus again. Locus is the path that
anything takes.

The Biology Class is studying the
human body. We had to draw a
skeleton and the circulatory system.
For some reason or other the class
had to stay an extra five minutes
Thursday.

Mr. Patterson gave us charts for
typing and speed tests. By this
chart we can tell how many mis-
takes we got per minute in a ten
minute test. We are writing differ-
ent forms of business letters.

Poems and Prose we have been
having in English Literature were
taken from the works of Jane Aus-
tin, Scott, Lamb and Keats.

Eight of the basketball players
chose up teams to play during the
Physical Training Class. All teams
have played so far and the teams
that haven't been beaten are the
teams of Bill, Jake, Lindy and
Glenn. The girls are also having a
tournament.

SENIOR CLASS NEWS

Anna Lee Brutes, Reporter

topic in Physics Class last Friday
and told to give two or three min-
ute report of extemporaneous
speaking.

The Literature Class is studying
the modern short story. The first
story we have is the "Revolt of
Mother."

Wednesday evening the Senior
Home Economics Class gave a din-
ner for their mothers. They were
shown pictures that Miss Erdahl
took some time ago while the girls
were working in their room.

The History class had to outline
the Declaration of Independence.

Friday Mr. Gregory read us a
few items from the Readers Digest

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher
Elizabeth Goll, Reporter

In Arithmetic the Seventh Grade
is learning about circles and de-
grees. The Eighth Grade learned
how to measure the height of ob-
jects, by shadows, ratio and pro-
portions.

The Seventh Grade is reviewing
the parts of speech in English. The
Eighth Grade is learning the cases
of nouns and pronouns.

Those who participated in the
Spelling Contest from the Eighth
Grade were Roger R., Bob Roths,
Marjorie, Lois Ann and Peggy.

Those from the Seventh Grade
were Harold, Billy, Shirley, Velma
and Rose.

Spelling Honor Roll

Those who received perfect scores
in the usual Friday lesson were:

Lois	Marjorie
Peggy	Elizabeth
Roger R	Roger B.
Irene	Harold
Harold	Ruth

Helen S.

During Manual Arts Class the
girls have been making purses and
bags.

We have been drawing maps of
Iowa, Hancock County and Ell
Township for Civics.

The Eighth Grade has studied
work in the library the past week
in Reading.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

We have been practicing the past
week for the Spelling Contest held
Friday afternoon.

Honor Roll

Spelling Honor Roll for the week

Norma E	Iabelle G
Maurice T.	Iris R
Larry R	Marjorie L
Luella P	William B
Dorance B	Marvin S
Merlin B	

Several Spring birds have been
reported seen. Among them are
the robin, meadowlark and wren.
"Penrod," by Booth Tarkington,
furnishes amusing adventures for
us in recreational reading.

Dorance celebrated his tenth
birthday on Wednesday.

THIRD AND FOURTH GRADE NEWS

Evelyn Gueff, Teacher
Honor Roll

Roger Bachman visited our room
Thursday.

We have learned two new poems.
"The Wind," and "Rainy Day."

In Fourth Grade we are begin-
ning a unit on China.

In Third Grade we are studying
about clothing from plants and
trees.

The five who won the Spelling
Contest in the Third Grade are Lu-
cille, Delores T., Maralee, Iris and
Maxine.

The Fourth Graders were La-
Nelle, Jo Ann, Beverly, Sondra, and
Audra.

Honor Roll

Those who received perfect
scores in Spelling this week are:

Janice	Lucille
Delores	Harley
Sondra	Jo Ann
La Nelle	Noren
Beverly	

PRIMARY ROOM NEWS

Virgie Hardcopf, Teacher

We have several new library
books in our room. We enjoy the
stories very much.

The boys and girls in our room
have been watching for the Spring
birds. So far we have seen robins,
meadowlarks, black birds, one blue
jay and one purple martin.

Lyle was seven years old Wed-
nesday. Tommy was seven years
old Friday. He treated us to cook-
ies.

On Friday the First and Second
Grades bought \$7.00 worth of War
stamps.

Larry, Elaine, Neva Ann, Billy
and Sharon were in the Spelling
Contest on Friday. Sharon stayed
up longer than any other Second
Grader and she received a 25c War

Stamp.

Honor Roll

The First Graders who got a per-
fect Spelling score were:

Tommy	Janice
Beverly	Roger
Daisy	Lois Ann
Gary Beck	Bonnie Jean
Denny	

In the Second Grade they were:

Billy	Neva Ann
Elaine	

ROGER RIDDER WILL ENTER COUNTY SPELLING BEE

Was Winner Of Local Spelling Con-
test Held Friday Afternoon

Roger Ridder, son of Mr. and
Mrs. Levi Ridder and eighth grade
pupil, won the Klemme Spelling
Contest Friday afternoon and the
right to represent the Klemme
school at the county contest to be
held at Garner.

by out-spelling Lois Ann Lau, the
second place winner, Bob Roths in
third place and Marcelle Josten and
Peggy Coobs, all in the final five.

Other Winners Named

Rose Schaefer was the first place
winner in the seventh grade, and
others in the high five were Billy
Jones, Harold Schwartz, Shirley
Stille and Velma Tiggerman.

In the Sixth Grade Iris Rosen-
dahl was winner of first place and
others in the high bracket were Isa-
belle Gibbs, Marjorie Lau, Norma
Early and Maurice Trumbell.

Luella Priebe was the best spell-
er in the Fifth Grade, and others
were Merlin Brinkman, Derance
Baack, William Bock and Marvin
Schmidt.

In the Fourth Grade Audra Jones
won first place and others in the
high five were La Nelle Harvey,
Sondra Bridges, Beverly Pringnitz
and Jo Ann Carpenter.

Maxine Barz won the contest in
the Third Grade and others in the
high five were Maralee Ridder,
Iris Schaefer, Delores and Lucille.

Sharon Bridges was the winner
in the First Grade and others in the
group of best spellers were Elaine
Neuberger, Neva Ann Anderson,
Lerry Stille and Billy Wadding-
ham.

All of the winners were awarded
with 25 cent War Stamps.

KLEMME LOCALS

A court whist party was given at
the C. J. Wille home Sunday eve-
ning in honor of their daughter, Mrs.
Edmond Blanchet, a recent bride.
Miss Helen Albert and Raymond
Wille won the high prizes. Mrs.
Blanchet was presented with a gift,
after which a delicious lunch was
served.

Mother China's child army and
her fighting old folks. Heroic deeds
of the "Hsiao Pao" or "Little Dev-
il," and other exploits of grim
courage which have marked Chin-
a's six-year battle for freedom.
Don't miss this stirring double-
page feature by Madame V. K.
Wellington Koo, wife of Dr. Well-
ington Koo, Chinese Ambassador to
Great Britain, in the American
Weekly, the magazine distributed
with next week's Sunday Chicago
Herald-American.

WEEKLY NEWS ANALYSIS

New Ration Orders Assure Healthy Diet; Nazi's Kharkov Offensive Recalls Drive That Preceded Collapse in World War I; Congress Ponders Postwar Security Plan

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

The direction in which the Nazis launched their counteroffensive against the Russians in the Kharkov area is indicated by the above map. Successful in its early stages, the counteroffensive had driven the Russ back 100 miles and regained for the Nazis areas captured by the Russ winter drive.

WAR PROGRAM:

Centralization Needed

Like doctors in a clinic, members of the senate's Truman investigating committee gave the progress of the war program a thorough examination and emerged with three basic reasons for "nearly all the failures and shortcomings" found.

First reason was "inadequate over-all planning within government agencies at the beginning of the various programs", second was "conflicting authority over various phases of the war program", and third, "hesitancy of the government to adopt unpopular or unpleasant policies long after the facts indicated such policies were necessary".

In recommending corrections, the committee called for clearly defined authority, centralized in a few officials, during the coming year. Incidentally, the committee warned that the year ahead would be the toughest and grimmest in U. S. history.

RATIONING:

Healthy Diet Sure

Americans tightened their belts in anticipation of the slimmer portions of meat, canned fish, butter, cheese and edible fats the new rationing regulations effective March 29 would impose.

To those who for months had been following the Food Administration's request to ration themselves voluntarily, the new estimated ration of about two pounds weekly of meat per person "more or less" represented only a slight shift downward. Still unrationed as the orders went into effect were poultry, fresh fish and such rarely used meats as rabbit and other game. The new rationing orders had been accompanied by the heartening news that coffee would be more plentiful, with one pound every five instead of six weeks, and that point values on dry beans and peas had been lowered.

All things considered, the new regulations would reduce consumption of the foods they covered by from 12 to 15 per cent. That supplies assured a healthy diet was emphasized by Food Administrator Wickard. Estimates indicated that 1943 per capita civilian supplies of meat, cheese, fats and other commodities would be about equal to the average for 1935-39.

NORTH AFRICA:

Axis Hopes Dimmer

Holed up in the Mareth line after having received a punishing beating Nazi Marshal Rommel has had to face the consequences of being ringed in by an Allied line of steel. That those consequences were to be serious and might even reach the disastrous proportions of a defeat rivaling the Axis rout at Stalingrad was the opinion of seasoned observers.

Faced by the increasing strength of General Montgomery's British 8th army and by the reinforced and battle-seasoned American forces of Gen. Dwight Eisenhower, Rommel and his cohort, Col Gen Von Arnim, had their work cut out for them.

TAX PLANS:

Ruml Revived

Like the cat with nine lives, the Ruml plan to skip a tax year and put America's 44,000,000 taxpayers on a pay-as-you-go basis, was hard to kill.

Even though the house ways and means committee had approved a plan imposing a 20 per cent withholding levy from pay envelopes effective July 1 and making "pay-as-you-go" optional with each taxpayer, proponents of the Ruml plan, principally in the ranks of the Republican minority, had ranged themselves solidly behind a bill embracing the Ruml principles.

Sponsors of the house ways and means committee's tax program pointed out that the withholding levy would not be a straight 20 per cent deduction against wages and salaries, but against the portions of such earnings remaining after deductions were made on the basis of dependents. The levy would not be an additional tax, but merely a means of collecting actual taxes through wage and salary deductions.

LEND-LEASE:

Diplomacy Weapon

Predictions that at lend-lease shipments in the coming year would dwarf all previous records and that Uncle Sam would use it more and more as a means of obtaining agreements with nations receiving it for postwar security, were voiced by Washington observers, after the house and senate had approved extension of lend-lease for another year.

What eventual payment this nation will seek for its wartime aid to its allies and friendly neutrals remained to be seen. Two major principles were involved, however. One was the promotion of a stable economic situation throughout the world after the war. The other was the necessity of America obtaining additional naval and air bases to help prevent a recurrence of Axis aggression.

A report to congress by Edward R. Stettinius Jr., lend-lease administrator, disclosed that aid extended by the United States under the act aggregated \$9,632,000,000 in its first two years of operation. Mr. Stettinius reported Russia was allotted 29 per cent of all lend-lease shipments last year, including half of all tanks shipped and 40 per cent of all tactical planes.

CHINA AIR FORCE:

Victory for Mme. Chiang

The labors of Madame Chiang Kai-shek had not been in vain. One of the first fruits of her American visit and Washington conferences was the creation of a full-fledged U. S. air force command in China.

Hailed as the fulfillment of long-deferred Chinese hopes this move indicated a sizable expansion of

MME. CHIANG KAI-SHEK
... first fruits sweet.

American air power in the China wear theater and a new phase in the war against Japan.

Under the new arrangement the newly activated 14th U. S. air force under command of Brig. Gen. Claire L. Chennault replaced the former China Air Task force. Famous as the trainer of the "Flying Tigers" which scourged Jap air invaders, Chennault with augmented manpower and planes would now be able to expand his operations greatly.

FRANCE:

Patriots Fight

As repressive measures by the Nazis had failed to halt the underground revolt by French patriots against conscription into German slave legions, it became clear that this movement was well organized and had the leadership of key men in General De Gaulle's Fighting French forces.

As hundreds of thousands of youths were reported fleeing from their homes to escape conscription, the flareup of anti-Nazi sabotage and terrorism resulted in the wrecking of German troop trains, the killing of Axis soldiers and attempts to assassinate pro-Nazi French leaders.

PACIFIC FRONT

Over widely scattered fronts in the East, Allied forces continued their battles against the Japanese. One major action in the Pacific area was reported from China's capital, Chungking, where it was announced that the Chinese had driven the Japs back toward the Burma frontier above Tung-yueh in the Salween river area.

In the Solomon Islands area, American dive bombers continued their attacks on Jap-held Munda, important sea and air base.

Washington, D. C.

'FLYING MINUTE MEN'

(The brass ring, good for one free ride on the Washington Merry-Go-Round, is awarded this week to the Civil Air Patrol.)

This brass ring goes not to one man but to 68,000 men and women. They are members of the Civil Air patrol who have been fighting the war in little single-motor planes flying within the boundaries of the United States, and who carry the torch for the future of civil aviation in this country.

How long they will be allowed to carry that torch is the important question. At present they are orphans of the storm—carrying military responsibilities without military standing. They fight submarines, but they had to fight for weapons first. The army and WPB are slowly throttling them by refusing new equipment or repair parts. Thus in order to keep their gradually deteriorating machines going, the Civil Air patrol is almost certain to be swallowed by the army.

The army has been wanting to take over because civilian fliers in wartime are considered a nuisance by the military—with justification in some cases.

Youths and Fathers.

But the owners of 25,000 private planes thought they had something to offer. The younger ones went into military service. Others, many being married men with families, organized the Civil Air patrol, which for more than a year has been flying the coastal waters and maintaining a courier service throughout the United States.

These are the "Flying Minute Men." At first their submarine patrol was merely a spotting job. If they spotted a submarine, they were supposed to radio a shore base and then hover around waiting for a bomber to come to the scene of action. But they had so many heart-rending experiences, that they clamored for bombs of their own. They would dart low over the water, discover a submarine location, radio to a shore base, hold the contact, hover and pursue—and then sometimes lose the prey because the army never came along.

For months they called in vain for bombing equipment. War department insisted that no civilians are allowed to carry weapons, and thus the Civil Air patrol should not be armed. The army would not even release life rafts, and as a result several CAP pilots have lost their lives on submarine patrol.

Finally the restriction was waived, and today these little single-engine planes carry small bomb racks, bombs, and bomb sights.

But they have not been allowed to reveal the success of their submarine patrol. War department calls it "military information," and insists that CAP shall say no more than that they have "attacked" submarines—without indicating the result.

Subs Sunk.

But we can reveal that submarines spotted by CAP observers have actually been sunk. The authority for this statement is Maj. Gen. Follett Bradley of the army air corps, who also emphasizes that these "Flying Minute Men" have provided their own planes, tools, radios, and other equipment.

A year ago German submarines were sinking merchant ships within sight of the Atlantic coast. This brazen activity ceased after establishment of the Civil Air patrol. The submarines were driven into deep waters, for the small planes, flying low and flying slowly, were able to do a better job of spotting than big patrol bombers which whizzed past the scene too rapidly for close observation.

WHY THE JAPS KNOW

Here is an excerpt from the interior department's annual 1941 report, which indicates why the Japs know so much about the Aleutian Islands:

"The floating plant Kosei Maru, with auxiliary craft consisting of 9 trawlers, was engaged from May to August, 1940, in taking halibut and cod in Bering Sea about 100 miles northeast of the Pribilof Islands, with one additional trawler during the last week or two of the season. The vessel was reported to have left for Japan toward the end of August."

"This is the eleventh consecutive year that Japanese floating plants have operated in these waters, the number of vessels having varied from one to four, with the usual complement of tenders."

Note: Under international law it is impossible to prevent foreign fishermen from fishing in foreign waters.

MERRY-GO-ROUND

War Transport Czar Joe Eastman says he gets a bushel of letters and postcards every week suggesting that he bar Mrs. Roosevelt from traveling. Old Washington observers who have seen previous Presidents suffer from getting out of touch with the nation, wish FDR had two Mrs. Roosevelts to keep him posted about U. S. sentiment. Any President who loses contact with the people is finished, and every President, especially in wartime, has to keep close to his desk.

The Ghetto In Warsaw

By Tosha Bialer

(WNU Feature—Through special arrangement with Collier's Weekly)

My husband, my son and I are the only persons in America to have escaped from the ghetto set up by Germany in Warsaw. The amazing set of circumstances by which we escaped cannot be told, because it would mean death to all who aided us.

Of those whom we left behind, I can say little. This is the third winter they will have passed through, and how many will survive I cannot say. There can hardly be many left now of the 600,000 that were once there.

I, who lived with them through dark years, who shared their bitter fate, humbly bear witness to their martyrdom. Anything I may say or write about it is in memory of those who died, a tribute to the courage and determination of those who are still living. I join with them in a prayer for a new world in which they will resume their place as free human beings.

Location of the Ghetto.

The ghetto, as set up by the Nazis after they took possession of Warsaw, included the oldest and most deteriorated sections of the city, a district that had been an eyesore for years and should have been torn down long ago. It comprised many blocks completely destroyed by bombing, without a habitable building left standing. With intentional foresight, not one park, playground or public garden was included behind the high ghetto walls. There was no access to the river banks. The modern Jewish hospital, the Liberal Jewish Synagogue and the Old People's Home were left outside.

The Germans were set on our destruction. With cold logic they concluded that overcrowding, inadequate housing, malnutrition and reduction to subhuman standards would save them the trouble and ammunition required to massacre half a million people outright.

Against this situation, the Jewish Council, a religious committee, took over the responsibility as best they could. The president was a Mr. Czerwinski, a fine man. I say "was" advisedly, because a few weeks ago we learned that he committed suicide when the Germans directed him to draw up a list of 100,000 people for deportation.

Business With Outside World.

All business with the outside world had to be handled through the Commissar for Jews of the German government. I never saw him. He was a remote personality, but his shadow fell deeply across our lives. A court building was the only place where our world met the outside world. Here Jew and Christian were allowed to see each other for the last time. Here men terminated old partnerships started by fathers or grandfathers. Here husbands and wives met to say good-by, to see each other no more. For the Nuremberg law has been applied in Poland, and marriages between Jews and non-Jews had to be dissolved.

We had no electricity, no radios, no telephones, no musical instruments, no street cars. The post office would handle nothing but postcards, and every card was examined by a German censor. Our official bread allowance was five pounds per month.

One morning we woke up to find a number of Jews lying dead in Kupiecka street. They had been caught outside the wall, shot down, and then the bodies thrown into the ghetto. We never knew whether they had passed or not. The Germans never bothered about little technicalities like that.

For our own sake and that of our families, we were always terrified at any harm coming to our jailers. Day after day we saw friends and relatives murdered in retaliation for deeds in which they had no share, no knowledge. On one occasion a Polish policeman had been killed while on duty. The Gestapo carried out an extensive search, in the course of which a building at 9 Nalwki street put up a stubborn resistance for several hours. When the defenders were finally overcome, 53 male inhabitants of that building were dragged out and shot.

Early in 1942, batches of deportees from Germany began to arrive, five or six hundred at a time. After being despoiled of whatever they had, they would be moved on. We were told they were to go to a "reservation" near Lublin. Actually, most of them left in charge of "Estermation Squads." According to the ways of disposing of their charges. One was to shut 50 or 60 of them up in a truck and then fill it with them starving by the roadside. Or, simply machine-gun them.

Keep the Battle Rolling With War Bonds and Savings

HIGHLIGHTS . . . in the week's news

CANBERRA: Diplomatic relations between Australia and Russia were brought closer together when Lord Gowrie, governor general of the commonwealth, received the credentials of the new Soviet minister, M. Vlasov. Lord Gowrie told the new envoy that "both our peoples are encouraged by the knowledge they are fighting for the preservation of their own way of life."

ANKARA: The elevation of Col. Gen. Rudolph Haarde to the post of commander in chief of German forces in Greece, Thrace and the Aegean area was reported here. He succeeds General Stuntz who was reported to have died in a railway accident in Bulgaria in which sabotage was suspected. Haarde was described as a close friend of prominent Bulgarian military leaders.

Country Press of America Is Vital Factor in the Job of 'Holding the Home Front'

ent to War' on the Day
Harbor Was Bombed
and It's Still Waging
A Valiant Fight.

LEMO SCOTT WATSON
ed by Western Newspaper Union.
THIN 24 hours after the
aps made their sneak at-
Pearl Harbor, Raymond
ward of London, Ohio,
ent of the National Edi-
association, was tele-
ing to President Roose-

sure you will find a unit-
backing a united nation
defense of our country
I am sure that I speak
the small dailies and weekly
papers making up the
bership of the National Edi-
association, in assuring

in America with which to
ten and solidify our ef-

the same day a similar
age went forward to the
House from the president
Newspaper Association Man-
Inc., the organization of
secretaries and managing
ors of more than 30 state
associations.

h was the promise. What
een the fulfillment?

it difficult to estimate in
figures the contribution to
a's war effort since Decem-
1941, of the 11,000-odd dailies
weeklies that comprise the na-
"small-town press." A large
of that contribution—perhaps a
part—has been in the realm
intangible, but vitally impor-
thing called morale—in "hold-
home front."

a matter of fact, the country
of America began making this
bution long before Pearl Har-
It started with the beginning
the national defense program
the menace of Hitlerism to
democratic way of life became
and more clearly apparent.

one thing, the country press
buted thousands of columns of
advice, both editorial and adver-
to promoting the sale of de-
bonds. When the selective
act was passed, the country
told the people of his com-
why it was necessary for
sons and brothers to leave the
s and stores and offices of rural
area and go into training so that
could be prepared to defend
country when that inevitable
of attack by the aggressor na-
came

Morale Was Low.

and it was during that period,
the morale of the selectees, in-
equipped, not yet adjust-
to the change from civilian to
ary life and not having the in-
ve of the existence of a "state
er" to make real the necessity
training, might easily have
ed to a dangerously low level.

emizing the fact that the draft-
man's receiving his home town
er was next best to receiving a
er from home, some country
ishers began sending copies of
papers free of charge to the
in camp. Hundreds more vol-
ntly followed their example and
good effects of this practice, in
as of heightened morale among
citizen soldiers, was so appar-
as to win special commendation
the country press from the mo-
division of the war department.

the same practice was continued
America entered the war and
benefits have been even more
arent. It requires little imagina-
to realize what it means to a
ier, sailor or marine in an out-
in Alaska or Greenland or on
fighting front in North Africa or
Guinea to open up a copy of
home town paper and read there
the folks back home are "back-
him up" by their buying war
ds, by their contributing to the
Cross blood bank, by their help
"getting in the scrap" and all
other ways in which civilians
and the war effort. More im-
tant still, perhaps, is the way in
ch it satisfies their hunger for
other news from home—the doz-
of little items about the normal
in their communities to which
hope to return some day soon.

important as has been "free pa-
s for servicemen," it is but one
the ways in which the country
ss has fostered morale not only
ong the fighting men but also
ong their families. Some publish-
have sponsored "send-offs for
ectees"—celebrations in which
whole community joins in paying

It's "Just Like a Letter From Home" to Him!

honor to the men as they march
away to war instead of allowing
their departure for their great ad-
venture to pass almost unnoticed ex-
cept by the presence of their relatives
at the railroad station as they leave.
Other publishers have de-
voted the front windows of their of-
fices to displays of pictures of serv-
icemen from their communities and
almost without exception the country
press, from the beginning of the
war, has printed "honor rolls" of the
names of the community's fighting
men, pictures of them and their let-
ters.

Typical of the numerous ways in
which the country press has built
morale, both military and civilian,
are these examples.

A New York weekly that
founded a "War Service Club"
which performs a variety of
services for the community's
men in the armed forces, includ-
ing the sending each month of
two dozen home-made cookies to
every man.

Another New York weekly that
promoted a "Happiness from
Home" box to bring Christmas
cheer to all local men in the
service.

A New Jersey weekly that
sponsored a special Armistice
day ceremony, honoring the
mothers of four local boys who
had been killed in action.

A Virginia weekly that spon-
sored a "Write Right to Fighting
Men!" campaign to offset the
ill effects of the kind of dis-
couraging letters which some
people write to men in the armed
forces.

One other great service of the
country press in the realm of morale
was the part it has played in putting
this nation in a "fighting mood."
Back in the days when we were
still calling them "defense bonds,"
certain government officials—also
some big city columnists and com-
mentators—began accusing the
American people of being too com-
placent about the war. Thereupon
a weekly newspaper down in Florida
printed an editorial which was at
once a reply to that accusation and
a trumpet call to action. It said in
part:

... If you want the American people
to snap out of their "complacency," then
for the sake of all that's holy start yell-
ing ATTACK! Call the defense bonds
VICTORY BONDS Call the defense
councils WAR COUNCILS

This is a fighting nation This is a
mighty nation Stop low-rating us We
common men and women know what
we do. We have no illusions about it.
We do not intend to be a slave race. We
a subject race, or a passive race. Fur-
thermore, we more than a little suspect
that the entire future of mankind is at stake.

Give us a battle cry!
That this was not an isolated case
was shown by the fact that about
the same time a small community
out in Montana had set aside a
certain day to sell a certain amount
of bonds—not "defense bonds" but
WAR bonds and they called it
BONDBARDMENT DAY. Commenting
on this project, the editor of the local
weekly which had sponsored the
event said:

We think we have the answer here, the
challenge to the cry of complacency. We
think the people are suffering from a sort
of emotional starvation. We are going to
bring back the spirit of the old Fourth
and bring back the spirit of the old Fourth
of July celebrations—that is that part which

invoked the deep spirit of patriotism. We
feel that it will be a laboratory test. We
are sure that scolding and charges of com-
placency are not the answer.

Needless to say this BONDBard-
ment Day in that Montana town, as
in many others throughout the coun-
try, was a tremendous success. And
it is significant that as the result of
a new spirit which swept the coun-
try, aided by the efforts of hun-
dreds of country editors, soon there-
after they were no longer called
"defense bonds" but "war bonds"
or "Victory bonds."

Nor has the work of the country
press in behalf of the sale of war
bonds through its editorial, news and
advertising columns been the only
contribution it has made to the war
effort in the realm of tangible things.
There was the scrap metal cam-
paign carried on to salvage from
the farms of the nation the thou-
sands of tons of metal so urgently
needed by the steel mills to make
battleships, guns and other weapons
of war. A Florida weekly drama-
tized the effort to "get in the scrap"
by capitalizing upon the reputation
of a scrappy American fighter—Gen.
Douglas MacArthur. So that com-
munity set aside a day for bringing
in all kinds of scrap material and
called it "Gen. MacArthur Day."
The event was an overwhelming suc-
cess.

He Sets an Example.

Nor does the average country editor
merely urge the people of his
community to do their patriotic duty.
Frequently he sets them an ex-
ample by going out and doing it
himself. There was the editor of a
New York weekly who has made
his office the center of a 24-hour
service as communications head-
quarters in case of enemy air raids.
There was the editor in a little Kan-
sas town who not only managed the
salvage yard in his town but who
personally collected and shipped
some 60 tons of scrap iron. More
than that he personally did all the
work of cutting up the iron with an
acetylene torch and supervised the
loading and sorting of the entire lot
—all this in addition to his regular
duties as editor, publisher, advertis-
ing solicitor and printer of his news-
paper. And finally there was one of
the leading country publishers in
California who did something about
the manpower shortage besides writ-
ing editorials about it. When trained
sawmill workers in his town began
leaving because they feared they
would be "frozen" in their jobs, he
signed up for work as a lumberjack
in a sawmill on the night shift—
from 5 p. m. to 1 a. m. He sleeps
the rest of the night, then puts in a
full day at his publishing duties.

Such are only a few of the high-
lights in the story of what the coun-
try press of America has done and
is doing since it "went to war." De-
spite the loss of revenue from de-
creased advertising income and in-
creased production costs, despite the
shortages of materials essential to
the printing business and despite
the loss of manpower when its news-
writers and advertising men and
printers went into the armed forces,
it is carrying on valiantly in the
fight for freedom and it is doubtful
if any other class of patriotic Amer-
icans, either as a group or as in-
dividuals, are contributing more in
more different ways to the victory
that will eventually be ours.

Here's How Rural America, Led by the Press, 'Got in the Scrap'

During the scrap collection drives
of the year the rural print shops of
America proved to be a rich source
of scrap war materials. On to
the scrap piles went a great variety
of metals—iron, steel, copper, lead
and zinc. There were old engrav-
ing machines, brass and iron
furniture—even even old
printing presses. Since these old
presses weigh two tons or more and
contain other metals besides iron,

the importance of such contribu-
tions is evident.

But they were not the only contri-
butions of the editors, many of whom
were chairmen of their town or
county salvage committees, who not
only publicized the scrap campaign
through the columns of their news-
papers but also worked actively in
"getting in the scrap." The record
of the small towns and rural ham-
lets of America in this patriotic work
is an inspiring one, as witness these

figures which are typical of hun-
dreds of such communities:

Town	Population	Tons of Scrap
Peet, Colo.	207	235
Burdett, Kan.	384	175
Vernon Center, Minn.	355	118
Elburn, Ill.	624	107
Stanton, Iowa	572	86
Silver Lake, Ind.	411	51
Attica, Kan.	600	40
Mellott, Ind.	300	25
Ripley, Okla.	500	12

About New York:

Wall Street begins with a grave-
yard, ends in a river and once was
a sheep pasture. . . . Make your own
wisecrack. . . . One of the best food
spots is the Telephone Company's
cafeteria on West Street. For the
convenience of phone workers, but
common folks like the rest of us are
admitted. . . . For a whiff of British
atmosphere take a walk along
Thames Street. It is where ye olde
chop houses and taverns are locat-
ed, as well as architecture patterned
after London's side streets. (And
don't forget to bring your monocle,
Mr. Jessel). . . . The green door
at the top of the left-hand stairway
on the mezzanine in Madison Square
Garden leads to the most exclusive
club in town—for the Garden's own-
ers, stockholders and friends. . . .
It also has a library, a taproom and
a cocktail lounge. . . . The large
pew in St. Paul's Church on lower
Broadway has the coat of arms of
the U. S., because it once was occu-
pied by General Washington and his
family. But you may sit in it.

Our town doesn't produce one
thing to feed, clothe or warm us.
Everything we use is shipped in. . . .
You can get the best view of the
majestic steel poetry of the G. Wash-
ington Bridge from the Cloisters at
Fort Tryon along the Drive. Leaves
you breathless. (You must see it,
Cong. Hoffman). . . . Pitman's, a
pub on South Street, contains all the
lusty flavor that you see in Western
movies. . . . A New Yorker need not
travel far to find natural wonders.
He may enjoy them by simply walk-
ing along the Hudson—more beau-
tiful, we are told, than the Rhine
or Danube. . . . The clientele at the
Hotel Taft is so cosmopolitan, many
of the maids and clerks there are
required to speak several languages.
The false walls to be found in
Chinatown cellars were erected to
mark dividing lines between differ-
ent Tong.

For some unknown reason, wom-
en are admitted to the men's bar at
the Plaza only after the Stock Ex-
change closes. . . . Those caves in
Central Park were once homes of
Indians. . . . Some of the most valu-
able property in town is in Harlem,
where poverty is king. . . . J. P.
Morgan buys his coffee on Maiden
Lane, with his ration card, of course.
He prefers the green bean and
roasts it himself. . . . The Bowery
Jewel Market (near Canal and Hester)
resells gems containing loving in-
scriptions. Mementoes of dead ro-
mances. . . . The Siamese Consu-
late has the softest snap. Never has
to take care of more than a half
dozen Siamese nationals. . . . The
Hapsburg Restaurant on 55th Street,
until recently, featured a hat-check
girl who gave you a dime with your
hat. . . . It's an interesting city, Our
Town. . . . Which out-of-towners al-
lege is a nice place to visit, but
not to live in. . . . But more people
live in New York City than any-
where in the world.

It happened during the recent FBI
raid on Tough Touhy and Basil
Banghart in Chicago. . . . John Ed-
gar Hoover, leading the raid in the
pitch black night, gun in hand, ac-
cidentally stepped on a sleeping cat.
The G-Man's surprise—you can
well imagine—was as startling as
the pussy's!

But what we started out to report
was a comment of Banghart, who
said: "Mr. Hoover, please send me
to Alcatraz. I hate where I was!"
Mr. Hoover asked: "What's
wrong with it? It has a nice, big,
stone wall, to keep out the riff-raff!"
To which Banghart whined:
"I don't like it there. Too many
thieves. They are the worst card-
cheats of all!"

You've probably read it before.
That's how we got it. But it belongs
here, we think. It's too good for the
opposition, anyhow.

It's the one about the cook on a
destroyer, who was sooooo seasick.
The Captain, on the bridge, was
cold and hungry. He sent a Lt. be-
low to bring back a couple of ham-
and-egg sandwiches. . . . The of-
ficer found the cook prostrate across
a table. . . . "A couple of ham-and-
egg sandwiches for the Captain,
pronto!" he barked.

"Ohhhhh!" groaned the agonized
cook. "I'm sooooo sick. I just
couldn't look at food. Please go
awaaaaaaay!"

"Don't you know what will happen
if you don't?" asked the Lt.

"What can happen—what can hap-
pen?" groaned the cook.

"The Captain will come down here
and shoot you!"

"Ohhhhh!" was the retort, "I
WISH HE WOULD!"

The reason the National Press
Club again did not hold its annual
dinner for FDR was that the Secret
Service nixed it. Tradition demands
it be held in that building. . . . Sev-
eral newspapers are offering fancy
salaries to scribes over 38, but re-
quire signing of a waiver to all job
rights 60 days after the Armistice.
OPA men are visiting swank
spots to inspect food stocks and
"hoarding, if any." . . . Averell
Harriman may inherit Winant's
London post if Winant enters the
Cabinet.

Here's Easy, Quick Way to Make Draw Curtains With Your Fixtures

IT IS easy to make draw curtains
with the fixtures you have, plus
a pair of large screw-eyes, some
wood or brass rings, and about
five yards of cord.

The screw-eyes are placed just
under the hooks for the curtain
rods; then run the cord through
the screw-eye at the right; then
through the rings, knotting it to
the left ring at center; then
through the rings and the screw-
eye at the left; and back through

the rings, knotting it to the right
ring at center.

Now pass the cord through the
rings and the right screw-eye and
then make the tassels; raveling
the ends of the cord after making
the knots. Sew safety pins to the
back of the curtains so that they
may be fastened quickly to the
rings.

NOTE—The curtains shown here are
from BOOK 1 of the series available to
readers at 15 cents each. BOOK 1 also
contains directions for making curtains
for various rooms, also cutting and mak-
ing directions for bedspreads, dressing
table skirts and slip covers. To get a
copy send name and address direct to

The Hope of Death Kept Spark of Life in Recruit

The army medico was making
his cheerful rounds of sick bay on
the huge transport that had been
working for several days through
the long, oily swells of a rough
sea. One case was nothing more
(or less, depending upon the indi-
vidual point of view) than an old-
fashioned attack of seasickness.

"Well, Private Jenks," boomed
the doctor heartily, "it looks to
me like you're not going to die af-
ter all."

Private Jenks opened a horrified
eye, to stare at the doc.

"Not going to die!" he wailed.
"Gosh, doctor, I thought I was.
That was the only thing that kept
me alive."

HOUSEHOLD MEMOS

by Lynn Chambers

Greet the Day With a Well-Balanced Breakfast
(See Recipes Below)

Good Morning!

What's your breakfast? A squirt of orange juice and a sip of coffee, fruit, cereal, toast and jam. No need to tell you which you can start your man-sized day's work on, is it? A breakfast should supply almost a third of your day's calories and food value. A slight breakfast will prevent you from waking up fully—and thus trying to realize your full quota of production whether you're on the job or in the factory. But, treat your first meal of the day with the respect you do the other two, and you find yourself refreshed and ready to do your job—no do it well.

If you're still in doubt about the value of a good breakfast, look at the statistics fed servicemen. Do you think they could get up and do their job if it weren't for fruit, cereal, eggs, toast or hotbread and jam for their first fare of the day? No, ma'am.

Breakfast affords a grand chance for you to get your vitamin B1—the important morale vitamin which prevents nervousness and sleeplessness. You need this vitamin every day—and its best sources are whole grain cereal and bread—and eggs.

On warmer days, serve oatmeal with whole wheat cereal, on cooler days, use the enriched, ready-to-eat cereals which are unrationed. When berries and fruits start coming use a few of them with the cereal for a delightful breakfast dish. Breakfast is a good way to take care of the citrus fruit requirement of the day, too. A half grapefruit, a large orange or a large glass of orange juice will fulfill the vitamin C quota of the day. Remember, however, that vitamin C is easily destroyed by air, and that means you should not squeeze or cut up oranges until just before serving.

*Old-Fashioned Popovers.
3 eggs
1½ cups milk
1½ cups enriched flour
½ teaspoon salt
Sift flour and salt into a bowl. Beat eggs and add milk to them. Stir gradually into the flour to make a smooth batter, then beat thoroughly with egg beater; put in greased muffin tins two-thirds full of mixture. Bake in a hot oven (350 degrees) half hour, then in moderate (325 degree) oven 15 minutes until brown. Note: No leavening agent is used in popovers, and their rising action is dependent upon thorough beating.

Lynn Says:

Make Rationing Work: Keep food essentials in mind when planning your menus, and use point-rationed food to best advantage. When you spend any of your coupons for rationed food, make sure you are not buying anything that you could buy fresh.

In buying meats buy those of which you get the most for your points. Extend whatever cuts of meat you can with cereals, stuffings, food extenders and vegetables to make them go further.

Start today to save sugar and put it in a bank so that you will have enough for the canning you are going to do this summer. Do not use sugar anywhere that you possibly can avoid it. Start planning your victory garden, so that you will be ready to put up as much of your share in fruits and vegetables.

Buy quality foods to get the most value of your points. This applies to canned and processed foods, meat, cheese and butter.

Lynn Chambers' Point-Saving Breakfast

- *Baked Apples
- Ready-to-Eat Cereal
- Cream and Sugar
- *Old-Fashioned Popovers
- With Jam
- Beverage
- *Recipes Given

If possible, have eggs for breakfast—with bacon, if you can manage it, but remember that a nice hot bowlful of oatmeal will give a goodly quantity of health. Then, of course, you can vary the menu with pancakes, french toast and waffles when the mood strikes you.

Baked pears or apples are a good fruit for breakfast variation. Try apples this way:

*Baked Apple With Orange Marmalade Filling.

Select apples that are suitable for baking. Core, and fill cavities with orange marmalade. Prick skins with fork and place in a baking pan with a little water. Cover with lid and bake in a slow oven until tender. Remove lid just long enough to brown.

Creamed Chipped Beef Omelet. (Serves 8)

- 1 cup chipped beef, cut fine
- 1½ cups white sauce
- 6 eggs
- 6 tablespoons top milk
- ½ teaspoon salt
- ½ teaspoon pepper

Fold chipped beef into white sauce. Beat eggs until fluffy, then add milk, salt and pepper. Melt enough butter or margarine into a heavy skillet to cover bottom and sides of pan, pour in eggs and shake gently over fire. When set, loosen sides and bottom, cover with heated creamed beef, carefully fold over with spatula, and slide onto hot platter. Serve at once.

For variety, there are many types of griddle cakes:

Sour Milk Griddle Cakes.

- 1½ cups flour
- 1 cup buttermilk
- 1 tablespoon melted butter or margarine
- ½ teaspoon salt
- 1 teaspoon baking soda
- 1 tablespoon sugar
- 2 eggs

Sift flour and sugar, dissolve soda in buttermilk and add to flour. Drop in unbeaten eggs and beat well, then fold in butter. Drop by spoonfuls on a hot, greased griddle and brown on both sides.

Flannel Cakes.

- 2 eggs
- 1½ cups milk
- 2 cups enriched flour
- ½ teaspoon salt
- 2 teaspoons sugar
- 2 tablespoons melted butter or margarine
- 3 teaspoons baking powder

Sift all dry ingredients. Beat egg yolks and add to milk. Pour this into the flour, add melted butter, and lastly the well-beaten eggs. Drop by spoonfuls on hot, greased griddle and serve with syrup, preserves or jelly.

Crisp Waffles.

- (Makes 4 4-section waffles)
- 2 cups sifted cake flour
- 2 teaspoons baking powder
- ¾ teaspoon salt
- 2 egg yolks, well beaten
- 1 cup milk
- ¼ cup melted shortening
- 2 egg whites

Sift flour, measure, add baking powder and salt and sift again. Combine egg yolks and milk, add to flour, beating until smooth. Add shortening. Beat egg whites until they hold up but are still moist, then fold into batter. Bake on hot waffle iron.

Star Dust

STAGE-SCREEN-RADIO
By VIRGINIA VALE
Released by Western Newspaper Union.

THE little town of Brawley, Calif., woke up one morning recently to find a motorized battalion of German troops, armed to the teeth, lining the streets. As the Mexican border's only 25 miles away, the townsfolk were a bit jittery. Then they took another look at the "invaders" and recognized them as Brawley high school boys, drafted by Columbia Pictures to represent a unit of the Nazi Afrika Korps in the picture "Somewhere in Sahara." Humphrey Bogart's starred in it.

Janice Gilbert, who's twenty, has been acting since she was eight, has been on the radio since she was ten. On "The O'Neills" she plays "Janice O'Neill" and also an infant

JANICE GILBERT

and four children. But her most famous juvenile role is "Little Orphan Annie"—when she tours army camps, entertaining the boys, she gets vociferous requests for a session with "Annie."

The night Ann Ayars, Metro starlet, sang for the boys at Fort MacArthur, Calif., she got a rousing reception, but could have dispensed with part of it. Arriving in a pouring rain, she was escorted to the hall by a new recruit who led her smack into a deep puddle at the stage door. Ann fell in to her hips. She says that most of what the soldiers saw of her was mud!

Any Hollywood personage who discovers Lupe Velez watching him intently is likely to be uneasy; experience shows that Lupe's just gathering material for a devastatingly funny impersonation of him. Her imitations seldom reach the screen, but in "Redhead from Manhattan" she does several imitations of fellow stars. She plays identical cousins, both of whom are revue stars.

Lionel Barrymore was in a dangerous spot a while back, and it wasn't one of those things that are part of a scenario, when the actor knows he'll be rescued. Driving home, he miscalculated the depth of flood water near his ranch, and found himself sitting in his stalled car in water up to his neck. The swift current started moving the car toward deeper water. But neighboring farmers came along with chains and hauled the car back onto the highway. The car was ruined, but the famous Barrymore wasn't damaged.

When Robert Ryan joined the army he knew that he'd have a job when he came back; he has a contract with RKO that assures his return to the screen at the war's end, at a salary exceeding the one he was getting when he left. His work in "Bombardier" and "The Sky's the Limit" was responsible for the scrapping of the old contract and the writing of the more favorable new one.

Bob Hope's set for another of those cross-country tours of army, navy and marine posts and bases, which is good news for the men who'll benefit; he gives them a swell show. In fact, he probably works harder at entertaining servicemen than at anything else.

Jack Miller, orchestra director for Kate Smith and "The Aldrich Family," can drop off to sleep any time. He dozed off in the studio before a recent "Aldrich Family" broadcast, so the cast slipped out and sent a page in to wake him and explain that the program was over and all visitors must leave. He spent a frenzied five minutes before he caught up with the truth.

ODDS AND ENDS

The voice which Willy Mager uses for "Wilbur" on the Tommy Riggs broadcasts is going into the movies for the second time, as the lead in the Metro cartoon, "The Screwy Squirrel." After three years' preparation, King Vidor is nearly ready to begin production of "America," starring Brian Donlevy... Helmut Dantine, the Nazi aviator of "Mrs. Miniver," has a leading role in Warner Bros. "To the Last Man," starring Errol Flynn... New Orleans' famous French market, exactly as it was back in 1885, has been erected as a set for "Saratoga Trunk." \$250,000 has been appropriated for advertising and exploitation of "Mission to Moscow."

Walter Winchell

(WNU Service)

The Congressional Jokes:

It has been reported that House legislative leaders intend to pick a few nimble-witted Congressional sharpshooters, who would be in constant attendance during sessions—to make clay-pigeons of those who try to spread smears across the Congress. It's about time. We hope their rapier-retorts will help enliven proceedings. Congressional history is crowded with swift repartee-heeing. Like some petty humans to-day, a small-time politico was once trying to make a name for himself by picking on an important American—who happened to be a Senator. The human mosquito annoyed the Senator for months, who finally slapped him into oblivion with this story: "A skunk once challenged a lion to a fight. The lion declined. When the skunk asked loudly if he was afraid, the lion said: 'Very much so. For you would only gain fame by having the honor to fight with a lion, while everyone who met me for a month would know that I had been in company with a skunk!'"

A lawmaker with a sensayuma once told this about himself. He sent a constituent a Cong. Record with a note stating that the Government prints and distributes speeches made by Congressmen without the slightest profit. The voter returned the note with this flip addition: "They are also read the same way!"

Huey Long was called a demagogue after he concluded a teejus filibuster. Hooey foamed at the mouth, daring his critic to define the word. Which his critic did. "A demagogue," he snapped, "is a man who can rock the boat himself and persuade everybody that there's a terrible storm at sea."

Here are some of the facts of life about Congress every citizen should know... Before times got too serious for such levity, a group of legislators organized a "Demagogues" Club, which met daily in the House cloakroom. After a Representative made a particularly demagogic speech for home consumption, he was hailed into the cloakroom and compelled to make the speech he would like to have made. Then he was asked to repeat the club pledge: "Vote for all appropriations and against all taxes," and inducted into full membership. The badge was a safety pin, worn under the coat lapel... Some fun, eh?

Then there's the one about the Congressman's wife who woke up in the middle of the night. "Jim," she whispered, "there's a robber in the house." Her sleep-befogged hubby replied, "That's impossible. In the Senate, yes, but in the House, never."

This is one of the Congressional favorites... House Speaker Tom Reed had a barbed-wire tongue... One day one of the biggest bores in Congress got up, drooled out a lengthy diatribe and concluded by stating: "Mr. Speaker, I am like Henry Clay. I would rather be right than President!" Reed merely intoned: "Don't worry—you will never be either."

Rep. "Uncle Joe" Cannon loved to tell tall tales about his fishing. He once told a friend about a fish he caught. Trying to beat him to the punch, the chum asked: "About the size of a whale, wasn't it?"... But the Congressman wasn't stopped: "Heck, no," he replied, "I was baitin' with whales."

In 1914 the House of Representatives was evenly divided between both parties. The vote for House Speaker resulted in a tie. One independent Progressive could cast the deciding vote. That man was Cong. Thomas D. Schall, who was blind. He felt handicapped in not being able to judge rival candidates by seeing their faces. So he asked a newspaper man who had "an honest voice" for counsel. The reporter suggested that with a war going on the House Speaker should belong to the same party as the President. The blind Congressman took his suggestion—and Champ Clark became Speaker. In that position, Clark played one of the most vital roles in world affairs and turned the tide of history.

Contrary to popular belief, most Congressmen don't like to have the power of giving political jobs. Through bitter experience a Congressional maxim has evolved: "Every political appointment means one ingrate and a dozen enemies."

No column of legislative anecdotes would be complete without the classic about the tot who visited the House of Representatives with his father. The youngster pointed to a man standing on the dais and asked who he was... The father explained he was the chaplain of the House... "Does he pray for the members?" the child asked with logical reasoning.

The father informed: "No, my son. When he sees the members sitting there—he prays for the country!"

PATTERNS

SEWING CIRCLE

for these clothes—the youngster because they are so pretty and sensible and her mother because they are practically no bother at all.

Pattern No. 8363 is in sizes 1, 2, 3, 4 and 5 years. Size 2 dress takes 1½ yards 35-inch material, overall 1½ yards, playsuit ¾ yard, 8½ yards binding.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

Enclose 20 cents in coins for each pattern desired.
Pattern No. Size.
Name
Address

From an old French word "mes" derived from the Latin word "missus" meaning a course at a meal, comes the Army's name "mess" for its breakfast, dinner, and supper. Favorite meal with the soldier is chicken dinner—his favorite cigarette, Camel. (Based on actual sales records from Post Exchanges.) A carton of Camels, by the way, is the gift he prefers first of all from the folks back home. He's said so. Local tobacco dealers are featuring Camel cartons to send anywhere to men in the armed forces.—Adv.

Attaining True Wisdom
Not by constraint or severity shall you have access to true wisdom, but by abandonment and childlike mirthfulness.—Thoreau.

Household Hints

To remove whitewash from ceiling, dissolve one pound of alum in one gallon of strong vinegar. Apply with a brush and let it soak in well. Then scrape and wash as usual.

Do not sprinkle all your linen napkins when preparing for ironing. Dip every third napkin into clear warm water, place one between two dry napkins, fold and roll together. Napkins dampened in this way are ironed easily.

Turn gas burners down when foods have begun to boil. Nothing is gained by too-rapid boiling.

Never leave egg white after it has been beaten stiff. If let stand it will flatten and will not beat up again.

Leaking faucets can waste gallons of hot or cold water in a few months. See that faucets are tight.

ECKARD ZEIDLER AGAIN NO. 1 FISHERMAN

When Eckard Zeidler tells you at
is time to go fishing, you can de-
pend on it that he knows what he
is talking about.

Saturday afternoon Eckard hiked
down to the river with rod, reel and
bait and came back with a nice big
sucker to back up his claims of be-
ing the first of the local nimrods
to catch a fish this spring.

Eckard brought the fish to The
Times office and it was still flopp-
ing around in the bucket.

For several years now, Eckard
has been the first local fisherman
in the early spring to get results.

He still ranks as Klemme's No. 1
Early Fisherman!

To show that he really could
catch fish, Eckard went out to the
river Monday evening and brought
back seven large bullheads.

IT MADE HIS PARENTS EMBARRASSED

One of the best true "kid stories"
we have heard for a long time is
the one about Dick, small son of
Capt and Mrs. A. H. Dulmes, form-
er Klemme residents, but now re-
siding at Brigham, Utah. The tale
was related by Dick's teacher to his
parents.

Dick is a pupil in the first grade
and one day the teacher thought
she would entertain the little tots
by reading a story. Evidently the
story was a bit long and not too
exciting, as she noticed that Dick
let out a couple of deep sighs, in a
rather bored manner.

She read a bit more and then de-
cided that perhaps the children
possibly were a bit tired of the the
story, so she closed her book and
remarked, "now children we will
relax for a few minutes." Dick
looked relieved and blurted out,
"Right now I could go for a beer!"

That remark really "floored" the
teacher. She had to leave the room
for a good hearty laugh.

ALL SIGNS ARE POINTING TO SPRING

We are still keeping the old snow
shovel in a handy place even if all
signs point to spring.

One of the sure signs of spring
is when the women begin to get
fidgety and start house-cleaning and
male members of the family are
chased out-of-doors to rake winter's
trash from the lawn and around
the yard in general. But these are
not too sure signs of spring.

But when the purple martins ar-
rived Monday and began soaring in
the air, it was one of the best signs
of spring. The better half found a
crocus in bloom Monday, which is
another of nature's sure signs that
spring has arrived.

And when this scribe gets that
far away feeling and visions of
leaping fish and cool woods . . .
well, who can question that spring
has arrived?

It doesn't take a large garden to
have fresh tomatoes even in late
winter. Mrs. Ed Lockner of Spenc-
er has learned. Mrs. Lockner has
a small tomato plant in a flower
pot from which she has picked six
large tomatoes and the plant still
has green tomatoes on the vines.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DEN- TISTS, FOREST CITY, IOWA. OF- FICE PHONE 374, RES. 189.

Orville Maben, of Garner, was a
business caller in Klemme Tuesday
morning.

Mrs. Alfred Merkel and daugh-
ter, Corrine, and Mrs. Peter Merkel
were Mason City visitors Monday.

Mr. and Mrs. W. F. Pavey were
at Des Moines and Perry on busi-
ness Tuesday.

L. B. Kallestad, of Belmond, was
a business caller in Klemme Tues-
day.

Mr. and Mrs. C. C. Kilgore and
son, Lt. Lyndon Kilgore, were at
Mason City on business Saturday.

Mrs. Edmond Blanchet is assist-
ing at the Thada Store on Satur-
days.

Mr. and Mrs. William Meyer, who
live on their farm near Miller,
were visiting in Klemme Friday.

Mrs. Henry Schroeder and son,
Albert, of Chicago, were dinner
guests Saturday evening at the C.
A. Larsen home.

Quite a number of men from the
Liberty and Klemme Methodist
churches attended the Brotherhood
meeting at Britt Monday evening.

Lt. and Mrs. Lyle Wilcox arrived
in Klemme Tuesday from Minne-
apolis for a few days visit at the C.
G. Waterman home.

Mrs. Carol Larson and sons of
Des Moines spent Monday and Tues-
day visiting at the parental Fred
Kluckhohn home.

Mrs. Quentin Stille enjoyed a
visit last Thursday from her sister,
Mrs. Ernest Scheetz, husband and
baby from Ft. Atkinson.

Mr. and Mrs. Ernest Scheetz and
baby, of Ft. Atkinson, were dinner
guests Friday evening at the Bert
Jones home.

Mr. and Mrs. Emil Barz drove up
from Waterloo Friday evening to
visit over Sunday at the home of
Mrs. Clara Barz.

Joe Hejlik of Garner, was trans-
acting business in Klemme Satur-
day morning and was a caller at
the Times office.

Cyrus Massey of Garner was in
Klemme on business Saturday af-
ternoon. He was a caller at the
Times office while in town.

Mrs. Lars Myklestad, Mrs. Allen
Myklestad and son, Roger, of Ven-
tura, and Miss Mabel Lee of Clear
Lake were visitors at the Paul Van
Buskirk home Sunday.

Mr. and Mrs. Bert Mathews, and
Grandma Smith, of Clear Lake,
were dinner guests Sunday at the
J. N. Day home. Mrs. Smith re-
mained for a few weeks visit.

Pvt. Lowell C. Mau, of Lubbock,
Texas arrived home Wednesday to
spend a furlough visiting with his
parents, Mr. and Mrs. Lewis Mau,
of near Klemme.

Earl Josten, of West Des Moines,
spent Saturday visiting with his
father, John Josten here, and with
his uncle, Erick Josten who is a
patient at a Mason City hospital.

Mrs. H. E. Harvey accompanied
Rev and Mrs. Broberg of Garner
to Des Moines Wednesday where
they attended a two day conven-
tion of Methodist workers.

Mrs. Rose Mitchell, Mrs. Antonio
Keraus and Miss Jeanette Knudson
of Swea City were Saturday night
guests at the W. C. Keraus home,
and Sunday dinner guests at the C.
G. Waterman home.

Mrs. C. A. Arnold purchased the
small house formerly occupied by
the Edwin Medaus family and had
it moved to her farm. The Medaus
family purchased the Patet house
some time ago and reside in it now.

Rev and Mrs. Harvey Nelson of
Terrill, Iowa, spent Thursday even-
ing and Friday visiting at the T. C.
Nelson home. Rev and Mrs. Nel-
son had been at Des Moines to at-
tend a Methodist conference.

Dinner guests Sunday at the
home of Mr. and Mrs. Louis Per-
kins were the latter's parents, Mr.
and Mrs. Bert Hinton of Fort Dodge
and Mrs. Perkins' sister and brother-
in-law, Mr. and Mrs. Lee H.
Stuart of Webster City.

Capt. A. H. Dulmes, who is now
stationed at the Bushnell General
hospital at Brigham, Utah, visited
with old Klemme friends Thursday
and Friday. Capt. Dulmes arrived
here from Temple, Texas, where he
took a convoy of patients to a hos-
pital there. He reports that Mrs.
Dulmes and Dick are well and an-
xious to get back to Iowa for a visit
with old friends.

Mrs. C. A. Larsen and children,
Eunice and Clarence, Jr., were
supper guests at the Edwin Josten
home Monday evening. Mr. Larsen
and Mr. Josten attended a Brother-
hood meeting at Britt.

Mr. and Mrs. Leo J. Esbeck and
Mr. Bob Geisel of Andrew, Iowa,
were week-end guests at the E. F.
Jacobs home. Mr. Esbeck is super-
intendent of schools, and Mr. Geisel
is in the hardware business at An-
drew.

Miss Vella Paul arrived home
Tuesday afternoon from Fort Ban-
ning, California on a fifteen day
vacation. Miss Paul is employed in
government communication work at
Ft. Banning. This is her first visit
home in three years.

Mr. and Mrs. Joe Burgess, Dean
and Jo Ann and Lt. Lyndon E. Kil-
gore were dinner guests Sunday at
the C. C. Kilgore home. Lt. Kil-
gore left Sunday night for Camp
Robinson, Arkansas where he will
report for duty.

Mr. and Mrs. Ira Overholt re-
turned Thursday morning from a
visit with their children in the east-
ern states. They visited with their
daughter near Washington, D. C.,
with their son at Palmerton, Pa.,
and with their other daughter at
Detroit, Michigan.

Lt. Lyndon Kilgore arrived last
Thursday morning to spend several
days of his leave visiting with his
parents, Mr. and Mrs. C. C. Kil-
gore. Lt. Kilgore, who graduated
about ten days ago from officers'
training, has been assigned to Camp
Robinson, Little Rock, Arkansas
for duty.

Rev and Mrs. Calvin Grossh-
uesch, accompanied by Mrs. Ray-
mond Barz, Mrs. Ed Becker, Miss
Avis Barz and Mrs. Naska Bock,
drove to Marshalltown this Wed-
nesday morning to attend a Re-
formed Womens Guild. They also
visited with Miss Gertrude Gross-
huesch who is taking nurses train-
ing there.

Mrs. Henry Schroeder and son,
Albert and Grandma Schroeder of
Chicago, arrived in Klemme last
Thursday. Albert spent a few days
here looking after business. Mrs.
Henry Schroeder will spend about
two weeks visiting here, while
Grandma Schroeder will remain at
the home of Mrs. Lena Schroeder.
Grandma Schroeder is now past 90
years of age but is well and healthy
and appears much younger.

PLENTY OF TURKEY

Delos W. Mott of Hampton is go-
ing to see that at least some people
are going to have plenty of turkey,
at least for Thanksgiving. He re-
cently had 7,500 turkey eggs placed
in the incubators of a local hatch-
ery.

afternoons Tuesday through Fri-
day; open all day Saturday and
closed all day Monday.

Our Men In The Service

PVT. GERALD E. BARZ HONORABLY DISCHARGED

Pvt. Gerald Barz, son of Mr. and
Mrs. Herman Barz, Klemme, ar-
rived home Wednesday from Ham-
mer Field, Fresno, Texas, where he
received an honorable discharge
from the army, because of an ill-
ness.

Gerald had served about six
months in the army and spent some
time in the army hospital. He ex-
pects to do farm work.

KEITH STILLE BACK IN IN THE STATES

Mrs. Blanche Fredrick received a
telegram the latter part of the week
from her son Keith Stille, saying
that he had arrived in the States.

Keith was one of the first Klem-
me boys to enlist and has seen a
lot of service in the Pacific.

"BILL" LEMKE NOW IN PRE-FLIGHT TRAINING

"Bill" Lemke, son of Mr. and
Mrs. Wm. Lemke of Liberty town-
ship has passed by his first stages
in becoming a pilot and is now in
the Army Pre-Flight School. His
address follows:

Pvt. Wm. H. Lemke, 17152308,
Hq. 82nd Coll. Tr. Detach.,
Iowa Wesleyan College (A. C.)
Mt. Pleasant, Iowa.

LOCAL MAN INJURED BY POWER SAW

Roland Runge, carpenter at the
Northern Lumber Co., injured one
of his fingers on his left hand while
operating a power saw Friday. It
required nine stitches to close the
wound.

AIR MAIL "SPECIAL"
Mr. and Mrs. Sam Spotts of Ida Grove received a letter dropped from a plane piloted by their son-in-law, Lt R W Manteuffel. The letter landed just 50 feet from the Spotts front yard

A RARE ITEM
Jefferson residents were able to purchase chewing gum one day last week. The Red Cross had purchased 519 packages to send to service men going overseas, when they were advised that a recent war regulation stating that the bright red labels might attract enemies who thrown into the water, the Red Cross was left with the gum in their hands. To obtain benefit from the purchase the high school seniors took charge of the gum, the gum with a minimum price of ten cents per package and a limit of two packages to a customer. All proceeds went into the Red Cross treasury.

SENIOR CLASS NEWS

Anna Lee Brunes, Reporter

Bulletin All sad expressions around Klemme High this past week are due largely to six weeks test. The Senior American Literature Class is working on modern short stories such as "The Revolt of Mother," "Under the Lion's Paw," and "Ali G d Canyon," and "Gift of the Magi."
The Physics Class was given 50 questions for our test. Most of them were true and false. As yet we do not know what are grades.
The Senior Home Ec Girls have started a unit in sewing. Some of the girls are making dresses for a friend.
By the way, where did Bill's picture book go one day last week?

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

This week we spent in studying and taking six weeks tests. We have now come to six weeks test. We have now come to six weeks test. We have now come to six weeks test.
The Junior Class is in the Red Cross. The Red Cross have to give a contribution Friday. An accident has to take place and the victims are to be bandaged and treated correctly. Each Class has to give a contribution and the best one will be the one on the last day of the course.
In Geography we worked out a practical problems dealing with ratio and proportions.
We are studying the state course in American Government. The three kinds of state courts are local county and district courts.
The Biology Class is still waiting for Mrs. Edahl to give her book on the importance of Biology.
Mark seems to have quite a bit of fun with his water gun in school but the girls don't seem to enjoy it.
The Junior mothers met at the school house Thursday to discuss plans for the Junior-Senior banquet which is to be given April 30.

SOPHOMORE NEWS

Patricia Kudje, Reporter

This week was the "six-weekly brain wave week." Pests again. Not any really hard ones in the lunch though.
Again our class is in the limelight. We still hold the record for high points in conduct in school.
As it was so nice this week, the boys and girls have had P. T. outside.

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

The Algebra Class had its six weeks test Wednesday. The grades were about medium. We should have done better.
The English class has started literature. We will continue this study to the end of the year.
In Science we had our 6 weeks test. It was the true and false kind. There were some high grades.
The Manual Training Class are repairing furniture. We also re-finish furniture.

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher
Marcile Jeston, Reporter

This week we are having 6 weeks tests. The Eighth Grade are going to start work on their paper this next week.
In the Eighth Grade we are now studying about squares and square roots. The Seventh Grade are now learning how to make figures by using a compass.

Spelling Honor Roll

Those who received perfect scores in Spelling during the test are: Roger B. Roger R. Peggy Lou Coobs, Marcille, Edward and Darwin.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

The Fifth Grade Geography has started a study of the South Atlantic States. We have studied thirty-three states in all.

The Sixth Grade have been studying the countries of Europe as they were before German occupation.

Spelling Honor Roll

Six weeks tests: Norma, Marjorie, Will S. Maurice.
Those who missed one out of the one hundred words were Robert, Iris, Merlin, Luella.
Those who missed two out of one hundred words were Marvin and Isabelle.

This week we read "Yummy Buys a Bicycle" for recreational reading.

THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

We were very proud of our spellers in the spelling contest. Audra Jones won in the 4th grade and Maxine Barz won in the 3rd grade. They each received a 25c Defense Stamp.
For Art this week we drew pictures of robins.

We April-fooled Mrs. Guelff with a peanut shower Thursday afternoon. It was fun and we had lots of peanuts.

Spelling Honor Roll

La Nelle, Audra, Sondra, Lucille, Maralee and D. L. received perfect scores in spelling this week.
Jimmy and Harley brought us some pussy-willows.

PRIMARY ROOM NEWS

Virgie Hardecopf, Teacher

The First Grade are reading in a new Social Science Reader "David's Friends at School." The Second Grade have finished their book "Friends and Neighbors."

In Art Class we had fun making airplanes out of a sheet of paper and a bobby pin.

We purchased \$8.30 worth of War Stamps this week.

Honor Roll

The following people were neither absent nor tardy this 6 weeks: Lois Ann, Leonard, Carole Ann, Graydon and Terry.

Spelling Honor Roll

Those who received one hundred in Spelling were:
First Grade: Bonnie Jean, Gary Beck, Lois Ann, Daisy, Roger, Janice, Richard, Denny, Ronald.
Second Grade: Neva Ann.

LETTER FROM ROYALTY

Several weeks ago a trainload of British soldiers were in Perry for a short time. At that time, Mrs. Harry Heaton assisted the boys in obtaining shaving cream without turning in old tubes. Mrs. Heaton was so impressed with the fine manner of the boys that she wrote a letter to Queen Elizabeth, telling her that they were good, well-behaved boys. Queen Elizabeth directed a lady-in-waiting at Buckingham Palace to reply to Mrs. Heaton's letter, sending the royal appreciation for favors shown to the boys.

LONG WAY FROM HOME

Mr. and Mrs. Donald Sackett of Stone City learned recently that two of their sons in the army, now stationed in Africa, had spent two days together. The two boys were filling their canteens at a small canal when Walter recognized his brother, Willis, standing just ahead of him in the line. The parents had not heard from Willis for some time and were glad to receive word that the two boys had seen each other.

BETTER IOWA GARDENS

(A special column prepared for The Klemme Times by Iowa State College Specialists)

The Irish Cobbler has proved to be the most productive and dependable variety of potato for Iowa. About three-fourths of the potatoes in Iowa are Irish Cobblers. Chipewawa is the next best variety. It does not have deep eyes like the Cobbler. Home gardeners who desire a few early potatoes will find that Warba will be ready for use several weeks earlier than Cobbler.

Lime should not be applied to soil which is to be planted to potatoes. In addition, it is wise not to apply manure to potato soil this spring. Potatoes, however, do best in a soil high in fertility. Application of superphosphate (0-20-0) fertilizer this spring will help produce a larger crop of potatoes. The fertilizer may be applied this spring on ordinary soils at the rate of 500 pounds per acre. On peat and muck soils 0-9-27 fertilizer should be applied at the rate of 500 to 800 lbs per acre.

Potato seed pieces should get off to a flying start after they are planted. If they do not, maturity is hastened. A worthwhile tip to home gardeners is to "green sprout" their seed potatoes. Spread the seed out where they receive indirect light a number of days before planting. Sprouts that develop will be short and not easily broken. Root stubs form at the base of the sprouts and roots develop quickly when the seed pieces are planted.

Successful growing of potatoes also depends on early planting. This means plant as early as the soil can be worked, which is generally sometime in April. Only in peat soils should planting be done in May. This lets God Friday out as a potato planting guide. Each seed piece should have at least one eye. Weight of each seed piece should be about 1 1/2 ounces. It takes from 20 to 25 bushels of seed to plant an acre.

Potato seed pieces in ordinary soils should be planted 12 inches apart in the row and the rows to be spaced 32 to 36 inches apart. Plant seed 4 inches deep and cover with only 1 inch of soil. This allows more warmth for the seed and hastens growth. In addition it also helps to control disease. As the plants develop the soil should be worked around the plants until the seed piece is covered to a depth of about 4 inches. This method makes control of weeds easier.

For additional information on potato growing see the County Extension Director or write the Extension Service at Ames.

Home gardeners should avoid sowing all their seed at one time. Stagger the sowings to avoid too much garden produce at one time.

Rape is an unusually good hog pasture.

The 2nd War Loan Starts April 12

13 billion dollars must be raised

THE GOVERNMENT of the United States is asking us to lend it 13 billion dollars in the next few weeks. We can do it. And we *must* do it. Every American must realize the truth:

In this, our toughest war, we've made a good start. We've trained a lot of men—made a lot of weapons—built a lot of ships.

But it's only a start. No man or woman among us would contend for a single instant that we're doing enough *now* to win this war!

We've Got to Build More!

We broke all records building 8 million tons of shipping last year. But grim-faced Army and Navy men will tell you that the 18 MILLION tons we're building this year *still* won't be enough!

We've Got to Fight More!

From now till this war is won, America must be on the offensive. In ever-increasing numbers, your sons, brothers, husbands must go into actual battle. Our losses have already begun to mount—and they will not grow less.

And We've Got to Buy More War Bonds!

Sure we're all buying War Bonds now. But we've got to help pay for our increased fighting and building . . . We've got to match, as best we can, the sacrifice of those Americans who are toiling and sweating on a dozen battlefronts—with the bloodiest yet to come. The blunt fact is this: to keep our war machine going, we've got to dig up 13 billion *extra* dollars this month. 13 billion dollars over and above our regular War Bond buying!

In the next few weeks you may be visited by one of the thousands of volunteers who are contributing their time and effort to this Drive. But don't wait for him. Make up your mind *now* that before this drive is over, you're going to march right down to your nearest bank, Post Office, or place where they sell War Bonds, and do your duty. And don't ever for-

get this: in doing your duty, you're doing yourself one of the biggest favors of your life!

For United States War Bonds are the greatest investment in the world—bar none. They're investments tailored to fit your particular situation. And they give you the chance of a lifetime to order and *get* the kind of world you want to live in after this war. Every cent you put in War Bonds now will help to guarantee plenty of peacetime jobs making peace-living for every one of us.

For your Country's sake—for your *own* sake—invest *all* you can!

There Are 7 Different Types of U. S. Government Securities— Choose The Ones Best Suited For You:

United States War Savings Bonds—Series E: The perfect investment for individual and family savings. Gives you back \$4 for every \$3 when the Bond matures. Designed especially for the smaller investor. Dated 1st day of month in which payment is received. Interest: 2.9% a year if held to maturity. Denominations: \$25, \$50, \$100, \$500, \$1000. Redemption: any time 60 days after issue date. Price: 75% of maturity value.

2½% Treasury Bonds of 1964-1969: Readily marketable, acceptable as bank collateral, these Bonds are ideal investments for trust funds, estates and individuals. A special feature provides that they may be redeemed at par and accrued interest for the purpose of satisfying Federal estate taxes. Dated April 15, 1943; due June 15, 1969. Denominations: \$500, \$1000, \$5000, \$10,000, \$100,000—also \$1,000,000 if registered. Redemption: Not callable till June 15, 1964; thereafter at par and accrued interest on any interest date at 4 months' notice. Subject to Federal taxes only. Price: par and accrued interest.

Other Securities: Series "C" Tax Notes; 7/8% Certificates of Indebtedness; 2% Treasury Bonds of 1950-1952; United States Savings Bonds Series "F"; United States Savings Bonds Series "G."

Party Church Is Setting For Beautiful Marriage Ceremony

BERLIN PRINGNITZ BRIDE
LOWELL C. MAU

Couple Will Reside At Lub-
bock, Texas

Evening, April 9, 1943, at
St. Luke's Methodist Church,
the Rev. E. Harvey, pastor,
performed the double ring cere-
mony in the presence of many re-
lative and friends.

Light service was used,
usherettes lighting candles
before the altar while Miss
Williams played the piano.
The ceremony Rev.
Harvey officiated on the piano
was accompanied by the
piano. The bride and groom
were from Lubbock as a
wedding march for the recessional.

The bride was beautifully attired
in a long dress of white silk
with lace yoke and inserts
finger tip veil of net with
white peonies and orange bloss-
oms. Her bouquet was red and
white ribbon.

The bride maid, Miss Maxine
Gardner, wore a dress and
a bouquet of red and white
flowers. Miss Delores Williams
wore a dress of pale yellow
with a white corsage.

The groom and his best man, Mr.
Pringnitz, Jr., wore white rose
buds.

After the ceremony
the wedding was held in the church
for relatives. Tables
were decorated with red, white and
small flags for
a three tier wedding cake
in the national colors and
a miniature bride and
groom in a patriotic setting, was
a centerpiece at the bride's
table. The two-course lunch was in
the home of Mr. and Mrs. Bernard
Gardner. The lunch was served by
Schneewetter, Evelyn Pring-
nitz, Katherine Michelson, Carol
Gardner, Neoma Nieman, Marie
Gladys Griffen and Mrs.
Stulle.

The couple plan to live at Lub-
bock, Texas, where Pvt. Mau is
stationed at the South Plains Air
School.

Mau graduated from the
Lake rural schools and at-
tended Garner High School and
then has been at home with
parents near Kanawha.

Mau graduated from the
High School with the class of
1942 and assisted his father on the
farm near Klemme until he was
called into the service in October.
The couple plan to live at Lub-
bock, Texas, where Pvt. Mau is
stationed at the South Plains Air
School.

Our Men In The Service

STAFF SERGEANT SANDREY RETURNS TO CAMP

Staff Sgt Wm Sandrey left Tu-
esday morning for Clovis, New
Mexico after visiting since Friday
with his parents in Klemme, Mr.
and Mrs. Frank Sandrey, and with
other relatives in this community.
"Bill" is at a comparatively new
air base in surroundings that look
like a desert, but deal for landing
large planes.

Bill says he likes army life, that
it is better than farming but he is
ready to return to civilian life as
soon as the war is over. His ad-
dress follows:

S-Sgt Wm Sandrey,
420 Bomb Sqdn, A A B,
Clovis, New Mexico.

PETIT JURORS DRAWN FOR MAY TERM OF COURT

Hancock County District Court
Convenes May 3rd

Judge T. A. Beardmore will pre-
side at the May term of Hancock
County District Court which begins
May 3. The Petit Jurors will report
for duty at 10:00 o'clock, May 11.

Following are the jurors drawn
for the May term:

J. R. Howlett	Kanawha
Alice Schmitt	Garner
Frank Pistek	Britt
Esther Kouba	Corwith
Paul Van Buskirk	Klemme
Carl Hampe	Britt

Leo Sankey	Britt
Abbie Tierney	Garner
Floyd Fiero	Garner
Elizabeth Schoun	Britt
Ray Hawley	Garner
Josephine Dominy	Goodell
Dave Ryerson	Britt
Otto Rabe	Crystal Lake
Clara Smith	Woden

DIRECTOR BAFFLED BY BLACK CRAVATS

Latest reports from the Institute
of Comedy Research is that if you
want to be funny you must, para-
doxically, wear a black tie.
Bud Abbott and Lou Costello
have been wearing them for years,
but had never thought much about
it until Director Erle C. Kenton
mentioned the matter during pro-
duction of "Who Done It?" the
team's latest comedy. The Univer-
sity film which will play at the Av-
enue Theatre, Sunday, Monday and
Tuesday, April 18, 19, 20. It is a
howling travesty on murder mys-
tery dramas.

"Why is it?" Kenton asked, "do
you wear black ties so they won't
distract the audience's attention
from what you're doing and say-
ing?"

"I guess so," said Bud. "I always
knew there was some reason for it,
and that's as good as any."

"Maybe we're superstitious," said
Lou. "We used to wear blue ties
and had bad luck. So now we wear
black ties."

Save your silk and nylon hoes.
They may save a life.

"They Give Their Lives—You Lend Your Money"

Graduate First Aid Class In Klemme High School

FORTY-FOUR HIGH SCHOOL STUDENTS COMPLETE RED CROSS FIRST AID COURSE

Forty-four Klemme high school
students Friday completed a Junior
Course in Red Cross First Aid un-
der the direction of Rev. Calvin
Grosshuesch. They will receive cer-
tificates for completing the course.

Following are those who com-
pleted the course:

Philipp Cook, Ronald Brinkman	

"STRAINED RELATIONS" By Bill Grosshuesch

Not "sifted," but "Strained Rela-
tions" Mr. Gay has rented a
summer home which belonged to a
dead relative. And Mr. Gay is not
exactly pleased with her choice.

There are always a couple of lov-
ers in a play and we have them,
too. Nancy Gay and Keith Willard
have troubles, too, and Keith tells
one story after another to get Nan-
cy and her mother on his side ag-
ain.

Then there is Fred Northrup who
(if you don't believe it come and
see) is three people at the same
time and gets away with it.

Bill and Jane take care of the
hot dog stand owned by Jane's
brother Clarence. Clarence occupies
most of his time with Pearl, the
maid.

Rita Lopez, Fred's girl friend
complicates matters by coming to
see Keith and getting him into hot
water with Nancy.

Stella Hayes, a woman with lots
of "dough," was going to let Mr.
Gay invest her money, but—And
Spoke Dugan, a tough guy, is after
a relative of "that Tweedwell bum."

One minute you are laughing
your sides out, the next your hair
stands on end, so don't miss this
thrilling comedy presented by the
Senior Class, Thursday evening,
April 22.

KLEMMME STORES WILL BE OPEN WEDNESDAY AND SATURDAY NIGHTS

Beginning next week, Wednes-
day, April 21, Klemme stores will
be open each Wednesday and Sat-
urday night until sometime next
fall.

Do your shopping in Klemme on
Wednesday and Saturday nights.

"FRIENDS OF SCOUTING" BEING ORGANIZED

Organization of the Klemme sec-
tion of the District "Friends of
Scouting" Campaign is rapidly be-
ing completed, according to C. G.
Waterman, Vice-Chairman of the
District.

Majors and Captains for the gen-
eral solicitation have already been
elected and the advance gift com-
mittee is already getting under way
with their work.

Rural residents will also be given
an opportunity to take part in the
campaign according to plans being
developed by Mr. Waterman. In
this connection it was pointed out
that while most Boy Scout Troops
meet in towns a large percentage
of the Scouts do come from rural
territory.

It was also pointed out that the
Scout program has some 40 Merit
Badges which pertain particularly
to farm work and that in many in-
stances there are agreements with
the National 4-H Clubs and the Boy
Scouts whereby Scouts on the farm
may receive credit for their work
in both the 4-H Club and the Boy
Scouts program. "Scouting," says
Mr. Waterman, "is for all boys."

EXTENSION OFFICE WORKS ON FARM LABOR PROBLEM

All Hancock County farms are to
be analyzed to determine the ex-
tent of the labor problem. The
County Extension Office is making
this study now using the USDA
War Beard Work sheets. The Coun-
ty Extension Service will cooperate
with all representatives of the
USDA War Board in getting the la-
bor problem solved. The Farm Se-
curity Administration and the Uni-
ted States Employment Service are
also cooperating on the farm labor
problem.

In most cases local communities
or neighborhoods can cooperate and
even organize themselves to get the
maximum out of their local labor
and machinery. This should be the
first step.

A smaller lamb crop this year
than last in the early lambing sta-
tes is forecast by the USDA.

Will Americans Be More Tender With Their Money Than Lives of Their Sons

Washington, D. C. — A blunt challenge—whether Amer-
icans will be more tender with their money than with the lives
of their sons—confronts U. S. citizens as they prepare to
meet the appeal of the government to put an additional 13 billion
dollars into the fight in the next three weeks.

American dollars which run off to
some cozy shelter to hide while
American boys are dying to defend
our cities and towns from destruc-
tion and invasion will face a rising
demand from all classes of patriotic
citizens to come out and fight.

Millions of workers who now are
buying War Bonds regularly out of
current income must lend extra
money to their government during
the Second War Loan campaign
(which started April 12).

In recognition of the spirit of sac-
rifice which is sweeping over the
land as our troops swing into of-
fensive action in Africa and await
the signal for a landing in Europe,
the Treasury Department is offering
a series of government bonds to fit
every pocketbook.

No matter whether Americans buy
the familiar Series E Bonds or 2½
per cent bonds or 2 per cent bonds
or tax certificates, they will be doing
their part to make the Second War
Loan drive a success.

Consumer Spending Too High.
Consumer spending in 1942 was

NORTH IOWA STILL HAS WINTER WEATHER

After a week of mild, spring-like
weather the temperature began to
drop Sunday and Monday with a
chilly wind out of the northwest.

Tuesday morning the tempera-
ture had dipped down to a low of
22 degrees and a light snow had
fallen during the night, with snow
flurries during the day.

Light rain fell most of the day
Sunday.

During the week of dry, warm
weather farmers were able to get a
good share of spring work out of
the way and most of the seeding is
done in this community. Quite a
few gardens were started last week
and early vegetables and potatoes
planted.

FIRST AID INSTRUCTORS GIVEN GIFTS BY CLASS

The adult class taking the Red
Cross First Aid Standard Course of
which C. G. Waterman is the in-
structor, assisted by Rev. C. Gross-
huesch, held a party after their
final class at the school house last
Wednesday evening. A social time
was enjoyed, followed by a lunch.
The class presented Mr. Water-
man and Rev. Grosshuesch each
with a nice First Aid Kit.

SHOWER HELD HONORING MISS BETTY RAWSON

Miss John Etchen and Miss Er-
dahl are having a pre-nuptial show-
er at the Etchen home this Wednes-
day evening in honor of Miss Betty
Rawson.

Miss Rawson, who has been em-
ployed at the First National Bank,
will go to her home at Riceville
Saturday, and in about a week will
leave for Mississippi to marry a
young man in the army.

GREGORY TO BE SUPERIN- TENDENT AT MCINTIRE

E. G. Gregory, principal of the
Klemme high school and manual
arts instructor, has accepted a po-
sition as superintendent of the pub-
lic schools at McIntire, in Mitchell
county. McIntire is a town of 300
population in northeast Iowa.

The Gregorys, who have resided
in Klemme for the past year, have
a son in the navy and a married
daughter in Minneapolis. Mr. Greg-
ory is a veteran of the First World
War.

DORCAS SOCIETY MEETS THURSDAY, APRIL 15

The Dorcas Society will meet at
the Methodist Church parlors on
Thursday afternoon, April 15th.

Mrs. C. G. Waterman and Mrs.
R. A. Jorgenson are the hostesses.

Ladies are asked to bring their
sewing things.

Mrs. Wayne Chambers of Seattle,
Washington, arrived this morning
for a couple of weeks visit at the
John Chambers home.

FUNERAL SERVICES HELD TUES. FOR BEN BLANK

World War Veteran Survived By Wife, Six Children

Funeral services were held Tues-
day afternoon for Ben Blank at the
Christian Reformed Church at Kan-
awha, with the Rev. D. H. Pless-
cher officiating.

Mr. Blank died suddenly at his
home west of Klemme Friday eve-
ning of a cerebral hemorrhage at
9:30 o'clock. Mr. Blank had been
in Kanawha in the afternoon and
seemed to be in good health, and
became ill soon after reaching his
home.

Mr. Blank, who is a veteran of
the First World War, leaves his
wife and six children: two sons,
Cecil and Raymond, and four
daughters, Lillian, Edna, Ada and
Leona.

OLD SANDERFELD FARM SOLD TO ED. BUNTENBACH

E. C. Buntenschach has purchased
the old Sanderfeld farm two miles
east of Klemme from the Metropol-
itan Insurance Company. The land
lies across the road from his farm
and consists of 240 acres.

When you have company or take
a trip, that's news. Phone 12.

IOWA RATIONING CALENDAR

Tires:
Class A Ration: Second in-
spection deadline Sept. 30.

Class B Ration: Second in-
spection deadline June 30.

Class C Ration or Bulk Cou-
pons. Second inspection dead-
line May 31.

Commercial Vehicles: Every
60 days or every 5,000 miles,
whichever occurs sooner.

Gasoline:
"A" book coupons No. 5 (4
gallons each) expire May 21.

Fuel Oil:
Period 4 coupons (11 gals. ea.)
expire April 17.

Period 5 coupons (10 gals. ea.)
now valid expire Sept. 30.

Coffee:
Coupon No. 26 (1 lb.) expires
April 25.

Sugar:
Coupon No. 12 (5 lbs.) expires
May 31.

Shoes:
Coupon No. 17 in War Ration
Book One expires June 15.

Point Rationing:
D, E. and F. blue stamps val-
id through April 30. A. Red
stamp (16 pts. of meats, edible
fats, cheese, canned fish) valid
through April 30. B. Red stamp
(16 pts. of meats, edible fats,
cheese, canned fish) now valid
through April 30.

County Rationing Board:
Office in courthouse is open
afternoon Tuesday through Fri-
day; open all day Saturday and
closed all day Monday.

"They Give Their Lives—You Lend Your Money"

More War Bonds Today

WEEKLY NEWS ANALYSIS

Congress Moves to Defer Farm Workers; Climax of Tunisia Campaign Approaches As Allies Close In on Rommel's Forces; Manpower Shortage Grows More Critical

(EDITOR'S NOTE: When opinions are expressed in these columns, they are those of Western Newspaper Union's news analysts and not necessarily of this newspaper.)
Released by Western Newspaper Union.

Lining the deck of a U. S. submarine as it docks at Pearl Harbor after a successful raid on the Japanese base at Makin island, these marine raiders are ready for the comforts of shore for a while. The raiders, transported to the island and back aboard American submarines, wiped out the garrison and all enemy installations there.

FARM LABOR:

Deferment Act Passed

Congress demonstrated unmistakably that it meant business in dealing with the farm labor shortage. Evidence of this determination was found in the senate's action in passing legislation to defer all essential farm workers from military service. The measure which had required house approval would direct draft boards to defer men employed substantially full-time in production of essential foods and fibers. Although Secretary of War Henry L. Stimson had strenuously opposed blanket farm deferments, sponsors of the legislation contended such action was necessary.

The house meanwhile had moved to combat the farm labor shortage in another direction, by passing a bill appropriating \$261,000,000 to recruit and train 3,500,000 men and women as a "land army."

SHOWDOWN:

Looms in Tunisia

Evidence had continued to mount that the Allies were preparing a concerted drive that would bring the North African campaign to a climax.

As the ring around the Axis defenders of coastal Tunisia was tightened by the Allied command, two developments spelled progress toward the final showdown.

One was the upsurge of offensive action by American forces under Lieut. Gen. George S. ("Blood and Guts") Patton which continued on after the recapture of Gafsa and El Guettar in central Tunisia and apparently had as its ultimate goal the coastal city of Gabes. Replacing Maj. Gen. Lloyd R. Fredendall on this front, General Patton brought with him the reputation of being one of the most offensive-minded generals of the army.

Another development of high significance was the drive by General Montgomery's British Eighth army against Marshal Rommel's Mareth line positions in southeastern Tunisia. Characteristically, tight-lipped Montgomery had issued no communiques concerning his early moves; first reports of the offensive had come from German sources.

Together, these two developments indicated that an Allied squeeze play was under way against Rommel's army.

LESS GASOLINE:

For East Coast

While the gasoline ration for "A" book holders in eastern states was cut from 3 to 1½ gallons per week, these motorists were given the opportunity of using the gasoline as they pleased, for the ban on pleasure driving was removed.

In making public the reduction, the Office of Price Administration, Price Administrator Prentiss M. Brown, announced that "A"-book holding industrial workers who motor to their jobs would be allowed supplemental gasoline.

Halving of the basic ration was made necessary, according to a statement by Petroleum Administrator Harold L. Ickes, because only 333,000 barrels of gasoline daily could be made available for East coast civilian and industrial use during April.

HIGHLIGHTS . . . in the week's news

DETROIT: New tires using steel instead of fabric cord at an estimated saving of 15 per cent in rubber were examined by Rubber Director William M. Jeffers on a tour of a tire factory here. Dr. Sidney M. Caldwell, scientist of the firm, said only two plies of steel were necessary, compared with 10 of cotton or nylon, making possible a thin casing and minimum friction.

LONDON: More than 30,000 Germans were among the approximately 75,000 Axis casualties in the battle beginning at El Alamein, Egypt, on October 23 and lasting until November 5. There were likewise 7,200 German prisoners, according to a statement issued by War Secretary James Grigg. Grigg said British casualties in the battle were 13,600, or 18 per cent of Axis losses.

RUSSIA:

See-Saw Offensive

The see-saw character of the warfare on the Russian front had continued with Soviet offensives pushing on without interruption toward the goals of Smolensk and Staraya Russa, while German counter-offensives were striking with increasing power in the Kharkov sector.

The main force of the Russian drive toward Smolensk had been concentrated on a stretch of the Vyazma-Smolensk railroad. The Reds were reported as having captured scores of settlements south of Bely. Much of the fighting was reported west of the Dnieper river headwaters.

The German offensive further south had ranged from Kharkov to Kursk, with epic tank battles and a struggle for supremacy in the air. A German communique had reported that "Enemy forces encircled southeast of Kharkov have been annihilated with the exception of small remnants." Far northwest of Kharkov and on a battle line extending down into the Donets river basin, the Germans were reported concentrating their reserves and tanks on narrow sectors still held by the Russians.

UNITY:

For French Factions

Three months of unpublicized preparation had been necessary for the action that was to culminate in a meeting between Gen. Henri Giraud and Gen. Charles DeGaulle and bridge once and for all the chasm that had separated the French North African regime and the Fighting French.

When Gen. Giraud had announced that everything reminiscent of Vichy rule was to be thrown overboard and then had followed with decisive decrees translating words into action, the day of French unity dawned.

Happily received by the DeGaulle lists, were Giraud's decrees nullifying all Vichy laws discriminating against Jews, restricting the activities of labor unions and banning Freemasonry.

Even before the Giraud decrees and the resignation from his government of ex-Vichy officials, Fighting French leaders meeting in London rejoiced that events in North Africa had taken a more favorable turn and that Giraud's invitation to DeGaulle for a conference would meet a friendly reception.

Further evidence of the increasing unity of French interests was the action of French Guiana's government in breaking away from Vichy control and joining forces with General Giraud. This South American possession had previously been under control of Axis-minded Adm. Georges Robert, high commissioner at Martinique.

POLITICS:

Banned for OWI

Accused by administration critics of propaganda boosting President Roosevelt for a fourth term, personnel of the Office of War Information were cautioned by Director El-

ELMER DAVIS

mer Davis to refrain from partisan political activity.

Conceding that the OWI had indulged in propaganda on behalf of the administration in an article in the bureau's overseas magazine, "Victory," Davis denied that there was any other evidence to support the charges.

"Our sole function is to contribute to winning the war," Davis pointed out in a memorandum to OWI's 3,000 employees. "We must take care that the utility of this office is not impaired by any action of ours, whatever injury it may be at tempted by others."

SOUTH PACIFIC:

Japs Show Concern

Even as Premier Hideki Tojo was warning the Japs that "the war situation is becoming more serious," Secretary of Navy Frank Knox declared that Japan has lost 1,857,000 tons of shipping, or one-third of her tonnage at the beginning of the war. "The journey to victory is just beginning," Knox, however cautioned.

While Japan was thus exhibiting signs of concern over the war's trend, American warplanes continued to blast at the westward movement of enemy troops and supplies to the islands above Australia, attacking Jap coastal vessels off western Dutch New Guinea.

Further to the south and east, Gen. Douglas MacArthur's air forces kept up a steady pounding on the big Japanese base at Rabaul in New Britain. Other United Nations air men attacked enemy outposts in the Kai islands between Australia and New Guinea.

Washington, D. C.

SOPHOMORE CONGRESSMEN

The President's heralded meeting with congressional freshmen had an unheralded sequel on Capitol Hill. Day after the White House party, 19 second-term house Democrats held a luncheon in Speaker Sam Rayburn's private dining room, at which there was considerable good-natured, and some not so good-natured, grousing about the President's relations with congress.

Object of the luncheon, arranged by Rep. Oren Harris of Arkansas, was to enable the second-termers to "console" each other for not being invited to the White House for a party when they were freshmen.

Among others, Rep. Sam Russell and Eugene Worley of Texas took great delight in joshing Rayburn: "Sam, why can't you get us an invitation to the White House?"

However, the luncheon took a serious turn when scrappy Rep. Edward Hebert of Louisiana lambasted the White House for not consulting with congress on new legislation, and criticized his colleagues for submitting to White House "dictates." Observing that only 26 of the 45 Democratic freshmen of the last session survived the November elections, the Louisianan declared:

"If a lot of us had paid more attention to our constituents instead of to White House advisers, there wouldn't be so few of us here today. In the last year of Huey Long's tenure, he controlled both houses of the Louisiana legislature completely except for one man. But Huey didn't try to ram through any bills without letting each man know what was going on and making him feel like he had a stake in the program. We in congress haven't been treated like that."

Hebert said he held no enmity against the House leadership, adding to Rayburn:

"I've always been very fond of you, but I've never been able to vote for you on a national ticket. I hope I will be able to cast my ballot for you next year, either as top man or running mate on the Democratic ticket."

This brought loud cheers from the luncheoners and blushes from Rayburn, who responded with a fatherly lecture urging those present not to let personal animosities influence their actions in congress.

AMERICAN BOMBERS

Despite the criticism you may hear of American planes, U. S. airmen who have studied the current bombings of Europe say privately that one American bomber is worth five of the British.

American planes are heavily armed and heavily armored. Able to protect themselves, they operate in the daylight, with precision bombing, whereas the British planes, flying at night, must lay down a pattern of bombs over a whole area, hoping that the principal target will be hit.

British planes can carry a heavier load of bombs, but the fewer bombs carried by the American planes are more effective because they go straight to the target.

Further, American planes have suffered fewer losses proportionately than the British, both operational and combat losses.

In fact the American contribution is so important that the all-out bombing of Germany must await the availability of more U. S. planes.

Most people think there is a heavy concentration of American planes in England now, and that the current round-the-clock bombings are the big show. Neither is correct.

There was a concentration of U. S. planes in England last summer and fall, made with intended publicity. This had the effect of sending the Nazis scurrying all over western Europe to mend their defenses. Then U. S. air strength was pulled out of England for the mission it had been intended for—the invasion of North Africa.

U. S. air strength in England is now being built up again, and when the time comes, the two air forces combined will stage the show intended to knock Germany out of the war.

MEXICO BARS MIGRATION

No one is advertising it, but Mexico has slapped a temporary ban on the recruitment of its workers for farm jobs in the United States.

This was expected to be one of our big sources of farm labor in the Southwest. However, no Mexican laborers have been imported in more than a month, despite feverish efforts by the Farm Security administration to bring in approximately 50,000.

Mexico is not keen about the recruiting program, and some time ago notified the state department that it was reserving the right to specify the sections of Mexico where labor could be recruited. Reason given was that Mexico couldn't afford to have labor drained from industrial sections.

Meanwhile the Farm Security administration has submitted orders for 6,000 Mexicans, but is still waiting for an okay to begin recruiting.

Note: So far we have imported 5,300 Mexican farm workers under 30-to-90 day work contracts.

The Midnight Express:

Walt Disney's "Victory Through Airpower" film, taken from Sever-Sky's book, is being blocked by brass hats in Washington . . . Because it reveals what everyone can savvy at a glance—that planes are the best weapons today . . . Bill Stout, who designed the first Ford planes, is working on what they hope will be the flivver of the air after the war. A tiny hundred h.p. job as simple to manipulate as the Model T . . . Mr. Whiskers just collared a woman agent here whose operations were right out of a spy film. Posed as a Navy nurse with all the proper apparel, etc. Worked the midtown bars, talking to servicemen, and had even married three of them.

Bob Burns, the ex-farmer, has done a series of recordings for the Dep't of Agriculture, to encourage the growing of peanuts. They are christened: "Nuts to you, Adolf!" . . . The cigar rationing for troops at Guadalcanal: Two cigars weekly. In Africa they get four . . . Although he's been in the Army a year, Carol Bruce sends her manager 15 per cent of her wages.

The sets for the film, "Attack by Night," will be replicas of actual Norwegian towns—with OWI supervision . . . Hollywood's veteran cameramen, now in the Army Signal Corps, are taking six-week refresher courses. They must "learn" how to hold a camera "correctly." And to develop negatives! . . . Mary Pickford will adopt children, according to coast buzz . . . The Mills Brothers start a trek back to the Big Time with a choice spot in "Reveille with Beverly" . . . Geo. Lowther, who does the "Superman" program, was the first page boy hired by NBC.

The Navy reminds girls that a WAVE or SPAR may request other assignments besides paper or desk work. The duties are varied. Aerographer, for instance, or radio communications, storekeeper, parachute rigger, and so on . . . Elton Britt, a singing cowboy, recorded "There's a Star-Spangled Banner Waving Somewhere." Made him a high bracket man. To date: 900,000 records.

The Wireless: R. Harkness, the Washington reporter for WEA, was puzzled by the to-doodle about Russia not advertising the aid from her allies. Harkness revealed that Pravda, the Soviet newspaper, published a full report only recently . . . The Hays office ruled that Fascists in films shouldn't have American accents. He should listen to the Quisling shortwavers, whose accents are as American as hot-dogs . . . You'll twirl your dials a long time before you catch anything more Hip-Hip-Hurray than Paul Robeson putting the big baritone to "Ballad for Americans" . . . The crossfire act banged over by Crosby and Hope would have been good for a dozen straight weeks at the Palace on Broadway.

The Magazines: The war has landed right in Vogue's lap. That mag tells its flabbergasted readers, mostly ex-motorists, one of the grimmest truths—that it's hard to read on a bus. Gad, sirs, is this America? . . . New Republic's Manny Farber tags Saroyan's flicker, "The Human Comedy," a chocolate soda made out of words . . . Newsweek scrubs away all the Congressional hullabaloo about bureaucracy and states it is all a build-up for the '44 elections . . . The startling rise of juvenile delinquency is the problem thrashed out by Ella Winter in the current Collier's. The antidote for the wave of knee-pants criminals, the author reports, is more playgrounds, dancing activities and other healthy forms of relaxation to keep them occupied. Remember Mrs. Roosevelt wanted to do that, and was howled down by some "enraged" Congressmen?

It happened in front of the New York Sun where some Newspaper Guild pickets were parading and distributing leaflets. A police car drove up, and a tough-looking Sarge got out . . . The pickets expected him to break up the line and seize the leaflets, as had happened so many times before. But he merely brushed by and went into the Sun offices . . . When he came out puzzled pickets asked: "Aren't you gonna do anything?" . . . "No," he said, "They said you were blocking the sidewalk. I told them I managed to get into the building. They wanted to know about the leaflets, and I reminded them about the Freedom of the Press."

Jimmy Cagney, according to a letter he wrote to the Norwegian Embassy, revealed that he is part Norwegian. It will be published in a book by one of the Norwegian diplomats . . . Ever since Cagney's marriage to his wife, some thing green for St. Patrick's Day. This year the gift, as green as was Newspapers, which have debunked haven't been read apparently. Stores complain of "clothing runs" every weekend.

Colored Smoke Grenades

Used for Army

Colored smoke grenades, type of signal device, developed by the army chemical service, the war department has announced. The device serves to control and identify units, and has other uses, is available in all theaters of operation.

Advantage of the grenades is they are more readily seen, throw off a dense smoke cloud to three minutes, which has cloud.

The grenades come in various colors, and in black. They are set off on the ground or from a plane to explode in air, through a time fuse, and have hit the earth.

They lend themselves to many uses. For example, troops surrounded by the enemy can set off colored grenades to indicate observation planes that they are medicines or different types of munition.

On the other hand, observation planes, hunting enemy positions, can adjust time fuses on grenades on ground targets, only pointing out locations to bombing bombers, but, through the type of target.

Seek More Fats

Production of fats and oil domestic materials in the U. S. is estimated at 11.7 billion compared with 9.6 a year ago. Goals for 1943 call for an acreage of flaxseed and peanuts, a soybean acreage only slightly less than the record acreage in 1940. Cotton goal has been reduced, ever, to permit greater use of resources for more essential such as peanuts and feed. With normal yields, production of vegetable oils from domestic crops may total 4.3 billion pounds the 1943 crop year, compared with 4.2 billion pounds this year. It was unusually favorable in 1942. The upward trend in land, and grease production is expected to continue in 1943, but may be offset by reduced butter production.

Grandstand in Solomon

The southern mountain Santa Isabel island made a grandstand from which a few sand natives could view reaction between American and nese fighting ships. Santa Isabel is one of the largest of the Solomons, says the National Geographic society, 110 miles long, and as much as 25 miles wide. The whole is covered from end by mountains densely with tropical forests and lush vegetation. Mount Marescot, the southeastern end, rises 3,300 high. The island is a center in the northern half of the 900 double chain of Solomon Islands of the wildest and least populated of the Solomons, Santa Isabel native settlements only at the ends of the island.

U. S. Steel Reports 1942 Production

28 Per Cent Greater Than War I Peak

United States Steel Corporation annual report for 1942, reporting a 28 per cent increase in production over the 1941 peak, was released as a production story—a financial story—of a great war effort. Production by U. S. Steel in 1942 was 30,000,000 tons, or 28 per cent greater than the 23,500,000 tons produced in 1941. The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941. The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941.

A one-page condensed financial record of the corporation for the year ended December 31, 1942, was made available in simple language. It showed that the company's net income for 1942 was \$1,865,951,962, compared with \$1,685,951,962 for 1941. The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941.

The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941. The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941. The report also stated that the company's production in 1942 was 28 per cent greater than the 23,500,000 tons produced in 1941.

AR CHIEF SAYS U. S. REQUIRES 11 MILLION MEN TO WHIP AXIS; HOME FRONT MUST BE ADJUSTED

erson Claims Nazis Have 13 Million Men at Their
Command; Jap Also Strong in Pacific Area.

By ROBERT P. PATTERSON, Undersecretary of War

itions raised in recent
as to whether America
have the army of 8,200,000
which its military leader-
has determined to be the
sum with which we can
to defeat our enemies
not, it seems to me, given
consideration to military

are out to win this war.
ation has entrusted the re-
sponsibility for this victory to its
leaders. This leader-
the joint chiefs of staff of
army and navy, after the
careful analysis of our ene-
strength, has decided that
must build an armed force
approximately 11,000,000,
includes an army of 8-
10 for 1943-44.

own men have been in
ct only with the smallest of
axis armies—a part of its
man force of less than a
er of a million men. But
striking force of this power-
has already been felt by
troops.

German field armies are
ed by more than one mil-
men in semi-military organ-
ons, such as the military po-
engineers, and supply de-
which in our army are in-
ed among service troops.

able sources indicate that the
ined number of those in the
man and Italian armed forces
those directly assisting them
well over 13 million. It is evi-
at this point that the superior-
of our enemies in the European
er is of ominous proportions.

similar analysis in the Pacific
does not brighten the picture.
Japanese army exceeds by
divisions the forces that the
ed Nations have been able to
and place in opposition.

at the United Nations, and par-
ticularly this country, have the po-
tential power to overcome this
tactical superiority. These poten-
tials must be converted to actuali-
ty. They must be harnessed and
en toward a single goal, the de-
of our enemies. In that drive
country, the latest of the ma-
powers to enter the war, must
be the most important part.

y Determines Size After
ful Study of Its Needs

ensive action requires superi-
r numbers. This is the reason
need an army of 8,200,000 includ-
officers by the end of this year.
navy, the marines and the coast
guard need 2,600,000 this year. That
total of 10,800,000 men and
women that must be in the armed
forces by the end of this year. This
is less than 8 1/2 per cent of our
total population. Thirteen and a
half per cent of the German popula-
tion is in the armed forces.

ten million, eight hundred thou-
sand is not a figure pulled out of a
hat. It is the requirement deter-
mined by those charged with the
responsibility of winning this

General Marshall says that we
need so many planes and so many
ships to win the war. Is there any-
thing in America who would question
this judgment? Admiral King says
we need so many escort ships
to destroyers to beat the Axis. Is
there anyone in America who would
question his judgment? The expert
views of our military leaders are ac-
cepted on our needs for guns and
ships. Why should anyone question
his judgment as to the number of
ships they need to use these
ships and man these ships?

The staffs of the army and the
navy under General Marshall and
Admiral King, in full possession of
the facts, have made the military
decision that a force this size is
necessary to win the war. Our Com-
mander-in-Chief, the President of
the United States, has approved this
program. It is America's answer to
the Axis. The Axis, I assure you,
is not like that answer.

in making this decision full ac-
count has been taken of the ability
of American industry and labor and
agriculture to produce the supplies

American troops land in North Africa. They are the vanguard of a proposed force of 8,200,000 men who will be needed to defeat the Axis, war official says.

needed by our forces, by our Allies
and by our civilian economy. Full
account has also been taken of the
ability of our rapidly expanding
merchant marine to deliver soldiers
and supplies overseas. The conclu-
sion reached was that it was a hard
job, but that it could and must be
done.

But there are critics of the army
program who ask, "Why should we
fight? Why not give more supplies
to the British, the Chinese and the
Russians and let them fight for us?"

The British, with the smallest
available manpower and subject to
savage aerial attacks, have come
nearer than any other of the United

ROBERT P. PATTERSON
Undersecretary of war.

Nations to the full-time war employ-
ment of every man, woman and
child. The Chinese have been he-
roically fighting for 5 1/2 years. The
Russians, by brilliant tactics and
with indomitable courage, have
killed more Nazis than all the other
United Nations combined. We should
give tribute to their dead, for they
have sacrificed countless lives. But
their manpower is not inexhaustible.

We're In the War, Too, and
It Will Be Won the Hard Way

This is our war just as much as
it is the war of the British, the Rus-
sians and the Chinese. We are send-
ing supplies to the utmost of our
ability to these and the other United
Nations. We will continue to do so.
But it will be our soldiers and sail-
ors, and those of our Allies, that will
win the final victory.

Elemental truths are often the
most difficult to grasp. Throughout
all ages people have tried to avoid
facing up to the reality that war
is grim business; have longed for
an easy war; and have hoped that
somehow, some way, victory could
be gained without risking too much
or without experiencing the stark
or unpleasantness of the conflict. But
unpleasantness of the world does
all the wishing in the world war and
not change the nature of war and
its impact on all peoples engaged in
it, whether in the battle lines or at
home.

The hour for realism has arrived
for every American. We must brace
ourselves for mounting casualty lists
and reverses on the battle front, and

for more arduous labors and sacri-
fices on the home front.

Realism must extend from the fox-
holes and pill-boxes on the firing
line to the factories and homes of
America. When our country is at
war, none of us can escape the
responsibility of viewing the rou-
tine, as well as the emergency du-
ties of life, in the light of their
bearing upon the final result—uncon-
ditional surrender by our enemies.

This nation has done a magnifi-
cent job in production for war. But
there is an even heavier task ahead.
We will have serious problems be-
cause of the increasing drain on
our manpower. But similar prob-
lems have been solved in England,
Russia, Germany and Japan. Non-
essential activities are out for the
duration and these countries are
fully mobilized—to a much greater
extent than we. On every one rests
the equal obligation to give service
either in the armed forces or on the
home front. Why should we suppose
that we can wage war successfully
without mobilizing our human re-
sources with a thoroughness at least
approaching that of our enemies and
of our principal allies?

Army Requirements Come First;
Nation Must Get Into Industry

The needs of the armed forces
must come first. The problems of
turnover and absenteeism must and
can be solved. Each of us must
work to the utmost of his capability.

We must also tackle our farm la-
bor problem with vigor. There are
white collar workers in non-essen-
tial industries who can go back to
the farms from which they came.
There are victory gardens to be en-
couraged. More work can be done
by women. Farm machinery can be
pooled. Many steps can be taken
to increase production on the
farms.

We cannot solve our manpower
problems by whittling down the size
of our armed forces. The problem
must be tackled at its source. Every
one wants to do his or her share to
help win the war and must serve
where he or she can render the best
service. The decision cannot be
based upon personal desire.

With vast territories and resources
at their disposal, the Axis cannot
be defeated by a blockade. Victory
will come from decisive military ac-
tion, backed by an armed force and
ability so overwhelmingly superior
that the enemy's further action will
be futile.

In World War I, it was our Ameri-
can Expeditionary force of 2,000,000
added to the strength of our Allies,
that made the enemy surrender. On
November 11, 1918, the Allies had
32 fresh divisions in reserve. The
Germans only had two. The Allies
had a total of 213 divisions. The
Germans had 185. The Germans
were aware of these figures. Their
ability to reason from figures is well
known. They decided that they could
not win, and they quit.

Now, as then, the enemy must be
made to realize that they cannot
win. Now, as then, we must make
them see that we are going to see
the job through.

THE BLUEPRINT FUTURE
No more worries, no more care
No more future need to fret;
Everybody'll get his share
From his country. Wanna bet?

No more forging to the front—
It was something of a crime—
Dead the "rags to riches" stunt;
Laws will do it all in time!

Gone the old trail-blazing way
Of the fit and tough and free,
Government will see that they
Find trails opened by decree.

No more "shack to palace" stuff—
Out with "May the best man win!"
Smooth'd will be all journeys
rough—
Congress will protect YOUR chin!

No more strong types pressing on—
No more extra-feathered nests...
Bid the pushing type begone!
Bar the whiskers from all chests!

No more Algiers—not a one!
No more bootblacks making
good;
Legislation will, my son,
See to that, it's understood.

No more hare-and-tortoise game—
(Hares will be controlled, and
how!)—
Tortoises will get the same
Breaks that hares are getting now.

No more "Upward, onward!" cries
No more praise for ambish keen
Everybody lives and dies
On the lower mezzanine.

No more bothering to plan,
No more "upward to the sky";
Welcome to the standard man,
Each one like the other guy!

No more "hitch your wagon to
Some far star that brightly
gleams";
Hitch it to the planners who
Also standardize your dreams.

DELAYED

Where is the spring that should be here?
Where are the songbirds, gently hum-
ming?
Gone are the snows of yesteryear—
But more keeps coming.

—Ethel Collins.

A half dozen men convicted of
black market meat operations have
been given jail sentences in New
York. We understand they are al-
ready figuring out ways to "cut"
the terms, evade the sentences and
get around the whole matter.

If the black marketeers go to the
hoosegow we trust the food will be
of a quantity and quality to give
them plenty of cause for complaint.

The height of irony would be
one of these meat racketeers be-
hind the bars lamenting, "The
place ain't so bad, but the food
is awful."

The trouble with many people is
that when they speak of getting
down to bedrock they think more
about the bed than the rock.

It may be true, but it seems highly im-
probable that a man turned on his radio
recently and did NOT get a war commen-
tator.

Elmer Twitchell thinks there
should be some sort of a flag or
insignia to paste in the windows of
the homes of husbands whose wom-
enfolk have gone to war.

He suggests a design, the back-
ground of which shows a sink full
of dishes. In the foreground would
be unwashed plates, denoting:

1 plate—Wife in uniform.
2 plates—Wife and daughter
in uniform.
3 plates—Wife and two daugh-
ters in uniform.
4 or more plates—Every fe-
male relative in uniform. Come
in and help dry the platters.

Ima Dodo can't get the withold-
ing tax idea straight. She thinks it
means congress is going to put a
point valuation on money and with-
hold everything from salaries over
eight ounces.

There will be a 5 to 10 per cent
rise in liquor prices soon. This is
fair warning just in case your pres-
ent bank won't accommodate you
with a big enough loan for another
bottle.

Elmer Twitchell can't wait for
shellfishes to be rationed so he can
annoy the waiter by asking how
many blue points he will have to
give up to get a half dozen blue-
points.

The National Resources Planning
board's 40,000-word plan for taking
care of everybody from the cradle
to the grave eliminates all troubles
and responsibilities. Except those
that will arise if its methods of elimi-
nating them are ever tried.

BLACK MARKET OPERATOR
His grasping hands and itching
palms

Grab all that they can snatch.
He sports a scheming mind as
black

As coal—with heart to match.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

PETER AND JOHN WITNESS CHRIST'S GLORY

LESSON TEXT—Mark 9:2-8; II Peter
1:16-18
GOLDEN TEXT—A voice came out of the
cloud, saying, This is my beloved Son. hear
him.—Mark 9:7.

Christ is God! The one who comes
to know that truth is ready to follow
Christ, and to make Him known to
others. The want of such a true con-
ception of the Son of God weakens
our convictions and hinders our use-
fulness.

"Where there is no vision, the
people perish," said the wise man
(Prov. 29:18). For want of a true
vision of Christ as God, and the God-
given constraint which makes men
give themselves in sacrificial serv-
ice, the people perish in their sins.

Peter and John saw our Lord in
His transfiguration, and the glow of
that experience lighted their entire
life and ministry. The touch of the
supernatural was on these men and
their message—for they had seen the
glory of Christ.

I. The Amazing Glory of the Son (Mark 9:2-6).

The transfiguration of Christ is one
of those wonderfully beautiful and
deeply spiritual experiences which
defy analysis or satisfactory de-
scription. Poetry and art have vainly
tried to depict it only to become
"in fact a confession of the impo-
tence of the loftiest art to rise to
the level of the divine" (Van Dyke).

Peter was so dazzled that he could
only suggest that they remain there,
forgetting for the moment that down
in the valley was demon-ridden hu-
manity waiting for the divine deliv-
erance of the Son of God (see Luke
9:37-42).

What took place on the mount can
possibly best be explained as the
outshining of the inner glory of the
Christ. He had laid aside His glory
when He became flesh, but not His
divine attributes—as very God. There
in the presence of God and the heav-
enly visitors that glory shone
through His humanity and His ap-
pearance became dazzling in its
whiteness.

II. The Approving Word of the Father (Mark 9:7, 8).

A cloud, like the cloud which filled
the Temple of old (I Kings 8:10, 11),
covered them, and the Father spoke
out of it words of approval of His
Son.

These words carry "both judg-
ment and command; judgment con-
cerning Jesus, 'This is my beloved
Son,' and command to the disci-
ples, 'Hear ye him'—that is, 'Listen
to him'" (Lesson Commentary).

John and Peter came to a fuller
conviction that He was the Son of
God as they saw Him transfigured
and heard the words of the Father.
They learned more plainly the fact
that He was God manifest in the
flesh for the redemption of man. They
saw in the indescribable beauty of
that moment a foregleam of His
coming glory. What important truths
—His deity, His redemption, His
coming kingdom. Have we learned
them as we have beheld His glory?

III. The Assured Faith of the Dis- ciples (II Pet. 1:16-18).

These words were written by Pe-
ter when he was nearly eighty years
of age—about thirty-five years after
the transfiguration. John wrote sixty
years after the event and said, "We
beheld his glory, the glory as of the
only begotten of the Father" (John
1:14).

The one who follows these eye-
witnesses in believing in Christ may
share their assurance expressed by
Peter that we do not "follow coun-
tingly devised fables" in making
known to the world the power and
coming of our Lord Jesus Christ. Our
faith is built on God's Word, and
upon such testimony as this by eye-
witnesses. Here is real ground for
assured belief in Christ.

Great experiences of spiritual re-
newing and power lead to effective
life and testimony for Christ. They
may not be in outward manifesta-
tions, in fact they are most often in
the inner recesses of man's soul;
but they do transform men and send
them forth to magnificent living for
God. One wonders if much of the
dearth of power in the Christian
Church is not to be attributed di-
rectly to the lack of such experi-
ences with God.

The disciples had an unforgettable
mountain-top experience. Even so
have many others found the secret
of power. It came to D. L. Moody
as he walked down a New York
street, praying in agony, "Deliver
me from myself. Take absolute
sway." The story of what happened
to him and through him as a sur-
rendered instrument in God's hand
is written large on the pages of
history. Others have had similar
experiences.

Let us remember that such privi-
leges are not reserved for a few,
they are the birthright of every
Christian. Power without knowledge
is a dangerous and destructive thing,
but knowledge without power is a
dead thing, resulting in a stale and
unfruitful orthodoxy that in turn
produces a dreadful and unchristian
religious system.

Young, Gay Jacket And Jumper Outfit

8243
12-20

Jumper and Jacket.

HERE'S an ensemble that is
young and gay whichever way
you wear it. The jumper with
snugly fitting bodice and easy go-
ing skirt makes a simply darling
outfit worn over a blouse or sweat-
er. For suit moods, wear the little
fitted jacket over the jumper—
nothing could be smarter!

Pattern No. 8243 is in sizes 12, 14, 16, 18,
20. Size 14 jumper takes 27 1/2 yards
39-inch material, jacket 17 1/2 yards

Due to an unusually large demand and
current war conditions, slightly more
time is required in filling orders for a few
of the most popular pattern numbers.
Send your order to.

Pull the Trigger on Constipation, with Ease for Stomach, too

When constipation brings on discom-
fort after meals, stomach upset, bloating,
dizzy spells, gas, coated tongue, and bad
breath, your stomach is probably "crying
the blues." Because your bowels don't
move, it calls for Laxative-Senna to pull
the trigger on those lazy bowels, com-
bined with Syrup Pepsin for perfect ease
to your stomach in taking. For years,
many Doctors have given pepsin prepa-
rations in their prescriptions to make
medicine more agreeable to a touchy
stomach. So be sure your laxative con-
tains Syrup Pepsin. Insist on Dr. Cald-
well's Laxative-Senna combined with
Syrup Pepsin. See how wonderfully the
Laxative-Senna wakes up lazy nerves and
muscles in your intestines to bring wel-
come relief from constipation. And the
good old Syrup Pepsin makes this laxa-
tive so comfortable and easy on your
stomach. Even finicky children love the
taste of this pleasant family laxative.
Take Dr. Caldwell's Laxative-Senna com-
bined with Syrup Pepsin, as directed on
label or as your doctor advises, and feel
world's better. Get genuine Dr. Caldwell's.

Kidneys Must Work Well—

For You To Feel Well
24 hours every day, 7 days every
week, never stopping, the kidneys filter
waste matter from the blood.
If more people were aware of how the
kidneys must constantly remove sur-
plus fluid, excess acids and other waste
matter that cannot stay in the blood
without injury to health, there would
be better understanding of why the
whole system is upset when kidneys fail
to function properly.
Burning, scanty or too frequent urina-
tion sometimes warns that something
is wrong. You may suffer nagging back-
ache, headaches, dizziness, rheumatic
pains, getting up at night, swelling.
Why not try Doan's Pills? You will
be using a medicine recommended the
country over. Doan's stimulates the func-
tion of the kidneys and help them to
flush out poisonous waste from the
blood. They contain nothing harmful.
Get Doan's today. Use with confidence.
At all drug stores.

DOAN'S PILLS

Started Express Service by Carrying Packages

Some expressmen in Boston have
served the 105th anniversary of ex-
press service by paying a visit
to Mount Auburn cemetery, Cam-
bridge, Mass., where the impressive
William F. Harnden memorial still
stands on Central avenue.

This monument was erected by
the express companies of the coun-
try in 1866 as a tribute to the en-
prise of Harnden, the "original
expressman," who started the ex-
press service in March, 1839, by car-

rying packages in a carpetbag and
traveling by rail and steamer be-
tween New York and Boston.

Frail of body but determined,
Harnden, only 26 years old, organ-
ized the first express company and
saw its traffic, scope of operations
and competitors grow to formidable
proportions, by the time of his death
in his 36th year.

History indicates that Harnden
succeeded in extending his service
abroad and eventually brought in

over 100,000 immigrants to this coun-
try, to provide labor so greatly need-
ed during the era of railroad con-
struction in the 'fifties and 'sixties.

Today, express service maintains
23,000 offices and employs 57,000 peo-
ple. In 1941, over 172 million ship-
ments were handled.

Some 15,000 motor trucks are used
for the collection and delivery of
shipments. All told, the express serv-
ice operates on a total mileage of
282,456.

Ink Spots
And Spatters

By Jergie

IOWA NEWSPAPERS AGAIN DO A SPLENDID JOB

Last week the government asked
the aid of the newspapers to help
launch a gigantic campaign to help
raise 13 billion dollars in the next
few weeks, asking the people of the
nation to buy bonds to finance the
war.

Iowa weekly newspapers pledged
their support and backed it up with
editorials and advertising. Nearly
every weekly newspaper that came
to our desk last week carried ad-
vertising urging people to lend the
government money, by buying war
bonds. Klemme business and pro-
fessional men responded nearly 100
percent in sponsoring a full page
advertisement in The Times last
week. Several other weekly news-
papers also carried a full page ad-
vertisement, and all but a few on
our exchange list carried adver-
tisements of various sizes. This
week The First National Bank is
sponsoring a good sized advertise-
ment to help the Government put
over the 13 billion dollar bond sale.

I was share of the 13 billion dol-
lar fund has been set at \$100,000,000
and we are sure that Iowa will go
over the top in the campaign, and
Iowa weekly newspapers can be
counted on to help do the job.

QUOTE AND UNQUOTE

Here's a little story that came to
our desk this week that is worth a
chuckle.

Dad criticized the sermon, Mother
thought the organist made a lot
of mistakes. Sister didn't like the
choir's singing. But they all shut
up when little Billy chipped in
with the remark "I think it was a
darn good show for a nickel!"

And while on the subject, here
is another one we found.

The chaplain preached a forceful
sermon on the Ten Commandments,
sending one private away in a seri-
ous mood. The private eventually
brightened up. "Anyway," he said,
"I never have made a graven im-
age."

Hancock County Board Proceedings

REGULAR APRIL MEETING

Garnier, Iowa, April 5, 1913
The Hancock County, Iowa, Board of
Supervisors met in session on above date
Chambers present.
The minutes of the last meeting were
read and approved as read.
Supervisor Eckels is appointed a com-
mittee to investigate and cause repairs
to be made in D. D. No. 48-3.
Supervisor Schoun is appointed a com-
mittee to investigate and cause repairs to
be made in D. D. No. 7, Section 6, D. D.
No. 1 and 2 lateral No. 13, D. D. No. 7
and D. D. No. 74.
Supervisor John Chambers is appoint-
ed a committee to investigate and cause
repairs to be made in D. D. No. 9, D. D.
No. 26.
WHEREAS, by reason of deterioration,
rain snow and other climatic condition,
certain highways under the jurisdiction of
Hancock County and its Board of Super-
visors will be seriously damaged or de-
stroyed unless the use of vehicle thereon
is restricted to permissible weights.
And, WHEREAS, the Board of Super-
visors of Hancock County, Iowa, deem it
to the best interests of all concerned that
a so-called embargo be placed upon certain
roads under its jurisdiction.
NOW, THEREFORE, be it resolved by
the Board of Supervisors of Hancock County,
Iowa, that the total gross weight of
any one vehicle operated upon the follow-
ing named public highways in Hancock
County, Iowa, shall not exceed 8000 lbs.,
and that the operation of any vehicle or
combination of vehicles upon any of the

following described highways in Hancock
County, Iowa, for a period of ninety days
from the passage of this resolution, with a
gross weight in excess of 8000 lbs., is
hereby specifically prohibited, and the
County Engineer is ordered and directed
to erect suitable signs at each end of the
highways affected, said signs designating
the provisions of this resolution and said
Engineer is further ordered and directed
to keep such signs placed at the design-
ated locations until in his judgment
said highways or portions of highways are
repaired or otherwise put in suitable con-
dition to carry the extra legal loads
thereon, in which case he may remove
said signs. This resolution adopted in
accordance with the provisions of Sections
5,035.20 and 5,035.21 of the 1939 code
of Iowa.

WHEREAS, There is now in the hands
of the Treasurer the sum of \$8,802.94,
credited the Hancock Disease fund, and
WHEREAS, there is now in the hands
of the Treasurer the sum of \$238.42, cred-
ited to the T. B. Eradication fund, and
WHEREAS, it is desired to transfer
\$1500.00 from the Hancock Disease fund,
to the T. B. Eradication fund, for the fol-
lowing reasons:

1. Excessive demands on the T. B. Eradi-
cation fund, and
2. WHEREAS, said transfer is to be per-
manent in accordance with Section 388,
Code of 1935, and,
WHEREAS, There is sufficient money
in the Hancock Disease fund to meet all de-
mands thereon, and
WHEREAS, all laws relating to municipi-
palities have been complied with.

NOW, THEREFORE, Be it resolved by
the Board of Supervisors of Hancock
County, Iowa, subject to the approval of
the State Comptroller, that said sum of
\$1500.00 be, and the same is hereby or-
dered transferred from the Hancock Dis-
ease fund to the T. B. Eradication fund,
and the County Auditor (secretarial officer)
is directed to correct his books accordingly
and to notify the treasurer of this trans-
fer, accompanying the notification with a
copy of this resolution and the record of
its adoption.

The vote thereon being as follows: Ayes,
F. J. Schoun, Penn Eckels, J. A. Cham-
bers. Nays none.

HANCOCK COUNTY,
By F. J. Schoun, presiding officer
FRED C. MISSAL
Secretarial Officer

I hereby certify the above to be a true
and correct copy of resolution passed by
the Board of Supervisors on the 5th day
of April A. D., 1943.

FRED C. MISSAL,
Secretarial Officer

WHEREAS, Kansas, has offered the amount
of delinquent taxes in full without penalty
on lots 1 and 2, block 6, Grandview, in
exchange for the amount of delinquent
taxes on Kanawha, Iowa, and has requested
that Hancock County, Iowa, assign tax sale
certificate No. 1007 and 1008 to him, and
WHEREAS, it is deemed for the best
interest of the tax payers of Kanawha
Iowa, and Hancock County, Iowa, that said
tax sale certificate be assigned to him.

Be it Therefore RESOLVED, by the
Board of Supervisors of Hancock County
Iowa, that tax sale certificates No. 1007
and 1008 on lots 1 and 2, block 6, Grand-
view, addition, to the town of Kanawha
Iowa, be assigned to Howard L. Rietveld,
of Kanawha, Iowa, and the County
Auditor be and he is hereby directed to
assign said tax sale certificates in behalf
of Hancock County, Iowa.

The foregoing resolution was offered
and read by Supervisor Chambers, who
moved its adoption, was seconded by Su-
pervisor Eckels, and whereupon the Chair-
man placed the motion for adoption, and upon
roll call the vote thereon is: J. A. Cham-
bers, F. J. Schoun, and Penn Eckels, Aye,
Nays, none.

On motion and second the quarterly re-
ports of Fred Katter, Recorder, Elmer
Raw, Clerk, and Fred C. Missal, County
Auditor, are approved.

On motion and second the application of
Ben Higdon, Jr., for a class B beer per-
mit is approved.

On motion and second the bond for sale
of beer of Ben Higdon, Jr., is approved.
Be it resolved that the claims herein-
after set out be allowed in amounts de-
signated thereon, and the County Auditor
be and he is hereby directed to draw war-
rants on the several funds of Hancock
County, Iowa, in payment of such claims
in amounts set opposite each claim.

LIBERTY 4-H BOYS CONDUCT
FARM BUREAU MEETING

The 4-H Boys of Liberty town-
ship entertained Liberty Farm Bur-
eau members at their monthly
meeting. The boys' program con-
sisted of musical numbers, group
singing and a quartet by LeRoy
Bredlow, Gordon Upmeyer, Albert
Kern and Donald Schaefer. LeRoy
Bredlow also read the Liberty news
comic strip prepared by the boys.

Chas. Bethke, Garner business-
man, showed his moving pictures
Paul Henderson and Miss Hazel
Grimes, County Extensioners, an-
nounced coming events and ex-
plained pending programs.

LIBERTY BUSY BEES HELD
MEETING AT GAST HOME

The Liberty Busy Bees 4-H Club
met at the home of Lola and Lois
Gast on March 20 with fifteen mem-
bers present. Miss Hazel Grimes
was present and told interesting
things about gardening, and that
now is the time to plan a Victory
garden.

The remainder of the program
consisted of a demonstration on
cleaning furniture by Lola Gast, a
demonstration, cleaning silver, by
Lois Huenemann, and a talk by
Carmen Goll. The entire club en-
joyed singing several songs. After
adjournment a delicious lunch was
served by the hostesses.

MRS. MISSMAN HOSTESS TO
U-DELT-EM CLUB

Mrs. W. F. Missman entertained
the U-Delt-Em bridge club at her
home Thursday afternoon.

High score in contract bridge was
won by Mrs. Art Kudje and second
high by Mrs. H. D. Ramsay who
was a guest. Mrs. Fred J. Arnold
won third high score.

HOISERY SALVAGE

From Nov. 16, 1942 to March 15
of this year, Iowa has contributed
21,522 pounds of silk and nylon
hosiery to aid in the manufacture of
powder bags, parachutes and other
vital supplies. This put our state
in twelfth place in the nation's col-
lection record. The national collec-
tion of 888,000 pounds represents ap-
proximately 18 million pairs of dis-
carded stockings.

The Shamrock Times

● SENIOR CLASS
NEWS
Anna Lee Bruner, Reporter

The physics Class worked on mo-
tors Thursday and most of them
are finished now. Friday we had
a test on Sound.

Report cards were handed out on
Tuesday, and as Mr. Gregory said,
there were some surprises.

The Literature Class has read
"The Big Fat Lummox" from
B. O. Tarkington's "Seventeen."

● JUNIOR CLASS
NEWS
Wava Schenewetter and
Mildred Busse, Reporters

In Government we have been
studying about the cause of crimes
the last few days.

Proportion and Similar Triangles
have been the main subject in Ge-
ometry the past week.

We have been reading some very
interesting stories in Literature, es-
pecially "The Bottle Imp" by Rob-
ert Louis Stevenson.

In Typing Mr. Patterson said we
have to type 500 stroke perfect for
every mistake over five in a ten
minute speed test. It seems that
some of us will be typing all sum-
mer.

Friday we had our last lesson in
English and we think most of us
enjoyed the course.

● SOPHOMORE
NEWS
Patricia Kudje, Reporter

This week we have been reading
poetry in English II. Some of the
poems are "Sohrab and Rustum,"
"Tam O'Shanter," and "Erech Ard-
on." Red likes to read them out
loud and he's pretty good at it.
Does he put outside practice on it,
or something?

Mr. Gregory has been reading
poetry to us too. The other day he
read "Ode to a Louse." We are now
on chapter fourteen in our book.
This chapter is on "A New Indus-
trial and Social Order."

Warner's ability to pull the Venetian
blinds doesn't suit the teachers
too much. They're afraid he might
hang himself on the ropes.

The poster on the bulletin board
of the Sullivan Brothers has caused

much comment. Under the picture
is the caption "They Did Their
Part."

All this year we have been jeal-
ous (?) of the Freshmen because
they do their Algebra better than
the Sophomores. Well, last week
they all came to us and asked us
how we could be so smart as to get
such high grades in our test. We
could tell them, but perhaps it
would be better not to.

● FRESHMAN CLASS
NEWS
Elwyn Etchen, Reporter

The Algebra class has struggled
all week to review the subtraction
and addition of fractions. It is very
difficult. We received a test Fri-
day.

There are some pupils missing on
account of illness and work at
home.

In English we are reading Liter-
ature. We have a test over the
topic. We find it very interesting.
We had a test in Science Thurs-
day. It was not so difficult. We
are now studying about crops and
soil.

Grade News

● SEVENTH AND EIGHTH
GRADE NEWS
Clara Smith, Teacher
Elizabeth Goll, Reporter

The Eighth Grade is now work-
ing on our paper. We hope to have
a very successful one.

On Friday we had our Civics
History chapter tests.

Several are absent from our
room because of illness.

In Arithmetic the Eighth Grade
are studying how to find the vol-
ume of cylinders. The Seventh
Grade is drawing hexagons with
protractors.

The Seventh Grade is learning
about direct objects and predicate
words.

In our Manual Arts Class the
girls plan to start new projects in
the Home Ec. Room.

Spelling Honor Roll

Those who received a perfect
score in Spelling are:

Roger R., Bob, Peggy, Dean, Ro-
ger B., Marcella, Lois Ann, Carol,
Edward, Irene, Ruth and Darwin.

● THIRD AND FOURTH
GRADE NEWS
Evelyn Guelff, Teacher

We had two visitors in our room
this week, they were Carol Bridges
and Kathiecn Dilman, who is in the
4th grade in Mason City.

We have drawn pictures of blue
bird, cardinals and blue jays this
week.

Everyone in the 4th grade gave
a report on something about China.

In 3rd grade we are learning to
multiply and divide by 4.

Spelling Honor Roll

Maralee, Delores, Harley, Son-
dra, Ruth, Audra, Richard and Do-
lores K. received perfect scores in
Spelling this week.

● PRIMARY ROOM
NEWS
Virgie Hardcopf, Teacher

Both the First and Second Grades
made pictures of their neighbor-
hood this week.

The Second Grade are reading in
a new book. The name of it is the
"Friendly Village."

Graydon and Gary Beck brought
pusy-willows to school.

We bought \$4.45 worth of
War Stamps this week.

Spelling Honor Roll

First Grade: Pupils having per-
fect scores are Roger, Lois Ann,
Gary Beck, Denny, Beverly, Tom-
my and Ronald.

Second Grade: Larry, Elaine, Shar-
on, Neva Ann, Miriam, LuVerne,
and Garry S.

**Power Politics—
AMERICAN STYLE**

The frenzied paperhanger from Austria must now be suffer-
ing from acute insomnia. His vision of world empire is fading.
His armies, once believed invincible by many, are beginning to
know defeat. Many of his "supermen" are now tired and
disillusioned.

And while Herr Hitler tosses sleeplessly, we wonder whether he
realizes the enormity of his mistake in neglecting his railroads.
For even in a land of "supermen," rolling stock must be kept in
condition; engines should be periodically overhauled; roadbeds
must be maintained; bombed railway centers must be given in-
stant attention. The Nazi overlord has neglected these things, in-
stead, he has violated a war principle as old as war itself—
doing so, he has violated a war principle as old as war itself—
maintain lines of supply and transportation so that armies
may have quick mobility.

How thankful America should be that management foresaw the
necessity of modernizing the nation's railroads. They are now
in "fighting trim," and we are determined to keep them that
way. ROCK ISLAND, for example, has for years pursued a com-
prehensive Program of Planned Progress. We have invested
vast sums every year to make it one of the nation's modern rail
systems, and we shall continue to keep it so.

Ours is the herculean task of moving fighting men and the ma-
terials vital to victory. War found us ready, and we shall carry
on until victory is ours.

SNAPPY FACTS ABOUT RUBBER

Seed-bearing pods high up in rubber trees when ripe go off with an audible pop. The pods, about the size of a goose egg, contain formations of gas which explode when ripe and throw the seed as far as 100 feet.

The French call rubber caoutchouc from an Indian term meaning "weeping tree."

Ninety per cent of roadside flats that plague car owners can be avoided. Checking air pressures while tires are cool, before inflating will show up tubes that are losing an abnormal amount of pressure due to slow leaks.

Temperatures, topography and types of roads as well as driving habit of owners account for wide variations in mileages from identical tires. These factors may account for a tire turning in from twenty to twenty-five thousand miles of service in Chicago whereas from seven to eight thousand miles may be the mileage it will render in Texas.

Jerry Shaw

ASK ME ANOTHER?

A General Quiz

The Questions

- 1 What is a philippic?
- 2 In army slang, what is a cavalryman called?
- 3 A quack medicine is often called a what?
- 4 In mythology, what was the name of the three-headed dog that guarded the entrance to Hades?
- 5 What is the difference between the "army of the U. S." and the "U. S. army"?

The Answers

- 1 A speech abounding in invective
- 2 A cavalryman is "bowlegs," while an infantryman is "blister-foot"
- 3 A nostrum.
- 4 Cerberus
- 5 "Army of the U. S." applies to all draftees and those who have enlisted "for the duration plus six months." "U. S. army" refers to our regular army

Telling time in the Navy is on the 24-hour system. Morning hours are from one to twelve, but afternoon hours are from 1300 to 2400 (midnight). So if you ask a sailor the time and he says "seventeen," subtract 12 and you get five o'clock in the afternoon. It's simpler if you ask him what cigarette he smokes. Chances are he'll say, "Camel," for Camel is the favorite cigarette among Navy men as well as among men in the Army, Marines, Coast Guard (Based on actual sales records from service men's stores.) Local dealers are featuring Camel cartons as gifts for men in the service from the folks back home.—Adv.

Beautiful Crazy Patch Quilt Made From Scraps of Silk and Thread

MANY an old-time art is being revived today and the art of making old-fashioned crazy patch quilts is one that fits into our times. All you need is scraps of silk and odds and ends of embroidery thread. The pieces are sewn to a foundation of light weight cotton material with a variety of embroidery stitches.

This colorful patchwork may then be used for a new cover for a comforter. Another idea is to cover a worn blanket with it.

NOTE—Book 7 of the series available to readers shows another crazy patch design and gives directions for more than 20 stitches and combinations of stitches to be used for this work. Book 2 of the series gives directions for 42 other stitches.

Aircraft Lifeboats

All American naval aircraft now carry rubber lifeboats with sufficient capacity to take care of everyone in the plane in case of emergency. The boats are built in four sizes, for one, two, four and seven men, and some automatically inflate themselves immediately after striking the water.

NO ASPIRIN FASTER

than genuine, pure St. Joseph Aspirin. World's largest seller at 10¢. None safer, none surer. Demand St. Joseph Aspirin.

Suffering and Achievement

Men regard suffering as an evil thing, which the world might well be rid of. This idea is typical of a good deal of modern sentimentalism, which ignores the history of suffering and its part in human achievement.—Dr. A. P. Shepherd.

GARNER, IOWA

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Fred Schlichting is building a garage near his residence in Klemme, the late Lew Lewis property.

Mrs. P M Wilson drove to Clarion last Thursday morning and visited there until Friday noon.

A number of the local mmrods have been catching some nice bullheads at Twin Lakes the past week.

Mrs. Fred Ridder was a dinner guest Sunday at the home of her son, Levi Ridder and family.

Wallace Pavey spent the week end at Garrison, Iowa visiting with his parents.

Miss Nevada Bredbenner, teacher at Allison, spent the week end in Klemme visiting with her mother, Mrs. Martha Bredbenner.

Mr. and Mrs. Clair West and children, of Des Moines, came Friday for a visit at the Sumner Trumbull home.

Mrs. Fred Ridder left Tuesday noon for Chicago, for a visit with her daughters, Mrs. Beatty and Mrs. Harvey and their families.

Mrs. Ben Coobs and Peggy, Mrs. Henry Keeper and Mrs. Clifford Adair were Mason City visitors on Saturday.

Mrs. Verle Keraus and baby son of Garner, spent Friday visiting at the parental E. C. Buntenschach home.

Mr and Mrs. Frank Benner and daughter, and Grandma Hyde of Ventura were dinner guests Sunday at the Alfred Merkel home.

Henry Helps has been ill for over a week, suffering with a heart ailment which has confined him to his bed. Today, Wednesday, he is reported to be much better.

S. G. Overholt of Sheffield spent Saturday and Sunday in Klemme visiting with his brother Ira Overholt and wife. S. G. Overholt is a high school teacher at Sheffield.

Miss Ruth Johnson came Friday from Des Moines for a visit with her parents, Mr. and Mrs. John Johnson. Miss Johnson is supervisor in a Des Moines hospital.

Mr and Mrs. C. G. Waterman and Lt. and Mrs. Lyle Wilcox were dinner guests Thursday evening at the home of Mrs. Rosie Mitchell at Swea City.

Lt. and Mrs. Lyle Wilcox left Saturday afternoon for Alexander, Louisiana where Lt. Wilcox will be on duty at Camp Claiborne. They expect to begin housekeeping there.

Mrs. Louise Schroeder expects to leave this week Thursday for her home in Chicago. She has been in this community for a couple of weeks visiting with relatives.

The Misses Hardcopf and Garabrant and Mrs. Lester Neuberger were dinner guests Thursday evening at the home of Mr. and Mrs. Melvin Neuberger.

Mr. and Mrs. Ben Coobs, Mrs. W. F. Pavey and Mrs. Verner Lewis went to Forest City today, Wednesday, to attend the funeral of Mrs. P. N. Anderson, and old friend and neighbor.

Mr and Mrs. Arthur Wellemeyer took the Rocket from Mason City Friday afternoon for Kansas City, Mo., where they visited over the week end with their son, Andrew and family.

Dinner guests Sunday at the R. A. Jorgenson home were Mr. and Mrs. Lyle Liebenborfer of Forest City; and Mr. and Mrs. Joe Liebenborfer and Mrs. Bessie Starboard of Hampton.

Wayne Pavey has been absent from his work at the creamery since last Friday because of a very sore throat. Ed. Becker is assisting with the work during Wayne's absence.

Miss Frieda Schuldt has returned from a two weeks trip through the southwest and west. Highlights on her trip was a visit to the Carlsbad Caverns in New Mexico, and a sight-seeing trip in California. The Times will print a story of Miss Schuldt's trip later.

Mrs. Wesley Patterson is teaching in the fifth and sixth grades this week as Miss Esther Boiles is ill. Arlene Schmidt is taking care of the Patterson baby while Mrs. Patterson is teaching.

Mr. and Mrs. Ben Merkel and son, Leon, of Clinton, came Thursday and remained until Sunday visiting with Ben's mother, Mrs. Peter Merkel and other relatives in this community.

Miss Jacqueline Kudje, sophomore student at State Teachers College, Cedar Falls, spent the week end in Klemme visiting with her parents, Mr. and Mrs. Art Kudje and family.

Harold Jost, of Toledo, Ohio, arrived Saturday noon and visited until Sunday morning with his father, H. F. Jost and family. Harold was on a business trip and was on his way to Texarkana, Texas.

Mr. and Mrs. Melvin Buseman drove over from Alexander Saturday evening for a visit with Klemme relatives. Mr Buseman is employed on the George Barkema farm near Alexander this season.

Miss Betty Rawson has resigned from her position at the First National Bank and will complete her work there Saturday. Miss Phyllis Swanson is now working at the bank.

The Klemme Fire Department answered a call Wednesday afternoon to control a grass field in the vacant lots east of the Herman Priebe residence. The fire was getting out of control and a threat to nearby residences. No damage was done, however, and the fire was soon extinguished.

Vella Paul, who has been visiting with her parents here, Mr. and Mrs. Herman Paul, for the past week, left Tuesday night for Des Moines to spend a couple of days visiting with her sister, Mrs. Eddie Epps. Miss Paul will leave Thursday for California to resume her work in government communication at a desert army camp. She has been enjoying a two weeks vacation.

Have you paid your subscription?

Mr. and Mrs. Walter Kimball and children drove to Rosemont, Minn., Sunday where they visited with Mr. Kimball's mother.

Mrs. Ernest Gerardi and daughter, Gracka Maria, arrived early this Wednesday morning from Wichita, Kansas, for a visit at the parental Conrad Quandt home and with other Klemme relatives for a couple of weeks. Gracka Maria explained that she came to celebrate her birthday, to have her grandmother make her Easter eggs and to be here for May basket time.

Don't forget to turn in those old toothpaste and shaving cream tubes. During March, Iowa shipped 6,031 pounds of this salvage material, while the national total for the month was 522,359 pounds. Collections are shipped to the Salvage Institute, 411 Wilson Ave., Newark, New Jersey.

THE 2nd WAR LOAN DRIVE IS ON!

Start Punching From Your Pocket!

America's war machine is growing—growing!

It's getting ready to deliver a tremendous, irresistible wallop that will smash the Axis flat—once and for all.

But brother—that punch has got to start from YOUR POCKET! And now's the time to let it go!

Uncle Sam is asking us to LEND him 13 billion dollars this month. 13 billions of extra dollars—over and above any War Bond buying that you'd be doing anyway! Money to buy ships and planes, money to feed and clothe and arm and train the millions of your fellow Americans who will deliver this punch—who are ready to work and sweat

and die to keep the place you live in safe.

Uncle Sam is asking you to back them up. He's asking you to lend the money they need by investing in War Bonds.

In the next few weeks, you may be visited by one of the thousands of volunteers who are giving their time and effort to this Drive.

But don't wait for him. Today—now—go to your nearest bank or Post Office or place where they sell War Bonds. And for your Country's sake—for your own sake—invest all you can!

There are 7 different types of U. S. Government securities—choose the ones best suited for you!

Sentinels of Health

Don't Neglect Them!

Nature designed the kidneys to do a marvelous job. Their task is to keep the flowing blood stream free of all living-toxic impurities. The set of living-toxic matter the kidneys must remove from the blood if good health is to endure. When the kidneys fail to function as Nature intended, there is a build-up of waste that may cause body-wide distress. One may suffer nagging backache, persistent headache, attacks of dizziness, getting up nights, swelling, puffiness under the eyes—feel tired, nervous, all worn out.

Frequent, scanty or burning passages are sometimes further evidence of kidney or bladder disturbance.

The recognized and proper treatment is a diuretic medicine to help the kidneys get rid of excess poisons. They have had more than forty years of public approval. As Doan's Pills, they have been endorsed the country over. Inside

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Homemakers May Learn Ration Wisdom Through Study.

is easily prepared gelatin des-
serts all unrated food. It's
y but easy to make, and will
either a light or heavy meal.

ese are times when changes
the fashion—and that particu-
applies to
ages in foods
cooking meth-
Mrs. Ameri-
can no longer
to the gro-
and get
gh canned or
essed foods
ut together a quick meal. Nor
she get together a meal, even
that would take time, with those
oned foods.

ints must be budgeted far more
fully than dollars and cents in
past! That is the realization ev-
homemaker has been feeling
e Ration Book II went into ef-
Out of that has arisen one
um, never to buy a canned or
essed food if a fresh one is
vailable
onfusion, indecision, and slow-
s in buying were the adjectives
ers used when buying with War
on Book II began. But this is
ually wearing away as Mrs.
erica learns new shopping meth-

ince point values change month-
it's a good idea to keep a list of
nt values on hand when making
menu. Plan menus for a week
a time—marketing lists and budg-
lists all on hand when you're do-
this important bit of work. Don't
to the store and wander aim-
sly, selecting whatever appeals
the eye. Even if you have four
five ration books from which to
end, it's certain you won't get
ough out of them by the hit or
ss method.

Keep on the lookout for point val-
s which may change—they vary
om month to month and sometimes
ange during the month as the pub-
s buying habits are watched.

Haphazard shopping, meal-plan-
ng, and carelessness about the
health of the fam-
ily are out of
date. The home-
maker must be
alert and vigilant
now as never be-
fore to make of
her family the
strongest and
healthiest possi-
ble unit—for a healthy America is a
strong America.

Lamb is fairly easily obtainable
great and second to pork, richest
source of thiamin—our morale vita-
min. Very little, if any, lamb is
being sent to the armed forces and
allies, and that means it is for ci-
vilian use.

Baked Lamb Loaf.
(Serves 8 to 10)
1½ pounds ground lamb
½ cups bread crumbs
1 cup milk
2 tablespoons minced green pepper
2 tablespoons chopped parsley
2 tablespoons grated onion

Lynn Says:
Fresh Vegetables: To those of
you accustomed to using canned
vegetables and learning how
many they serve, these hints are
given on how many fresh vege-
tables will serve:
Asparagus: One pound yields
two cups, cut, serve three to four.
Beans, green or yellow: yields
three to three and one-half cups,
serves four or five.
Beets: One pound yields three
to four servings. Use young beet
greens as vegetable, too!
Broccoli: One pound serves
four to five.
Cabbage: One pound, shredded,
yields three and one half cups.
One pound cooked serves three.
Parsnips: Four medium sized
roots make a pound, serves four
to five.
Peas: One pound gives two
servings.
Spinach: One pound serves
three to four.
Turnips: One pound yields
three to four servings.

Lynn Chambers' Point-Saving Menus
*Deviled Egg, Macaroni and Pea Salad
Hot Biscuits with Jam
Marmalade Bavarian Milk
*Recipe Given

1 cup cooked peas
2 teaspoons salt
½ teaspoon pepper
Soak crumbs and mix well with meat and other ingredients. Pack into a loaf pan. Bake in a 300 degree oven for 1½ hours. This may also be baked in a ring mold and served with parsleyed potatoes.

Fish will come into more popularity to help extend our main dishes when ration points will not cover that major item:

Fish Loaf.
(Serves 6)
2 cups cooked, flaked fish (leftover may be used)
2 tablespoons chopped green pepper
1 tablespoon minced onion
2 tablespoons butter or margarine
1 cup fine, soft bread crumbs
½ teaspoon salt
½ teaspoon pepper
2 eggs, separated
½ cup milk
2 teaspoons lemon juice

Shred the fish. Sauté green pepper and onion in butter, add to fish with bread crumbs and seasonings. Beat egg yolks, add milk and then add to fish mixture. Stir in lemon juice. Fold in stiffly beaten egg whites. Poured into a greased loaf pan, set in a pan of hot water. Bake for 1 hour in a 350 degree oven. Serve with white sauce to which hard-cooked eggs have been added.

As the days become warmer we will gradually begin adding salads for our main dishes, to help save on pointage. Here is a splendid suggestion, using all unrated foods:

*Deviled Egg, Macaroni and Pea Salad.
(Serves 8)
10 to 12 deviled eggs
1 package (12 to 16-ounce) macaroni
2½ cups cooked, fresh peas
French dressing
Radish roses
Salad greens—optional
Deviled eggs
10 to 12 hard-cooked eggs
2 tablespoons salad dressing
2 tablespoons lemon juice or vinegar
1½ teaspoons mustard
1½ teaspoons Worcestershire sauce
½ teaspoon salt
¼ teaspoon celery salt
¼ teaspoon pepper

Cut a half-inch slice from rounded end of egg. Cut a saw tooth edge around white, if desired. Remove yolk carefully. Press yolks and bits of leftover whites through sieve, add remaining ingredients and beat until light and fluffy. Refill shells, using pastry tube for decorating top, if desired.

Boil macaroni in salted water according to directions on package. Drain, rinse, then drain thoroughly. Marinate with a little french dressing, then chill.

Cook peas, drain, and save stock for soup. Marinate peas in french dressing.

To make salad, heap macaroni in center of dish. Alternate deviled eggs and radish roses around edge, pressing them into macaroni. Fill with a border of peas between eggs and macaroni.

Marmalade Bavarian.
(Serves 6)
1 package orange-flavored gelatin
1½ cups hot water
¼ teaspoon salt
½ cup heavy cream
½ cup orange marmalade
Dissolve gelatin in hot water. Add salt. Chill until cold and syrupy. Fold in cream, whipped only until thick and shiny, but not stiff. Fold in marmalade.

THE MOVIES AND FOOD

Several picture companies announced they will ban or greatly tone down scenes of feasts, banquets or elaborate dinners for the duration. The idea is that they are resented by the public in times like these

"Nonsense!" exclaimed Elmer Twitchell today. "For the past year I have lived largely on cinema meals. Hungry and weak, I have gone to a movie and found my appetite appeased in no time."

"There was one spell when I had lost ten pounds. I went to a Cecil DeMille picture and put on fifteen in the first reel!"

"With new ration rules coming every day and with the people having troubles galore getting food, the one source of relief has been those Hollywood feasts. Even a breakfast as shown by most directors was enough to make you unbutton your vest."

"Last week I went to my butcher to beg for a small chuck steak. I couldn't get it. Well, I went over to the nearest movie theater and ran right into 'Philadelphia Story'—a return engagement of course—and enjoyed two of the finest meals I ever had, one indoors and one outdoors, with whole sides of beef in them. They showed closeups of the gravies—yum, yum! And there were flashes of the thick soups from eleven angles!"

"The wife came home exhausted the other day from a losing fight for a few cans of food. She was terribly depressed. I took her to a picture palace and it had a breakfast that would have done anybody else for a six course dinner."

"Such grapefruit—big as watermelons! Such sausages! They showed them sizzling in the frying pan! Such wheat cakes! I think four authors, three directors, two producers, four composers and six artists got credit lines for 'em!"

"Then they served ham and eggs, too. They showed these eggs—sunny side up—photographed from above, below and from east and west."

"Mrs. Twitchell was a new woman at once. And I never saw her so happy as when they poured the coffee. The pot was as big as a stove and everybody had two or three cups."

"Then came the finest hot rolls the movie world has ever produced. I understand it took twenty-four weeks, 182 people and \$100,000,000 to get just the right touch to 'em. And that \$100,000,000 didn't include the butter!"

Elmer was licking his lips. "I can't believe Hollywood is serious about abolishing these things," he added. "Lower morale my eye! They raise morale. Picture fans of America arise! We must not stand meekly by and see the movies as short of food as our own homes are. On with the baronial manor feasts! We want more groaning boards. Where else will we get butter?"

VANISHING AMERICANISMS
Mommie sent me over to see if you could lend her some butter?

Bring me a sharper knife; this steak is quite thick.

Tickets to the annual beefsteak dinner will be \$1 each.

Send down about \$30 worth of supplies; we're going on a week-end cruise.

The food shortage in some restaurants has reached a point where some places are advertising for chefs who can bring their own cattle.

"Frankly," writes Merrill Chilcote, "I'm surprised at these food shortages. I'd formed an opinion that if we ever ran short of anything Henry Ford could make it from soybeans."

President Roosevelt is now drinking milk instead of coffee with his breakfast. The blame for this, it seems to us, must be shared about equally by Mrs. Roosevelt and Mayor LaGuardia.

WPB is allowing a resumption in the manufacture of electric iceboxes. The theory is that they will presently be ideal places in which to keep books or old clothing.

"Life is so funny. I had my summer all planned. I was going to be a serious farmer. Now here I am with a success on my hands. I really don't know what to do about it. It upsets me so."—Helen Hayes.

Just try to reconcile yourself to these tough breaks, Helen.

"With the ban on butter it was suggested that substitutes might be found in mayonnaise, peanut butter and apple butter."—News item.

Wanna bet?

Concerto for Two-Finger Typewriter:

The most eagerly awaited mail in more than 200 Army and Navy bases from Australia to North Africa is the semi-monthly copy of The Grimy-Gazette . . . the editor is a Chicago girl named Maggie O'Flaherty . . . Her brother, in the army, sometime ago sent her this plea: "What we need here more than anything are new jokes. We're telling the same ones to each other 20 times! Fergoodnessakes, sis, dig up some for us!"

So Maggie started collecting them—slightly risqué or pure puns. When they were too naughty she laundered them as best she could and left it to the boys to decode them into unpurgated literature.

Her gag-scouts are friends who travel in parlor cars, and her girl friends bring those they hear in beauty parlors and cafes . . . Twice a month Maggie puts them in the mails for all over the fighting fronts . . . One compliment came from Capt. Tom Griffin in N. Africa. He said: "Thanks for the Gazettes. Laughs are few and far between out here" . . . A Camp Polk, La., Sgt. wrote that her Gazettes solved the problem of getting the men to read the bulletin boards.

Oh, yes, Maggie O'Flaherty has a regular occupation.

She writes radio shows for kiddies.

She is one of the lovelier actresses . . . Her young actor-groom enlisted on that December 7th and he's been on active duty abroad for over a year . . . Last night she was at a girl friend's apartment playing gin-rummy with a foursome of gals . . . When she left the room to answer the phone, one of the girls observed: "Hasn't she the loveliest figure? Amazing how she's kept it so trim since he left."

"And why not?" said Tallulah. "Nobody's been able to make an appointment with her for over a year—except Elizabeth Arden!"

Billy Bryant, the famed Showboat man, was in a Broadway producer's office where a group were panning a dramatic critic, whose review that morning lambasted their new play . . . The producer sent the critic a telegram which said: "You are selling your comedy at 2c per copy!" . . . To which the reviewer replied: "And you are selling your 2c production at \$4.40!!!"

That recalls the time George Bernard Shaw tried to sell a dated manuscript to a weekly magazine, which rejected it with this note: "Our editors see no reason why it should be published by us."

Shaw answered: "Am forwarding a copy in Braille."

Earle Stanley Gardner, the mystery master, was discussing the cooking in New Orleans. He bemoaned the fact that the cuisine there was so good and the variety of rich dishes so tempting, that on his last visit he nearly ate himself to death . . . "Then you don't like New Orleans?" asked his listener . . . "Like it!" he ejaculated. "I love it. It's Gout's own country!"

The editors of the Mirror consider this one of their favorite war gags: A Berlin worker asked a bank clerk how to invest his life savings of 1,000 marks . . . "Buy State bonds," he was advised . . . "But," he butted, "supposing the State goes broke?" . . . "You forget the Nazi Party will see that it doesn't!" . . . "But," persisted the man, "supposing the Nazi Party collapses?" . . . "Well," was the answer, "isn't that worth 1,000 marks?"

Notes of an Innocent Bystander:

The Intelligentsia: The March of Time editors edited out the last two stanzas of the ditty, "Stalin Wasn't Stalin" (rendered by the Golden Gate Quartet), which have to do with the American Eagle and British Bulldog helping the Russian Bear . . . Tom O'Connor's deft piece in PM, which castigated E. James Smythe, the Bund and Klan supporter, was the week's tops in lowdown reporting . . . Roger Butterfield of Life says the piece on Al Schmid, the marine hero, couldn't have been done sans the help of the Philadelphia reporters who dug it up originally . . . Time has its own intelligence bureau—off-the-record statements and background on stories and people, which are distributed for the personal observation of Time editors only . . . Quentin Reynolds probably is in Russia, having flown there longer than a fortnight ago . . . 93 newspapers suspended publication in 1942.

Those who plan giving parties in their homes for servicemen might follow the policy of the Stage Door Canteen in New York.

The Canteen workers have learned the songs the servicemen do not want to hear. They include: "Miss You," "Dear Mom," "We Did It Before," "Remember Pearl Harbor," "White Cliffs of Dover," "Letter From Home," "God Bless America," "This Is Worth Fighting For" and "My Buddy."

All of them, it is explained, "are depressives."

PATTERNS SEWING CIRCLE

1744-B
It Fits Beautifully
A REAL indispensable — beautifully fitting shirtwaist with kick pleat and action back.

Barbara Bell Pattern No. 1744-B, designed for sizes 12, 14, 16, 18, 20; 40 and 42. Corresponding bust measurements 30, 32, 34, 36, 38, 40 and 42. Size 14 (32) requires, with short sleeves, 3½ yards 39-inch material.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers.

Send your order to:

SEWING CIRCLE PATTERN DEPT.

Barbara Bell Pattern No. 1748-B, designed for sizes 32, 34, 36, 38, 40, 42, 44 and 46. Size 34 requires 4½ yards 35-inch material.

1748-B
Princess House Frock
LIKE looking neat, pretty and efficient? Just button into this princess house frock and presto . . . perfection.

Barbara Bell Pattern No. 1748-B, designed for sizes 32, 34, 36, 38, 40, 42, 44 and 46. Size 34 requires 4½ yards 35-inch material.

Business Through Siege
During the entire 17 months' siege of Leningrad, broken on January 18, 1943, most factories, schools and churches continued to function and four theaters and 23 motion-picture houses did not close their doors even for one day.

Distributing Doctors
The army has one doctor for each 121 men; the navy has one doctor for each 154 men, and that leaves one for every 1,500 citizens.

Corn Planting Time

WILL SOON BE HERE

AT STAND WILL YOU HAVE
AT HARVEST TIME?

YOU MUST HAVE A GOOD STAND TO GET
A HIGH YIELD

There is an advantage in planting thicker in the Northern
Belt. According to 5 year trials conducted by Iowa
Field Test, planting 3 kernels per hill gives the grower
bushels per acre at harvest time; whereas 4 kernels per hill
gives the grower about 3 plants per hill
kernel planting has outyielded 3 kernel planting by
approximately 4 bushels per acre.

Need a good corn crop this year, let's prepare a good
seed bed, plant shallow, and plant for a good stand.

RATION BANKING

Some 450 of Iowa's 655 banks
have signed up in the federal ra-
tion banking program, the Des
Moines district OPA reports. OPA
ration banking officials said the
new federal regulation eliminating
from ration banking the food retail-
ers who have an annual volume of
less than \$2,500 will greatly reduce
the detail work required of ration
banks. Shoe dealers, however, are
required to service their ration ac-
counts at ration banks regardless
of their business volume.

MUSIC NEWS

By Patricia Kudje

The Boys Glee Club gave a dance
Thursday night in the gym for the
high school. The floor was so
slippery that more than one slipped.
During intermission Miss Eldahl
showed her moving picture, of her
stay in Klemme during this year.
There were pictures of several of
the teachers, her Home Economics,
Classes and the Biology Class.
The refreshments served were co-
ca and doughnuts which were
both very good.

SENIOR CLASS
NEWS

Anna Lee Bruner, Reporter

The Senior Class has been run-
ning bitter and von this past week
working in the play. We have g-
ten the ticket sale started and as
last year we are having a contest
between the boys and the girls with
the boys giving the winners a
trip to the state.

The American Literature Class is
at work on poetry. Some of the po-
ets are very amusing while others
are very sad.

History students are reviewing
their book. They are having a test
at the end of each week. This is to
last until the year is out.

Most of the Home Economics
girls are finishing their dresses this
week or starting on something new.

In Physics we have finished the
unit on Sound. We had a test over
this unit on Friday.

JUNIOR CLASS
NEWS

Wava Schoenwetter and
Mildred Busse, Reporters

This week in American Govern-
ment we have been studying coun-
ty and town and city governments.
We also studied township gov-
ernments and how the size and loca-
tion of townships are determined.

In English Literature we are tak-
ing up many poems. The two main
poets of the period were Tennyson
and Keats.

The Geometry class is still work-
ing mainly with ratio and propor-
tion. Algebra is very helpful in
this kind of work.

Starting next week the Typing
class is going to put out a paper.
We are learning to type invoices,
different kinds of letters and other
things helpful in the business
world.

Only about half of our class was
present this week. Elwyn, Corrine,
Raymond, Vern, and Denis were
all.

For our paper Eunice was elected
Editor, Larry, Assistant Editor and
Vern Grieman, Sports Reporter.

SOPHOMORE
NEWS

Patricia Kudje, Reporter

Mr. Gregory will be superinten-
dent at Colwell next year and not
at McIntire.

We are reading "The Coming of
Arthur" and "Lancelot and Elaine"
in English.

Thursday, in Algebra, we got so
absorbed in optical illusions we just
about forgot the time. Mr. Mick-
lick was showing us examples that
look like something different than
they really are. And, got us so
mixed up we didn't know what was
what. He couldn't fool Ed Barz.

The other day Red said to Ed,
"Come out to my locker and get
some candy bars." Get it, "Barz."

Allen Anderson or "Andy" is ab-
sent because of illness. We miss his
wise cracks.

Herbert Mueller and Marj H
were alone at a study hall table
last Friday. Alas! Both were study-
ing!

FRESHMAN CLASS
NEWS

Elwyn Etchen, Reporter

The Algebra class is reviewing
the cases of factoring. We are add-
ing and subtracting fractions. It is
very difficult.

In English we are reading Caes-
ar. Different people take part in
the play and we act it all out.

In Science we had a test Tues-
day and the results were good.
The Home Economics girls are

finishing their first dresses. Some
are starting their second ones.

Grade News

SEVENTH AND EIGHTH
GRADE NEWS
Clara Smith, Teacher
Peggy Coobs, Reporter

Many pupils are absent because
of illness. We hope they will all be
back soon.

In Manual Arts the girls have
started to sew. We are making such
things as aprons, skirts and shorts.
The boys are making wood pro-
jects.

We have started having Remed-
ial Reading again this week.

Spelling Honor Roll

Those who received 100 percent
in Spelling are:

Peggy, Marcell, Carol, Dean, Ed-
ward, Lois Ann, Roger R., Bob, I-
rene, William, Harold, Ruth and
Darwin.

In History the room is having a
review for a test.

In Civics we are studying about
the State Government of Iowa.

FIFTH AND SIXTH
GRADE NEWS

Esther Bolles, Teacher
Iris and Isabelle, Reporters

We have had a very unu-
sual week in the 5th and 6th grades.
Viv Bolles went home due to ill-
ness. Dorance, Larry and Marjorie
are also out with illness. Maurice
returned Friday after being out due
to illness. Mrs. Patterson has been
our teacher this past week. We like
her even though she changed our
seats.

In Art we made Easter Posters
and an Egg Tree. To make this
tree we blew the insides out of eggs
and colored faces on the outside.
Then we tied them onto tall plants
that Merlin brought.

We added \$24.75 to our War
Stamp fund. Marvin bought a
War Bond for his birthday.

Last week we had no news, so we
have two honor rolls this week.

Spelling Honor Roll

Last week, 5th Grade: Phyllis,
Marvin, Merlin, Luella.
Sixth Grade: Iris, Maurice, Isa-
belle, Norma.

This week, 5th Grade: Everyone.
This week, Sixth Grade: Norma,
Iris, Isabelle, Maurice.

THIRD AND FOURTH
GRADE NEWS

Evelyn Guelff, Teacher

We received five new books for
our library. They are all very in-
teresting and everyone is anxious
to read them. We are reading
"Yummy Buy," a Bicycle," now.

In Art we have drawn several
new birds for our bird books.

The 3rd Grade has been working
on story pictures of wood.

The 4th Grade had a test this
week over the unit on China.

Spelling Honor Roll

Lucille, Delores T., Maralee, Au-
dia, Maxine, Janice, Beverly, Son-
dra, Harley, Jo Ann and Ruth re-
ceived perfect scores in Spelling
this week.

We bought \$8.65 worth of
War Stamps this week.

PRIMARY ROOM
NEWS

Virgie Hardecopf, Teacher

On Friday afternoon we made
butter. We put the cream in jars
and each took turns shaking the
jars. After rest period we had a
lunch of crackers and butter. We
all tasted the buttermilk too.

The First Grade have finished
their book "David's Friends at
School." We have three new Li-
brary books. We enjoy them very
much.

In Art Class we colored Easter
rabbits and Easter eggs and put
them on the bulletin board.

Denny brought a tulip plant to
school one day last week.

The Kindergarten, First and
Second Grades bought \$9.25
worth of War Stamps this
week.

Spelling Honor Roll

First Grade: Lois Ann, Beverly,
Tommy, Gary Beek, Janice, Ronald,
Roger, Denny.

Second Grade: Elaine, LuVerne,
Sharon, Garry S., Neva Ann, Billy,
Miriam.

WEED NOTICE

TO ALL PROPERTY OWNERS AND
TO WHOM IT MAY CONCERN

BE IT RESOLVED BY THE BOARD of
Supervisors of Hancock County Iowa
That pursuant to the provisions of
Chapter 131, Acts of the 17th General
Assembly it is hereby ordered
That each owner and each person
in the possession or control of any
lands in Hancock County, shall cut,
burn or otherwise destroy all noxious
weeds thereon, as defined in this chapter,
at such times in each year and in
such manner as shall prevent said
weeds from blooming or coming to
maturity, and shall keep said lands
free from such growth of any other
weeds as shall render the streets or
highways adjoining said land unsafe
for public travel. Noxious weeds shall
be cut or otherwise destroyed on or
before the following dates and as of-
ten thereafter as is necessary to pre-
vent seed production:

GROU 1 June 20, 1943, for Leafy
Spurge, Perennial Peppergrass,
Sour Dock, Smooth Dock, Sheep
Sorus
GROU 2 June 20, 1943, for Canada
Thistle, Russian Knapweed, Buck-
horn Wild Mustard, roads, and be-
tween July 10, 1943, for Field
Bindweed, Wild Carrot
GROU 3 July 15, 1943, for Horse
Nettle, Perennial Sow Thistle,
Quack Grass, Butter-Print, Vine
Cocklebur.

2 That each owner and person in
the possession or control of any lands
in Hancock County infested with any
primary noxious weeds including quack
grass, perennial sow thistle, Canada
thistle, field bind weed, horse nettle,
leafy spurge, perennial peppergrass,
Russian knapweed, shall adopt a pro-
gram of weed destruction, prescribed
by the Weed Commissioner, which in
five years may be expected to destroy
and will immediately keep under con-
trol such infestations of said primary
noxious weeds.

3 That all weeds other than pri-
mary noxious weeds, on all county
trunk and local county roads, and be-
tween the fence lines thereof shall be
mowed by the adjoining property own-
er, to prevent seed production, on or
before July 3, 1943.

4 That if the owners or persons
in possession or control of any land in
Hancock County fail to comply with
the foregoing orders the Weed Com-
missioner shall cause this to be done
and the expense of said work, includ-
ing costs of serving notice and other
costs, if any, to be assessed against
the land and the owners thereof.

5 That the County Auditor do and
is hereby directed to cause notice of
the making and entering of the fore-
going order by one publication in each
of the official newspapers of the coun-
ty.

(Publish April 21, 1943.)

Next Decade to See Changes in Air Travel That Seem Fantastic to All but Aviators

But Most of Us Will Live To Learn Every Prophecy Has Come True!

By ELMO SCOTT WATSON
Released by Western Newspaper Union.

CALIFORNIA high school youngsters will spend two weeks' study-vacations in a China reached after a fast hop in a plane or a huge dirigible.

The graduating classes of Hudson's Bay Eskimo elementary schools will fly to New York or Chicago for supervised study-visits.

Half-naked natives from the forests of Malay will fly to universities in California or Australia and fly back to the native villages as agronomists and physicists.

"Impossible!" you say—or perhaps only: "Not likely!"

As a matter of fact, it's not only possible but it's entirely probable. You can take the word of a man who knows!

He is Harry Bruno, who grew up with American aviation and with its early heroes. If any man is qualified to forecast what's ahead in an America that has always pioneered in flight and that will probably be even more dependent on air travel in the future than it has in the past, he is that man.

So when he makes such prophecies as those given at the beginning of this article, don't just laugh them off. Instead, read these words of his: "All this—and more—can be accomplished with the planes and airships that exist today. But the world of tomorrow will fly greater, faster, more economical flying machines and airships than now exist."

You'll find those words in a new book, "Wings Over America—The Inside Story of American Aviation," written by Harry Bruno and published by Robert M. McBride and Company of New York. It's not only an interesting book because it's the "inside story" told by a man who, as one of the six original "Quiet Birdmen" and as today's foremost aviation publicist, has first-hand knowledge of every memorable and spectacular event in the development of America's aerial power. It's also an important book—important right now when America is engaged in a life-and-death struggle. For, as Maj. Alexander P. de Seversky, who wrote the introduction to Mr. Bruno's book, says:

"The United Nations will win this war through superior science, or they will not win it at all. We must cut loose from the past and embark upon audacious new strategies, with air power as their core. We must utilize our superior technological set-up to spring intellectual surprises, in machines and strategic innovations, on the enemy. And thus it will be that the dreamers, the pioneers of yesterday's aviation will become the realists and leaders of today and tomorrow. The dynamics of air power are so intensive that we must plan for tomorrow if we want to be on time today. Fortunately America has the leadership to achieve this. Harry Bruno tells us where and why."

Such being the case, let's "cut loose from the past" (so far as our ideas of the limitations of air travel are concerned) and "embark upon audacious new" voyages into the future with Mr. Bruno. You can do that by reading the last chapter in his book—"The Next Ten Years."

Always Look Forward.
At the outset of that chapter he says: "The gods of aviation have one rule which all must obey—always look forward." Then he admonishes us to "Look ten years ahead to a post-war world in which the defeated Axis gangs are a thing of the past, and you see one of the most powerful reasons for each and every one of us to buckle down and do our utmost to guarantee this victory. Thanks to aviation, this is one of the most glorious ages in world history."

Besides his predictions about the California high school youngsters, the Eskimo school children and the half-naked natives from the forests of Malay, Mr. Bruno foresees also the day when:

"Shepherds will fly from the crags of Tibet to universities in Vladivostok and fly back to their native villages as doctors.

"Plane loads of professors will take off from Madrid to train South American Indians in new universities established near new airfields in Colombia, in Venezuela, in Peru. "The whole world will become the oyster of any American with a two

This Glenn Martin super-passenger liner is not a plane of the "far future"—rather it belongs in the "near future" for plans for its production already exist.

weeks' vacation—and the low cost of airplane and airship travel will make a most enlightening vacation in Norway or India a reality for the Detroit mechanic or the Boston librarian."

Planes of the Future.

How will they be able to do all this? Here is the answer in Mr. Bruno's words:

"The big planes of the next decade will glide through the stratosphere at speeds of 600 miles an hour and more. They will enable a man to breakfast in New York and have dinner in Paris on the same day. Citizens of Detroit and Denver will be able to do exactly the same, even though their planes will fly non-stop from their home towns to Europe and South America.

"Their planes will not be patterned after the huge flying boats that now cross the oceans. The new planes of 1952 will be huge stratosphere land planes, whose sealed, oxygen-equipped cabins will carry more than 200 passengers in all the luxury and comfort travelers enjoyed on luxury steamships like the Queen Mary and the Normandie. They will be powered by banks of gasoline-

PROPHET—Harry Bruno, who "grew up" with American aviation, makes some startling—but "too conservative," so say his friends—predictions about air travel during the next ten years.

burning engines of 5,000 horsepower each. But the use of gasoline, in aviation, will some day be as obsolete as the era of steam in automobiles. Electric engines of 10,000 horsepower, receiving their impulses through rays transmitted from ground stations will supplant gasoline engines within two decades of the end of the war.

"Passengers with more time, out for a more economical ocean crossing, will ride in the comfortable helium-filled dirigibles of the new world. These giant cargo and passenger airships will cross the Atlantic in about 36 hours, carrying fast freight and about twice as many passengers as the fast planes."

If you decided to sell your automobile because of the inconvenience of gas rationing and wait until after the war to get a new one, don't count too much on becoming a "motorist" again. For, according to Mr. Bruno, automobiles "will start to decline almost as soon as the last shot is fired in World War II. The name of Igor Sikorsky will be as well known as Henry Ford's, for his helicopter will all but replace the horseless carriage as the new means of transportation. Instead of a car in every garage, there will be a helicopter."

Why? Well, these marvelous machines can do everything an automobile can do, do it better and besides take you up in the air, far from the gasoline fumes of the crowded highways. Look at this picture of a Sunday afternoon pleasure "drive," as Mr. Bruno paints it:

"The family will take off in its helicopter from the backyard or the roof hangar, climb straight to the

level authorized by government regulation, fly on to their destination, and land on earth, on a roof top, or on water—as fancy dictates. Instead of wheels, the craft is mounted on rubber floats—inasmuch as it rises and descends like an elevator anywhere, wheels are not needed. These 'copters will be so safe and will cost so little to produce that small models will be made for 'teen-age youngsters. These tiny 'copters, when school lets out, will fill the skies as the bicycles of our youth filled the pre-war roads."

But 'copters aren't the only machines that your children and their children will be driving. For, says Mr. Bruno, "the great sport of our youth will be motorless flight. Glider meets will be held all over the country, much like the sailing meets of other years."

However, the glider won't be a machine for "pleasure driving" only. It will become an important economic factor in the transportation of the future. "Powerful cargo-carrying sky trucks will tow trains of cargo-carrying gliders—since all but the bulkiest slow freight will be carried by airplane or glider-towing, cargo-carrying dirigibles. The glider will also become the great transportation medium of commuting."

Trains of Gliders.

Which means that when you decide to visit Aunt Emma back in Syracuse or Cousin Will out in Oregon, here's how you'll go:

"Glider trains, towed by a lead passenger-carrying plane that will fly hundreds of miles, will drop gliders carrying local passengers at airports all along the route. Thus, a trip from New York to Albany, for instance, would be made in a glider attached to the New York-Buffalo sky train. Passengers would board the train at the overhead station of Rockefeller Center. The sky-train, which started from LaGuardia Field, would pick up the Albany glider at Rockefeller Center (and pick it up in flight, too) and continue on toward Buffalo. Over Albany, the conductor-pilot of the Albany glider will cut his craft loose from the train and glide to earth. By the time the lead plane reaches Buffalo, he will have dropped all of his gliders along the route."

"But all of these machines can still fall down and kill people—no, sir, I'll stick to good old Mother Earth!" you say. The aviation of the future will become increasingly safer, Mr. Bruno believes. He writes: "All aircraft will have television weather survey sets, enabling them to see and hear weather conditions along the routes that lie ahead. In this manner, they will be able to fly above or around storm areas and add to the comfort of each flight."

"All airplane factories will be entirely underground, air-conditioned and deep enough so that no aerial bomb can ever hurt them. Airports will also go underground and what will appear to be an empty field will suddenly become active when a plane lands on it. A quick taxi to a designed spot, and down will go the underground hangar as the surface sinks under the operation of a large elevator. An international police force, armed with the newest type of air weapon, will have no trouble maintaining order and understanding."

Such is Mr. Bruno's preview of "things to come." Do you find them hard to believe? Then reflect upon these final words:

"These predictions are a lot more conservative than the flat prediction, in 1900, that before the century was over man would build a machine that would really fly. If anything, most of my friends—men like Igor Sikorsky and C. M. Keys, who read this chapter, for instance—mark the predictions down as being too earth-bound, too conservative. And this should tell you that most of you will live to see them all come true!"

Washington, D. C.

MARTINIQUE APPEASEMENT

How tolerant we have been of the French island of Martinique, for two years thumbing its nose at us with its bombing distance of the Panama canal, is illustrated by a conversation which took place between the state department's Sam Reber and treasury department officials.

Reber had gone to Martinique to negotiate with Vichy Admiral Robert regarding the airplane carrier, cruisers and six oil tankers rusting in Martinique waters. Subsequently, the state department announced that an agreement had been reached with Admiral Robert whereby these ships would be turned over to the U. S. A. Months have passed, however, with no result.

After state department envoy Reber returned, treasury officials asked him:

"What about the gold in Martinique? What is to become of that?" They referred to 25 billions of gold francs still stored in Martinique.

"Oh," replied Reber, "that didn't come up."

"Wasn't it even mentioned?" asked treasury officials, who remembered how France had defaulted on her debts from World War I, still owing us several billion dollars.

"No," replied Reber, "did you think it would be safer up here?"

"Well, it certainly isn't very safe down there," countered the treasury. "We decided," replied Reber, "that we didn't want to do anything which might infringe on the sovereignty of France."

That ended the matter. The gold is still in Martinique, and Admiral Robert, who apparently isn't much impressed by the subtleties of state department appeasement, has continued to thumb his nose at the United States.

RED CROSS DONOR

Several weeks ago Mrs. Roosevelt phoned the Red Cross to say that she wanted to donate blood to the Washington blood bank, but wanted no publicity.

Red Cross officials agreed and the visit went off without any fanfare. Mrs. Roosevelt merely took her place in line with other blood donors, rolled up her sleeve, had a pint drawn from her arm, and went on about her business.

Some weeks later, Red Cross officials were astounded to have Mrs. Roosevelt appear at the blood bank again. This time she had not telephoned, but they felt their pledge of no publicity still held good. Once again, the First Lady took her place with other blood donors, and scarcely anyone knew she had been there.

Red Cross officials wished they could have publicized the incident, because they were in the middle of their drive for funds. However, they did not do so, and this column learned of the facts quite by accident.

PAY BEFORE PATRIOTISM

War Production board officials tell of a heavy snow-and-sleet storm that blanketed Seattle and left the Boeing Aircraft plant snowbound, unable to operate for two days. By the end of the week roads had been opened, and Boeing broadcast a back-to-work call.

Men came to the gates of the plant, but stopped there. And they declined to go further until they could be assured of receiving time-and-a-half pay for week-end work.

"But you haven't put in 40 hours this week," officials retorted.

The men stood their ground, however, and Boeing officials telephoned Washington for advice. They talked with Madame Perkins, who ruled that nothing should be allowed to interfere with production and that the men should be paid.

MERRY-GO-ROUND

U. S. department chiefs have asked for the deferment of very few government workers, but local draft boards, acting on their own, have deferred a tremendous number simply because they worked for the government.

The diplomatic envoys of Honduras, Costa Rica, Salvador, Guatemala, and Nicaragua soon will become ambassadors extraordinary instead of ministers plenipotentiary. This would give all Good Neighbor diplomats the rank of ambassador except Haiti and the Dominican Republic; would also place them ahead of Australia, Canada and New Zealand.

Figures for accidents on the home front continue to be almost as tragic as war casualties. Ned Dearborn of the National Safety Council says that 93,000 Americans were killed and 9,300,000 injured last year.

Of the 26 British camera men who filmed General Montgomery's "Desert Victory," four were killed, seven wounded and six taken prisoner. The film is imperfect and hard on the eyes because it was taken under battle conditions. But it is a great story of British heroism.

Only American journalist to visit the Japs' secret naval base, Truk, is Willard Adventure. In his book, "Pacific Adventure," he scooped the world on Japan's surreptitious plans to dominate the Pacific from Truk. Recommended as required reading for the state department.

A Yank's Life In India

By William Chaplin

(WNU Feature—Through special arrangement with Woman's Home Companion.)

In the heart of New Delhi, capital of India, you will find the headquarters of the Tenth Air force of the American army. It is really a city of its own.

Before this war, there have been eight Delhis, six of which crumbled away with declining civilizations. Beginning of the war found still in existence the seventh Delhi, a typical teeming eastern city of rickshas, sleeping coolies and wandering cows; and the eighth Delhi, a governmental suburb of broad streets and fine buildings known as New Delhi.

Now that the Yanks have come to India, there has come into being a community which may well be called the ninth Delhi.

When my plane arrived in India I drove to the Imperial hotel, then the American headquarters, along streets my taxi shared with camel caravans, bullock carts, motor buses, bicycles and pony carts. On broad tree-lined Queensway we ran between empty lots where ground was broken for construction projects.

Already masons were at work on fresh foundations and loose-limbed hill-women with rings in their noses and heavy silver anklets clanking above their bare feet were carrying bricks on their heads.

I stayed in India six months and long before I left the ninth Delhi was completed and occupied, with the American flag flying before the headquarters building and thousands of American soldiers comfortably installed in their new quarters.

Bomb Japs in Burma.

As I write, British troops are still pouring across the Burma border and members of the American Tenth Air force are bombing Japanese installations in Burma. America didn't get into the war in time to give mass aid to preventing the loss of Burma, but by wise planning they got there in time to take part in its reoccupation. Theirs is destined to be a vital part in turning the tide of war in the East.

The ninth Delhi, spread along both sides of Queensway for half a mile, comprises two-story barracks, officers' quarters, office buildings, hospital and post exchange. Last but far from least are the mess halls, where Yank soldiers eat as do few armies on either side of this war.

While the barrack room bearers are making the beds and comparing admiring notes on their new masters, the boys themselves are eating a breakfast that might just as well have been prepared in East Orange, N. J., or Terre Haute, Ind. Fruit, eggs, much of the meat and all the fresh vegetables are purchased locally, but there's a good sprinkling of canned and packaged goods brought through half a dozen submarine zones so the boys can have the kind of meals that mother used to make.

Yanks Eat American Style.

The American soldiers in India are eating American style in the army mess halls, but healthy curiosity has led them to make a thorough investigation of Indian food as well.

The little restaurants are always crowded with them, nibbling strange curries, savoring hot spices, perhaps even trying a chew at the red betel nut the Indians think good for their digestion. And a particular favorite is a rich pastry covered with real silver leaf.

The Indians think silver is good for their insides. The Americans don't take much faith in that, but they do get a kick out of eating real silver. Some of them are writing home warning the folks to lock up the family silver after the war; they say they might forget where they were and chew up Aunt Lou's best creamer or swallow those souvenir spoons from the World's fair.

These men of the Indian AEF are mechanics, clerks, cooks, technicians of a hundred different kinds, and they put in a full day at their appointed tasks unstayed by sun or dust storm or monsoon. But they have their fun while they can get it.

A tonga is a two-wheeled cart drawn by an undersized, mangy but spirited Indian pony. There is one back rest running from side to side. Thus two passengers can ride facing forward and two facing backward.

The man who invented tongas didn't know much about the laws of balance. If two passengers take a tonga and sit in the back seat, the shafts go up in the air so high the pony has to walk on tiptoe. To counteract this the driver crawls out on the right shaft and operates as a sort of off-side jockey.

Uncle Phil Says:

Have You Noticed It?

Journalism has made advances since we were a boy. The number of casualties in a great disaster is approximated what the first reports say.

An auctioneer must be awake, but that doesn't get us where if the people don't nod.

Some men are born with the majority don't extend greatness thrust upon them.

No one writes the way he did, there would be literature.

There's Hope for Us

Perhaps we are not as minded as we are thought or we could forget our troubles.

Arise with the lark, but larks in the evening.

Every wife knows that it is vanity that makes a husband wear his fine clothes. He glimmers exhilarates her.

Nature is a good mother, coddles no one.

Pull the Trigger Constipation, Ease for Stomach

When constipation brings on dizziness, stomach upset, loss of appetite, your stomach is probably "the blues" because your bowels move. It calls for Laxative-Senna. The trigger on those laxative pills is Syrup Pepsin for perfect action to your stomach in taking. Many Doctors have given prescriptions in their prescriptions to medicine more agreeable to a stomach. So be sure your Laxative-Senna Syrup Pepsin. Insist on Dr. Caldwell's Laxative-Senna Syrup Pepsin. See how wonderful Laxative-Senna wakes up your muscles in your intestines to become relief from constipation. A good old Syrup Pepsin makes the digestive so comfortable and easy on the stomach. Even finicky children take this pleasant Laxative-Senna. Take Dr. Caldwell's Laxative-Senna Syrup Pepsin, as directed on the label or as your doctor advises. It's the world's better. Get genuine Dr. Caldwell's.

To relieve distress of Menses Female Weakness

WHICH MAKES YOU CRANKY, NERVOUS, HEADACHE, BACKACHE, BILIOUSNESS, etc. Lydia E. Pinkham's Vegetable Compound has helped thousands to relieve periodic pain, backache, headache, with weak, nervous, blue feelings—due to functional disturbances. This is to its soothing effect on the woman's most important organ. Taken regularly—Pinkham's Compound helps build up strength against such annoying symptoms. Follow label directions. Works fast.

Aviation Pioneers Made Possible Heroic War Exploits of Today

America will never forget the courage and heroism of such World War II heroes as Capt. Colin Kelly Jr., Lieut. Edward H. O'Hare, Gen. Claire Chennault and Gen. James H. Doolittle, who wrote their epics in the air and signed them with their honor. Let us not forget, however, the names of the pioneers who made these war exploits possible—not only the Wright Brothers, Glenn Curtiss, Billy Mitchell and Admiral Byrd,

with whose activities we are all familiar, but the many other audacious men whose reputations have been obscured. Here is a partial list of the roll of honor: Calbraith Perry Rodgers, the man who flew across the continent in 1911 and one of the outstanding aviators of pre-war America; Jimmy Taylor, the unassuming, little known flying genius who for 20 years was one of our ace test pilots; Lincoln Beachy, a great exhibition pilot who

made tests that saved thousands of lives; Vernon Castle, a brilliant wartime aviator who is remembered (if at all) as a dancer; Roscoe Turner, a speed demon with a useful purpose; Clifford Henderson, the Barnum of aviation, who did more than any aviator except Lindbergh to attract American attention to flying. These Americans gambled their necks, their brains and their money that aviation might grow.—"Wings Over America."

'Pretty as a Picture' Will Top the Easter Costume

By CHERIE NICHOLAS

Spring hat fashions are fascinating. Judging from previews so alluringly this season it would seem surely must be some sort of movement among milliners to offset the conservatism of the new fashions and coats with head-dresses and hats that are made to take on feminine charm.

The classic little felt fedoras, pompadours, tricornes, calots is that make such smart this spring, with their protruding veils, and the tiny straw hats that pitch for a perilous angle (were it not for the modish hatpins that come to rescue), are so beguiling to their provocative flatness at very first. These perky felts will carry through the spring, giving a definitely "new" answer to the all-time Easter tailleur.

Old-fashioned yet chic is the suit hat of light-colored color (this spring) felt to the top to the right in the crown. It is typical of the current and important fashion note that the flower buckle is used here. The small yellow appear to be holding a grosgrain, of deeper lilac than in place. The piquant veil is the ribbon.

Up-to-the-minute suit hat in the lower left corner. White straw woven with both edge forms the smart crown for this swank chapeau. A black burnt goose is set right side and the towering banded in black grosgrain.

course you'll be wanting a lit-

tle flower hat to wear with your suit or your simple basic dress and its frilly neckwear on extra occasion. Flower hats are the big news this spring and what gay little flatters they are! You will find as you look around the most beguiling flowery confections fancy can picture creating a scene of bewildering loveliness wherever Easter millinery is on display.

Can't you just see the violet-becked hat shown below to the right drawing admiring glances as it moves along on the avenue comes Easter Sunday morn? It's of white straw with a scalloped brim. The purple and white violets that trim it carry a rapturous note of spring. The dotted veil is in a matching violet shade.

"He loves me, he loves me not"—maybe that's why daisies are chosen to adorn the jaunty bright-stripe taffeta sailor shown in the upper left corner. Here's hoping the petals will tell. This colorful hat breathes the very breath of spring in the yellow and orange-toned stripes of the taffeta. The large white daisies are effectively positioned, and the daisy at the throat fastens to a sapphire blue velvet choker that matches the ribbon on the hat.

As to the adorable rose fantasy that crowns milady's head with glory as illustrated centered in the group it has a story also to tell of veil enchantment, for the veil theme is being played up in all its phases with consummate art this spring. The Easter bonnet without a veil will be rather the exception than the rule. In this instance lacy fern-green veiling exquisitely patterned frames the face in a wistful sort of beauty, then flows gracefully down the back. The snow white roses hug a bicycle clip to nestle securely in the hair. Sweet bit of headwork for the coming spring.

Released by Western Newspaper Union.

Print Lining

Print linings are being used in jackets this season to extent. Another big feature new spring 1943 mode is the way to which daytime de-colour is going. This very charming ensemble demonstrates these high-style points. Here a red wool coat is jewel-but a street-length dress that given a most daring new look. Makes a smart after-five gown. Check up on the new afternoon print. You will find designers are unusual things with them.

Sleeve Length Is News This Spring

The long and short of it in sleeves makes interesting news this spring. Both are in fashion. In fact sleeves go to extremes in the new dresses and blouses. Many of the incoming blouses have wrist length sleeves that finish off with a simple wrist band or with a daintily feminine frill of lace. Then, too, some of the smartest, most exclusively styled black or navy dresses that make slender silhouette and sophisticated simplicity their theme have long, fitted sleeves that take on dramatic lingerie frills or lace ruffles at the wrist. The bracelet length sleeve also remains a popular choice, being liked for its thorough practicality.

In contrast to the lengths above mentioned, fashion is staging a sensation in way of sleeves so brief that in some instances they appear to be not much more than shoulder caps. So far these sleeves are merely in the tryout stage. These short versions are at their best in sports clothes. However, charming little afternoon frocks are thus sleeved, also the dressy-type black street-length dinner and restaurant gowns.

Gingham Necklace

A cunning necklace that will delight the heart of any little girl is made up of little red-and-white checked gingham flowers combined with red felt. There is a little gingham hair bow to match that carries out the popular ensemble idea.

CHATTERER TELLS SAMMY JAY ABOUT SHADOW THE WEASEL

CHATTERER the Red Squirrel, was hurrying through the Green Forest. He didn't know just where he was going. He had but one thought and that was to get as far away from Shadow the Weasel as he could. It made him have cold shivers all over every time he thought of Shadow.

"Seems to me you are in a great hurry," said a voice from a pine tree he was passing.

Chatterer knew that voice without looking to see who was speaking. Everybody in the Green Forest knows that voice. It was the voice of Sammy Jay.

"I—I—am," he said. "What's that?" Sammy asked sharply. "I always knew you to be a coward, but this is the first time I have ever known you to admit it. Who are you running away from?"

"Shadow the Weasel," replied Chatterer, still in a very low voice, as if he were afraid of being overheard. "Shadow the Weasel is back in the Green Forest, and I have just had such a narrow escape!"

"Ho!" cried Sammy. "This is important. I thought Shadow was up in the Old Pasture. If he has come

"Ho, ho, ho! Ha, ha, ha!" laughed Sammy Jay. "I wish I had been there to see it."

back to the Green Forest folks ought to know it. Where is he now?"

Chatterer stopped and told Sammy all about his narrow escape and how he had left Shadow the Weasel in a hollow of a chestnut tree with Redtail the Hawk watching for him to come out. Sammy's eyes sparkled when Chatterer told how he had pulled the tail of old Redtail. "And he doesn't know now who did it, he thinks it was Shadow," concluded Chatterer with a weak little grin.

"Ho, ho, ho! Ha, ha, ha!" laughed Sammy Jay. "I wish I had been there to see it."

Then he suddenly grew grave. "Other folks certainly ought to know that Shadow is back in the Green Forest," said he, "so that they can be on their guard. Then if they get caught it is their own fault. I think I'll go spread the news." You see, for all his mean ways Sammy Jay does have some good in him, just as everybody does, and he dearly loves to tell important news.

"I—I wish you would go first of all and tell my cousin, Happy Jack the Gray Squirrel," said Chatterer, speaking in a hesitating way.

Sammy Jay leaned over and looked at Chatterer sharply. "I thought you and Happy Jack were not friends," said he. "You always seem to be quarreling."

Chatterer looked a little confused, but he is very quick with his tongue, is Chatterer. "That's just it! If anything should happen to Happy Jack I wouldn't have him to quarrel with, and it is such fun to see him get mad!"

Now, of course, the real reason why Chatterer wanted Happy Jack warned was because down inside he was ashamed of that dreadful thought that had come to him of leading Shadow the Weasel to Happy Jack's house so that he himself might escape. It had been a dreadful thought, a cowardly thought, and Chatterer had been really ashamed that he should have ever had such a thought. He thought now that if he could do something for Happy Jack he would feel better about it.

Sammy Jay promised to go straight to Happy Jack and warn him that Shadow the Weasel was back in the Green Forest, and off he started, screaming the news as he flew, so that all the little people in the Green Forest might know. Chatterer listened a few minutes and then started on.

"Where shall I go?" he muttered. "Where shall I go? I don't dare stay in the Green Forest, for now Shadow will never rest until he catches me."

MANPOWER PROBLEM

Lady—It would be easier for you to get a job if you made yourself presentable.

Tramp—I know, lady, I found that out years ago.

LITTLE MISS CURIOSITY

Nancy—Isn't a man born in Poland a Pole?

Teacher—Yes, my dear.

Nancy—Well then, why isn't a man born in Holland a Hole?

STAGE-SCREEN-RADIO

Released by Western Newspaper Union.

IT'S hard to write about Signe Hasso because only superlatives should be used, and there's so much to say. Very beautiful, talented and intelligent, the young Swedish dramatic star is famous on the Scandinavian stage and in England. She put in her year of waiting here for her quota number, so that she could act, by writing for Swedish newspapers; even covered the President's press conferences. She's a superb actress,

SIGNE HASSO

beautifully trained. You'll get just a small sample of her work in Metro's thrilling "Assignment in Brittany"; she stands out in a cast including such experts as Margaret Wycherly, Richard Whorf, John Emery and George Coulouris.

Christine Gordon, making her American debut in "I Walked With a Zombie," plays the zombie, the longest role in this RKO film. In Czechoslovakia Miss Gordon was well known on the stage, screen and radio—in this picture she doesn't speak a word!

Carlton Morse, whose "One Man's Family" has been a ten-year favorite on the air, is finally making a screen treatment of it for United Artists. What with still doing the famous radio serial and having his "I Love a Mystery" broadcast again, he's fairly busy.

There's an ambitious plan under way to open United Artists' "Stage Door Canteen" on all fighting fronts simultaneously—practically all over the world, as well as on ships at sea. The event will be brought to the American public by radio; the famous folk of the show world who appear in the picture will participate, and there'll be conversations between them and the men of the armed forces.

Lum and Abner, who must deliver their fourth picture to RKO by June 1, are still searching frantically for just the right story. Meantime, their second film, "Bashful Bachelor," still makes money; the third, "Two Weeks to Live," is just out.

At the request of King Haakon of Norway, the English offices of Warner Bros. have asked that a print of "Edge of Darkness" be sent over immediately for a special showing; the print was rushed to Lisbon by Clipper, then to London. Starring Ann Sheridan and Errol Flynn, with a cast including Walter Huston, Judith Anderson, Ruth Gordon and Morris Carnovsky, it tells the story of the revolt of a Norwegian village against the Nazi invaders; it's a picture fit for a king, showing the spirit of his native land.

"Ladies in Gray," a story of the American women who are working in government hospitals to help rehabilitate the wounded, will be produced by Metro with the co-operation of the war department and the Red Cross.

For the first time in eight years Adolphe Menjou and his wife, Veree Teasdale, will appear together in a picture; they'll be seen in "Hi Diddle Diddle" as a husband-wife team, and are planning to continue as a starring partnership.

Ann Shirley and Walter Reed, who took screen tests together when they were 13, for child parts in a Brian Foy picture, have the romantic leads in "Bombardier." He didn't immediately recognize her when they met at the RKO studio; in the days when they made those tests together she was known as "Dawn O'Day"—the kind of name that always used to be inflicted on child actresses.

ODDS AND ENDS—Gloria Blondell, sister of Joan, is carrying a career for herself, very successfully, in "I Love a Mystery" . . . Victor Borge's doing fine; after appearing in "Broadway Melody of 1943," he'll appear in a picture with Hedy Lamarr, as her leading man . . . Pierre Aumont, making his starring debut here as leading man in "Assignment in Brittany," looks like just what's needed in Hollywood, where good leading men are scarcer than hen's teeth right now . . . To date, Ralph Edwards' "Truth or Consequences" broadcasts from various cities have been complete sellouts; he hopes to sell \$20,000,000 worth of war bonds on his present tour.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

By HAROLD L. LUNDQUIST, D. D. Of The Moody Bible Institute, Chicago. (Released by Western Newspaper Union.)

Lesson for April 25

Lesson subjects and Scripture texts selected and copyrighted by International Council of Religious Education, used by permission.

THE RISEN LORD

LESSON TEXT—John 20 1-17. GOLDEN TEXT—He is risen.—Mark 16 6.

"Christ is living! My people shall know it. I shall preach about it again and again until they believe as I do." So exclaimed Dr. Dale of London when the glory of Christ's resurrection laid hold of him as never before. There began that day the custom of singing an Easter hymn in his church every Sunday morning.

Easter has come again, and it ought to make us glad to recall the resurrection power of Christianity in the midst of the world's awful sorrow and death. Easter should mean more to us than ever this year, if we believe in Christ. If we do not, why not rid ourselves of the dark garments of unbelief, and put on the bright and beautiful garment of faith in a living Christ. Let us be clad in His righteousness.

The first Easter Sunday had scarcely dawned when the faithful Mary came to the tomb. Finding the stone rolled away from its entrance she ran to find Peter and John. What they came and saw, and what—or rather who—she remained and saw, make up our interesting lesson.

I. Peter and John Saw the Empty Tomb (vv. 1-10).

Peter, though he had denied his Lord, was not sent away by his brethren. They knew his true heart, and evidently the gentle and loving John had taken him to his home. Mary knew where to find him. What a tender incidental indication of the Christian spirit of the brethren of Peter.

John and Peter ran to the tomb. The unusual news so stirred them that John the younger did not think to await the slower steps of Peter. He came first, but when he did he only looked in. Peter had no hesitation, but went right in. What he found there was most significant.

Here was twofold evidence that the body of our Lord had not been stolen. The burial clothes were there. They had not been carried off by a thief. Nor had they been snatched aside by a deceiver. They lay in order. There off to one side, carefully folded, was the head covering. Jesus was gone, but He had left in all the dignity and majesty of a triumphant Lord.

What they saw caused John to believe. It appears (v. 9) that they had not yet understood the clear teachings of the Old Testament regarding the death and resurrection of Christ. They were slow to believe. Let not any in our day, with its greater light, fail to believe.

Peter and John came and saw—and then "they went away again unto their own home." And so they missed seeing Christ Himself.

II. Mary Met the Risen Christ (vv. 11-17).

The tears of Mary were the genuine expression of a devoted heart, but they were nevertheless mistaken tears. The question of the angel reveals that fact. Why weep because His body was gone, when that was the very thing which should give her joy? Why weep over a dead Christ when He was alive?

How often our discernment is dimmed by tears and our judgment warped by sorrow. We look on the wrong side of our circumstances and see only a tangle of threads and blurred colors. On the other side God is weaving a pattern of beauty and blessing, which will be our joy through all eternity. Why not remember that now?

Blinded with tears and troubled in heart, Mary did not even recognize the Lord when He spoke to her. But our Lord looking into her soul and knowing that it was her very love for Him which made it hard for her to think of anything but His death, gave to this true-hearted woman the privilege of first seeing Him after His resurrection.

As He spoke her name, she knew Him. We recall that Jesus Himself had said that He was the Good Shepherd who "callesth his own sheep by name" (John 10:3-14).

He knows your name and mine, fellow Christian, and one day we too shall hear His voice even as Mary did on that day. She believed and worshiped. Let us follow her example this Easter day.

There is a danger that the observance of Easter may lose its real significance in the empty incidents which the world would have us believe make the day. It is a holiday. There is thought of new clothes, of formal church attendance, of family gatherings, of flowers and feasting. They are all right in their proper place. But let us be sure that no adult fails to meet the risen Christ today, and let us be sure that the smallest child knows that this is more than the day of bunnies and candy eggs. They will rejoice in the knowledge that a victorious Christ lives to give them eternal life.

Let us really "keep the feast" this year, purging out the leaven of hypocrisy and dead works, and remembering Christ (see I Cor. 5:7, 8).

New Tea Towels Add Gayety to the Kitchen

ANIMATED cutlery, dishes, glassware, pots and pans bring their infectious gaiety to a new set of tea towels. They offer a mixing bowl parade, a knife, fork and spoon dash, the soup spoon dance, and four more equally interesting tea towel designs, with a trio of teaspoons as motif for a matching panholder. Outline embroidery does the set in a jiffy—it could even be done in running stitch.

No. 23505, 15 cents. Is a hot iron transfer of the eight motifs—the kind of transfer which may be stamped several times. Send your order to:

Do you know the new regulations on packages sent to men in the service? Here they are: You can send packages to soldiers anywhere in the U. S., although there are now Post Office restrictions on packages to overseas Army men; and you can send packages to men in the Navy, Coast Guard, and Marines, wherever they are. And when you send that package from home, remember—the gift men in the service always appreciate is cigarettes. And the favorite with men in the Army, Navy, Coast Guard, and Marines is Camel (based on actual sales records in Post Exchanges and Canteens). So stop in at your local dealer today—and mail him a carton of Camels.—Adv.

SNAPPY FACTS ABOUT RUBBER

War workers cars are being checked in company parking lots by at least one manufacturer to make certain that tires are kept in serviceable condition. If the worker fails to have his tires re-capped in time he is denied further application either for tires or repairs.

It takes three to eleven times normal distance to stop on snow or ice without tire chains, and you can't negotiate slippery hills with bare tires that spin on packed snow, waste gas and wear tires.

Each taper on a rubber plantation is responsible for about 300 trees, which in one day's tapping will net an average of 50 pounds of latex, equal to about 17 pounds of dry rubber.

Automotive conservation authorities in New Hampshire boast of the reduction of that state's tire needs by 57 per cent as an example of what can be done in saving rubber now on motor vehicles.

which has jurisdiction over 66 Iowa counties. No definite ration allotments can be made until further instructions are received from Washington headquarters. OPA officials said.

Last year Iowans received an average of 14 pounds of canning sugar per person, while the fruit canning average was 58 quarts as compared to the national average of 36 quarts. Iowa ranked among the first five states in the 1942 sugar allotment for canning purposes. OPA officials said they expect an even greater demand for canning sugar this year because of the rationing of processed fruits.

THANKS, MRS. BLOOM!

Red Cross material travels a long way. Klemme Red Cross ladies were pleased to receive a box of assorted buttons from Mrs. Bloom who sent them from Los Angeles with Wm. Stille when he returned to Klemme. The ladies here were pleased to think that Mrs. Bloom still remembers her old home town.

SAFETY COUNCIL DISTRIBUTES BOOKS TO SCHOOLS

The Hancock County Safety Council presented ninety-five copies of "Man and the Motor Car" to the sub-district schools in the county. The book contains 296 pages and treats such topics as Nation on Wheels, The Car, Rules of the Road, The Pedestrian, The Bicyclist, Accidents and many others.

The book is edited by Albert W. Whitney and published by the State of Iowa Department of Public Safety cooperating with the Department of Public Instruction.

The books were distributed thru the office of the County Superintendent each teacher receiving her copy at a teachers meeting held last week.

Hog cholera flared up in many parts of Iowa last year. Farmers can't afford to take a chance of getting it this year. They should vac-

Mrs. C. A. Larsen and Clarence, Jr. went to Garden City, Minnesota Saturday to see Albert Yahke who has been ill, but is now better. They returned home Sunday evening.

Word has been received in Klemme of the death of Linn Drake of Iowa Falls, whose funeral was held Sunday. Mr. Drake was foreman on the Rock Island section here a few years ago.

Mr. and Mrs. H. D. Ramsay and children, Larry and Carmen, drove to Marble Rock Sunday and were dinner guests at the home of Mr. and Mrs. H. G. Ramsay, parents of H. D. Ramsay.

A garage at the residence of Mrs. Edna Thada has recently been completed. The garage is attached to the east side of her house. Some improvements were also made inside the house.

Mr. and Mrs. R. A. Jorgensen drove to Des Moines Thursday evening for a visit at the W. Henry Galbreth home and to attend the Iowa Press Association Convention Friday and Saturday.

Mr. and Mrs. Peter Wilson entertained to dinner Sunday evening Dr. and Mrs. W. F. Missman, Mr. and Mrs. C. G. Waterman and Mr. and Mrs. R. A. Jorgensen. After dinner Court Whist was played and high scores were won by Mrs. R. A. Jorgensen and C. G. Waterman.

Mr. and Mrs. Lester Stille entertained to dinner Sunday in honor of Keith Stille, of the U. S. Navy, his mother, Mrs. Blanche Frederick, Grandma Kinton, Mr. and Mrs. Lee Anderson of Charles City, Miss Ruth Stille of Des Moines. In the afternoon the following came for a visit: Betty Hartzel and Emil Christensen of Iowa City, Francis and Margie Hartzel of Britt.

SERVICES HELD MONDAY FOR FORMER KLEMM MAN

George Weiland, 78, Former Hotel Proprietor in Klemme

Funeral services for George Weiland, 78, of Cedar Rapids, were held at the Klemme Methodist Church Monday afternoon with Rev. H. E. Harvey delivering the funeral sermon. Arrangements were in charge of the Wellemeyer Funeral Service and interment was made at the Ell Township Cemetery near Klemme.

Mr. Weiland was born in Germany and came to America when 16 years old and has lived in Iowa since.

At the age of 25 he was united in marriage to Miss Effie Blank, at Belmond, Iowa. Two children were born to this union: John H. who died in 1918, and Mrs. Gertrude Miner of Cedar Rapids, who survives, and also four grandchildren.

Mr. Weiland farmed for a number of years, worked for the railroad for 23 years and was proprietor of the Klemme Hotel for about 5 years. The past five years he has been living with his daughter at Cedar Rapids.

THE 2ND WAR LOAN DRIVE IS ON!

Come on,
Let's WIN this war!

If we should lose the war, life would not be worth living.

"But we won't lose it," you may say.

Listen, brother—in this world nothing's sure, unless you make it so.

This month it's up to us here at home to do our part, and then some, to make Victory surer—and quicker! To do it, we've got to lend Uncle Sam 13 billion extra dollars.

It isn't easy—but war isn't easy and Victory isn't cheap. It takes money—and more money—to buy planes, ships, tanks, guns and a million other things our boys must have to deliver that final, paralyzing knock-out punch.

And it's a whole lot easier for us at home to lend our money than for our boys to fight through the hardships and dangers of deserts, swamps, jungles, ice-fields and sub-infested seas!

There are 7 different types of U. S. Government securities—choose the ones best suited for you!

THEY GIVE THEIR LIVES... YOU LEND YOUR MONEY

PFC. UTTERBACK WANTS TO HUNT PHEASANTS HERE

Mr and Mrs Emil Beier of Liberty township received the following letter Tuesday from Wm Utterback, who worked at the Beier farm for about five years. He is thought to be in Australia.

Dear Mr and Mrs Beier
Received your most welcome V letter during the past week and hope this note finds you both improved. It is sure fine you can have Byrnes to give you a hand.

Sure was a surprise to hear Loren and Ruth were married. However, it has been quite awhile since I've been up to see you and have lost tract of the old bunch around Liberty. I guess I am surprised every time I hear of the young folks there.

Will be glad to change to a higher altitude and get up to your place and get a pheasant after the war.

Yours, Bill

Editor's Note Because of War Regulations we cannot print Bill's address.

Domestic rabbits are getting considerable attention now as a source of producing meat in towns and in cities.

GOES TO MEXICAN BORDER

LT. RAY A JORGENSEN, JR.

First Lt Ray A. Jorgenson, Jr., called his parents. Mr and Mrs R. A. Jorgenson Thursday night to inform them that he was being transferred from Lubbock, Texas in the Panhandle to Del Rio, Texas on the Rio Grande River on the Mexican border. The transfer comes as a promotion in his work in the U S Air Forces.

Lt. Jorgenson has been instructing pilots on twin motored bomber training ships at Lubbock for nearly a year.

At Del Rio he will instruct pilots on the Martin B-26, heaviest of the medium bombers. The B-26 is said to be the fastest medium bomber in the world. It is powered by two 1,800 horsepower motors and has great bomb-carrying capacity. It carries a crew of five and is protected by guns in top, tail and front turrets.

For the time being Mrs Jorgenson is staying with her parents, Mr and Mrs. N. A. Vaughter at Amherst, Texas, until Lt. Jorgenson can find living quarters at Del Rio.

A Tribute to Our Children

TO PUBLISH PICTURES OF LOCAL CHILDREN

Pictures of the children of this city and surrounding community are to be printed in this paper as a special tribute to our young citizens. Tomorrow the responsibility of guiding the destinies of the world will be placed upon their shoulders. All are invited and urged to participate in this featured event. Among our children are those destined to fame and fortune, so let's not omit any of them!

Every parent should cooperate to make this a colorful and inspiring exhibit. You can cut out and keep these pictures of every youngster in the community. They will always be treasured keepsakes and cherished memory records that could not be acquired in any other way.

You are all guests of ours, and all photographs will be taken free of charge.

We have made arrangements with the Woltz Studios, nationally known portrait photographers, to come and take the pictures right here in town. You do not have to order photographs, subscribe to, or be a subscriber to this newspaper, to have your pictures taken and run in this featured event. All that is necessary is that the children be brought by their parents to the photographer on the date and at the location mentioned below. Proofs of all poses will be submitted to the parents, and cuts of approved poses will be prepared, identified, written up, and printed in this paper.

The Studio will also take pictures of adults and family groups, and submit proofs without charge, but these pictures will not be published in the paper.

If photographs are wanted for yourself it will be necessary to arrange for them direct with the Studio when proofs are submitted for examination because they cannot be obtained through this paper.

Remember, all children must be accompanied by parents or guardians.

HERE IS THE TIME AND PLACE TO HAVE YOUR PICTURE TAKEN FREE OF CHARGE.

One Day Only

WEDNESDAY, MAY 5, 1943

Klemme Community Hall 12:00 Noon to 8:00 p. m.

BUSINESS PLACES CLOSE AT NOON FRIDAY FOR SCRAP DRIVE

At a meeting of the Civic Club held Tuesday night to plan for the county-wide scrap drive on Friday of this week, it was voted to close all business places at noon and all businessmen to go all out to make the drive a success.

This is in line with what other towns in the county are doing to help put over the scrap drive.

It is urged that those who have scrap please donate it, the money to be used in War Work Trucks and help is donated, why not donate your scrap and help along a good cause?

MANY SERVICE MEN HOME ON FURLOUGH LAST WEEK

It was good to see so many former Klemme young men on the street last week, young men in uniform home for a few days furlough for a visit with home folks. The following young men in the service were home last week. Keith Stille, La Rayne Stille, Lt Harold Kothenbeutel, Fred Soback, Francis Pearson, Bob Schneider, Homer Schonenwetter, and Franklin Kluckhohn.

HELLO, FOLKS!

Mr and Mrs Elmer Schneider, who live 6 1/2 miles east of Klemme were grandpa and grandma twice on the same day! The reason for this unusual honor was because their son-in-law and daughter, Mr and Mrs Dale Schreiber of Omaha, Nebraska were the parents of twins, a boy and a girl, born to them at an Omaha hospital Thursday morning, April 22nd.

The twins have been named Doris Virginia and Dale Jay.

Grandpa Schneider was heard whistling a popular tune which we translated: "Praise the Lord and pass ME the cigars!"

Carlsbad Caverns Has Room Over Half Mile In Length

MISS FRIEDA SCHULDT TELLS OF WONDERS SEEN ON RECENT TRIP

Klemme Lady Has Returned From Trip Through Southwest And California

(By Miss Frieda Schuldt)

I will try to tell you of a few of the interesting sights I have seen since I left Klemme.

At this moment, in Arizona, we are passing through a real Iowa blizzard. It has been snowing for several hours. We are on the Scout, a train on the Santa Fe with fourteen cars and the two steam engines are puffing and snorting, pulling us through the canyons and up the steep grade towards Williams, Arizona, and the Grand Canyon country. The small pines and grasses on the hillsides are covered with snow. It's a great change from the orange trees and vineyards, the yuccas and desert flowers of a few hours ago.

Leaving Klemme I came to El Paso, Texas, via Kansas City. The great plains of Kansas and Texas were still bare and brown except for the fine green fields of winter wheat. No field work was being done at that time, April 1st.

From El Paso I took the Carlsbad bus for White City, New Mexico, arriving at the Caverns about noon. For the benefit of your readers I will try to tell them about a few of the interesting things as I saw them and as they were told to me by the guides.

After reaching the entrance, we took the elevator down a 700-foot shaft to the dining room of the caverns and here an earlier party of about 100 persons were waiting.

After eating our lunch, which was served to us there we started on our long trip of 7 miles. The going is slow, but not tiresome, as the paths are smooth and wide.

This cave was discovered in 1901 by a cowboy named Jim White who was riding herd and was attracted by the millions of bats that fly out of the cave at dusk. He climbed up the rocky hill and was amazed to see a large opening, which later was explored by him.

So far three distinct levels have been explored, but only the upper level is open to the public. These immense rooms have been hollowed out by water millions of years ago, forming fantastic shapes in the beautifully colored rocks.

One of the rooms measures over 4,000 feet long, 600 feet wide with the ceiling 350 feet above. Some of the rooms are smaller, but all are very large.

Many of the stone figures look like totem poles, some like snow-covered Christmas trees, crumbly-looking figures like pop-corn, others are beautiful crystals and here and there are clear pools of water. From the ceilings hang great stone chandeliers, white crystals that resemble icicles, great sheets of transparent, lace-like rock that looks like beautiful drapes.

One of the wonders of the cave is a "live" stalagmite, estimated by geologists to be sixty-millions of years old, and still forming at the rate of one cubic inch each 100 years. This formation is wet, as water is dripping onto it from a stalactite in the ceiling above.

In the so-called "chapel" in the cave, an impressive service is held near a pipe-organ-like stalagmite, estimated to be the oldest formation in the world. Lights are turned out for a few moments and as voices in the distance sing "Rock of Ages," the lights are turned up very slowly, giving one the feeling that day is breaking after a night of absolute blackness.

The last two miles of the trip is the hardest as it is a climb of 800 feet. Those who wish, may take an elevator to the surface. I chose to walk and saw many more beautiful sights.

My next stop was with Mr. and Mrs. Clarence Harbough. (The latter being the former Esther Bloom.) They live on a 24-acre ranch in a valley near the Salton Sea. Here the temperature was 104 degrees, but the night was cool. In this valley are grown alfalfa, dates, orange

es and vegetables. The valley is surrounded by the Santa Rosa and San Bernadine mountain range.

We drove out to the desert park and saw the many beautiful flowers and desert plants that were in bloom. It is a beautiful sight as the flowers seem to blend in with the colors of the sands and the mountains in the distance.

In Los Angeles I visited with the Henry Schuldt family and the Blooms. Trips to the beautiful parks in the vicinity was greatly enjoyed. There are many places of interest to visit, such as the Forest Lawn Cemetery at Glendale where one sees the Moseleum where the dead are laid to rest in marble crypts. Here stand three romantic and historic old world churches: The Little Church of the Flowers, The Church of the Reformation and the Wee Kirk O' the Heather.

These little churches are open to the public when no services are in progress.

Leaving again we drove through a cold rain to San Bernadina, a distance of some sixty miles. The scenery was very beautiful in the valley. Large vineyards stretched out for many miles. There were orange groves, the trees laden with golden fruit and fragrant white blossoms. The hills are beautifully green with wild oats. We passed the Kellogg Ranch, famous for its fine hores. More beautiful flowers, roses, wisteria and other flowers in bloom everywhere we looked.

We then reached the nice home of Mr and Mrs Godfrey Greene. (Mrs. Greene is the former Hulda Johnson, Klemme.) Here we spent a very enjoyable afternoon and evening. Their home is just a few miles from Lake Arrowhead, resort hotel.

Back on the train and passing through the great plains of Texas. Just passed a great herd of Hereford cattle. The fields seem bare and brown. I understand it has been dry through these parts.

A few miles back while the train was traveling 75 miles per hour we felt a jerk and the train came to a stop. The engine had struck a car on a crossing and a young man was instantly killed. The door of the car hung on the engine of the train while other parts were strewn along the tracks.

Next stop is Kansas City. Our train is carrying 600 passengers and is late (all trains run late these days.) From there I will take a train for Mason City and good old Iowa, with its prosperous-looking farm homes and snow covered fields.

Sincerely,
Frieda Schuldt.

TO TAKE SPECIAL COURSE

MISS HAZEL GRIMES

In order that Hancock County Homemakers may have the latest information available on canning equipment, supplies and methods, Miss Hazel Grimes, extension home economist from this county will go to Mason City April 29 for an all-day refresher course. Following the meeting she will be available for food preservation demonstrations in this county.

Chicken and Rice—Fine Favorite for Easter
(See Recipes Below)

Easter Essentials

How differently you will plan your Easter dinner this year! You may forget many of the traditional foods and use only what your points will allow you—or what you can obtain at the grocer's. Many of you in former times had ham or leg of lamb, but perhaps this year it may be chicken, or whatever ration points will allow. So, get out your ration points and put on your thinking caps, ladies, and see what we can have to eat this dinner a success.

Markets throughout the country have different meats available for selection. A lot will depend on how well you have saved your ration points on this occasion. You plan chicken, stretch it with what we do in this recipe:

***Fricassee of Chicken.**
(Serves 6 to 8)

4-pound chicken
1 cup flour
3 tablespoons chicken fat
2 teaspoons salt
Paprika
3½ cups boiling water
Freshly boiled rice
Lean chicken and cut into serving pieces. Dredge with flour and fry in fat. Add seasonings and simmer water to half cover. Simmer, closely covered, until tender, about 1½ to 3 hours. If desired, serve in oven to brown slightly after rice, and serve with boiled rice.

Some of you perhaps be unable to obtain lamb. If cannot obtain leg of lamb, a tender cut will suffice to serve this barbecue sauce:

Lamb Shoulder, Barbecued.
4 pounds shoulder of lamb
1 medium onion
½ cup chili sauce
1 teaspoon salt
½ teaspoon pepper
Dash of cayenne
1 tablespoon vinegar
1 cup water
Mix onion, chili sauce, seasonings and vinegar and water. Pour over lamb which has been wiped with a dry cloth and place in pan with tightly fitting cover. Cover. Bake at 350 degrees for 3½ hours.

***Orange and Greens Salad.**
(Serves 8)
Cups coarsely shredded greens (lettuce, endive, watercress)
Cup sliced, stuffed green olives
Cup diced orange sections
Cup chopped green pepper
Cup salad oil
2 tablespoons lemon juice
1 teaspoon salt
1 teaspoon celery seed
1 teaspoon Worcestershire sauce
Combine salad greens with oranges, olives, green pepper. Mix with oil, lemon juice and seasonings. Just before serving toss lightly together, mixing well together.

Lynn Says:

How to Save Ration Points: If you old recipes call for tomato sauce, tomato soup and other canned tomatoes, substitute tomato gravy. In most cases, it will work quite well. Substitute fresh fruits for canned and dried fruits in desserts and buy heavily of citrus fruits. Serve them sectioned or sliced. Use seasonal fruits generously, as applesauce and rhubarb. Store any excess water from cooked vegetables, and have it well covered when stored. Use soups, gravies and stews. When cookie recipes call for dried fruits, omit them or use them sparingly. Omit chili sauce, catsup and brown chow from menus. Use them for seasoning foods such as meat when cooking or for sandwiches when necessary.

JUST GLOBAL
The scene is any home of the post-war period, if the global mood goes on unchecked and aviation continues to develop by leaps and bounds.

Father—Where is everybody, dear? The house seems so quiet in the last hours.

Mother—Oh, nothing special. I hadn't noticed it.

Father—But all the kids—where are they all of a sudden? They were here a moment ago.

Mother—Oh, the children! They're just running around the neighborhood between now and lunch.

Father—Where's Junior?

Mother—Junior went out just a minute ago—to Moscow, I think, he said, someplace like that.

Father—He went to Moscow yesterday.

Mother—But it's all right if he goes again today, isn't it?

Father—I don't like him going there every day, you know. Where's Alecia?

Mother (nonchalantly)—She put on her hat and coat, so I guess she ran over to Brazil or Dakar. I think she said something about Dakar—but one never knows. She's so restless.

.....

Father—Where's Walter? I just saw him in the yard.

Mother—Walter had an hour or so on his hands and he took a run over to see that Stevens girl in Asia.

Father—What Stevens girl in Asia?

Mother—The Burma Road one, I think.

Father—She's quite a nice girl.

Mother—Oh, did you meet her?

Father—Of course. Don't you remember she was at that dinner we went to night before last in Fuchow?

Mother—What a bore that party was. I wish we had gone to the other one.

Father—What other one?

Mother—We were invited to bridge with the Biffels in Sebastopol the same night. If I'm going out for a whole evening I like Sebastopol.

.....

Father—Where's Jennie?

Mother—You know very well where Jennie goes every day.

Father—Where?

Mother—To school, of course.

Father—What school now?

Mother—Mrs. Crumpsell's Academy in Madagascar.

Father—I thought she was at Mrs. Bertinn's school in Zanzibar.

Mother—No, we took her out of that. She hated being so close to home.

Father—Where's the baby?

Mother—You still call Millicent the baby—she's almost five years old now.

Father—Where is she? I haven't seen her since breakfast.

Mother—The two little children next door came over and wanted to take her some place to play.

Father—Where did they go?

Haven't we got a big yard?

Mother—Oh, Chidey, you're so old-fashioned and provincial.

Father—Where did they go?

Mother—I'm not sure. The Collins child wanted to go to some park in India; the Adams girl preferred French Morocco. They'll be back presently!

(Blackout as pop collapses.)

.....

WAR IS WAR!

Attempts to link up the global war with various merchandise is getting more and more amusing. We saw one that made us dizzy the other day: a dress house proclaiming the "Four Freedoms Models." There was the Freedom of Religion, the Freedom From Want, the Freedom From Fear and the Freedom of Speech models.

.....

We were intrigued by the "Freedom From Fear" frock; asymmetric lines in a deep throated neckline and graceful draped skirt with multi-colored background.

And the "Freedom of Religion" wasn't bad. "A button down the front dress with a pull-through bow at the neckline. In all colors," the ad said.

And then there's the "Freedom Red Lipstick" believe it or not.

.....

There's a terrible oversight in the new OPA meat chart. No point value is fixed for butchers' thumbs.

.....

Coming complaint: "I'm so hungry I could eat a chart!"

.....

Ima Dodo asks, "If I ask for meat and get it do I yell 'Bingo!'"

.....

Query from any husband: "Do you think points grow on trees?"

.....

"Mrs. Roosevelt will then attend a Conference To End Discrimination, to which admission will be by invitation only."—New Haven Journal-Courier.

Oh, well, maybe just a little discrimination.

.....

SELF-PRESERVATION

My strong box once held deeds and cash;

With jewels it was a clutter;

Today it guards, instead of trash,

My share of meat and butter.

Pier.

Deceptive, Smart.

POUNDS thinner and inches taller—that's what this smart frock will make you look. It was thought up by a top-flight designer who wanted her style to be as deceptive as it was smart! Just look at all the good points—the crisp white vestee, the beautiful handling of the bodice, the slimming skirt and the attractive belt.

Pattern No. 8364 is in sizes 36, 38, 40, 42, 44, 46, 48, 50 and 52. Size 38 takes with ¾ sleeves, 4½ yards 39-inch material. ¾ yard for contrasting vestee.

ASK ME ANOTHER? A quiz with answers offering information on various subjects

Questions

1. What is the chemical symbol for silver?

2. Who defeated Horace Greeley when he ran for President on the Liberal Republican and Democratic tickets?

3. What is the approximate weight of a gallon of water?

4. A person with hyperopia is said to be what?

5. The science of matter and motion is called what?

6. What is the approximate width of the Strait of Gibraltar at its narrowest point?

7. Starting at the equator, how long does it take the sun to rotate on its axis?

8. What army award for gallantry was originated by George Washington, and is being given to U. S. soldiers in this war?

9. When did famous men first appear on our coins?

10. Approximately how many pounds of food does the average American soldier eat daily?

Answers

1. Silver's chemical symbol is ag.

2. Grant.

3. Eight pounds.

4. Far-sighted.

5. Physics.

6. Eight and one-half miles.

MUSIC NEWS
By Patricia Kudje

The Girls Sextette is working on some pieces for the Junior-Senior banquet

SENIOR CLASS NEWS
Ardella Nelson, Reporter

The American Literature class is enjoying reading Zona Gale's one-act play, "The Neighbours". The students take turns reading the different parts.

We are studying Light in Physics class. Is everything we see really upside-down? But then who wants to argue about it?

Now that the play is over, maybe some of the Seniors can get more sleep. We hope so, anyway.

By the way, working on the play is a good excuse for skipping class, isn't it?

JUNIOR CLASS NEWS
Larry Van Syoc, Reporter

Allen Lau and Mavis Neuhing each had a chance to teach American Government for a day this week. Both gave us unwelcome tests. Mr. Patterson also favored us with a test Wednesday.

The Typing Class is working hard on their paper. If this one is successful, we will probably put out two more.

Final plans for our banquet are being completed. We voted not to have a dance after the banquet.

We are reading short stories in English Literature. Many of these are interesting and we enjoy reading them.

SOPHOMORE NEWS
Patricia Kudje, Reporter

We are reviewing for our semester tests in World History. Mr. Gregory has given us a set of about seventy questions which we have discussed in turn.

We are now reading "As You Like It" by Shakespeare. We also started "Quentin Dunward," but it was quite dry.

In Algebra we are doing fractional equations containing decimal and literal equations. We work at the board each day.

We have read two chapters this week in Biology, "The Beginning and The End," and "The Regulatory Mechanisms." Miss Erdahl has a chart showing the different stages a person goes through. Some of us are in the 1-3 age group, or at least seem to be.

FRESHMAN CLASS NEWS
Elwyn Etchen, Reporter

The Algebra Class is studying subtraction and addition of fractions. We find it very difficult.

In English we are acting out the play of Caesar. We find it very interesting.

The Science class had a test on Thursday, which was different. It was the study of the body and its parts.

The Manual Training boys are making many items, which requires skill.

The Home Economics girls are sewing. They are improving very rapidly.

Grade News

SEVENTH AND EIGHTH GRADE NEWS
Clara Smith, Teacher
Helen Pringnitz, Reporter

Three pupils who were ill have returned to school again.

The Seventh Grade in Arithmetic are studying areas of figures.

We have finished our work sheets in Civics.

Mrs. Smith has finished the book "Treasure Hunt of the S-18" which she was reading to us.

Spelling Honor Roll

Perfect Spelling scores were won by Edward G., Betty, Roger, Bob, Billy, Irene, Ruth, Shirley, Helen Suckow and Darwin.

FIFTH AND SIXTH GRADE NEWS
Esther Bolles, Teacher
Iris And Isabelle, Reporters

We have had an English test in

both grades this week, and we are studying for Geography tests.

In Art we made more eggs for our Easter Egg tree. This week we used material to make hats and collars, and cotton and yarn for hair.

Larry and Marjorie are back in school, but now Merlin is ill.

Mrs. Patterson treated us Thursday by reading the last half hour, while we ate candy Easter Eggs which she brought for us.

THIRD AND FOURTH GRADE NEWS
Evelyn Guelff, Teacher

Delores Karsjens celebrated her tenth birthday Monday, April 19th. She treated us to candy Easter eggs.

Mrs. Levi Ridder visited our room Wednesday afternoon. She took pictures of us during recess.

We have made Easter things for Art this week.

We are reading "Freddy, the Detective," now.

Spelling Honor Roll

The following received 100 percent in Spelling this week:

Harley, La Nelle, Audra, Sondra, Richard, Darlene, Norene, Beverly, Delores, Jo Ann, Ruth, Lucille, Delores T. Maralee and Maxine.

PRIMARY ROOM NEWS
Virgie Hardcopf, Teacher

In Science the First Grade is studying the seasons and the signs of Spring. The Kindergarten has been learning Nursery Rhymes.

Richard Baack was 8 years old Friday. On Thursday he treated us to candy Easter eggs.

Carole Bridges visited in our room Wednesday afternoon.

We each made an Easter basket and set it out for the Easter Bunny.

The Kindergarten wrote to the Easter Bunny and asked him to bring us some Easter eggs. We found our baskets Thursday in the Home Economics Room.

We bought \$7.85 worth of War Stamps this week.

Spelling Honor Roll

Denny, Lois Ann, Roger, Tommy, Janice, Gary Beck, Ronald, and Bonnie.

BETTER IOWA GARDENS

(A special column prepared for The Klemme Times by Iowa State College Specialists)

It's not too late to set out plants of cabbage and broccoli, particularly in the north half of Iowa. Good, stocky plants should be set out rather than spindly ones. It is important that vegetable plants be transplanted with a considerable amount of soil around their roots. The transplanting operation is a shock to plants. The tiny root hairs responsible for taking in water and mineral nutrition are usually destroyed in large numbers in the operation of transplanting. It takes a while for new root hairs to form. This points out the importance of setting plants with soil around their roots to avoid loss of as few root hairs as possible. There is less setback in pot-grown vegetable plants than those grown in plots.

* * *

A fairly large hole should be dug to receive the vegetable plant. The plants generally vary some in size and the depth for setting each plant can be secured easily by filling the hole with soil to the correct level. The soil should be firmed well around the plant, then watered.

* * *

Wind is especially hard on newly set vegetable plants. The sun also may hurt them. It pays to protect newly set plants from sun and the wind for a number of days by the means of crates, baskets or several shingles placed over each plant. Vegetable plants should be set in the evening.

* * *

Celery cabbage and turnip are two vegetables that should be planted after July 15 for good results. Spring planting of these vegetables has not proved desirable.

* * *

The technique of making successive sowings of vegetables adapted for such procedure must be kept in mind by gardeners all through the season. It is an important method of avoiding having too many vegetables at one time. Peas are not particularly adapted for successive plantings. Spread in maturity may be had by use of early and midseason varieties. Late varieties are not adapted for Iowa. Several sowings of lettuce and radishes can be made up until about May 10 or 15. Snap beans and sweet corn are particularly adapted for successive sowings at about 15 day intervals up until July 15. Small frequent sowings rather than one large sowing make harvesting and conservation of garden products much easier. May 1 in southern Iowa and May 15 in northern Iowa is the time to start making the first sowing of bush beans and sweet corn.

* * *

It is still not too late to prune small fruits and tree fruits. However, this should be done as soon as you can find time now.

Babies Baptized At Methodist Church Easter Morning

Three babies were baptized Sunday morning at the Klemme Methodist Church by Rev. Herschel E. Harvey, pastor. They were:

Ava Mae, daughter of Mr. and Mrs. Wilson Sandry.

Marcelle Mae, daughter of Mr. and Mrs. Walter Bachman.

Joan Marie, daughter of Mr. and Mrs. Dwight Helps.

Once Poor Wastelands Now Yield Profitable Products; Use Farm Crops in Plastics

Chemurgy Opens Industry to Agriculture; Urge Production of Many New Plants.

"The proportion of usable wealth to be derived from an acre's production is becoming larger. Chemurgy has meant maximum utilization of maximum production. It has insisted that ways be found to use the high as well as the low values of the harvest—the stalk as well as the grain, the shell as well as the kernel, the weed as well as the crop."

With those words, Wheeler McMillen, president of the National Farm Chemurgic Council, describes the revolutionary effect chemurgy promises to have on agriculture. With a national purchasing power to support the new products of this industry, farmers will not only be obtaining additional income from standard crops, but they will derive revenue from the use of the vast sub-marginal lands now lying waste.

Dandelions, milkweeds and cat-tails—all of these, and many more, were once considered the useless and even pestiferous embroidery of the lonely plains. But today they have been proven to have real commercial value.

Although American experiments with the dandelion have not been as extensive as those in Russia, efforts are being made here to convert the latex of this colorful little plant into rubber. In this field, we were concerned with the guayule shrub, and although the project later was abandoned because of the steady flow of natural rubber from the Indies, it has now been revived in the sandy Southwest.

But if we have lagged in our development of the dandelion, not so with the milkweed or the cattails.

Milkweed Yields Fiber

According to Dr. Boris Berkman, milkweed produces two fibers. A pioneer in milkweed development, Dr. Berkman says one fiber is tubular with an air chamber. It is 58 per cent alpha cellulose, 20 per cent lignin and is covered with a vegetable wax of a high melting point. This fiber is found in the pod.

Known as milkweed floss, the fiber is buoyant, has a high insulation value and promises to be valuable for soundproofing material. Dr. Berkman predicts its use in life preservers, life jackets, aviator suits combining insulation value for high atmosphere with buoyancy in case of a landing in water, sleeping bags, mattresses, pillows, and surgical dressings.

The other fiber of the milkweed is found in the outer layer of the stalk. In different species of the plant, it represents between 10 and 20 per cent in weight of the entire stalk. Known as Bast, this fiber has a great tensile strength, and the high alpha cellulose content of 92 per cent.

Dr. Berkman says that studies show that Bast fiber ranks second to manila hemp in breaking and tensile strength. Running about three-fourths of an inch in length, the fiber is soft, pliable and much finer in texture. It has good possibilities for use as textile.

Seventy-two per cent of the milkweed found growing wild in Michigan was on No. 4 submarginal land. Approximately 85 per cent of milkweed seed germinates. In experiments last year, milkweed pickers earned from four to seven dollars a day, and they included women and children.

The tall, somber cattail that stands silently in the marshes today may soon be the base for a flourishing industry. In experiments conducted under the direction of C. F. Burgess, noted chemist, this lowly plant was found to have high heat insulating, sound absorption and water resistant properties.

According to Mr. Burgess, the floss of the cattail can be produced at a cost competitive with cotton. About 140 man-hours of labor are needed

The castor plant's beans (inset) contain valuable oil—for medicine and industry. Yield per acre varies according to soil.

to collect and process 50,000 spikes a day. These spikes yield 1,500 pounds of cattail floss. Location of plants close to the marshes where the plants abound would trim operating costs.

Belladonna Is Medicinal

The Belladonna, whose reddish bell-shaped flowers and shining black berries ornament the fields, contains medicinal properties which make cultivation of the plant both useful and profitable.

Dr. Alex Laurie of Ohio State university points out that Belladonna is one of a number of plants whose tops and roots yield alkaloids that prevent gripping of irritant cathartics, relax muscles and decrease secretions. One of the alkaloids—scopolamine—is among the most satisfactory materials used in childbirth.

According to Dr. Laurie, belladonna thrives in acid soils. All shade must be eliminated if the quality of the plant is to be retained. A 30-inch spacing between rows and 12 inches in the row required 17,500 plants and produced as high as 1,000 pounds of dry material per acre in cultivations at the Ohio Agricultural Experiment station. It was found that high nitrogen and phosphorus are necessary to secure higher yields, but the alkaloid content was not increased proportionately.

Harvesting and drying demand knowledge of plant growth and adequate equipment, Dr. Laurie says. Since usually three crops may be secured per season, the plants must not be cut down to the ground. It is in the field of plastics that chemurgy has made such great strides in utilizing the product of the farm in industry.

From cotton linters chemurgy has produced cellulose acetate, a molding and extrusion material in the form of sheets, rods and tubes, and also ethyl cellulose, an excellent elastic plastic when used with other agents.

From skim milk, casein is derived. Buttons, synthetic wool, felt hats and bonded plywood are all products of casein.

Oat hulls, nut shells and corncobs have a ready use in plastics. When the war created an acute shortage of formaldehyde, chemurgists obtained furfuraldehyde from oat hulls and corncobs. Furfural is used in

facture of butadiene for synthetic rubber. Petroleum refineries employ it as a solvent.

Walnut shells act as fillers in many types of plastics. They are used for the making of large cast molds in forming or stamping large aluminum airplane sections. Appreciable quantities of walnut shell flour are fillers in various rubber products. This flour contains "cutin," a wax-like substance of waterproof character.

Revive Castor Planting

Loss of territory and reductions of shipping have cut off importation of many products formerly received from other countries. The importance of these products to our economy, and the possibility that we may be deprived of them for substantial periods, has led to a movement for the cultivation of these products here at home.

As a result of these movements, it has been learned that many of these products were raised in this country many years ago, but gradually were abandoned as domestic growers found it hard to compete

phenolic resin and also in the manufacture of the cheap labor of other countries.

The case of castor beans is an example. Oil from these beans serves a variety of important purposes, as a medicine as we all know, but also as a hydraulic liquid, lubricant, demulsifier, tanner and preserver and insecticide.

In 1860, castor beans were grown commercially in the Midwest. There was a pressing plant for the beans in Kansas. But when we began importing castor beans from India and Brazil, our own industry died out. The location of India in the war zone and the shortage of shipping to Brazil has led to a bean shortage that has prompted the movement for resuming castor bean cultivation here.

Under the impetus of the department of agriculture, a castor bean seed production program has been designed to build up a stockpile of approximately three million pounds of pure variety castor beans for plantings. Texas, Oklahoma, Kansas, Missouri, Illinois, Kentucky, Tennessee and Indiana are the eight states that will share in the program.

In recent experiments, Dr. W. L. Burlison of the agriculture department of the University of Illinois discovered that certain types of castor beans would produce profitable crops when grown in the right soil and climate. A bean that yielded 475 pounds per acre in one section of the state, yielded 1,748 pounds in another section. It has been pointed out that in this country beans would have to be planted each year and harvested before frost. In Brazil, the plant is a perennial, with blossoms and mature beans growing on the stalk at the same time.

Cascara and digitalis are found in the forests and mountains of the Northwest Pacific area. Over six million pounds of cascara bark yearly are obtained in Washington and Oregon. With a value of \$1,250,000, this crop is gathered from wild growth and cultivated groves. Digitalis leaves are also picked from native and planted patches in the same states.

Sage, coriander and anise thrive in the Northwest, but the large amount of hand labor needed for the care of these crops has proven a discouraging factor. The work of thinning and weeding these crops conflicts with the same type of labor in the sugar beet fields.

NAZIS LEAVE EXPLOSIVE SOUVENIRS BEHIND

"Soldiers who pick up attractive looking objects on the battlefield never make the same mistake twice."

This grim precept of war is being strongly re-emphasized in the training of our troops by order of Lieut. Gen. Lesley J. McNair, commanding general of Army ground forces.

The news that booby-traps were being employed extensively by the enemy in North Africa came as no

surprise to army training officers, for intensive training in booby-trap detection and destruction has been part of the basic training program for many months. However, the army is making sure that every specific lesson learned in the front lines is being hammered home in training.

Booby-traps by the thousand, and in many different forms, are being left behind by the retreating Germans, and are being dropped from

enemy planes behind our own lines. They are usually in the form of fountain pens, watches, attractively colored balls, fat wallets, and similar objects.

No possibility is overlooked by the enemy. Even a whistle was found to contain a booby-trap. When the whistle is blown, the vibrating pea hits the striker, causing the explosion. The small charge is in the body of the whistle, and is exploded by a striker and cap.

Washington, D. C.

WHITE HOUSE SPRING DAYS

When the White House butler says "Dinner is served," it doesn't mean what it used to mean. Most of the time, it's nothing more than a simple three-course meal for two or three persons, served not in the state dining room, or even in the family dining room on the first floor, but in the President's study on the second floor.

Except for the occasional visit of a South American president, social activity at the White House has disappeared. Roosevelt dined with Mr. and Mrs. Harry Hopkins, Justice Byrnes, Judge Sam Rosenman, or perhaps with Grace Tully, his blue-eyed, white-haired private secretary. Mrs. Roosevelt is off again, on-again, as usual.

A friend of Gen. "Pa" Watson, aide to the President, sent him some finnan haddie the other day, and Watson passed it along to the President. "Meat," said Watson, "or anything that passes for meat, is as precious as gold these days." The President enjoyed the free finnan haddie.

If Grace Tully is there for dinner, it means work after dinner. On the average of two evenings a week, the dictation isn't finished in the daytime, and Grace stays over. For the war has not decreased the President's dictation. Jimmy Byrnes remarked the other day, "I don't see how he can handle so much paper work."

Fact is, the President is leaning heavily on letters, and cutting down interviews. His appointments run from 10:30 to lunch, with an occasional conference at two o'clock. But afternoons are reserved for dictating to Grace Tully. The only thing to throw this regimen out of gear is an afternoon press conference, a talk with a man like Anthony Eden—or the spring sunshine.

Sometimes the President swings around from his desk, takes a quick look at the sunshine over the South Grounds, and says to his Scottie, "Let's go for a ride—what do you say, Fala?"

A Ride in the Country.

This means a quiet tour into the country, without motorcycle escort, in a car which looks like anybody else's shiny limousine and stops at the traffic lights like the car of any ordinary citizen.

Members of the President's intimate staff insist they see no change in him under the pressure of war. The war hasn't altered his mood or his methods. He still laughs heartily, eats well, and dictates methodically, with never a "read that back to me."

Grace Tully explains it by saying the President is a psychologist, and he keeps a good temper for the sake of the people around him.

The slackened social activity doesn't shut out the house guests, however. Any day, Mrs. Roosevelt is likely to get a letter from old friends or relatives who are coming to town, and she replies. "Won't you stay with us?"

They do. They come for a day or two, sometimes for a week. But they go their ways, and see little of the President. He will dine with them once in the course of the visit, but the rest of the time, "dinner is served" for two or three in the private study.

In short, evenings are very quiet at the White House, and except for the President's own late hours at his desk, the electric light bill is the lowest in years.

MERRY GO ROUND

Efficient Governor Holland of Florida is not expected to run against efficient Claude Pepper for the senate. The last time Claude ran he was vacationing in Scotland shortly after his nomination when a voice called his hotel room. "Senator, I am an American Press representative in Scotland and we have a cable that your election in Florida has been contested." "I'll be right down," replied the alarmed Pepper. It was Jesse Jones, with Stewart MacDonald, Federal Housing administrator, playing a practical joke.

Nicest compliment Rep. Warren Magnuson of Washington received on his report for the naval affairs committee regarding ship-building bottlenecks came from the navy department, which Magnuson criticized for delays in submitting shipbuilding plans and specifications as well as in furnishing materials.

Undersecretary James V. Forrestal wrote: "I want to congratulate you both on the thoroughness with which your work was done and the restraint with which your criticism and suggestions were phrased."

Supreme Court Justice Roberts agrees with Vice President Wallace that the difficulties of the Constitutional convention after the Revolutionary war were similar to the difficulties of establishing world government now—but not insurmountable.

Abolition of the Austrian Legion under Crown Prince Otto as a U. S. army unit came as the result of violent protests from Austrians, Hungarians, Slovaks inside the army who were glad to fight for the U. S. but not for the return of the Hapsburgs.

Notes of an Innocent Bystander:

The Intelligentsia: Fred Allen has decided not to do a column. But he is quitting radio in June. . . . Lucius Beebe admits clowning in Chicago about getting a priority on a west-bound train "as a lathe worker," but points out that you need no priority for train-riding. Eavesdroppers took it to heart, and so Beebe has the final titter. . . . Ben Hecht is making the slick mags again with his first-rate stories. . . . John Briggs, the N. Y. Post music man, has quit to join OWI and hopes to be in Africa shortly.

The Wireless: The Berlin brag-garts, according to the short wave listeners, skipped all reference to the Tunisia runaway. Rommel qualified for the master race by putting on a masterly race of 1,430 miles away from the scrapping. . . . Goebbels probably regards the twin bombing of Berlin as a blessing. It smashed the radios and prevented the groggy citizens from hearing the bad news from Africa. . . . R. G. Swing made a point for wide open info on the submarine sinkings. It will be harder to take, he warned, when the total losses are discovered. Besides, the truth would cure us of some of our cockiness, which isn't stylish when there's a war on.

The Magazines: Otto Kruger's letter to his daughter on her 16th birthday in Cosmopolitan is grand. By all means clip it and show it to yours. . . . "Hospital Ship" in the Satevpost, by Comdr. M. Lewis and J. Isaacs, II, is eye-arresting. . . . Those who deprecate the power of ridicule and words should dip into a piece in Free World, which reveals that Goebbels is so concerned about the epidemic of anti-Nazi quips, he has urged Nazis to sock noses of those who tell them. . . . Gerald W. Johnson says in Atlantic Monthly that we are at war because the Axis thought we wouldn't fight, which gave them the idea they could push us around. In fewer words—the trouble was they believed ostriches instead of Americans. . . . Sir Cedric Hardwicke in This Week relates a Shaw gag. The hostess cornered Old Whiskers at her party and inquired if he was enjoying himself. "Madam," he said, "that is all I'm enjoying!"

The Big Show:

Sallies in Our Alley: Sgt. Soupy Campbell, former actor, who is back from the Solomons, swears this happened. . . . A Jap acrobat, who had returned to Japan in time to be drafted, was found alone frantically waving a white flag in surrender. In perfect Americanese he greeted the marine with: "Fergoodness-sakes—where the hell have you been?" . . . Two gents were discussing the wife-problem last night. "Mine is really strange," said one. "She has the constant fear someone'll swipe her clothes." . . . "Well," suggested the other, "why don'tcha have them insured?" . . . "Oh, I did, I did," was the reply, "but she still worries. Now she has some guy stay in her closet and watch them. I happened to find him there last night."

Midtown Vignette: He is a new Broadway lawyer and he was eyeing his new office and new furniture proudly. He told his secretary that he was "ready"—because he now had the necessary "front" to receive the biggest clients.

There was a knock on the door, and both cleared the decks for their first action. . . . Was this their first big client? . . . Well, let's be ready, anyhow. . . . She opened the door and let the stranger in—the cue for the new attorney to put on his big act. . . . "I'm sorry, Mr. Ridgeway," he said audibly, "my fee is still the same—\$10,000. Good day!" . . . Picking up another phone he boomed: "I'm very busy these days, but I'll take your case." . . . The visitor was in the doorway by this time. . . . The new counsellor, with a dramatic gesture, asked: "My good man, what can I do for you?" . . . "Not a thing," was the reply, "I came to connect the phones!"

The Magic Lanterns: The news-reels, which are working on a good story these days, put it all over the fiction dept. Best of the newsies shows the Nazi defeat at Stalingrad. You'll never get the glow out of a scenario that comes with a gander at Marshall von Paulus, jittery as a hophead, reporting to the Russky leader to take what's coming to him. . . . The long lines of German prisoners against the snow also make a pretty picture.

The Front Pages: Jonathan Daniel, the North Carolina editor, just added to the President's staff, is enough, in fact, to bring the ax-mel's plastering in Tunisia found the opinion gents reveling in delight—even those obdurate fellows the Nazis. . . . This gives you an idea of the way some legislators in Congress had them more excited than Rommel's defeat.

Half of World Doesn't Know What Other Thinks

A commercial traveler for the night at a small inn. In the breakfast room following morning he was by the landlord how he enjoyed the cornet playing in the next bedroom during the night. "Enjoyed it?" was the question. "I should think not, indeed. I spent half the night pounding the wall to make that cornet stop."

"I'm afraid there's been a misunderstanding," said the landlord. "The cornet player told me that the person in the room applauded so heartily he played every piece five times over."

Junior Miss Styles Alive With Color

A noted designer of "junior miss"
fashions is showing a collection of
colorful clothes that reflect Tyrolean
influence. Yarn trims decorate wool
dresses, and there are scores of
dirdnd skirts with embroidered bor-
ders and huge patch pockets that
are cunningly worked with yarn and
cutout felt flowers.

Cute pinafores and jumpers are
all done in the colorful Tyrolean
manner. Especially attractive are
the toppers of bright fleece and cor-
duroy. The showing of accessories
fascinates the eye. You will see
belts, some with suspenders pictur-
esquely embroidered.

The hats go from calots to soft,
rolling brim shapes and, together
with the cunning match bags that
accompany them, they are a charm-
ing sight with their saucy little
feathers and their artful yarn em-
broidery.

If You're Needle-Wise You Can Make These—

Applique prints make interesting
news. What's more, if you are deft
with the needle and have imagina-
tion you can make your own print
fabrics. The technique is similar to
that used in making applique-on
muslin quilts. You cut out flower
shapes of tiny bits of calico or per-
shapes of tiny bits of calico or per-
These you form into cluster
cale. These you form into cluster
design, proceeding to applique them
to the fabric background. Un-
to the fabric background. Un-
bleached muslin or sail cloth with
the flower appliques works out best.
You can achieve a regulation print
effect with big round patches scat-
tered with regularity in polka dot
fashion.

America Loved In Middle East By Gordon Gaskill

(WNU Feature—Through special arrangement
with Woman's Home Companion.)

Since time means nothing in the
great bazaar of Damascus, I had
contentedly spent a full half hour
haggling the price of a dagger
with a merchant named, like all
Syrians apparently, Ali Hassan.

Then for the first time he noticed
the brass insignia on my uniform:
"U S" His eyes opened wide.
"What!" he cried. "You Amer-
-ican?"

I nodded and Ali Hassan pondered
my answer for a moment. Then
suddenly he held out the dagger.

"Take it," he said, "take it
free for nothing, and the next
time you see that President
Roosevelt, give him the dagger
as a present from me and tell
him he has the love of Ali Has-
-san of Damascus."

So I took the dagger, and told him
I would, and I will—for I think
I shall never forget the look in his
eyes as he said the name of Roose-
-velt.

High Opinion of U. S.

I have now been in the Middle
East long enough to be past amaz-
ment at such behavior. But at first,
before I became immune, I was as-
tonished and touched to find how
enormously America bulks in the
thoughts and dreams of the entire
Middle East. To find how American
products are cherished and used—
and sometimes oddly misused. To
find how the ancient East is becom-
-ing Americanized.

For example, merely because I
was an American, a Jewish mer-
chant in Beirut had given me the
best pair of shorts in his shop, a
Free French tobaccoist had pressed
rare and expensive cigarettes on
me, an Arab restaurateur had re-
fused payment for my dinner, and
a Greek woman who runs a printing
shop had waved aside money for
some visiting cards. Instead, she
wept as she told me how the Nazis
had killed one son, how another son
works in New York, and how much
she loves all Americans.

"All Americans," she said simply,
"will go to heaven. All of them.
I am certain." I let it go at that.

Prized American Cigarettes.

When I entered Syria at a remote
border point, the frontier official
waived all formalities, and I gave
him a package of American cigar-
-ettes. "The first I've had in two
years!" he breathed and he took
them as if they were gold. They
almost were, for in Beirut they were
selling for a dollar a pack.

Syria has always loved Americans.
Most of us forget, if we ever knew,
that after the last war Syria voted
to have the United States rule her.
When America declined, France
took the mandate instead.

America has been generous to
Syrians who emigrated and often
found their fortunes. Almost every
other Syrian you meet has a kins-
-man in America and asks some-
-thing like: "Do you know my son,
Joseph, in the state of Philadel-
-phia?"

Zahle, a charming city in the
Lebanon's lovely Valley of Mulber-
-ries, especially cherishes Amer-
-icans. There are 20,000 Zahlian in
Zahle, but 20,000 more live in Amer-
-ica. The local newspaper actually
has more subscribers in America
than in Zahle itself. I went to
Zahle to stay one day and left, very
regretfully, after ten days of unbel-
-ievably generous hospitality.

A Kiss for the President.

It was in Zahle, for instance, that
a woman of about 50 came up to
me as I was walking along the main
street and asked me, in French,
whether I was really an American.
I said yes, and she asked if she
could kiss me, then and there. So
she did, on both cheeks. "Once
for President Roosevelt, and once
for all other Americans, may God
bless them."

What she said about "all other
Americans" makes a point that
should be underlined: This lav-
-ish gratitude and hospitality that
Americans in the Middle East
are receiving is emphatically not
for us as individuals, but as
symbols of the 130,000,000 Amer-
-icans back home. Through us
here, they are thanking every-
-body in the States.

Even the money situation helps
this pleasant state of affairs. For
example, the lowest paid American
ordinary seaman receives today at
least \$200 a month, or about as much
as a British major. And the dollar
is at a premium, worth in purchas-
-ing power nearly a half more than
face value.

For economy's sake, American
merchant marine officers have dis-
-carded their ancient prejudice
against wearing their rather snappy
uniforms on shore. They have dis-
-covered that a uniform—any uniform
—means great savings.

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

CHRIST'S CHARGE TO PETER

LESSON TEXT—John 21:15-24.
GOLDEN TEXT—Greater love hath no
man than this, that a man lay down his
life for his friends.—John 15:13.

Breakfast for a hungry fisherman
—that is what our loving and
thoughtful Lord had provided on the
shore of Galilee. He wanted to talk
to Peter, but He knew this was need-
-ful first. There are some folk who
think that following Christ is a dole-
-ful matter, devoid of every pleasure.
Jesus never taught any such thing.
He attended weddings and dinners
even in the homes of those despised
by men. But remember that He al-
-ways did it for their spiritual good,
not merely for His own enjoyment;
and that He always brought the gath-
-ering up to His own spiritual level,
rather than stooping to any worldly
or wicked standards.

Here we find Him with a glowing
fire upon which fish is broiling, and
with bread ready for these hungry
men. It was just like Him thus to
meet in most delightful and satis-
-fying fellowship those who serve
Him. Draw up to the fire, Christian
friends who are standing afar off.
You may be so timid that, like the
disciples, you will not dare to call
Him by name (v. 12), but if you will
come, you will find that the precious
fellowship will soon warm your
heart.

With the meal over, Christ turned
to Peter and in their conversation
we find the latter required to

I. Face Responsibility (vv. 15-17).

With kindly persistence our Lord
brought Peter face to face with his
responsibility of full-hearted devotion
to Him. Before service can be ren-
-dered there must be a right relation-
-ship to the Lord.

Three times Peter was asked to
declare his love for Christ. Such a
public confession was quite in place,
before the man who had thrice de-
-nied his Lord was restored to a place
of leadership. The words "more
than these" (v. 15) indicate that
Jesus was asking of him a high
measure of devotion. It is no more
than He has a right to expect of us.

The conversation after breakfast
that morning was a very profitable
one. One is reminded, by contrast,
that few of our mealtime discussions
are very useful. Many (perhaps
most) after-dinner speeches and
conversations yield little profit. Here
is an occasion when such was not
the case. One wonders whether we
would not be wise to take the sug-
-gestion and turn our thoughts and
those of our dinner guests to spiri-
-tual things. Surely it should be so
among Christian friends and in a
Christian home.

II. Feeding Christ's Flock (vv. 15-17).

We review the same verses to
point out that an expression of love
to Christ means nothing except as
it manifests itself in service. Like
Peter, we are to be diligent about
feeding His flock, whether they be
the young and inexperienced lambs,
or the mature sheep of the fold.

We tend to specialize. Even in
soul-winning some give themselves
to child evangelism while others
reach only adults, and would hardly
think of dealing with a child. True
it is that we have varying gifts, and
one does one type of work better
than another. But let us avoid over-
-specialization. Every needy soul is
a challenge to us as we present the
gospel.

The word "feed" should be
stressed. Here again the church has
frequently failed. Men and women
are won to a decision for Christ, and
then forgotten. Sheep must be fed
if they are to grow. A teaching
ministry must accompany the evan-
-gelistic effort. They belong together,
and to neglect either is to fail, at
least, in that measure.

III. Follow Him to the End (vv. 18-24).

Endlessly ingenious are the de-
-vices of Satan. He who had sifted
Peter like wheat (Luke 22:31) and
had rejoiced in the weakness of his
denial of Christ, now saw him step-
-ping out into victorious living. He
heard the prophecy of the martyr
death of Peter. So he put into his
heart a question. Why should he
suffer? What about John? What
was the Lord going to do for him?

When our enemy cannot trip us up
with temptation to personal sin, he
resorts to the device of jealousy.
Many promising Christian workers
have become useless because they
have taken their eyes off Jesus and
put them on the persons and work
of other Christians. Doing a work
which was difficult and unnoticed but
very important to God, they have
felt the urge to quit because some-
-one else seemed to have the easier
task and receive more recognition.

The answer of Jesus in verse 22
plainly states that it is not the place
of one disciple to judge the course of
life of another, nor to gauge his own
devotion to Christ by another's place
or service.

The word of Christ to us is the
same as to Peter: "Follow me."
We have all we can do to live our
own lives in a manner well-pleasing
to our Lord.

7480
YOUR small daughter will love
making her own bed with this
charming embroidery on the
spread. It's a dainty old-fashioned
doll, complete with pantalettes,
hoop skirt and bonnet. Use gay
colors.

Boiling diapers at least once a
week is advisable to prevent
diaper rash appearing on the
baby's tender skin.

If the butter is too hard, heat a
pan with hot water or otherwise,
pour water out and invert pan
over butter dish. This does the
trick and softens the butter evenly.

It is cheaper to put on a new
roof when the old one shows signs
of wear, than to have rain leak
through and cause redecorating as
well as reshingling expense. Leaky
roofs are expensive.

Perfect balance in grouping fur-
-niture makes a rambling and ir-
-regular living-room inviting.

Foods to be stored in freezer
lockers should be in a moisture-
-vaporproof container.

Pattern 7480 contains a transfer pattern
of a 13½ by 16½ inch motif and 12 smaller
motifs; stitches, color schemes; list of
materials needed.
Due to an unusually large demand and
current war conditions, slightly more time
is required in filling orders for a few of
the most popular pattern numbers.
Send your order to:

Something Wrong if RAF Pilots 'Put Up a Black'

The RAF has developed a lan-
-guage all its own. Many of the
terms, such as "Browned off" for
bored, and "Put up a black" for
doing something wrong, have been
adopted now into common usage.
Some expressions have been bor-
-rowed from the United States, in-
-cluding "Flinging a woo," which
means to have a date with a girl,
and "Roughneck" which, in the
RAF does not mean a tough guy,
but an unlikeable person.

"Gen" means the real, inside
information on anything, and,
similarly, "duff gen" means wrong
information. A "flap" is a sudden
operation. To be in a "flap" or
in a "flat spin" means to be busy
on a job, too busy to do anything
else.

Pilots who go "dicing" or on a
"shaky-do" are attacking a diffi-
-cult and dangerous target; if it's
an easy target it's a "piece of
cake." After they drop their
bombs they sometimes "stooge
around to take a beaker," meaning
to hang around to have a look.

THESE BUTTERMILK ALL-BRAN BISCUITS MAKE ANY MEAL!

Any meal becomes a feast with
these tempting-texture biscuits! Made
with tasty KELLOGG'S ALL-BRAN, they'll
make a hit with everyone!

All-Bran Buttermilk Biscuits

½ cup Kellogg's All-Bran	1 teaspoon baking powder
½ cup buttermilk	1 teaspoon salt
1½ cups flour	½ teaspoon soda
	½ cup shortening

Soak All-Bran in buttermilk. Sift
flour, baking powder, salt and soda to-
-gether. Cut in shortening until mix-
-ture is like coarse corn-meal. Add
soaked All-Bran; stir until dough fol-
-lows fork around bowl. Turn onto
floured board, knead lightly a few
seconds, roll or pat to ½ inch thick-
-ness and cut with floured cutter. Bake
on lightly greased pan in hot oven
(450° F.) about 12 minutes.

NOTE: Sweet Milk Recipe: If sweet
milk is used instead of buttermilk,
omit soda and increase baking powder
to 3 teaspoons.

Added Savings ...in war-time baking

Full baking effectiveness, now, in
every ounce of Clabber Girl Baking
Powder... No waste of baking pow-
-der, no waste of baking ingredients
when you specify the new, im-
-proved moisture-proof Clabber
Girl container... In all sizes at
your grocer's.

Adrian Bielefeld and daughter Paddy of Dougherty, and Mr. and Mrs. Fred Nagel enjoyed a goose dinner at the home of Mr. and Mrs. Henry Jost Easter Sunday.

Mr. and Mrs. Vernon McLaughlin and children of near Beilmond were Easter Day dinner guests at the parental Mrs. Daisy Lenke home.

Emil Blumer, who has been seriously ill for the past week, was taken to a Mason City hospital on Friday to be treated for pneumonia. Mr. Blumer's condition is reported as improved at this writing.

Vic Schoenwetter has been getting around by the aid of a pair of crutches the past week as the result of an accident. Mr. Schoenwetter fell from a ladder while he was painting his barn. In the fall he sprained and injured one foot and his ankle, but fortunately, no bones were broken.

Mr. and Mrs. Paul Grange of Mason City, and Mr. and Mrs. P. W. Johnson and family of Humboldt, all former residents of Klemme, met at Garner Sunday and had dinner together at a cafe there.

Virginia and Mary Margaret, daughters of Mr. and Mrs. Edwin Bock of Garner, enjoyed having supper with their grandmother, Mrs. Naska Bock, here Monday evening.

Mr. and Mrs. Frank Gibbs and two sons of Sioux City and Mr. and Mrs. Don Gibbs of Clear Lake visited at the Anna Gibbs and Sumner Trumbull homes Saturday evening.

Miss Lorraine Buntenbach, who is a freshman at Carleton College at Northfield, Minnesota, came last Thursday evening to spend the week end in Klemme visiting with her parents, Mr. and Mrs. Ed C. Buntenbach.

Mr. and Mrs. P. W. Johnson and twins, Peter and Nancy, came Sunday from Humboldt to spend the day visiting with Klemme friends. Their daughter Barbara, who came here Friday, returned home with them.

The Choir of the Klemme Reformed Church gave their Easter Program Sunday evening "The Easter Gospel in Story and Song." It was directed by Mrs. Ernest Gerardi. The program was well attended.

Mrs. Jack Dominic and little daughter, Jill Mina, left last week for Tacoma, Wash., to join her husband, Lt. Jack Dominic who is stationed at Ft. Lewis, Wash. Mrs. Dominic has been visiting for the past month at the home of her parents, Mr. and Mrs. R. C. Ludeke of Clear Lake. The Dominics were formerly stationed at Camp Claiborne, La.

The Misses Darlene and Verla Jean Perkins of Estherville visited from Friday evening until Sunday afternoon with their parents, Mr. and Mrs. Louis Perkins.

Mr. and Mrs. Donald Nissen, of Sioux City, and Harold Nissen of the U. S. Navy, came Thursday afternoon and visited until Friday afternoon at the John Day home.

Mr. and Mrs. J. A. Chambers and daughter, Thelma, and Mrs. Wayne Chambers were dinner guests with relatives at Corwith Friday evening.

Mr. and Mrs. Walter Kimball entertained to dinner Sunday Mr. and Mrs. Clarence Nelson and daughter of Garner, and "Cap" Blank of Kanawha.

Mr. and Mrs. George Schoenwetter and son, Sgt. Homer, were supper guests Thursday evening at the home of Mr. and Mrs. Ed Schoenwetter.

Mrs. Leonard Swanson, Mrs. Walter Lemke and Joan, Mrs. John Clements and Mrs. Wayne Pavey and Carol Ann were Mason City visitors Saturday evening.

Sgt. Bob Schneider of Fresno, California, spent Wednesday and Thursday forenoon visiting with his parents, Mr. and Mrs. E. J. Schneider. Bob had escorted some troops to a South Dakota camp and so had an opportunity for a brief visit before returning to Fresno.

Mr. and Mrs. Wesley Patterson and baby daughter, Ferrol Paige, spent Saturday and Easter Sunday visiting with Mr. Patterson's parents near Bancroft. On Sunday Ferrol Paige was baptized at the Presbyterian Church at Ringsted.

Mr. and Mrs. Arthur Kudje and children, Patricia and Ginger, and Mr. Joe Johnson, drove to Cedar Falls Sunday and spent Easter visiting with Miss Jacqueline Kudje, sophomore at State Teachers College.

Adjust Corn Planter

• BEFORE PLANTING TIME . . .

Some adjustments of the corn planter can best be accomplished before it is taken into the fields.

We want to point out these adjustments, together with a reminder that accurate planting has much to do with the yield of corn and other row crops.

Proper seed plates should be selected to accommodate the size and shape or grade of seed. The rate of planting or spacing in the row should be fixed by a calibration test run by blocking up the planter and trying it with the seed to be used in the field. Row spacing should be adjusted by shifting the planter head along the check row frame. The markers must be set to accommodate a change in row spacing.

One of the principal adjustments on the planter in the field will be the depth of planting. This is easily controlled by the convenient lever and check, if the corn is to be check-rowed. For the 4-row planters a special wire carry-over apparatus will improve performance, as will adjusting the pitch of the shoe shank usually cares for most of the problems of the 2-row machines.

If the planter is dropping too far back of the button on the wire, the toe of the shoe should be raised. If the planter is dropping too far ahead of the button on the wire, the toe of the shoe or runner should be lowered.

Above all else, regardless of what claim is made by seed corn companies, check your seed corn for uniformity or likeness of kernels if planting with edge drop planter.

THE 2ND WAR LOAN DRIVE IS ON!

★ ★

The Command has Come—

"Attack!"

THE big push is on! This is the fateful summer that we have been waiting for. Hitler knows he must win before another winter rolls around, or face inevitable annihilation. And you can be sure that he will hurl everything he has—every gun, plane, soldier and tank—into the summer struggle that is even now rising in tempo on every front.

And when the command goes out to our fighting men to **ATTACK**—you can be sure they don't look for excuses. They don't hesitate. They strike fast and hard—as they did at Guadalcanal, in Tunisia and in the skies over Europe.

NOW the command has come on the home front to attack! To attack with the dollars that buy the weapons of war our boys must have to meet the last desperate assaults of Hitler. Your government asks you to lead it 13 billion dollars during this drive. And this

historic 2nd War Loan Drive, which started April 12th, is the most urgent appeal America has ever made!

The time is short—act now!

When you attack with War Bonds you don't suffer pain or anguish—you don't risk your limbs or your life as millions of our boys are doing every day. All you do is make an investment—the safest in the world. You help to secure Victory now—and your own financial security.

During this drive if you are visited by a volunteer War Bond worker, welcome him. He will explain the 7 different types of U. S. Government obligations you may choose from. But don't wait for his call—go at once to your nearest bank or Post Office or place where they sell War Bonds. And answer the command to **ATTACK** by buying more War Bonds—and still more War Bonds!

Garner Girl Is Bride Of Young Klemme Farmer

L. JUHL MARRIES
SCHLEI OF KLEMMME

Ceremony Took Place At
Parsonage, Clear Lake

Lillian L. Juhl, daughter of Mrs. Axel Juhl of Garner, the bride of Dale Schlei, daughter of Mrs. Bertha Schlei of Klemme, was married in a double ring ceremony performed at the Zion Lutheran parsonage at Clear Lake, Iowa, on Sunday afternoon, April 28th, at 2:00 o'clock, the Rev. Reuter officiating.

The bride was attended by Miss Schult, of Garner, cousin of the groom. Arthur Juhl, brother of the groom, acted as best man.

The bride wore a two-piece Navy blue dress, a pearl necklace and white dress, a pearl necklace and white dress, a pearl necklace and white dress.

The groom wore a suit with light blue accessories and a shoulder corsage of gardenias. Her bridesmaid, Mrs. Lou Winston of Hollywood, Cal., wore a contrasting suit with pale pink accessories and a corsage of gardenias.

The ceremony was performed at the Green Mill at Mason and later in the evening the wedding was honored at a reception at the Community Hall in Klemme.

The bride is a graduate of Veneta High School in the class of 1934. The groom graduated from Klemme High School in 1934.

They will make their home on Bertha Schlei's farm south of Klemme, which the groom managed the past five years.

The death of his father.

CASES FILED FOR
AY TERM OF COURT

Following the new cases filed at the Court House at Garner for the term of district court:

The Maud Haskin vs. Webb Haskin Plaintiff asks for divorce.

MRS DALE SCHLEI
(Courtesy of Globe-Gazette)

FORMER KLEMMME GIRL IS MARRIED IN COLORADO

Mr and Mrs David Schwichtenberg of near Klemme, announce the marriage of their eldest daughter, Jeanne, of Colorado Springs, Colorado, to Corporal Elmo "Jim" Murphy of Omaha, Nebraska, which was performed April 11, in the United Brethern parsonage at Colorado Springs, Colo., by the Rev W. G. Schaefer.

The bride wore a navy blue suit with light blue accessories and a shoulder corsage of gardenias. Her bridesmaid, Mrs. Lou Winston of Hollywood, Cal., wore a contrasting suit with pale pink accessories and a corsage of gardenias. Corporal Ray Sollars of Fresno, Cal., acted as best man.

A wedding dinner was served after the ceremony by Mrs. Bonnie Lewis, a friend of the bride. Blue and white decorations were used throughout the dinner.

Mrs. Murphy was graduated from the Twin Lake township rural schools and the Garner high school. She later attended the American Institute of Business in Des Moines, and is now employed by the U S Government as a stenographer at Peterson Field, Colorado. After a short trip, the couple is residing at 413 South Nevada Avenue, Colorado Springs, Colo.

BELMOND LADY SURPRISED ON EIGHTIETH BIRTHDAY

Miss Helen Harberts, of Belmond, was pleasantly surprised at her home on her eightieth birthday anniversary on Sunday when a large group of relatives and friends appeared to honor her with a pot-luck dinner.

Those present included. Mr and Mrs. Theo Bente and Abbie Doris, Mr and Mrs. Harm Walter and June; Mr and Mrs. Geo Harberts; Mr John Harberts, all of Belmond; Mr and Mrs. Elmer Anderson, and Ruby Ella, Mr and Mrs. Don Branes of Goodell.

Mr and Mrs. Menno Smit and Wanda Mae of Renwick; Mr and Mrs. Sylvan Johnson, Ivan, Eugene and Norva, and Jerry Schreck of Forest City.

Mr. and Mrs. Dwight Helps, Stanley, Eunice, Raymond and Jo Ann; Mr and Mrs. Ed Becker; Mr and Mrs. Edgar Buss of Klemme; Mr and Mrs. Rank Buss and Naida of Thornton.

Mr and Mrs. Rank Meinders, Caroline, Adolf and Walter of Clarion; Mr and Mrs. Lambert Menke, Adeline, Jr., Avis and Phyllis, of Forest City.

Mr. and Mrs. Louis Meinders and Janice Lou of Meservey; Mr. and Mrs. Clair Bonte and family called in the afternoon.

All enjoyed a good time and Aunt Helen wished that all might have such a lovely 80th birthday as she enjoyed and said the surprise was most complete.

Haymaking methods seem to be undergoing drastic changes which reduce the amount of time and labor involved. One of these changes is to substitute a sweep or buck rake built on the chassis of a truck or auto and use that in place of a hay rack.

Sixty Thousand Pounds Scrap Metal Collected

OVERHOLT SAYS SCRAP DRIVE WAS SUCCESSFUL HERE

J I Overholt, salvage chairman, says that the scrap drive conducted in this community last Friday, was successful and that approximately 60,000 pounds of heavy scrap metal was brought into Klemme.

There is still a lot of scrap metal in the community and several farmers stated they would bring in their scrap later, after they had knocked down some old machinery and salvaged some usable parts.

The government needs a lot of heavy scrap metal and urge everyone to dispose of it through salvage channels as soon as possible.

Chopped hay can be fed with much greater ease than loose hay. Baling hay out of the windrow doesn't save much time, but it does save mow space and may result in better quality.

Where Will Money Come From?

People ask: "Where will the money come from?" to reach the thirteen-billion dollar objective of the Second War Loan. The answer is simple. The people HAVE the income.

When we produce munitions or peacetime goods, or anything else, we likewise produce income. For every dollar of production, there is a dollar of income.

The problem of war finance boils down to this—if individuals and businesses receive more income after taxes than there are things produced for them to buy, then excess funds arise. The government deficit is matched by the combined surplus of everybody else. This surplus should be put into Government securities to wipe out that deficit.

They give their lives . . . You lend your money.

NEIGHBORS DO PLOWING FOR SICK FARMER

Neighbors of Max Mace, south of Klemme, got together Saturday and did his plowing.

Mr. Mace has been ill and confined to his bed for the past ten weeks and his spring work got behind.

The following farmers hepled to get the plowing done Saturday for Mr Mace: Herman Ahlstrom, Bill Green, Richard Lauen, Virgil Cook, Louis Stahl, Leo Kearney, Gerald Burke, Henry Busse, John Lauen, Charles Halfpop.

Others Helped Sow Oats

Another group of farmers put in Mr Mace's cat crop. They were: Enno Ostendorf, Harry Ostendorf, Walt Koehler and John Chambers.

BOYS 4-H CLUB MEETINGS ARE BEING PLANNED

Hancock County boys 4-H clubs have scheduled the following meetings:

El Midgets, Thursday evening, May 6th.

Liberty, Thursday evening, May 6th.

Concord - Garfield, Monday evening, May 10.

Boone Rounders, Tuesday evening, May 11th.

All members should plan to keep these dates open and attend these meetings. Invite new members. Remember that in the Class A projects members may enroll at any time. These projects were added to give a boy a chance to use his father's livestock if he keeps the records and helps with the breeding and management of the livestock or crop.

For a company dessert, serve a gingerbread square filled with a layer of vanilla ice cream or orange sherbet.

Klemme Bond Sales Now Over The Top States Chairman

TELEGRAM PRAISES NEWSPAPERS

Washington, D. C.

Frank Tripp
Allied Newspaper Council:

May I ask you to express to the newspaper publishers our thanks and appreciation for the truly remarkable contribution they are making to the second War Loan. We feel quite certain that never before has any cause received such complete and effective support from the newspapers of the country, and we are grateful for it.

H. Morgenthau, Jr.
Secretary of the Treasury.

RURAL EIGHTH GRADES TO TAKE EXAMS FRIDAY

The eighth grade examination for pupils in the rural schools of Hancock county will be given on Friday, May 7th, commencing at 9:00 a. m. The school sites for the examination are:

Klemme Independent
Britt Independent
Corwith Consolidated
Crystal Lake Consolidated
Miller Independent
Woden Independent.

The above in Hancock county and Forest City in Winnebago. The Garner site will be at the Court House.

The State Department of Public Instruction has eliminated the mid-year examination usually given in February, also eliminated the seventh grade examination as such, effective this year. This year only one examination will be given, it is entirely objective, consisting of fifteen parts and twenty-two pages. The music examination is optional with the student, if he has taken the Fullerton Course during the year, has completed it and has a music grade from his teacher. He may choose not to write.

All seventh grade pupils are encouraged to take the same examination as, and with the eighth grade pupils. No grades will be given seventh grade pupils, but an individual chart will be prepared in the office of the County Superintendent for use by the pupil and his teacher this fall, giving pupil rank in the county and percentile as compared to all others in the state for each of the fifteen parts of the examination.

A total of 231 have indicated their desire to write as seventh and eighth grade pupils, and have designated their preference as to where they will write.

Chas. S. Whitney,
County Superintendent.

SENIOR CLASS HAS PHOTOS ON DISPLAY AT THADA'S

The display of pictures in the window of Thada's Store is attracting a lot of attention. The photos are likenesses of the Klemme High School graduating class, and they are a fine looking group of Seniors.

IMPORTANT LABOR NOTICE

If you have a day or two or more extra labor on your farm that might help another farmer, be sure to make it known by notifying County Extension Director Paul Henderson, at Garner.

This is without a doubt one of our best ways of easing the farm labor shortage. Let's not hoard labor on any farm this crop season. You will be paid by the farmer needing help besides making an extra contribution to the big job of food production.

We expect to have a local committee and a local registration station in each town or locality as soon as the county farm labor committee has formulated the plans for the county.

KLEMMME TOPS BOND SALES BY TWENTY PERCENT

Quota May Be Doubled Here Says
Chairman Waterman

The town of Klemme oversubscribed its Second War Loan quota by over twenty percent, says C. G. Waterman, local chairman of bond sales.

The quota for the town of Klemme had been set at \$21,500.00 and this morning that figure had been exceeded by \$4,805.00, or a total of \$26,305.00.

Mr. Waterman stated that a number of people had indicated that they expect to purchase more bonds again at a later date, and it is possible that the quota will be doubled.

The report for the rest of the county was not available at this time, but this information will be published at an early date.

HANCOCK COUNTY CREAMERY TRANSPORTATION COM- MITTEE ELECTED

The six creameries of the county were represented at a meeting of creamery haulers, operators, and producers on April 27th. Meeting was called to order by Alfred V. Josten, Chairman of the County Farm Transportation Committee.

The following committee was elected to administer the mileage reduction program for the creamery trucks: Omar Maland, Kanawha, Chairman; Otto Kloock, Garner, Secretary; R. M. Hutson, Forest City; Ernest Asleson, Woden.

The plan is an industry plan, and every industry will set up similar programs to eliminate cross hauling and extra miles now being traveled. The Hancock County Committee will co-operate with other county committees in the district.

R. W. King of the O. D. T. Office in Mason City explained the O. D. T. order and the suggested program. A. D. Oederkirk, Iowa State College Marketing Specialist, pointed out a few programs that might be followed, and offered the services of the marketing section of the college in helping map routes and offering suggestions.

4-H GIRLS RALLY DAY PLANNED FOR JUNE 8

Mrs. C. J. Wille, Chairman of the County 4-H Committee, met with the members of that committee Miss Ruby Schram, Mrs. D. E. Keat, Mrs. Lyl Fox and Miss Hazel Grimes, at the Farm Bureau Office in Garner on Saturday, May 1.

Plans for a 4-H Girls County-Wide Rally Day were made which will be held at the Garner High School at 1:00 p. m. on Tuesday, June 8th.

Since the 4-H Girls State Convention cannot be held this year at Ames, Rally Day will be of even greater importance than it has been in the past. Plans are being made for some member of the State Club Staff to attend this meeting and bring to the club the inspiration that comes from a sense of belonging to a state-wide group.

W. S. C. S. MEETS THURSDAY AT METHODIST CHURCH

The W. S. C. S. will meet on Thursday, May 6th at 2:00 p. m.

Mrs. E. H. Patet is the lesson leader and Mrs. Edwin Josten has the devotions.

NOTE OF THANKS

I wish to take this means of thanking the many friends, neighbors, and relatives who remembered me with cards, letters, fruits, candy, flowers and other gifts and calls during my illness; also those lending a helping hand and those who offered their services, which was very much appreciated.

MAX MACE, Goodell, Iowa.

To relieve distress of MONTHLY Female Weakness

WHICH MAKES YOU CRANKY, NERVOUS! Lydia E. Pinkham's Vegetable Compound has helped thousands to relieve periodic pain, backache, headache with weak, nervous, cranky blue feelings—due to functional disturbances. This is due to its soothing effect on one of woman's most important organs. Taken regularly, Pinkham's Compound helps build up resistance against such annoying symptoms. Follow label directions. Worth trying!

Kidneys Must Work Well

For You To Feel Well. 24 hours every day, 7 days every week, never stopping, the kidneys waste matter from the blood. If more people were aware of how the kidneys must constantly remove poisons, excess acids and other waste matter that cannot stay in the body without injury to health, they would be better understanding of why the whole system is upset when kidneys fail to function properly.

DOAN'S PILLS

HOUSEHOLD MEMOS... by Lynn Chambers

Neat Trick for Stretching Meat-Scrapple
(See Recipe Below)

Make Red Points Work!

Making red points fit your menus still give you plenty of valuable proteins and fats on which to do a man-sized day's work is like working out a jig-saw puzzle. But you remember how they all can come out if you try hard enough? The answer is in juggling your points before you eat them, getting meats with low fat value, and extending flavor of meat as much as possible.

First of all, let's realize that meat is a high quality protein, and that the body needs it for repairing and building tissue—which is a full-time job. We designate proteins as complete and incomplete, the ones which complete do a complete job of building and repairing. Complete proteins are meat, cheese, fish, poultry, eggs and milk.

Incomplete proteins are those which can do just part of the job, and in this class we have breads, cereals, beans, peas and nuts. Of course we can use these foods alternately or in combination with meat, when we cannot get enough meat to fill our requirements. But, always, please bear the difference in mind.

Pork is our foremost source of vitamin or vitamin B—sometimes called the pep and energy vitamin because of its important contribution to mental health. Here pork sausage is combined with a cereal or a really delicious "stretched" fish.

All-Brat Scrapple.

(Serves 8)

1 pound fresh pork sausage
2 cups water
1 teaspoon salt
1/2 teaspoon pepper
1/4 teaspoon powdered sage
Few grains cayenne
3/4 cup cornmeal
3/4 cup bran cereal

Brown sausage in heavy skillet, turning occasionally; pour off and save fat. Bring

water to a boil, add salt, pepper, sage and cayenne. Stir in cornmeal gradually, cook until thickened, turning constantly. Add bran cereal and sausage and mix thoroughly. Pour into dampened loaf pan; chill until firm. Unmold. Cut into 1/2-inch slices and brown in sausage fat on hot griddle. Serve with maple syrup or apple butter.

Chicken is a complete protein—and goes a long way, nicely in this delightful fruity salad which you'll enjoy serving company or Sunday night supper guests:

Lynn Says:

The Score Card: With 35 million homemakers carrying ration books to the grocers, new ways for managing limited foods are the order of the day.

Many of these homemakers are accustomed to pulling off cans from their shelves, or taking quick-frozen food from their storage lockers. Now they will have to glean all possible facts from labels of these processed foods, budget their points carefully.

It's smart to buy the size of can most profitable for her own individual family. Keep a table of equivalents handy in your purse until you become proficient. Usually, 16 ounces or one fluid pint will fill two measuring cups. The 32-ounce size will fill four cups.

Remember canned vegetables are already cooked and need be brought only to boiling to be ready to serve.

Buying fresh fruits and vegetables relieves pressure on canned goods.

This Week's Menu

*Stuffed Veal Hearts
Buttered Noodles
Quick-Cooked Green Cabbage
Grated Carrot—Fresh Grapefruit
Salad
Whole Wheat Rolls Jelly
Rhubarb Sauce Cookies
Beverage
*Recipe Given.

Orange-Chicken Salad.

(Serves 6)

1 1/2 cups orange sections
2 cups cooked chicken, minced
1 cup diced celery
1/2 cup lemon french dressing
Lettuce and other greens

Toss orange sections, chicken and celery together with the lemon french dressing. Arrange on six individual beds of greens or lettuce.

Kidney beans are a second-class or incomplete protein food, but they are fine to use on that extra day when there are no red points left over for meat. Dried peas and lentils have a low point value which makes them fine for tide-overs on meatless days: Grated cheese adds food value, takes only a few red points:

Kidney Bean Loaf.

(Serves 6 to 8)

2 cups dry kidney beans
2 cups water
4 cups stale bread crumbs
2 cups grated cheese
1/2 cup chopped onion
1/2 cup shortening
1 egg
1 1/2 teaspoons salt
1/2 teaspoon pepper

Soak beans overnight in the 2 cups water. In the morning, bring to a boil in the same liquid and then simmer until beans are tender.

Mash beans fine and add all other ingredients, mixing well. Pack into a loaf pan and bake 1 1/2 hours in a 325-degree oven. Baste occasionally with 1 tablespoon melted butter and 1/4 cup water.

You may use fish generously as a real menu aid during these days. Many types of fish are in season all the year round, and a great many other come in season during spring:

Fish Loaf.

(Serves 4)

2 cups flaked, steamed fish
1/2 teaspoon salt
2 eggs, separated
1 cup medium white sauce
Combine, fish, salt, beaten egg yolks, white sauce and beaten egg whites. Pour into greased baking dish and bake in a moderate oven 20 to 30 minutes.

*Stuffed Veal Hearts.
(Serves 5)

2 veal hearts
2 tablespoons chopped onion
1/4 cup chopped celery
2 tablespoons shortening
1 1/2 cups fine bread crumbs
3/4 teaspoon salt
1/4 teaspoon pepper
1/4 cup water
3 tablespoons shortening
2 cups stewed tomatoes
2 whole cloves
1 bay leaf
1 teaspoon salt
1/2 teaspoon pepper

Clean hearts by cutting through side to center, open with a sharp knife, cut out all veins and arteries. Wash well. Make a dressing by cooking onion and celery in shortening. Add crumbs, salt, pepper and water. Stuff the hearts with dressing and tie together with string.

Roll hearts in flour, brown in shortening. Add tomatoes, cloves, bay leaf. Sprinkle with salt and pepper. Cover with tight fitting lid and cook on low heat for 1 1/2 hours.

MR. TWITCHELL COMES OUT AGAINST PLANNING

Elmer Twitchell today came out with a post-war plan. Article one in the plan is a plan to abolish too much planning.

"Over-planning has put the world where it is," he declared. "What this world needs most is less planning."

Superdoo planning has been all the rage and it is at the peak just now but once this war is over you are going to see a terrific swing against anybody or any government with a plan, a chart or a blueprint, especially if it's hard to follow with the naked eye.

The revolt against planners will be so big that both major political parties will adopt a plank that reads, "We promise to leave a few things to God, to nature, to the laws of gravitation and to chance." And both candidates for the presidency will start their campaigns with a candid "How can I solve everything? I'm as mixed up as anybody else!"

Suddenly Mr. Twitchell drew himself to his full height of five feet, four inches and announced his candidacy in the first post-war presidential campaign. Here is my platform, he announced:

1—I elected I promise not to worry too much.

2—I make the solemn pledge to voters that I shall draw up no involved plans whatever.

3—I shall do what I can about forgetting most of the plans that have been piling up all over the premises.

4—I shall prohibit blueprints in government, and name in my Cabinet only men who have no especially bright ideas about anything, except golf and gin rummy.

5—in the appointment or election of all men to public posts I shall oppose any candidate who has ever been heard to say "Let's try this. It's something novel."

6—I promise an end to regulations and controls.

7—I give the American public my solemn pledge not to peer into the future. I offer my candidacy on a non-peering basis only.

8—I have no definite ideas about the Shape of Things to Come. But I shall do my best to avoid the cruller shape in my personal opinions.

9—I shall be my steadfast aim to respect the past, concentrate on the present and let the future take care of itself.

10—I promise nothing. I think a lot of things have to be left to Providence and all I agree to do is the best I can, which is probably not any too dazzling.

BLACK MARKET STUDIES

He's Mochie the Butchie
Who laughs at the charts,
Ignores OPA and
Loves all the black marts;
A loophole he'll find in
Each rule that is framed;
He'd scuttle the war and
Be quite unashamed.

There's Sadie the lady
Who's with him in crime:
She grabs all the food she
Can grab at one time;
Whatever she hears that
Our troops badly need
She'll go for with vim and
Incredible speed.

And Chubby, her hubby,
He too cramps the war
By stuffing it down and
Then yelling for more;
A trio all out to
Get all that it can . . .
Will somebody rush the
Insecticide man?

1943 VERSION
Mary had a little lamb;
Its fleece was white as snow;
And everywhere the lambkin went
The OPA would go!

Jay Russell.

Why Non-Politicians Go Mad
"The Nickel Plate Road report showed an operating revenue of \$88,742,412, a gain of 47 per cent. Net income was \$27,762,787, the highest in the road's long history. Taxes jumped from \$3,500,000 to almost \$23,000,000.

The net income was \$8,592,438, a decline of 35 per cent in a year."—Newspaper report.

With a bigger year the road might have gone much deeper into the hole.

The first triumph you must gain in a Victory Garden is a victory over the impulse to let it go to the dogs.

The trout season has opened in some states. And rationing has become so much a part of life that when a game warden leaned over a bridge and demanded "What luck?" many a fisherman answered, "Oh, about 16 points worth."

Theme song proposed by Maurice Turet: "Brother, can you spare a point?"

"Remember away back," asks Merrill Chilcote, "when a 'sacrifice' meant a bunt with a man on base?"

Newspaper Man Stuff:

So here's to the gallant reporters,
The boys with the pencils and pads,
Those cool, imperturbable, calm, indisturbable,

Nervy, inquisitive lads.
Each time that we pick up a paper,
Their marvelous deeds we should bless;

Those bold, reprehensible, brave, indispensable
Sensible lads of the press!

—Newman Levy.

City editors are like those you see in the movies . . . They really are . . . Cynical, indifferent and incessantly so-whatty . . . Ask Jim Bishop, one of the Mirror's nimble newspaper sleuths . . . Jim was a witness to this incident many years ago . . . It was one of those lovely tidbits that brightened a dull night . . . Out of the nowhere came a stranger loosely waving a pistol . . . "I wanna see the Fish and Game editor," he said softly, "very important" . . . And so Bishop brought him to the Fish and Game man . . . "I just killed my wife," began the fellow. "I trusted her in a trunk and then I tied up her boy friend in a chair and then I set fire to him. I always liked your column, so I thought I'd give you the scoop."

Bishop and the Fish and Game editor took him over to the city editor . . . Now this city editor is one of those guys who wouldn't blink if Rommel walked in and brought Hitler with him—and he was irked . . . "I'm busy," he said, motioning to his assistant across the slot . . . The murderer was told to repeat his story to the assistant city ed . . . He took a deep breath and rubbed his face, which was scratched like a ten cent ruby . . . As he unfolded the details he kept yanking chunks of wire and rope from his pockets, and waving the pistol . . . The city editor never looked up from the copy he was studying, except to stifle a butt.

"Now with this rope," said the killer, "I tied up her boy friend. And with this wire I strangled her lovely throat. And here is the pistol, you can see for yourself that one bullet is missing" . . . The indifferent city editor, who was still occupied with the dummy of a page, looked up and said to his assistant: "Hey. Think there's anything to this one?"

This actually happened recently in one of the editorial offices . . . There had been rumors again that a shake-up was taking place and that heads would roll . . . One morning a stranger sat at a desk in the corner and answered the phone when it rang and when it wasn't ringing, he just looked around at everybody . . . It gave the staff the screaming jitters . . . Nobody knew just what he was there for and all were afraid to ask . . . Finally, one feature writer engaged him in gab . . . "What is your job around here?" he asked . . . "Oh, I don't work here," was the reply . . . "Well, then," queried the other, "who are you waiting to see?" . . . "Oh," said the stranger, "I'm not waiting to see anyone. My friend works in the advertising department. I'm his insurance agent. He told me I could use this desk."

The reporters down at Police Headquarters are the most colorful, we think . . . They "live" in a shack across the street from the gold braid cops . . . Life is a game of pinocle, a brass bell bonging a second alarm, a slip boy shuffling in with a suicide's name and address or a phone call from the city desk to check on a rumor out of Washington that the Nazis are invading Turkey . . . But what we started out to say was that the kid who brings the morning papers to the niteside reporters there was bawled out by one of them. The boy had forgotten to leave a Times for the irate man . . . The kid said he was very sorry, and that it wouldn't happen again . . . "It better not," barked the reporter. "You know I bring a fish home every morning. What the hell am I gonna wrap it up in?"

My favorite newspaper man story always was the one about the veteran editor, who on Christmas Eve gave these instructions to a cub . . . "Now I want you to go down to the Bowery," said the boss, "and dig up some human interest about those poor unfortunates. Jot down how they enjoyed their Christmas dinner at the mission. Then after you cover the Salvation Army feast for the poor—bring me a couple of hot dogs."

Those are the kind of stories scribes tell each other, at any rate, and they have spellbound newspaper men ever since they got their first assignments . . . Take this one, frixample . . . Nobody's asking you to believe it . . . But take it, anyhow . . . A reporter phoned his city desk about a homicide . . . "The core," he said, "is still at the scene of the crime!"

"Don't you mean corpse?" snarled the rewrite man.

"I certinny don't!" was the retort. "There was only one!"

ON THE HOME FRONT with RUTH WYETH SPEARS

HERE is how you can play Fairy Godmother to a kitchen chair. Pad the back as shown here, using at least three layers of cotton batting for the front of it and one for the back. Next, cut an 18-inch circle of cardboard and use it for a pattern for marking the shape of the round seat on boards or plywood. Cut out the wooden seat and screw it to the chair. Save the cardboard pattern.

Cover the front of the chair back next, tufting it with covered buttons sewn through the back with a long needle. Sew the back of the cover in place with stitches

hidden under welting. Tack a strip of muslin around the seat, and sew the ruffles to it. Now, pad the round cardboard; stretch covering fabric over it; then sew it in place on the chair.

NOTE: Readers are writing to tell us that the new BOOK 9 should be called the Victory Book as it contains so many ways to make pretty things for the home that could not otherwise be had for the duration. Copies are available by mail post-paid for 15 cents. Address:

What Is Inflation?

Do you have excess cash?
You will answer, "No." But
the fact remains that you do.
For almost every wage earner
these days has an income, in
checkbook or pocketbook, well
above the cost of his living,
taxes, insurance and debt re-
payments.

You never actually "bid"
against anybody for a porter-
house steak, but when you take
the spending of all average
Americans as a group, it's a
different story. So it is im-
portant that excess money be
saved rather than used collec-
tively to bid up prices. If it is
spent, instead of saved, prices
soar. . . That's inflation.

Ideally, it should be invested
in Government securities dur-
ing the Second War Loan.
"They give their lives . . .
You lend your money."

Be sure to select the right size
plate for the corn planter. Some
hybrid seed corn companies attach
a tag to each bag of seed recom-
mending the size plate to use.

BETTER IOWA

GARDENS

(A special column prepared for The
Klemme Times by Iowa State
College Specialists)

Tender vegetables may be put in
if it seems that danger of killing
frost is past. The average date for
the state as a whole is May 2. In
northern Iowa, however, it's best
to hold off for a few days, until a-
bout after May 10.

This brings us to the logical time
to plant such vegetables as beans
and sweet corn. Planting them ear-
lier was a gamble and may have
amounted to waste of seed. The
soil in April generally is too cool
for germination. Usually little if
anything is gained by trying to sow
seed of the tender vegetables in
cold soil.

Town gardeners who do not have
a fence or stakes for their pole
beans to climb upon can plant a
tall growing sort of sunflower a-
long the side of the garden, putting
in the seeds anytime now. When
the sunflowers have a good start,
plant several pole beans around
each sunflower.

The earliest maturing sweet corn
varieties should be planted to se-
cure the first roasting ears. Matu-
rity in sweet corn can be hastened
if a phosphate fertilizer is added to
soils deficient in this element.
Home gardeners who prefer not to
make successive plantings can get
some spread of maturity by plant-
ing a mixture of hybrid varieties
including 50 percent Icana and
Golden Cross Bantam.

Gardeners who want choice
sweet corn over a period of about
2 months should make small suc-
cessive plantings of one or two va-
rieties at intervals of about 15 to
20 days until July 15.

Sweet corn should not be planted
close to field corn or popcorn be-
cause both readily cross with the
sweetcorn and cause unevenness of
maturity in the kernels. The early
planting of sweet corn should be
about an inch deep, while midsum-
mer plantings can be from 1½ to
2 inches deep. Have each plant a
foot apart from the next one, with
the rows 3 feet apart.

Edible soybeans may be planted
in the garden in May when other
beans are planted. They need a-
bout the same kind of care as other
garden beans. Bantam is the re-
commended variety for refrigerated
locker storage. Other good ones are
Willom, Hokkaido and Higan.

Pole lima beans are not depend-
able for Iowa climate. Bush limas
should be planted instead. It does
not pay to try to grow the navy
type beans here on a large scale
either, since fall rains stain the
seeds and mold may occur. For
what small seedlings are put in,
Great Northern variety should be
used.

Bible School begins.

To help the protein situation,
Iowa State College workers have
recommended that farmers grow a
few extra acres of soybeans with
the intention of grinding them for
feed.

It's A People's War

We are paying more in taxes
than ever before . . . and likely
will pay more. But we cannot
rely on taxes to finance the war.
It would not be fair to base a
tax on the average single fam-
ily income when many families
have more than one income.
We could borrow all the money
from the banks, but for both
economic and social reasons
this is undesirable. The gov-
ernment would then sacrifice
its greatest dam against infla-
tion. This is a People's War
and the people should finance
it. The people WANT to finance
it. Sale of War Bonds has
mounted consistently since
Pearl Harbor.
They give their lives . . . You
lend your money.

NOTICE OF SPECIAL ELECTION

Notice is hereby given that, in pursu-
ance of a Resolution of the Town
Council of Klemme, Iowa, passed and
adopted on the 19 day of April, 1943,
authorizing and calling a special elec-
tion as herein stated there will be
held throughout the said Town at the
regular polling place therein, as
hereinbelow stated, on the 20 day of
May, 1943, a special election for the
purpose of enabling the legal electors
of said Town to vote for or a-
gainst the approval of Ordinance No.
36, which Ordinance was passed and
adopted by the Town Council of said
Town subject to its approval by the
electors as therein stated, on the 19
day of April, 1943, and is duly re-
corded in the office of the Town
Clerk of said Town, and which Or-
dinance is in exact words and fig-
ures as follows, to-wit:

ORDINANCE NO. 36

AN ORDINANCE AUTHORIZING
CENTRAL STATES ELECTRIC COM-
PANY OF CEDAR RAPIDS, IOWA,
ITS SUCCESSORS OR ASSIGNS,
WITHIN THE TOWN OF KLEMME,
IOWA TO CONSTRUCT, RECON-
STRUCT, MAINTAIN AND OPERATE
AN ELECTRIC LIGHT AND POWER
PLANT AND A SYSTEM FOR THE
TRANSMISSION, DISTRIBUTION, USE
AND SALE OF ELECTRICAL ENER-
GY, INCLUDING THE RIGHT TO
BUILD AND OPERATE A HIGH POT-
ENTIAL, ELECTRIC TRANSMIS-
SION LINE TO AND THROUGH THE
TOWN.

BE IT ORDAINED BY THE TOWN
COUNCIL OF KLEMME, IOWA,
Section One
Permission and authority are hereby
granted for a period of twenty (20)
years from and after the acceptance of
this Ordinance as herein provided to
Central States Electric Company of
Cedar Rapids, Iowa, its successors or
assigns, hereinafter called the Grant-
ee, to construct, reconstruct, main-
tain and operate a plant or plants for
the generation of electricity, and to
enter upon the public streets, alleys,
highways, bridges and public places
within the corporate limits of the Town
of Klemme, Iowa, as the same are now
or may hereafter be extended or lo-
cated, and thereon thereat to construct
and thereafter construct, reconstruct,
maintain and operate a system for the
transmission, distribution use and sale
of electricity, consisting of poles, wire,
conduit and other construction neces-
sary or incident to said system and its
use, including a high potential electric
transmission line to and through the
Town and to sell and furnish electri-
cal energy to the Town and its in-
habitants for all purposes.

Section Two

This Ordinance shall be in full force
and effect from and after the approval
by the legal electors of the Town of
Klemme, Iowa, at a special election
called and held for that purpose, and
the Grantee in writing filed with the Town
Clerk within thirty days from and
after its approval at such election, and
its publication as provided by law.
Passed this 19 day of April, 1943
ATTEST:

A. J. KUDJE Town Clerk
J. E. STILLE Mayor

The polling place for said special
election shall be as follows to-wit:
COMMUNITY BUILDING,
KLEMME, IOWA

The polls shall be opened at 8 o'clock
A. M. and shall close at 8 o'clock P.
M.
Dated this 19 day of April, 1943
ATTEST:

A. J. KUDJE Town Clerk
J. E. STILLE Mayor

(Publish April 21-28, May 5-12, 1943)

Birth Rate of Indians Shows Upward Trend

The Indian is no longer the "van-
ishing American," for his birth rate
is increasing faster than the white
man's, western Indian service of-
ficials disclosed in Salt Lake City
recently.

The Indian birth rate in Utah
alone is three times the national
average for all races and in other
parts of the United States is even
higher, C. C. Wright, superintendent
of the Uintah and Ouray agency at
Fort Duchesne, Utah, said.

The birth rate among the Utes
and Piutes under jurisdiction of the
Indian service is 55.4 per 1,000 popu-
lation, while the national average
for all peoples is 16.7 per 1,000.

Another cause for the Indian's
revival as a race was attributed to
modern science. While the white
man's death rate remains about the
same from year to year, improved
methods of sanitation, care of ma-
ternity cases, control of children's
diseases, and improved economic
conditions are slashing the Indian's
death frequency.

Addressing a meeting of Indian
service officials, Joseph C. McCask-
ill, assistant United States commis-
sioner of Indian affairs, said that
no group in the United States had
a higher rate of natural increase
than the full-blooded Indian. The
Navajos of southern Utah and
northern Arizona are increasing
faster than any other race in the
nation.

The Indian population of the United
States reached its lowest ebb be-
tween 1900 and 1910, McCaskill de-
clared. Since then the population
curve has taken a sudden upward
swing.

Figures show that the rate of in-
termarriage has greatly decreased
within the last few years and Mc-
Caskill predicted the 1940 census
would reveal an almost complete end
of intermarriage and a building up
of the full population.

'It's a Long, Long Trail'

Through National Forests

If a motorist set out this year to
travel all of the highways and truck
trails in the 160 national forests, it
would take more than four months
of steady driving, 12 hours a day,
at an average of a little better than
40 miles an hour.

Then if he stopped driving and
set off to walk the trails which are
used by fire fighters, sheepherders,
cattlemen, recreationists, and oth-
ers of the millions of visitors to
the national forests each year, it
would take a little more than 15
years traveling 20 miles a day, says
the forest service, United States de-
partment of agriculture.

Even then the visitor would not
have seen all of the 273,000 square
miles of Uncle Sam's forest lands,
although he would have passed some
of the 70,000 miles of trout streams
and many of the thousands of lakes
and would have visited all of the
3,600 developed camping and picnic
grounds.

Reptile Roommates

Harvey Camin, 17, of Cleveland,
Ohio, has been keeping snakes in
his rooms since he was four years
old and now sleeps with a number
of the reptiles, their cages less than
a foot from his head. "My snakes
don't hurt me," he said, permitting
a Georgia cornsnake to coil itself
about his neck. "If one should hap-
pen to bite me I just pour a little
kerosene on the wound." Harvey
watches his pets in their homemade
orange-crates cages and keeps a
book on the reptiles' feeding, intelli-
gence, mating, growth, drinking
and peculiarities.

Harvey also has a horned lizard
from the Mojave desert, a leopard
lizard, three turtles, one crocodile
and a number of frogs.

Parents were an obstacle to Har-
vey's collection for years, but
they've become used to the idea
now.

Hiking at Age 75

To Niles Smith of Massillon, Ohio,
who is 75 years old, a 20-mile hike
each day is "good exercise." A
hiking for window-shopping is the
reason for Smith's daily jaunts. He
lives almost exactly half-way be-
tween the downtown sections of
Massillon and Canton, on the Lincoln
highway. Since he has difficulty in
deciding which city to visit, he often
compromises and looks at the shops
in both. Streetcars, Smith explains,
are not for him. "If you have any
regard for your health," he says,
"you'll walk." The secret of health-
ful walking, according to Smith, is
to swing your arms. "Exercise
every muscle in your body," he ad-
vises, "and you'll drive out all the
poisons in your body and probably
live happily ever after."

Modernized Farm Bathrooms

In thousands of farm houses
throughout the country the many
benefits and advantages of running
water under pressure are being
made available through the swift
advance of rural electrification. The
bathroom in the farm home can
now be just as up-to-date and at-
tractive as the bathroom in the city
home. With the installation of an
electric water system, not only may
the bathroom be modernized but
washrooms and lavatories for the
hired hands may also be easily im-
proved. When the bathroom is lo-
cated on the second floor it is wise
to provide the first floor washroom
with a lavatory and a shower com-
partment.

WHERE THE FOOD GOES

Here's where the food goes. 35
percent of the canned food products
of the United States goes to the
armed services, Lend-Lease ship-
ments and the national food re-
serve. Furthermore, at least 552
million pounds of foodstuffs and
other farm commodities were deliv-
ered for shipment to Allied Na-
tions in a single month at the end
of 1942. These foodstuffs consisted
mainly of concentrated foods and
animal protein products.

HAD HOME GROWN FOR EASTER SUPPER

Monday Mrs. Roy Schaefer had
a nice, ripe tomato to thank for
long with a note which read:
"is a sample of the 1943
crop. We had some for
Easter and have a couple
getting ripe."

And, that is really
Home grown tomatoes for
the season is really a
Iowa. We venture to say
Schaefer will have a fine
Garden this summer.

SENIOR CLASS NEWS

Anna Lee Brunes, Reporter

We, the members of the Senior Class, have been preparing for the final test of our school year. We've finally reached that long looked for last week of school, and it will probably be our busiest. The Seniors seem to be very popular lately for everyone is asking them for cards. We received our announcements from the Times Print Shop Friday. American Literature class has been reading plays. A committee chooses characters and each day they are different. In Physics we are finishing the chapter on Light.

JUNIOR CLASS NEWS

Larry Van Syoc, Reporter

This week we spent in final preparation for our Banquet. The decorations resembled an army camp "Typist's Tattler," our typing paper has been completed. The copies were distributed this week on Monday. In Biology we are studying diseases and their prevention and cures. Wednesday we had a test. We are nearly done with our English Literature book. Now we are reading prose. The American Government class is studying Education in the United States. Iowa has the least number of illiterate persons in all of the States.

SOPHOMORE NEWS

Marjorie Hartbeck, Reporter

In English this week we have continued reading "As You Like It" by Shakespeare. We have read most of it in class, each person is reading the part of some character. This last week we studied about diseases in Biology. Now we are reading articles on different drugs and habits. We have finished our reports on Scientists. Algebra has been rather difficult this last week since we have spent most of the week solving problems. One of the members of our class was ill this past week.

FRESHMAN CLASS NEWS

Elwyn Etchen, Reporter

Ruth is taking special interest in a Sophomore boy. I wonder why? Ronald is always teasing the girls in English. He's been at it too long to get caught. Lowell is always having fun in the study hall. He says he's got to have some fun before he joins the Junior Commandos. Robert has taken a special interest in fighting. He recently took an upper classman.

GETTING BACK TO SCHOOL

The Algebra class is studying Complex Fractions. We have been wondering why Lowell thinks that a difficulty. We are expecting a test in English over Caesar. Ronald thinks it's awful dry. The Science Class was gifted with a test Thursday. It was a test on the Body. The Manual Training boys are learning how to put on French shellac. The Home Economics girls are sewing and are still working on dresses. (They put the stitches in backwards. No wonder the Red Cross won't accept them to work.)

Grade News

SEVENTH AND EIGHTH GRADE NEWS

Clara Smith, Teacher
Elizabeth Goll, Reporter

Again we have some pupils out of school because of illness. Peggy and Mary are both out due to illness. We are completing our Work Sheets in Civics on the Government of the United States. Many of the boys wanted to help

you think they would have helped, or only wanted an excuse to get out of school?

Spelling Honor Roll

Those who got an O. K. in Spelling this week were:
Roger Ridder, Marcille, Betty, Irene, Bob, Harold, Helen S. and Darwin.

FIFTH AND SIXTH GRADE NEWS

Esther Bolles, Teacher

We are reading the "Secret Garden" for Literature. In Art we are making May Baskets. Marvin Schmidt celebrated his birthday on April 19th.

Spelling Honor Roll

For April 19th:
Marvin, Luella, John, Iris, Norma, Maurice, Larry, Marjorie and Robert.

This Week's Honor Roll:

Marvin, Luella, Willis, Maurice, Marjorie, Norma, Iris and Larry.

We bought \$17.50 worth of War Stamps this week.

THIRD AND FOURTH GRADE NEWS

Evelyn Guelff, Teacher

We had seven visitors in our room this week. They were baby chicks that boys and girls received for Easter. Jo Ann and Janice each brought one; Darlene brought two, and Norene brought three. We enjoyed watching them very much. This week we have been making May Baskets in Art. We have some very pretty ones. The Fourth Grade gave a play for the 3rd grade this week. It was about Daniel Boone and the Indians.

Spelling Honor Roll

The following had perfect scores in Spelling this week:
Jimmy, Maxine, Lucille, Maralee, Darlene, Harley, Jo Ann, La Nelle, Audra, Ruth, Norene, Beverly and Richard.

We set \$12.00 as our goal for War Stamps this week but we bought \$18.45 worth!

PRIMARY ROOM NEWS

Virgie Hardcopf, Teacher

Many of the boys and girls gave and received May baskets on Friday. We have had only about one-half of the girls and boys here this week. We are sorry so many are ill. We hope everybody will soon be well and back in school. Roger was seven years old Friday. He treated us to candy. Elaine was eight years old Friday and she treated us. We sang the birthday song and colored birthday cakes which we gave to them. David Waddingham visited in our room Friday. His birthday was that day too. He was five years old.

Spelling Honor Roll

Ronald, Janice, Bonnie, Roger, Lois Ann, Billy, and Elaine.

SEAMAN NORMAN LAU HOME ON FURLOUGH

Norman Lau, stationed at the U. S. Naval Base at Norfolk, Virginia, arrived home Sunday morning for a short furlough to visit his parents, Mr. and Mrs. August Lau of Liberty township. Norman has attained the rank of Petty Officer, 3-c and is an aviation metalsmith. He returns to his base Thursday.

CADET "DODE" GRANGE HAS NEW ADDRESS

Aviation Cadet Dorance Grange has a new address which we print so that his letters from here will reach him sooner:
A-C Dorance S Grange, Group 21, Sqdn. 2, Flight A-1, A A F P S (Pilot) S A A T C, San Antonio, Texas. "Dode" is doing alright, too, at the pre-flight school as he acts as flight lieutenant and has charge of forty-six men.

Marine Describes His First 'Look at Infinity'

The earth resembles a relief map from 11 1/2 miles in the sky, according to Lieut. Col. Chester L. Fordney of the marine corps.

Colonel Fordney, who made a trip into the stratosphere with Commander T. G. W. Settle, navy balloonist, in 1933, says that no rivers, lakes or highways were visible but that mountains could be distinguished.

"At times we would lose the image of the earth far below us," said Colonel Fordney. "Clouds looked like a white carpet with blue toward the horizon.

"The stratosphere sky is a beautiful blue as one looks into the space above. It was so inspiring that I later described it as my first look at infinity. It was a sight that gave me my first real conception of space."

Colonel Fordney reports that the radiant energy of the sun is so intense in the stratosphere that outside temperature at the top of the balloon's gondola, which was painted white, a color that reflects heat, was exactly zero, while at the bottom of the gondola, which was painted black a color that absorbs heat, the temperature reading was 104.5 degrees above zero.

There was no sensation of motion in the stratosphere although the instruments showed the balloon was rising at a speed of 120 miles an hour after passing the 35,000 foot mark, where the stratosphere begins, the marine corps officer stated.

Descent from the peak began as gas in the balloon cooled and contracted. The balloon dropped from the 50,000 mark to 800 feet in 40 minutes, or at a speed three times as great as that of a modern express passenger elevator.

Dean Advises Workers Be Given Personality Test

Need for new types of personality tests to show why workers are or are not fitted for certain types of employment was pointed out by the dean of the school of education, Pennsylvania State college.

"A large proportion of workers who are fired from industrial jobs are well trained and fully able to do their work, but they have personality difficulties," Dean Trabue said recently in speaking before the National Vocational Guidance association meeting in San Francisco. Neither interviews nor letters of recommendation give adequate indications of the necessary personality traits, he explained. The interviewer's own personality often interferes with an objective estimate, and different interviewers frequently disagree about the applicant's qualifications. Similar objections can be made to recommendations.

While a number of good personality tests have been devised, Dean Trabue declared that some of these merely attempt to discover abnormalities and complexes rather than fitness for a particular job. Reliable tests which give more information about normal workers in current industrial occupations would undoubtedly contribute to greater efficiency in our war effort.

Army Buys Race Horses

Horses which once thrilled the crowds at Santa Anita race track in California, and ponies which thundered across the polo fields have now joined the army, the war department announced. Nine horses, the pick of more than 125 recently inspected at the Santa Anita track by the remount division of the quartermaster corps were purchased for about \$700 each and will be sent to various depots throughout the country to be used for breeding purposes. Following the outbreak of war, horse racing was abandoned on the West coast, and many owners offered to sell their stables to the war department. The remount division is planning to purchase more race horses for breeding purposes.

Michigan 'Building Bees'

Old-fashioned "building bees" to encourage the improvement of rural shelter in the cut-over section of northern Michigan are being encouraged by the U. S. department of agriculture. The idea is to demonstrate to low-income farmers how run-down properties can be improved at small cost when neighbors work together.

A companion plan calls for the finding of part-time employment for those farmers whose land cannot adequately support the family. Farmers will be encouraged to seek outside income through part-time employment in reforestation, in fire control, and in lumbering on publicly or privately owned lands.

Whipping Post in Maryland

The customary punishment of whipping as a penalty for crime, part of the common law of England, was adopted by Maryland in its first constitution in 1776 and continued through all successive constitutions of the state down to the constitution of 1864, and then it was removed from the statute books, not by direct appeal, but by force of the Constitutional Amendment abolishing slavery.

The only crime for which the whipping post can be applied in Maryland now is for brutal assault on wife, under the Act of 1882, chapter 120, codified in 1939 code, section 11, article 27.

MRS. RAMSAY HOSTESS TO U-DELT-EM CLUB

Mrs. H. D. Ramsay entertained the members of the U-Delt-Em club at her home last Thursday afternoon where the ladies enjoyed contract bridge.

Mrs. George Lawhorn won high score, Mrs. P. M. Wilson, second high and Mrs. Fred J. Arnold, third high score.

MARCH OF TIME

Farmer Plots Crop Acreage Under New AAA Program; Agency to Assist Drive To Meet Record Wartime Production

Committeemen Will Carry Grievances to War Boards; Goal Is to Raise Yields Per Acre; All Problems Will Be Dealt With on Local Basis.

The 1943 farmer is on his honor!

Like the boy taking an examination at school, it's up to him and him alone. He's strictly "on his own."

Under the 1943 agricultural adjustment agency plan, the farmer for the first time has the full responsibility for measuring his acreages on specific crops and reporting the results he gets. Formerly this was done by AAA employees, but the new scheme will conserve travel, cut down wear and tear on tires and cars, and decrease the use of gas and oil.

Now it is up to the farmer to check on his own fields.

He appears to be happy about this change in program administration, department of agriculture reports show. While AAA committeemen — themselves farmers — will continue to give him every assistance, the responsibility for carrying out production plans and doing his share in the national program rests with the individual operator.

Spot checks will be made periodically to determine the status of community and county production, and farmers are being asked to keep records and lay out their crops so that reports can be made easily and quickly.

Goals this year call for about 5 per cent more production than in 1942. Basis for the 1943 AAA program to reach these goals is "local action." It recognizes that the job of production adjustment — of shifting crops to meet war needs and planning acreage to the best advantage — must be worked out and carried out on the individual farms. It can't be done in Washington, say the committeemen. It must be done locally, to conform to the local situation.

Instead of a national over-all goal "formula," each state and county has been left free to adopt the means which seem best suited to the particular section concerned. Wide latitude is given the committeemen in making goal assignments. They are not only allowed to determine such assignments on a "capacity of the farmer to produce" basis. They are expected to use such a yardstick.

Capacity to produce varies according to the character of the farm land, machinery and labor available, and many other factors. Each region has its individual problems which must be taken into consideration in determining what the specific area may reasonably do in a given period.

AAA Committeemen Will Keep Government Informed

The role of the AAA committeemen will be that of an important go-between who keeps the government informed on the farmer's progress and problems, and the farmer informed on what the government

ternates. County committees totaled 3,029 with 9,067 members. The county committeemen are responsible to the state offices, which in turn report to the regional offices. Uncle Sam's millions of farms depend upon the AAA committeemen to keep them informed of changing phases of the over-all national program, of the state's particular part in the 1943 farm plan, and of the numerous details having to do with production goals and how they can be met.

AAA county chairmen are also chairmen of the County Farm Transportation committees, which issue certificates of war necessity for mileage rationing, and the County Farm Machinery Rationing committees, which ration many types of farm equipment. In the matter of labor shortage, the community committeemen report localized needs to the county committee and war board chairman, the latter then carrying the problems on to the proper authorities.

Chairmen of AAA state and county committees head up the war boards which correlate the efforts of department of agriculture agencies to assist farmers in their war production.

Getting the right fields into the right kind of production and getting higher yields out of every acre through better farming practices is the basic theme of the committeemen's work in 1943.

Committeemen Will Help Arrange Cooperative Action

Among his activities is helping to arrange co-operative use of scarce machinery and co-operative transportation programs. Many localities already have worked out successful schemes for sharing trucks

Mr. Farmer's on his own.

and trailers, as well as binders, combines, picking machines and other mechanical aids to planting and harvesting essential war crops. Facilities for storage of crops are sometimes another item for him to handle.

Assistance in the various loan and purchase programs instituted by the Food Distribution Administration and Commodity Credit Corporation is made available through the AAA committeemen. Increased production of peanuts, soybeans, hemp (under a special program), castor bean seed, Irish potatoes, and many other crops has been greatly aided by such programs. New applications for insurance on the 1943 cotton crop will be handled by the committeemen, and he will in addition keep farmers informed of the availability of loans, insurance and payments under the program.

Program objectives of AAA also vary in certain instances from past planning. Emphasis is falling still more heavily on the need for better yields per acre. To achieve this, more attention is being given to production practices which immediately increase yields.

All-out activity in the use of lime and phosphate, contour cultivation and terracing, for example, is being urged. Over three-fourths of 1943 production practice payment funds for the country as a whole will be used to promote such "quick" helps to better crops. In the East Central region, about 80 per cent of such payments are going for promotion of this immediate-yield program.

Production practices, reports show, are feeling the "localizing" influence just as are other branches of the AAA program. Formerly the rates of payment for different practices were worked out on what might be termed a national basis. This year the various regions determine the soil building allowances for the farms in their particular areas, with relation to the particular problems involved. In the Southern region each state has its own basis for determining soil building allowances.

Reason for this localization is obvious. Production practices may be

more easily adapted to the individual areas and the individual farms within them. In turn, available funds may be used to the best advantage and with the greatest efficiency.

Acreage limitations have been removed on a number of crops which previously had such limits. Except for short staple cotton, tobacco and perhaps one or two other crops, farmers are freed to exceed their goals in 1943. This is particularly

Will aid cooperative plans.

true of dairy products and meat.

Goals for most crops are minimums, calculated as the least possible amount which will keep the national efficiency at a reasonable level, and at the same time provide for the armed services and war plant workers and give assistance to America's Allies.

AAA committeemen and the farmers, working hand in hand, are doing their best to develop and carry through the most efficient and productive individual farm programs they can. Problems of every sort stand in their way — labor, machinery, transportation and material shortages being paramount.

By their close personal co-operation, however, they make possible an equally close relationship between the farmer and his government.

America's farmers have a tremendous production job ahead of them. Demands for food such as they are now attempting to fill have never before been made upon any nation. Last year they upped production 12 per cent over '41. Another 5 per cent increase is hoped for in '43.

Grandma Learns Blueprinting in Aircraft School

In San Diego there's one school in a great building left over from the San Diego exposition — another in a church — another even in a once-vacant storeroom. They're crammed with students the like of which has never been seen before.

Two grandmothers, one white haired, the other pink-cheeked and marcelled, bend together with compass and rulers over adjoining desks. They are both learning to be mechanical draftsmen, to turn out their share of the ten acres of blueprints required to build a single flying battleship.

"How on earth," you ask the Consolidated Vultee teacher, "do you manage to guess that a grandmother can learn some engineering, when she decides she wants to help in the war?"

"It's not so difficult at that," you are told. "First we look for evidence of artistic talent. Perhaps a woman has done painting, or drawing, or fine arts design. Perhaps she laid a career aside to bring up a family. If she can draw, and if she is intelligent, we can easily teach her mechanical draftsmanship. She is straight on her way into the engineering department."

In California, where the airframe industry of the nation centers, literally hundreds of thousands of people have gone to school, and are today at work doing precision jobs. Most of them were never before in a factory.

In an age that has been called revolutionary, here we have the real revolution.

The lure of wartime money is not enough to have done this. In San Diego, for instance, Consolidated early realized that the sort of workers needed must be appealed to on the basis of their patriotic willingness to serve.

Kentucky Once Was Center of U. S. Hemp Industry

Government plans to grow nearly half a million tons of hemp annually promise to restore to Kentucky the hemp industry for which the state was first distinguished.

Kentucky's blue grass section was adapted to hemp. Seed had come to the Colonies from Europe. Virginia supplied Kentucky's early planters. In time practically all hemp in the United States was grown from Kentucky seed. A generation

ago, the state was still producing nearly a quarter million pounds of seed a year. Grown for its fiber, the hemp shoots up seven to ten feet, and 14 feet when cultivated for seed.

Homespun cloth was woven from the fiber by wives and daughters of settlers. A later use of the fiber included the making of bagging, cotton baling, rope and sailcloth. Early in the last century Kentucky had a dozen mills making hemp bagging;

40 producing hemp rope for fast clipper ships and other merchantmen, and for the growing U. S. navy. Lexington was a market for hempen goods.

Foreign competition cut domestic output. Abaca, so-called manila hemp, from a plant of the banana family, made better rope at less cost. Jute supplanted hemp for many uses. Also Kentucky planters found tobacco a more profitable crop to raise.

Washington, D. C.

FOOD AND PAY-AS-YOU-GO

Although food was supposed to be the chief topic of discussion at the recent White House conference with farm leaders, actually Foodczar Chester Davis did his best to sell the President on pay-as-you-go taxation. He proposed it as an anti-inflation measure to drain off surplus income and ease the work of income tax payment on the average citizen.

"We have simply got to come to it Mr. President," argued the food czar. "It was unfortunate that pay-as-you-go taxes were given a black eye by the Rumi plan. But pay-as-you-go taxes should go hand in hand with rationing to prevent overspending."

The President didn't commit himself definitely, but indicated that he would favor a pay-go plan if windfalls to the wealthy, as provided for in the Rumi plan, were completely eliminated.

Ed O'Neal, president of the Farm Bureau Federation, and Ezra T. Benson, executive secretary of the National Council of Farmer Co-operatives, also took up the cudgels, O'Neal contending that taxpayers wouldn't be able to meet next year's assessments unless the pay-as-you-go plan or forced saving were adopted.

G.O.P. Watching Chances.

"I've made a poll of taxicab drivers and they are all for it," said O'Neal. "The great majority of the American people feel the same way. They are against windfalls but they feel they won't have enough money to pay their income tax payment next year. If the administration doesn't take some action on this, the Republicans will steal the ball from you."

"That's right, Mr. President," chimed in Benson. "The farmers in my organization are overwhelmingly for a pay-as-you-go tax program. I think labor is, too."

"Maybe you're right," responded the President. "Chester (to Davis), I suggest that you talk this over with congressional leaders."

The conversation then turned to farm distribution and the President drew on his own experience as a farmer to illustrate the difficulty "little farmers" are having getting their crops to market.

"I used to raise 100 barrels of apples every year on my Dutchess county farm in New York," the President said. "I also raise some apples on my land in Georgia."

Apple Competition.

The President grinned to Albert Goss, master of the National Grange who hails from Washington, the biggest apple-producing state in the country. "I'd stack my apples up against those you produce in Washington any day."

"You're getting out of your class, Mr. President," smiled Goss. "Have you ever eaten a Delicious?"

"You win, Albert," chuckled the President, "but the point I am trying to make is this — little farmers like myself, and the same goes for all other farmers who don't have the advantage of co-operatives, have encountered a lot of difficulty marketing their crops and getting their money since the war began because of the transportation problem and other factors."

"Don't you think the government should step in and buy up apples and other products that have been running into distribution troubles and store them in the warehouses?" the President asked Goss. "It would take a lot off the market and help many little farmers who are hard up for cash."

Helping Little Farmer.

"I don't agree with you, Mr. President," replied Goss. "I think the way to protect the little farmers is by continuing the agriculture department 'support price' program. Farmers can get along if they are assured that they can get fair prices and a decent break on priorities for machinery to produce their crops. I don't think the government should buy up and sell farm products when there is no necessity for it."

The President meditated for a moment and replied "I guess you're right at that."

The meeting also thrashed out the question of price ceilings. Ed O'Neal of the Farm Bureau and Albert Goss of the Grange contending that if rationing were tight enough it wouldn't be necessary to have price ceilings, that rationing would automatically take care of prices. Justice Byrnes, Chester Davis and Jim Patton of the Farmers Union argued to the contrary. The President decided with them.

His order shortly thereafter putting price ceilings on almost everything was the chief result of the meeting.

MERRY-GO-ROUND

Ambassador John G. Winant has provided an apartment in London for six American soldiers wounded in action with the British Eighth army in Egypt. Three are Harvard men, three from Dartmouth. The six graduated as the top six in a British officers training school before going to Egypt with the British 60th regiment. This is the famous regiment which in Revolutionary times was withdrawn from action in America because it was too friendly to the colonial cause.

Flying Fortress Dishes It Out

By Capt. Clyde B. Walker

(WNU Feature—Through special arrangement with The American Magazine.)

We were carrying some mighty heavy stuff for Jerry in our big Flying Fortress.

Leaving our home field in England at six o'clock in the morning, our objective was the submarine pens at Lorient, France.

As we approached, somebody yelled "Flak!" and the anti-aircraft shells broke around us. At the same time the ball turret gunner shouted "Wolves coming up!" He had sighted a dozen German fighters, Focke-Wulf 190s, climbing fast from downstairs.

I held the ship steady on her course. A few seconds later Bombardier Bentinck pressed his bomb triggers. The giant bombs hit exactly where he had aimed them, in the middle of a platform between two submarine pens.

"Bull's-eye!" he whooped over the intercom. I never heard anyone sound so jubilant. Those were the last words Bentinck ever spoke. The next second, everything hit us at once. Things started happening much faster than I can tell them.

FW's Take Us On.

We were raked from end to end with flak. At the same time a swarm of FW's dived out of the sun. They came in like hornets, with 20-millimeter cannon and machine guns wide open.

One burst of flak ripped into the nose. It killed Bentinck instantly. The same burst wounded Navigator Smith and knocked him unconscious.

A second burst ripped away the doors of the bomb bay. Another burst sprayed around Co-pilot Bill Reed and myself.

That wasn't half of it. Krucher, in the tail, had been hit. A cannon shell had torn a big hole in the ball turret. Radio Operator Frishholz had a flak hole in the back of his head, and the radio room was on fire.

No. 1 Engine Is Out.

The first broadside of flak smashed the drive shaft of No. 1 engine. The No. 2 had been hit on top and was throwing oil. It might catch fire any second. Flak had knocked a big dent in the propeller of No. 3, and No. 4 had a big hole in its base. I carried on with 3 and 4. The ship staggered and started falling behind the rest of the squadron. I put the nose down and dived steeply for the cover of some clouds far below us.

FW's Close In For Kill.

Seeing we were badly hurt, the FW's closed in for the kill. Then the boat really lived up to her name of Flying Fortress. We took plenty during the next 60 seconds, but not half as much as we wished out.

My waist gunner, Bill Stroud, took care of the first one. It was so close that he could see the back of the pilot's head. Stroud poured a stream of bullets into him. The FW went into a spin, and Stroud followed him with burst after burst.

A moment later another Jerry came under his sights. He poured steel into him, saw him break up.

Right waist gunner Berring was pumping 50-caliber slugs at range. He, too, got a "probable," a red-nosed FW which spun down and out of sight.

Meanwhile the wounded tail gunner got a chance. While he was lying back there losing blood, an FW roared in to finish him off. Krucher took steady aim and rapped out one long burst. It literally sawed the German's wing off. He went down in flames.

With the wind shrieking through the flak holes, we raced down, down, for that beautiful layer of clouds. We made it. The remaining FW's didn't attempt to follow us into the clouds.

Somehow or other, we limped home on our two engines and landed at an English airport near the coast. Our wounded went to the hospital, and have now recovered.

Bentinck — as great a bombardier as ever served in any man's army — was gone, but the other nine of us will soon be flying again.

Our trip back was as big an adventure as our fight with the FW's. Coming out of the cloud cover, we were down to 600 feet when we saw the ocean again, then a large town, which I recognized as Brest, one of the most strongly fortified places in France.

I pointed the ship straight over Brest. We were so low that we could see people staring up at us, but there were no fireworks.

Crossing the harbor, we passed right between two German destroyers at anchor. They could have blasted us to blazes.

KEEP your home attractive through Spring and Summer with airy, cool-looking curtains. Use inexpensive materials: theatrical gauze, fish-net, sheers. Even unbleached muslin will do for those shown. So easy to make, too.

Pattern 7413 contains all instructions for making curtains and drapes in styles.

Due to an unusually large demand for current war conditions, slightly more is required in filling orders for the most popular pattern numbers.

Send your order to:

Sewing Circle Needlecraft Dept.
82 Eighth Ave. New York
Enclose 15 cents (plus one cent cover cost of mailing) for Pattern 7413.
Name
Address

When the soldier talks about "skipper" he means his captain. The head of his company is that's just what the title "captain" means. It comes from the word "caput" meaning "head." Another leader high in the man's favor is Camel cigarettes. They're first choice with the Army. (Based on actual records from service men's stores.) When you're sending from home, keep in mind the carton of cigarettes is always welcome. And though there are Post Office restrictions on packages to overseas Army men, can still send Camels to soldiers in the U. S., and to men in Navy, Marines, and Coast Guard wherever they are — Adv.

SNAPPY FACT ABOUT RUBBER

Stout chains and padlocks are made of rubber. Each of the four wheels of a truck has a rubber bumper. A rubber bumper is a man's car when it parks in the streets at night. It was not until 1916 that the U.S. made its first annual appropriation for Federal aid highway, good roads, good automobiles and good tires are companion necessities of modern motoring. It is generally believed that speeds below 35 mph are safe, whether front or rear, not particularly dangerous, but not particularly safe. Another good reason for keeping to the rubber-riding mph limit! In return for their stimulated growing and collecting activities, the United States has agreed to pay South and Central American countries from 33 to 45 cents a pound of rubber until the end of 1946. Before government price fixing, rubber was selling in the U.S. at 22 1/2 cents a pound.

In war or peace
B.F. Goodrich
FIRST IN RUBBER

It is not advisable to apply lime to the garden soil unless a chemical test shows that lime is needed.

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mrs. P. M. Wilson was visiting with friends at Clarion Tuesday.

Bring in your Electric Fans for overhaul and repair before the hot weather sets in. Lewis Radio Inc.

Walter Eisberg and family of north of Garner, were Klemme visitors Saturday evening.

Mrs. Henry Voetberg of Garner was a business caller in Klemme Saturday.

Look for Larson Clothing Co. advertisement in this issue of The Klemme Times.

Mr. and Mrs. John Micklick and son, Bobbie, were business callers at Hanlontown Saturday afternoon.

Mr. and Mrs. H. D. Ramsay entertained friends from Webster City to dinner, Sunday.

Mrs. Daisy Lemke spent Tuesday visiting with her daughter, Mrs. Vernon McLaughlin near Belmond.

The annual Bible School will begin at the Reformed Church on Monday, May 17th.

Mrs. H. W. Adams came Tuesday morning from Missouri Valley for a visit with her son-in-law, Wesley Patterson and family.

Mr. and Mrs. John Day took Grandma Smith to Clear Lake Saturday afternoon where she will visit at the Bert Mathews home.

C. A. Larsen improved his private office at his place of business by having venetian blinds installed the past week.

We are glad to report that Henry Helps, who has been ill for several weeks, is greatly improved and is able to be out of doors on warm days.

Mrs. Frank Gruetzmacher and daughter, Miss Glenna, of Madrid, were in Klemme Saturday on a business mission and visiting with relatives and friends.

Saturday evening was a busy time for the kiddies in Klemme as it was May Basket Time and they were busy hanging up baskets and receiving them from their friends.

Mrs. Frances Ridder returned this Wednesday morning from Chicago where she visited for a few weeks with her daughters and their families. Mrs. S. A. Harvey and Mrs. Walter Beatty.

Max Mace, farmer living south of Klemme, has been bedfast for the past ten weeks. However, we are glad to report that Mr. Mace is improving at this writing and is feeling much better.

Emil Patet began his new duties as janitor at the Klemme Methodist Church May 1st. Mr. Frank Ward, who has been the janitor for several years, resigned several weeks ago, effective May 1st.

Charles Bock, son of Mr. and Mrs. Phillip Bock of Klemme, has volunteered to serve in the U. S. Army and will leave next Tuesday for Des Moines to take his physical examination.

Mr. and Mrs. Wesley Patterson and baby daughter, Ferrol Paige, Miss Evelyn Gueff, and Mr. and Mrs. E. G. Gregory were dinner guests Sunday noon at the home of Mr. and Mrs. Keith Albertson and son, Jimmy.

Iowa is experiencing a rather cold spring. The past week north Iowa has had several light frosts and the weather stays cold, in fact, too cold to please the farmers who are anxious for warm weather for corn planting.

Miss Virgie Hardcopf is a patient at the Park Hospital at Mason City where she went the first of this week for a minor operation. Mrs. Wesley Patterson is teaching for her this week.

Mr. and Mrs. Jim Pavey of Garrison, Iowa, and son Tom of the U. S. Army of Ft. Leonard Wood, Mo. visited at the W. F. Pavey home on Sunday. In the afternoon Mr. and Mrs. Wallace Pavey and their company drove to Hampton for a visit at the home of a cousin, Earl Petham.

Mrs. Bertha Schlei moved in from her farm the first part of the week and is getting settled in her house two blocks south of the Wilson drug store. Her son, Dale and wife are living on her farm southwest of town.

Walter Kimball closed his harness and shoe store here Saturday night, and Sunday Mr. and Mrs. Kimball went to Boone where Mr. Kimball is now employed in a shoe repair shop. The Kimball children will remain in Klemme until the close of school.

Rev. Calvin Grosshuesch and Mr. John Merders drove to Burlington, Iowa, Tuesday to take in the Iowa Synod meeting of the Reformed and Evangelical Church. The Synod closes Thursday. They will visit with Miss Gertrude Grosshuesch at Marshalltown before returning to Klemme. Miss Grosshuesch is taking nurses training at a Marshalltown hospital.

THE 2ND WAR LOAN DRIVE IS ON

How to invest in "fighting dollars!"

"Lend more money to help carry on the fight! That's what our government is

asking you and all the rest of us ... asking us to lend it 13 billion fighting dollars in the next few weeks! 13 billion extra dollars—over and above all regular War Bond buying!

We can do it ... we must do it ... we owe it to our boys who are fighting overseas. For their sake ...

We've got to build more ships! We broke all records last year when we built 8 million tons of shipping. This year, we're building 18 million tons ... but still it is not enough!

We've got to do more fighting! More and more of our soldiers and sailors are going into actual combat ... requiring more equipment, and more supplies. We cannot let them down!

We've got to buy more War Bonds! To help pay for the things our fight-

ing men need ... we've got to buy War Bonds as we never bought them before!

In the next few weeks you may be visited by one of the thousands of men and women who are giving their time and effort to the 2nd War Loan Drive. Welcome these patriotic workers if they call ... buy from them all the War Bonds you can!

Better still, don't wait for them. Go to your nearest bank, post office, or War Bond booth, and invest more fighting dollars now! It's the least you can do to help those who are fighting and dying overseas!

Among the 7 different kinds of U. S. Government securities is one that exactly fits your own particular purse and requirements. These securities are the finest investment in the world ... bar none! For your Country's sake ... for your own sake ... invest all you can!

YOU WOMEN WHO SUFFER FROM HOT FLASHES

If you suffer from hot flashes, dizziness, distress of "irregularities", are weak, nervous, irritable, blue at times—due to the functional "middle-age" period in a woman's life—try Lydia E. Pinkham's Vegetable Compound—the best-known medicine you can buy today that is made especially for women. Pinkham's Compound has helped thousands upon thousands of women to relieve such annoying symptoms of kidney or bladder disorder as some times burning, scanty or too frequent urination. Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

DOAN'S PILLS

That Nagging Backache

May Warn of Disordered Kidney Action

Modern life with its hurry and very irregular habits, improper eating and drinking—its risk of exposure and infection—throws heavy strain on the work of the kidneys. They are apt to become over-taxed and fail to filter excess acid and other impurities from the life-giving blood.

You may suffer nagging backache, headache, dizziness, getting up at night, leg pain, swelling—feel constantly tired, nervous, all worn out. Other signs of kidney or bladder disorder are sometimes burning, scanty or too frequent urination.

Try Doan's Pills. Doan's help the kidneys to pass off harmful excess body waste. They have had more than half a century of public approval. Are recommended by grateful users everywhere. Ask your neighbor!

Health Into Menus

With Vitamins Plus

...greens give you plenty of vitamins A, B and C. Assemble your salads and get plenty of health insurance—you don't need to shop for these.

...the pep appeal of your salads these days? It should be better than ever before with spring vegetables dotting the markets colorfully in greens, yellows and reds. Many vitamin-laden fruits are just coming into season so you home-owners should have no trouble getting your quota of two fruits, two vegetables and a citrus fruit into your family's diets.

...winter it is sometimes extremely difficult to meet that nutrition requirement because of the scarcity of vegetables and fruits and their consequent high prices. Now, though, prices are higher than last year at this time, they are abundant, and we can afford to spend the money required to buy them. Perhaps, you have a garden this year. You're probably planning to use most of the produce, but you may have some crops available for immediate consumption such as asparagus, tender green shoots of onions, etc. In some parts of the country it's a bit early for some of the produce to make their appearance, but you can try to do up and at them!

...homemakers are fortunately becoming more and more conscious of the importance of fruits and vegetables in the diet, and the more so they become, the more healthy will come each generation of Americans. Even those of you who have been deficient in these foods during growing years will get much benefit from including these foods in your diet. A heavy meal calls for a light, crisp, "just right" feeling. Rich fruits and vegetables supply.

...remember vitamins and minerals in hand to give your body health and to keep it in good workable order. Most vegetables have many of both minerals and vitamins. It is interesting to know that greens (lettuce, parsley, watercress, turnip greens, etc.) are rich not only in iron that makes for good, rich blood, but also in vitamin A, which provides good health of skin, eyes, and helps you buoyant and full of energy. The greens get a nice big boost for being rich in Vitamin C, necessary for health of teeth and bones, and for quick healing of wounds.

Don't be surprised when the greens come in for a nice share of honors for vitamin B, also. That's the vitamin necessary for normal nutrition. Easiest way to keep most of the vitamins intact is to serve the vegetables raw—as you would in a salad. The same goes for fruits. Don't either of them soak in water or be uncovered in the refrigerator. The vitamins seem to evaporate quickly, especially in the case of vitamin C, so easily lost by cooking leaving exposed to air.

...Lynn Says: Fresh as a Day in May: So will be your foods if you keep them properly refrigerated. Desserts to cool you off and keep your appetites unjaded, if they're to be frozen, belong right in the freezer. Meats and fish are safest kept right under the freezer in a meat-keeper if you have one.

Milk, cream and beverages are good alongside the freezer unit. Custards, puddings, butter and staples fill the middle section nicely, are easy to get at. Leftovers, foods prepared ahead, salads, some fruits and berries are well refrigerated when kept on one of the lower shelves. The humid or crisp means just that for it keeps those fresh fruits and vegetables crisp and well refrigerated.

The storage bin at the bottom of the refrigerator is usually non-refrigerated, and gives splendid storage to cereals, crackers and extra beverages.

Lynn Chambers' Point-Saving Menu
 Braised Liver and Onions
 Whipped Potatoes
 Parsleyed Carrots
 Green Salad
 Enriched Bread Butter
 *Orangeade Refrigerator Pudding
 *Recipe Given

Keeping vegetables well refrigerated insures at least a good degree of vitamin preservation. Keep them covered, too!

Arrange your crisp raw fruits and vegetables attractively. If you'd like to have some fun, really, then take out the old geometry text, and follow some patterns you find therein—they're fine inspiration for attractive appearing vegetable and fruit dishes.

Cottage Cheese-Vegetable Salad.
 (Serves 6 to 8)
 2 cups cottage cheese
 1 garlic clove (optional)
 1 teaspoon salt
 2 tablespoons chopped chives or green onion
 2 tablespoons chopped pimiento
 1/4 cup chopped celery
 Paprika
 2 cucumbers
 1 medium sized onion
 2 large tomatoes
 2 carrots
 French dressing
 Salad greens

Rub mixing bowl with clove of garlic. Add cottage cheese, salt, and paprika. Fold in chopped chives, pimiento, celery. Turn into a bowl that has been rinsed with cold water. Chill in refrigerator. Unmold on center of large salad plate, surround with watercress, thin cucumber slices, onion rings, carrot flowers, tomato wedges. Serve with french dressing.

A salad bowl that's popping full of health with its tomato slices (vitamin C) lettuce (vitamins A and C), bananas (A, B, C), green peppers (A and very much C).

Here's a vegetable that makes a main dish when combined with macaroni:

Green Pepper Stuffed With Macaroni.
 (Serves 6)
 6 green peppers
 1 cup cooked, elbow macaroni
 1/2 pound grated American cheese
 1 cup soft bread crumbs
 1/4 teaspoon Worcestershire sauce
 1/4 teaspoon salt

Cut a slice from top of green pepper, scoop out, and cook in boiling salted water for 5 minutes. Drain. Mix remaining ingredients, saving 1/2 of cheese for top. Fill peppers with mixture, stand upright in pan and sprinkle remaining cheese over top. Bake in a moderate oven 25 minutes.

Jaded appetites will respond quickly if you serve this delectable cool pudding:

***Orangeade Refrigerator Pudding.**
 (Serves 9)
 1 tablespoon gelatin
 1/4 cup cold water
 1 1/2 cups orange juice
 1/2 cup sugar
 1/2 teaspoon salt
 2 tablespoons lemon juice
 2 egg whites
 1/4 cup sugar
 4 cups oven popped rice cereal
 1/2 cup melted butter
 1/4 cup sugar

Soften gelatin in cold water. Heat orange juice, sugar and salt to boiling point. Add softened gelatin and stir until dissolved. Add lemon juice and cool. When mixture begins to thicken, fold in stiffly beaten egg whites to which sugar has been added.

Crush cereal crumbs fine and mix with melted butter and sugar. Distribute evenly in bottom of a square pan and press down firmly. Pour in orange mixture. Chill in refrigerator. Cut in squares when firm, and serve with whole orange slices and whipped cream, if desired.

The Once Over
 by H.I. Phillips

IMAGINARY INTERVIEWS

(Occasioned by a recent photo of the President and his Scotch terrier alone in the White House.)

Falla—Boss, you lead a dog's life. Franklin—In a job like mine in a world like this it's inevitable.

Falla—Oh, well, it isn't as bad as it's painted. I have it all over you, however.

Franklin—How's that?

Falla—I have moments when nothing bothers me.

Franklin—I realize that, and I often envy you. A dog's life isn't so bad.

Falla—Bad! When I look at the world of human beings I get the shakes. And there's one crack I don't like.

Franklin—What's that?

Falla—That one that the world is going to the dogs. As Ed Wynn once said, the dogs wouldn't take it.

Franklin—There's some truth in that. How are you getting along under rationing, by the way?

Falla—I can't complain.

Franklin—That's a novelty! I'm sorry we have to give you odds and ends. Meat is scarce, but if you get hungry you can always bite a congressman.

Falla—I'll never be that hungry.

Franklin—I'm mighty fond of you, Falla.

Falla—That goes double. And I know you better than most people.

Franklin—You never question my actions or offer suggestions, and you show complete confidence in me. I never remember a time when you seemed sore at anything I did.

Falla—I didn't like that Casablanca trip too much. It wasn't sporty of you to leave me behind.

Franklin—Mrs. Roosevelt was here, wasn't she?

Falla—Don't be silly.

Franklin—If I took you around to those conferences what help would you be in planning a new world?

Falla—The one I would plan would be a big improvement on this one.

Franklin—I've often wondered about that. Dogs are seldom bothered by the fights of one group or another, or by rival ambitions.

Falla—Never. You see, we dogs never talk of a master breed, a pure Nordic strain or need for more breathing space. A dog who behaved anything like Hitler, Tojo or Mussolini would be in the dog catcher's wagon in no time as a hydrophobia case.

Franklin—How do you like being a White House dog? Would you rather be out romping in the fields?

Falla—The White House is good enough for me. Romp in the fields today and you're apt to wind up a prisoner of war.

Franklin—Do the visitors here bother you much?

Falla—No, but I should think some of them would be a pain in the neck to you, boss.

Franklin—Well, you can't stay here forever, I suppose.

Falla—Why not?

Franklin—I won't always be President.

Falla—Stop kidding!

The Uncertain Draftee
 He's Class 3-B on Monday,
 Class 2-A on Tuesday night;
 He's 1-C some time Wednesday—
 On Thursday sitting tight;
 He's 3-D Friday morning
 And Saturday 4-N;
 1-A on Sunday afternoon—
 Unless he's switched again!

Then there's the fellow who is in Class 2-EFBM (Experienced Fighter by Marriage.)

A lot of voters are a little disappointed in Wendell Willkie. They had hoped he was one man who could be depended on not to write a book.

We know a man who says he is in Class 1-CC: Constantly Confused.

The Brenner Pass Boys
 Two pals a bit less scrappy—
 Two buddies nearly done—
 Two bosom friends unhappy—
 Two heels that beat as one!

A ball player has been asked to stop in and tell Judge Landis why he yelled at an umpire. There can only be two reasons: (1) he wanted to see if the ump was deaf; (2) he was paying off an election bet.

"A ceiling will be placed on restaurant food prices to keep the customers from being charged too much."—News item.

Wanna bet?

The Unrationed Prune
 The prune looks old and wrinkled; Slightly shriveled at the joints; But I'm sure you'd feel no better if your stock dropped 20 points.

Fair Question

If Barbara Frietchie could come back Do you suppose she'd be a WAAC?

"One of the hardest problems of the great is to remain great without also appearing ridiculous," says Merrill Chilcote

WAR ON ALL FRONTS
 A SERIES OF SPECIAL ARTICLES BY THE LEADING WAR CORRESPONDENTS

American Submarines

By Frank Gervasi

(WNU Feature—Through special arrangement with Collier's Weekly)

Dozens of American submarine commanders have made records in the Pacific. Their roster grows every day. There are proportionately more Navy Crosses in the submarine service than in any other branch of the navy, and for this there are many reasons.

The submarine is an American weapon, invented and now perfected by Americans. Our men understand what the submarine can do, and they employ it as what it is—an offensive weapon of irresistible hitting power.

Most important of all, however, is that fact that German U-men are ordered or "sent" into action in ships lacking even elementary comforts and unequipped with any safety devices.

Our men "go." They love the submarines, and spend as much time telling you how safe they are—"safest ships afloat"—as fliers will say in describing the good qualities of our planes.

Submariners and fliers are the most weapon-proud men I've met in this war.

There is evidence of the submariners' contention concerning the safety of our submarines. Since the war began, the navy has reported the loss of only six undersea boats, including the Argonaut.

Submariners Quiet About Exploits.

Concerning their exploits, however, submariners are invariably mum, and no matter how well you might be prepared to contend with a submariner's economy of words, his reticence will still surprise you.

A quiet "Very well" is the accustomed acknowledgment of all orders, disasters, communications and missions aboard ship. A torpedoman might come to the control room with news that the aft and the forward torpedo room is flooded, and he would probably obtain from the skipper nothing more than a "Very well."

This reticence, however, as admirable as the submariners' courage and ingenuity and calm efficiency, has contributed to the neglect which was the lot of the service until war came. Hidebound naval traditionalists with limited imagination couldn't see the submarine as anything more than an adjunct of the battleships and cruisers. To the horse-and-buggy naval strategists of yesterday, the submarine represented merely a scouting and observation auxiliary weapon which might, with luck, sometime surprise and sink an enemy ship.

Our Sub Force December 7, 1941.

And on December 7, 1941, we had, for a major sea power, a third-string submarine force. Theoretically we had 113 submarines, with 73 building and 23 more scheduled to be constructed. Actually, however, there were substantially less than 100 submarines in service. Thirty-five subs were of the S-type which were found to be unsatisfactory and had been withdrawn for re-fitting.

Out of the total of submarines available for duty, roughly only one-third could be spared for action against the Japanese.

With our declaration of war on Japan, the picture changed rapidly, although not fast enough to suit our submariners. In May, 1942, an additional appropriation was made by congress for the construction of 200, 000 tons of submarines which are now coming off the ways in yards on both coasts at a rate surprising to the layman but still unsatisfactory to submarine commanders.

U. S. Subs Sink 82 Jap Ships.

Even the publishable figures appear to support their point of view. Up to August of last year, American submarines had sunk or damaged 82 of the 219 Japanese ships sunk by all weapons. This represented 37 per cent of the total. Our submarines accounted for 27 per cent of all enemy warships sunk, and for 60 per cent of all noncombatant shipping sent to the bottom.

The submariners' record improved as more boats entered service. The navy department has credited our submariners with having sunk approximately 180 Japanese vessels of all categories.

Written down beside the total number of United Nations ships sunk by German U-boats, the admitted 180 sunk or crippled by our own subs in the Pacific might not seem so startling. But every Jap ship sent to the bottom represents a proportionately higher loss than the equivalent in American or British tonnage.

The reason is simple: The Japs send supplies to their overseas troops only when absolutely necessary. The Jap soldiers fight on less food, medicines and other nonmilitary supplies than their American or British counterparts.

PATTERNS

SEWING CIRCLE

Versatile Suit

VERSATILE costume . . . with jacket, a good-looking casual suit ready for everything . . . without jacket, first rate for every active sport.

Barbara Bell Pattern No. 1775-B, designed for sizes 10, 12, 14, 16, 18 and 20. Corresponding bust measurements 28, 30, 32, 34, 36 and 38. Size 12 (30) ensemble requires 4 1/2 yards 39-inch material. Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to:

Cold 'Reduces' Distance

Figuring one rail to 35 feet, engineers of the Canadian Pacific railroad have estimated that the 3,363-mile "rail distance" across Canada was "reduced" two and one-quarter miles during a cold spell last winter.

There is usually one-eighth of an inch distance between rail ends. In cold weather the gap broadens to five-sixteenths of an inch, railroad officials said.

GETTING ACQUAINTED WITH OUR NEW NEIGHBORS

This writer spent a couple of evenings last week getting acquainted with some of our new farmer neighbors who have moved into the community this spring. We found that they were all very nice folks and we enjoyed visiting with them for a few minutes.

One of our first steps was at the Guy and Leslie Braund farm just north of town about a mile and a half. They live on the Albert Kehl farm and last year were on the Dr. Rumber farm northwest of town.

We soon found that we had been acquainted with Guy for many years, having known him when we lived at Garner some twenty-three years ago. But we did not know his son Leslie who is a partner in farming with his father. They are farming about 320 acres and said they could handle it. Guy did not have any sympathy for John L. Lewis and said he'd like to see him try to organize Iowa farmers. He would get chased clear out of the state!

South of town we stopped for a chat with Bob Hinman on the hill next to the Riverside School. Bob and his family have lived there for the past year. As we glanced down toward the river Bob opened up and we soon had a man "who talked our language." In other words, Bob likes to fish. We did not get much "farming" done, but we did settle a few questions on fishing.

Another newcomer in the community but not altogether a stranger here as he married Owen Neuherr's daughter, is Warren Bier. Warren was busy fixing a wagon box when we drove on his yard but he was ready to visit. Warren's pride is his fine herd of white hogs, and he has some mighty good ones. He has a good crop of Chester White pigs coming along fine.

The Bier family live on the Tice farm south of town.

We enjoyed another visit at the Bernard Gruis home east of Klemme. Our first impression was that Mr. and Mrs. Gruis were "real folks" and they made us feel right at home. Mrs. Gruis was helping her husband finish up the chores for the evening as their children are too small to do much along that line. Mr. Gruis had some tough luck with his spring pigs, but he was hoping that maybe the fall pigs would turn out better. The Gruis family resides on the Henry Nannenga farm and everything was neat and clean around the yard.

Our next stop was at the home of Mr. and Mrs. H. J. Mourlam, who live on the farm just east of John Neuberger's farm, or 5 1/2 miles east of Klemme. The Mourlam family lived on the Cashman place, first farm north of Goodell on the east side of the road, last year.

After visiting with Mr. and Mrs. Mourlam for a few minutes, we asked about the service flag hanging in the window and learned that their son "Buster" was a mechanic in the army air corps and stationed near Portland, Oregon. We had a lot in common and told them we also had a son "Buster" in the army air corps.

But everything was not so good

with us as it took us a long time to convince their pet dog "Bomber" that we were there on a friendly mission. "Bomber" is a little tan-colored Pomeranian and weighs only seven pounds, but what he lacks in size, he makes up in courage. However, before the visit was over "Bomber" must have decided we had some connection with the army air corps and we became real friends.

Harry Koehler and family have lived on the Zinn estate for over a year, but we had not visited with them at their home, so took a run that way for a chat. Harry farms in a big way, he has to as he is running a big farm. But he was going to make short work of planting a couple of hundred acres of corn this year with his four-row planter which which he had adjusted and all ready to go. The Koehlers have a nice herd of Holstein dairy cows and milking was just being finished when we arrived there. Mrs. Koehler was getting some bulbs all ready to set out and their garden will contain beautiful flowers as well as vegetables.

Mr. and Mrs. N. L. Liesener purchased the farm 5 1/2 miles east of Klemme where they now reside. This is the farm where Mr. and Mrs. Clarence Neuberger lived for many years.

Norman was finishing up separating the milk when we drove in.

Along with ownership comes pride of appearance, and this was true at the Liesener farm. Norman is short of help, but he has already done quite a bit of improving. He told us of his plans for the future which will include a new barn, as the old one is rather small. Some of the buildings will be re-arranged on the place to make doing chores a lot easier. He also plans to put in a new driveway west of his house to the road, which will be a fine improvement. Some tiling is also on his list of improvements for the future. The farm is not on the high-line but has its own electric light plant.

That completed our trip for two evenings and it was most enjoyable. In fact we are planning to make another "after supper tour" as soon as possible, as there are a few more "new neighbors" we want to get better acquainted with and to also spread the "gospel" that "Klemme is little but lively, and a good place to trade."

NOTICE OF SPECIAL ELECTION

Notice is hereby given that in pursuance of a Resolution of the Town Council of Klemme, Iowa, passed and adopted on the 19 day of April 1943, a special election shall be held on the 19 day of May 1943, for the purpose of enabling the legal electors of said town to vote for or against the Ordinance of Ordinance No. 36, which Ordinance was passed and adopted by the Town Council of Klemme, Iowa, on the 19 day of April 1943, and is duly recorded in the office of the Town Clerk of said town, and which Ordinance is in exact words and figures as follows, to-wit:

ORDINANCE NO. 36

AN ORDINANCE AUTHORIZING CENTRAL STATES ELECTRIC COMPANY OF IOWA TO CONSTRUCT, MAINTAIN, OPERATE, REPAIR, REPLACE, IMPROVE, AND EXTEND A SYSTEM OF TRANSMISSION LINES AND SALES OF ELECTRICAL ENERGY INCLUDING THE RIGHT TO BUILD AND OPERATE A HIGH VOLTAGE LINE TO AND THROUGH THE TOWN OF KLEMMÉ, IOWA.

RE IT ORDAINED BY THE TOWN COUNCIL OF KLEMMÉ, IOWA

Section One
Permission and authority are hereby granted for a period of twenty (20) years from and after the acceptance of this Ordinance as herein provided, to Central States Electric Company of Cedar Rapids Iowa its successors or assigns, their officers called the Grantors, to construct, reconstruct, maintain and operate a plant or plants for the generation of electricity and to extend upon the public streets, alleys, highways, bridges, and public places, within the corporate limits of the Town of Klemme, Iowa, as the same are now or may hereafter be extended or located, and thereon, thereunder, thereover, and throughout, to construct, reconstruct, maintain and operate a system for the transmission, distribution, use and sale of electricity, consisting of poles, wire, conduit and other construction necessary or incident to said system and its use, including a high potential electric transmission line to and through the Town and to sell and furnish electrical energy to the Town and its inhabitants for all purposes.

Section Two
This Ordinance shall be in full force and effect from and after the approval by the legal electors of the Town of Klemme, Iowa, at a special election called and held for that purpose, and the acceptance of this Ordinance by the Town Clerk, within thirty days from and after its approval at said election, and its publication as provided by law.

Passed this 19 day of April, 1943
ATTEST
A. J. KUDJE, Town Clerk
J. E. STILLE, Mayor

The polling place for said special election shall be at the following place: COMMUNITY BUILDING, KLEMMÉ, IOWA.
The polls shall be opened at 8 o'clock A. M. and shall close at 8 o'clock P. M.
Dated this 19 day of April, 1943
ATTEST
A. J. KUDJE, Town Clerk
J. E. STILLE, Mayor
(Publish April 21-28, May 5-12, 1943)

Successive sowings of lettuce and radishes should not be made beyond May 15th.

COUNCIL PROCEEDINGS

Klemme, Iowa, April 19 1943.
Regular meeting called to order by Mayor Stille with Thomas, Wellesmeyer, Kluckhohn and Priebe present.
Minutes of previous meeting read and approved.
A. J. Kudje appointed Clerk for the two year term.
Bonds of C. G. Waterman and J. E. Stille approved.
George Busman appointed Marshall at a salary of \$188.88 per month.

Herman Priebe, Election 4.20
Ordinance relating to franchise for the Central States Electric Company approved at this meeting.
Meeting adjourned.
A. J. KUDJE, Clerk.

NOTICE FOR COAL BIDS

Bids will be received at the office of the County Auditor, Hancock County, Iowa, up to 1:30 o'clock P. M. Thursday, June 3, 1943, for approximately one hundred (100) tons of coal delivered on track at Duncan, Iowa. Bidders will state price per ton and fully described specifications of coal upon which bid is made. By virtue of sealed bids, the Board of Supervisors reserves the right to reject any or all bids. Published by order of the Board of Supervisors this 5th day of May 1943.
FRED J. MISTAL, County Auditor
(Publish May 12, 1943)

OFFICIAL NOTICE

The Hancock County Board of Education will consider textbook adoptions for the county rural schools in the following fields, and as below indicated.

I. READERS
Basal reader grades 1-6 and 7-8
Co-basal reader grades 1-6
Supplemental reader, grades 1-6
II. SCIENCE
Grades 1-8
Hearings will be held on June 1, 1943 in the courthouse at Garner, Iowa, beginning at 9:00 a. m. Bids will be received until 12 o'clock noon on the day of the hearing. The Board of Education reserves the right to waive technicalities and to reject any or all bids. Hancock County has a total enrollment of about 1025 rural pupils in ninety-two schools.
Samples may be sent to each board member to choose, but the book company representatives are not to interview the board members individually or collectively except at the time of the hearing.
This publication complies with Section 4451, Code of Iowa 1939, and is published by order of the Hancock County Board of Education.
Board members are:
Mrs. H. C. Meyer, Britt
Mrs. S. B. Durant, Forest City
Mr. G. A. Robinson, Britt
Mr. W. E. Puffer, Corwith
Mr. F. C. Missal, Garner
(Signed) CHAS. E. WHITNEY, Chairman
Hancock County Board of Education
Dated at Garner, Iowa,
May 11 1943
(Publish May 12-19 1943)

SCRAP COLLECTIONS FALL FAR SHORT IN IOWA

Iowa collected only 20,000 tons of scrap iron and steel during the first months of the year, or only 20 per cent of its quota, according to Herbert C. Plagman, executive secretary of the State WPB Salvage Division. Plagman said scrap piles are badly depleted, and urges all civic bodies and farm groups to join with the local salvage committees in a statewide movement to furnish Iowa's share of the badly needed iron and steel.

Fall pigs, to be most profitable, should be farrowed during August and September, which means the sows should be bred now.

METHODIST VACATION BIBLE SCHOOL BEGINS MAY 24

The Methodist Vacation Bible School will start Monday, May 24 at 9:00 a. m. for all boys and girls of the grades. A very helpful course is being offered to each department and is especially designed for the particular age group. These are the courses offered:

Beginners: "Happy Times In Our Church."
Primary: "Child Life in Bible

Times."
Juniors: "Followers of Intermediates "O C Worship"

Registration will begin day in Sunday School the country should arrange in bringing the children these days we especially help our boys and girls help themselves and their places.

Using poultry feed low in protein delays egg production

DAYBREAK

moving into position for action on the African Front... returning from a night "bombing party" over Axis territory on the home front, loaded munition trains whistling shrill as they approach slumber-wrapped towns in Kansas, Missouri, Texas—everywhere. It is WAR—war with its toll and its heroism and sacrifices.

BUT SOME DAY WILL COME ANOTHER DAWN—a sunrise will light up a world at peace. Then trains will speed across nation carrying ration-free foods for America's pantries, materials for its home builders; tools and implements for its factories and professions; and peace-time necessities for all.

Now we are engaged in war. America's railroads—all vital in the transportation army—are performing a patriotic duty. Theirs is the hauling job of the nation. And what a job it is—doing—41,000,000 tons of army freight carried in 11,600,000 troops transported during the first year of the war.

ROCK ISLAND'S Program of Planned Progress, begun several years ago, is being carried on even in the midst of the war. For the new day dawns America will demand the best in railroading. While today it isn't possible to buy off of the equipment and materials required, we must have the revenue now to great backlog of purchases that some day will be released. Think of the many jobs this will make available for our boys in uniform!

As yesterday—and today—so tomorrow ROCK ISLAND'S purpose is to provide the finest in transportation.

BOARD PROCEEDINGS
3RD ADJOURNED APRIL MEETING
Garner, Iowa, May 4, 1913
The Hancock County, Iowa, Board of
Supervisors met in session on above date
with John A. Chambers, Penn Eckels and
F. J. Schoun present.
The minutes of the last meeting were
read and approved as read.
On motion and second the salaries of
all highway employees are increased five
cents per hour effective on May 1, 1913.
On motion and second the contract to
gravel certain Hancock County roads of
John Schisel is approved.
On motion and second the bond of Ken-
neth F. Boughton, County Coroner is ap-
proved.
Supervisor Schoun is appointed a com-
mittee to investigate and cause repairs to
be made in D D No. 7, and D D No.
106.
Supervisor Chambers is appointed a
committee to investigate and cause repairs to
be made in D D No. 63.
Supervisor Eckels is appointed a com-
mittee to investigate and cause repairs to
be made in D D No. 36-2.
WHEREAS the State of Iowa has ac-
quired title to the SW 1/4 of the NW 1/4 of
Section 33, Township 97 North, Range 25,
West of the 5th P. M., containing forty
(40) acres more or less according to Gov-
ernment survey, in satisfaction of a loan
from the Permanent School Fund of Iowa,
WHEREAS it is deemed for the best
interests of the taxpayers of Hancock
County, Iowa, that said lands be offered
at public auction by law provided, and
WHEREAS the Township Board of
Trustees of Crystal Township have ap-
praised the value of the above before men-
tioned real estate, as by law directed (Sec-
tion 4503, Code of Iowa, 1939, and amend-
ments thereto)
THEREFORE RESOLVED, by the
Board of Supervisors of Hancock County,
Iowa, acting for and in behalf of the
State of Iowa, and the Permanent School
Fund thereof, that the real estate described
in the preamble hereof be offered at Public
Auction at the Courthouse in Garner,
Iowa, at 1:30 P. M., on the 21st day of
June, 1913.
The County Auditor is hereby directed
to give notice of said sale as by law directed.
The Board of Supervisors reserve the right
to waive technicalities and to reject any
or all bids.
The foregoing resolution was offered and
adopted by Supervisor Eckels who moved its
Chambers, whereupon the Chairman placed
the motion of its adoption and upon roll
call the vote thereon is Penn Eckels, John
Chambers and F. J. Schoun, aye, Nays,
On motion and second the County Audi-
tor is hereby directed to advertise a let-
ting for one hundred (100) ton coal for
the Hancock County Home to be delivered
back at Duncan Iowa. Said letting to be
held at the Courthouse in Garner, Iowa,
at 1:30 P. M. on June 3, 1913.
On motion and second the County Audi-
tor is authorized to draw warrant on the
Road Construction Fund as stipulated in
Cause No. 11281 in the Clerk of the Dis-
trict Court Hancock County, Iowa.
WHEREAS Wm. Henschen, Engineer,
has to report that Hanson and Jorgenson,
of Calamus, Iowa, has completed their
contract for cleaning the main open ditch
of Drainage District No. 97, of Hancock
County, Iowa, to his entire satisfaction,
and
WHEREAS there is due on said con-
tract a final estimate in the sum of
\$ 5.00
BE AND IT IS THEREFORE RESOLV-
ED, by the Board of Supervisors acting
for and in behalf of Drainage District No.
97, Hancock County, Iowa, that the report
of the Engineer be approved and the
County Auditor be and he is hereby directed
to cause a notice of hearing on the final
estimate to be advertised as by law di-
rected, which hearing shall be held at the
Courthouse in Garner, Iowa, on June 3,
1913 at 2 o'clock P. M.
BE IT RESOLVED that the claims here-
after set out be allowed in amounts de-
termined thereon, and the County Auditor
be and he is hereby directed to draw war-
rants on the several funds of Hancock
County Iowa in payment of such claims
in amounts set opposite each claim

Low Brothers

HIGH STANDARD HOUSE PAINT

C. A. LARSEN, PROP.

Get your free copy of "Color Keys to Sunlit Homes," Lowe Brothers big illustrated book, con-

taining over 100 full-color recommendations for paint-styling your home, both inside and out.

LOTS OF PEOPLE make a big mistake

in figuring the cost of house paint.

They look at its price per gallon. But that's all wrong. What they really pay for is cover-

age per gallon. That's why I figure it's just common sense to use Lowe Brothers High

Standard House Paint. It's definitely a quality paint and it covers solidly more

square feet of surface, so it spreads evenly and easily, cuts down the labor and cost,

lengthens the time between repainting. It just naturally goes farther and lasts longer to save money all the way."

Tell a Most Amazing Story to the Fashion World

By CHERIE NICHOLAS

TTIONS for workaday kitchen, farm and factory wear; cottons for play clothes and sportswear; cottons for simple daytime go-to-market and school wear; cottons for "be-pretty" afternoon and fur-dresses, cottons for negligee and pajama apparel and your daintiest-trimmed "nighties"; cottons for your smartest town-wear suits, coats, cottons for blouses from sturdyest shirt types to the airy, muchly be-frilled and lace-trimmed lingerie types that are in conversation this season; cottons for delectable party frocks; cottons for wedding and graduation frocks; and would you believe milliners have all of a sudden taken to creating our smartest hats in cotton—gloves and stockings, too, of matching cottons, you please!

Will admit the spectacular career of cottons sounds almost too fantastic to be real, but it's true, by word of it, in regard to the cotton flight they have made in the fashion world right on and up to the very pinnacle of fabric fame. It is plain to be seen, why women in fashion sense are planning to wear late spring and summer dresses in terms of cottons. They are, for instance, that in the up-to-date cotton fabric department it's to be had for the buying (expensive, mind you) a series of new 1943 city cottons in tweed textures that make up into as stunning town-wear suits as the model on the left in the above illustration. This smart jacket-and-skirt is made of a handsome new cotton-tweed mixture in black and white. The three-button jacket has the new shorter length and has a breast pocket cut on the side. A kick pleat in the front of skirt is for walking. Here is a cotton of unquestioned "style," its quality is assured, and it comes from each tubbing looking as

bright and fresh and capable as new.

In making up the new plaid gingham designers never miss a "trick" in way of details that have "endearing young charms." For proof, take a look at the gay little dress to the right. Here you see an applied pique tulip apparently growing right out of the background of a bright plaid-with-black gingham that is ever so good-looking. Of course there had to be a smattering of wee ruffles at the sleeves and neck, for ruffles bob up anywhere and everywhere on the new summer frocks. The ruffles are of the same cotton fabric as the bands on the skirt.

Amazing things are certainly happening with cottons in these modern times of ours. For instance, designers have this season discovered in ordinary mattress ticking fashion potentialities they never dreamed of in days of yore, as you will see if you glance at the winsome two-piece dress centered in the group. This attractive two-piece is actually made of mattress ticking. It's trimmed with—guess what!—white cotton upholstery fringe, such as is used to trim couch covers and sofa pillows. Who'd ever have suspected a humble cotton material could be so glamorous!

Seeing that peasant skirt-and-bouise two-piecers continue first in favor among 'teen-agers and in the junior group, the outlook on cottons in that direction presents a scene of picturesque dirndls made of flower-patterned and bordered gay chintz, or of heavy unbleached muslin dyed in clear reds and greens, yellows and blues, these so combined as to achieve fascinating color contrasts. The blouses with these skirts are exquisite lingerie types with peasant drawstring necklines.

Star Dust

STAGE SCREEN RADIO

By VIRGINIA VALE

Released by Western Newspaper Union.

WHEN Director King Vidor began telling Brian Donlevy about Ellis Island, the day Brian did his first scenes for "America," he replied "Bet I know more about Ellis Island than you do." Seems that in 1911 he returned to the United States from Ireland with his mother; unaware that she had to pay a head tax before being re-admitted, she'd spent all her money. A phone call to her husband in Sheboygan Falls, Wis., would have settled the matter. But as she had a hot Irish temper, she insisted on arguing with all the officials. "So they put us in a corner and ignored us until Mother cooled off," said Donlevy. "That was two days later!"

Bruce Bennett, on location with Humphrey Bogart for "Somewhere in Sahara," received a letter asking him to become a Pan-American co-ordinator. Several years ago he was in Guatemala, making a Tar-

BRUCE BENNETT

zan picture; the outfit ran out of funds, and while stranded Bennett made friends with a number of influential people. Now, asked to choose a co-ordinator, they've asked for him.

CBS Caravan's comedian, Jack Carson, has turned down a \$25,000 personal appearance tour, on conclusion of his Warner Bros. assignment. "The Animal Kingdom." He'll tour army camps for the Hollywood Victory committee instead.

If you've noticed lately when listening to Monty Woolley on the air that his voice sounds a bit husky, don't blame it on the California fog. It's due to fog, all right—one created on the set of "Holy Matrimony."

RKO expects "The Robe," done in Technicolor, to be one of the most important pictures in screen history. The story is laid just subsequent to the crucifixion. With Metro making "Quo Vadis," it looks as if there'd be a cycle of religious pictures.

Julie Bishop steps into excellent company—and into her first starring role, as well—in "Dark Eyes"; Bette Davis and Ann Sheridan have the other two principal roles. It's a hilarious comedy, made from a New York stage success; the girls will be seen as impoverished Russian gentlewomen, who write a play and then try to get backing for it.

Samuel Goldwyn announces that he's looking for "the 16 most beautiful girls in the world" for his musical, "Up in Arms," introducing Danny Kaye to the screen. Goldwyn-picked beauties go far. Betty Grable and Lucille Ball got their first screen breaks as Goldwyn girls; they were in "Whoopie" and "The Kid From Spain," with Virginia Bruce and Paulette Goddard. Miss Bruce got a part in Flo Ziegfeld's "Smiles" as a result. Paulette Goddard went right ahead on the screen, and also met Charles Chaplin.

Descendants of Vodka, a cocker spaniel, have cornered the mascot market at various U. S. air bases. Vodka belongs to Maj. Alexander P. de Seversky, and will appear with him in Walt Disney's "Victory Through Air Power," which will combine live action sequences and animated cartoons. Vodka is credited with more than 1,000 hours in the air.

Most of the people in England will hear the Quiz Kids in the very near future; while the Kids were in New York they were invited by the British Broadcasting corporation to take part in the British "Answering You" program, recorded here and broadcast there.

ODDS AND ENDS—Constance Bennett's going to play a burlesque queen in "Hi Diddle Diddle" . . . Kate Smith has turned down an offer to play Marie Dressler in a movie biography of the actress; says she's a singer, not an actress . . . Brooklyn's hanging around outside the small-fry ball park ask everyone who Dodgers' ball game will Red Skeleton be out? . . . leaves, "When will Red Skeleton be out?" . . . Though the musical in which she returned to the stage was a flop, Mary Martin's not losing money . . . radio shows are falling over each other to sign her up as a guest star, paying as much for one performance as she'd earn in a week . . . Not bad for a Hollywood vacation!

IMPROVED UNIFORM INTERNATIONAL SUNDAY SCHOOL Lesson

PETER AND JOHN PREACH TO SAMARITANS

LESSON TEXT—Acts 8:14-25.
GOLDEN TEXT—Lift up your eyes, and look on the fields, for they are white already to harvest.—John 4:35.

The Church as it grows has problems, and so God calls leaders to serve Him in meeting and settling them for His glory and the good of the Church.

Philip had gone to Samaria (as a result of the first persecution of the Church) and there he had been used of God to bring many to faith in Christ. Now that the new groups of believers needed guidance and instruction, Peter and John were sent to help them (v. 14).

A proper understanding of, and attitude toward, God's gracious gift of salvation is of first importance. New converts must recognize that it is a gift that it cannot be earned or bought, and that it issues in a life of service and testimony.

All three of these matters are covered in our lesson.

I. Spiritual Life and Power Is God's Gift to Believers (vv. 14-17).

The Holy Spirit was received by these early members of the Church by the laying on of the apostles' hands, but later He came directly into the believer's heart the moment he had faith in God. This is now our blessed privilege, and the provision for our every need as followers of Christ, to recognize the indwelling Holy Spirit.

What a glorious truth it is that the believer is indwelt by the Holy Spirit, He who is a divine person, not just a power or influence (I Cor. 6:19). Thus every believer, including the humblest as well as the greatest, has in him the One who gives spiritual life and power, who gives grace for holy living, and empowers for service.

The greatest power in all the world—the power of the infinite God—is thus available to every true and yielded believer, as God's free gift.

Gone then is all boasting of our own strength, and gone are all excuses for weak and careless living. The power and grace are His, and He gives them to us as His gift. Christian friend, are you allowing the Holy Spirit who dwells in you, to inflame and use you as He will?

II. Spiritual Life and Power Cannot Be Bought by Works or Money (vv. 18-24).

Men of this world are so used to putting their trust in money that they come to think that one can buy anything. To them every man and every desirable thing must have its price. Let us be clear that there are men who cannot be bought, and that the best things in life bear no price tag. A mother's love, friendship, fellowship with God—priceless they are, but not for sale.

Above all let it be clear that eternal life, and the power of God the Holy Spirit, cannot be gained by piling up good works, nor by payment in the coin of this world.

Simon Magus wanted this power to improve his business as a magician. He made a very gross proposal, but one wonders whether he was any more to be censured than many in the Church today who are doing the same thing, though by more cultured and skillful methods.

Not only are there those who are trying to buy their own way into heaven, but also those who by holding the purse strings, try to control the message of the preacher. What about those who by their financial gifts seek to gain control of church organizations?

Their efforts are doomed to ultimate failure—God will see to that!—but in the meantime they do much harm to the cause of Christ. Many a church and pastor would like to rise up and say with Peter, "Thy money perish with thee."

III. Spiritual Life and Power Should Result in Testimony (v. 25).

Peter and John set the Samaritan Christians a good example as they went back to Jerusalem, by permitting the Holy Spirit to use them to testify and to teach the Word of the Lord in many of their villages.

One of the great hindrances to the carrying out of the great commission has been that Christians have received spiritual life, and even spiritual power, as though it were something for their own gratification or comfort. God saves us to serve Him in testimony and in life.

The Holy Spirit does not speak of Himself. He guides the believer in all truth (John 16:13), particularly the truth regarding Christ. The Spirit's primary interest is to glorify Christ (John 16:14).

It follows then that the Spirit-filled believer will be busy about speaking for Christ and glorifying His name. The Holy Spirit is ready to teach even the words to say that Christ may be lifted up and men be saved.

Peter and John, as good leaders of these new Samaritan believers, gave them by word and example a good foundation for growth in grace and usefulness to Christ.

TAME UNRULY HAIR

Give it that well groomed look. Add lustre. Keep your hair lying flat. Always use Moroline Hair Tonic. Large bottle 25c. Sold everywhere.

Bride Carried High

Among the strangest wedding customs of the world are those of the Bulgis tribesmen of the Celebes. When a woman is to be married, it is necessary for three days before the ceremony that her feet do not come into contact with the ground. During this period she is continuously under the influence of drugs administered to her as she is carried about on the shoulders of members of her family.

Teen-Age Vogue

one of the most important fashions scheduled for this spring and summer is the blouse-and-skirt costume. It is not only popular with the young set, but also in the adult world. The blouse for this charming junior dress is of white swiss lace, and it has the flattering low neckline that young girls want in their smart peasant waists they all are wearing this summer. The skirt is black taffeta, for party wear. Casual everyday wear most of the skirts are vividly colorful peasant dirndls. Exquisitely sheer and delicate blouses are worn with dressy skirts and casual wash-dirndls.

Flower-Laden Snood Highly Picturesque

The snood vogue goes on and on. If you want to blend into the spring and summer landscape of flowers and birds, sunshine and all things lovely, wear one of the picturesque head coverings so frivolously pretty, and you will feel you are going stepping into a world of romance. There are all sorts of whimsies that go to make up the new fascinatons and snoodcaps, such as seashells, glittering crystal beads and fluttry ribbon. Sometimes the flowers, like single daisies, for instance, are scattered all over the big-mesh snood that confines the hair. Then again a cluster of flowers is placed at each side in Chinese fashion. Some prefer a single gardenia monature atop the pompadour, with the rest of the snood left unadorned.

Peasant Fashion

The peasant trend is one of the biggest influences running through summer fashions. Some stores are establishing a special peasant department. Blouses come first, with dirndl skirts and jumpers. Cottons for these skirts include glazed chintz, seersucker, chambray and bright-dyed unbleached muslin. Felt suspenders, belts, caps are all trimmed in gay and intriguing embroidery.

Short 'Toppers'

With the coming of milder weather the demand turns to toppers and boyish box coats in the new short length. The corduroy topper is stressed, as well as short coats in bright colors and in navy, also gray or beige, and the newest color of all is a bright gold tone.

Mr and Mrs. Wm. Meyer of near Miller, were Klemme visitors Saturday evening.

APPLY CALYX SPRAY ON FRUIT TREES SOON

The calyx or petal spray should be applied to apples and other tree fruits when about nine-tenths of the petals have fallen from the blossoms. All of the common fruits: pears, plums, cherries, black raspberries, gooseberries and currants, should receive this spray. It is the most effective if put on just at the end of blossoming time, according to H. E. Nichols, Extension Horticulturist at Iowa State College. It should never be applied when too many flowers are still in bloom, as bees will be killed by the lead arsenate in the spray. If put on after the little apples are formed, it is too late to get effective disease control.

Last year's cool rainy weather was ideal for plant disease development. Consequently, there has been a heavy carry-over of these diseases to this season. The rainy weather of recent weeks also has been ideal for the development of fruit diseases especially apple scab and brown rot.

County Extension Director Paul Henderson suggests the following mixture for this calyx spray: Four quarts of liquid lime sulfur (or 4 pounds of the dry form), 3 pounds of hydrated lime, plus 1 1/2 pounds of lead arsenate with water to make 50 gallons. If many plums are to be sprayed, the amount of lime sulfur could be cut in half. With a few trees of several kinds, however, it is easier to use the same material for everything.

All trees, young or old, that blossomed or did not blossom, should be sprayed. The spray should be thoroughly applied to all parts of the tree.

MAKE YOUR OWN PIG AND HOG FEED with SECURITY DRY MIXTURE

Are you worried because of lack of protein feeds, getting scarcer each day? Try adding Security Food to your own grains and mill feeds to help supply milk vitamins and minerals. These new dry feeding formulas will help solve your feeding problem. It helps pep up baby pigs... and shapes up your hogs... and rounds out hogs ready for market 30 to 60 days earlier! For Sale by

KLEMME COOPERATIVE CREAMERY COMPANY

Local Happenings

Klemme and Vicinity

Drs. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Mr. and Mrs. Ira Overholt were at Mason City on business Tuesday.

C. E. Proctor, of Garner, was in Klemme on business Monday afternoon.

Henry Wade, Liberty Township, has been on the sick list for the past week.

Mrs. Eddie Epps of Des Moines, visited over Sunday in Klemme at the parental Herman Paul home.

Mrs. Edna Thada and her granddaughter Barbara Thompson, were Mason City visitors Thursday.

Miss Garabrant, who directed the choir the past year, was presented with a gift.

Herman Stille was seriously ill the past week suffering with heart trouble. He is much better at this writing.

Mr. and Mrs. Metzger and two children of Ogden, Iowa, came Saturday and spent Sunday visiting at the Dr. Missman home.

We are glad to report that Emil Blumer is improving at the Mercy hospital at Mason City and that he is able to be up part of the time.

Mrs. Louis H. Suckow of Forest City drove down Monday evening for a visit at the Herman Paul home.

Mrs. Lester Neuberger left last week for Philadelphia, Pa., to visit with her husband, Pvt. Neuberger, who is stationed at an army camp near that city.

Mr. and Mrs. P. M. Wilson spent Sunday visiting with their son-in-law and daughter, Mr. and Mrs. Robert Risser and son, Bobby, at Des Moines.

Miss Thelma Chambers, teacher in the Britt high school, spent the week end visiting with her parents, Mr. and Mrs. J. A. Chambers south of town.

Mr. and Mrs. Wesley Patterson and baby Ferrol Paige spent Sunday at the parental Patterson home near Bancroft. Baby Ferrol stayed with her grandparents for a week.

Mrs. H. W. Adams returned to her home at Missouri Valley, Saturday, after visiting for the past week at the home of her son-in-law and daughter, Mr. and Mrs. Wesley Patterson.

Miss Dorothy Back, who is employed in a war work plant in Detroit, Michigan, left for that city after spending a two weeks vacation here visiting with her parents, Mr. and Mrs. Herman Baack.

Miss Virgie Hardecopf is back at her position teaching in the first and second grades after spending the past week in a Mason City hospital where she underwent a minor operation.

Mr. and Mrs. Lyle Liebendorfer of Forest City and Mr. and Mrs. R. A. Jorgenson of Klemme were dinner guests Sunday at the home of Mr. and Mrs. Joe Liebendorfer at Hampton.

Miss Mavis Meyer of near Miller helped her brother, Carroll Meyer of near Fertile, with work for a few days. Mrs. Meyer had been called to Chenoa, Ill., because of the illness of her father.

Pfc. Wayne Meade of Camp Rucker, Alabama, spent a few days the past week visiting at the Wm. Meyer home near Miller. He had a fifteen day furlough which he spent visiting with relatives.

Miss Ruth Johnson, registered nurse of Des Moines, is enjoying a vacation during the month of May, which she is spending visiting with her parents, Mr. and Mrs. John Johnson east of Klemme.

Mrs. Ernest Gerardi and daughter, Gracka Maria, left last Thursday for their home at Wichita, Kansas after visiting for about a month at the parental Conrad Quandt home. Mrs. Gerardi and daughter were accompanied home by Miss Marie Blank, who is enjoying a short vacation from her work at the beauty shop.

Mr. and Mrs. Carol Larson and children of Des Moines spent Tuesday visiting with Klemme relatives. Carol's mother, Mrs. August Larson has been seriously ill and confined to a hospital but is much better at this writing.

Mr. and Mrs. Louis V. Perkins enjoyed having their children with them for a Mother's Day dinner. They were Mr. and Mrs. Vic Perkins and the Misses Darlene and Verla Jean Perkins, all of Estherville, Iowa.

Mr. and Mrs. Don Speer are closing their cafe here Saturday and will leave for the west coast where Mr. Speer will work in the ship yards for the duration. Don's father Mr. C. E. Speer is working in one of the great ship yards on the west coast.

Mr. and Mrs. Walter Kimball drove up from Boone Saturday evening and spent over Monday with their children here. Mr. and Mrs. Kimball are living in an apartment at Boone for the present until they can find a house. Walt is employed in a shoe repair shop and says he likes his work fine. The family will move to Boone after school is closed here.

The Woltz Studio of Des Moines will have their salesman at the Klemme Community Hall on Tuesday, May 18th to show proofs of the pictures taken last week Wednesday. Cuts will be made of the pictures and the pictures of Klemme children will be printed in an early issue of the Klemme Times. About fifty pictures will be printed. Watch for this feature.

DRAMA SUNDAY NIGHT AT METHODIST CHURCH

The Fifty-Fifty Class will present a play entitled "That Cause Can Never Be Lost" at 8:00 p. m. Sunday May 16th.

It is a dramatization of a letter from an American soldier somewhere in the Pacific to his parents back home. Players from the class will pantomime the action which the letter suggests.

We especially invite the parents of boys in National Service to be present, as it will reveal what the boys are really thinking of their homes and loved ones while away.

Those taking part in the drama will include mothers and fathers, Sunday school teachers and scholars, Boy Scouts children and young people as well as the Soldier Boy.

A worship service will precede the play. The public is heartily welcomed.

GREGORY SUPERINTENDENT AT COLWELL NEXT YEAR

Mr. E. G. Gregory, principal of the Klemme high school, has been elected as Superintendent of the Consolidated Schools at Colwell for the coming year.

Besides having the responsibility of principal here, Mr. Gregory also had charge of the manual training department here.

Colwell is about ten miles northeast of Charles City and is also on the interurban railroad running to Charles City.

MRS. SANDRY ENTERTAINS MISSION STUDY GROUP

Mrs. Frank Sandry was hostess to the Mission Study Defenders of the Methodist Church at her home in Klemme this Wednesday afternoon.

Devotions were in charge of Mrs. Henry Busse; Mrs. J. A. Chambers lead the lesson study and Mrs. C. C. Kilgore the questions.

ATTENTION WOOL GROWERS

The Commodity Credit Corporation advises wool growers against mixing "off" wools with regular wools in preparation for marketing. "Off" wools should be bagged separately to avoid the one per cent discount which will be made against the entire lots of wool where this procedure has not been followed. "Off" grades of wool when kept separate, will be valued on their merits. Such wools include tags, crutchings, dead, black, fine buck, heavy burry, eye clippings and other damaged wools.

Mrs. Peter Merkel entertained the following to a Mother's Day dinner at her home Sunday: Mr. and Mrs. Alfred Merkel, and family; Mr. and Mrs. Ed. Christians and family; Mr. and Mrs. John Lass and Mrs. Francis Pearson.

The members of the Methodist choir enjoyed a picnic supper at Rev. Harvey's fire place in his yard last Thursday evening. The weather was a bit cool for a picnic, but a lot of hot coffee helped to equalize the temperature and make the picnic enjoyable.

We can print anything. Call the Times Office.

Insulate

- AGAINST HEAT ...
- AGAINST COLD ...

—V—

There are no restrictions on Insulating and now is an ideal time of the year to do this work, or have it done... have a cooler, more comfortable house during the heat of the summer months ahead. INSULATION PERFORMS A DOUBLE DUTY keeps your house COOLER in the SUMMER... and keeps your house WARMER and a more even temperature in WINTER... as well as SAVING FUEL... the fuel you save will soon pay for the cost of Insulating.

- ZON-O-LITE and
- BALSAM WOOL

... are both sold by us. Each has its special purpose and they are not expensive to use. It is EASY to insulate!

- ASPHALT SHINGLES ...

Three Different Types in Five Distinct Colors

- Pompeian Red
- Blue Tone
- Briar Green
- May Fair Green
- Brown Blend

This is the time of the year to re-roof your house and other buildings. We have Asphalt Shingles for immediate delivery... No waiting if you order them here!

Victory Garden--

- CANNED VEGETABLES will be plenty high in price as this War Emergency continues.
- IF YOU WANT TO EAT Vegetables this Summer and next Winter... you had better make a Garden.
- MAKING A GARDEN IS NOT EASY. In Planting Time it is either too hot, too cold, too wet, too dry... in fact, it is never just right.
- AND THEN WE HAVE Cut Worms, black birds, potato bugs and cabbage millers to contend with. Gosh! What a fight!
- THERE IS, HOWEVER, ONE THING you don't need to worry about and that is...

As usual, we have all the nice plants you want or need for your Victory Garden.

Let's all get into the Fight and see who has the best garden this year.

Twenty-six Received Diplomas Completing H. S. Course

26 EIGHTH GRADERS
GRADUATED HERE
TUESDAY EVENING

Mau And Arlene Wille
Four Year Average
Above 94 Percent

Commencement exercises
at the school auditorium last
evening, twenty-six boys
were presented with di-
plomas for successfully completing
the high school work.

Eight grade pupils were
presented and received certifi-
cates. They were:

Betty Lacey

Clarence Larsen

Lois Ann Lau

Dean Jacobs

Robert Roths

Marcelle Josten

Mau Lead Class

Mau lead the class in
honors, having an aver-
age of 94.76 per-
cent. Closely followed by
Wille who had a four year
average of 94.63 percent for the
four years of high school work.

Who ranked near the top
were Ardella Nelson,
Betty Etchen and
Harlan.

Attendance records in
the school were attained by La
Lawn, Anna Lee Brunes,
Harlan and Betty Ward.

Letter Awards

in basketball were earn-
ed by Grosshuesch, Elwyn Ja-
douce, Verner Greis-
bach, Allan Lau,
Harlan, and Elmer Buckley.

Letters were awarded to
Grosshuesch, Leonard Kaduce,
Freeman, Louis Klotzbach,
Schwichtenberg, Harvey Aus-
bourn, Brinkman, Harlan
and Glenn Wille.

And Stamp Sales

Klemme grade and high
schools made a fine record in the
sale of War Bonds and Stamps
from September 1, un-
til now was approximately \$3,-

the school bought the larg-
est, closely followed by the
high school, but all of the grades
were congratulated for their

Bamman, who graduat-
ed, and Wayne Schoenwetter,
and Merle Etchen.

a couple of months ago
a pair of twins in the
grades, Peter and Nancy
who have moved away.

Held In Town Park

Annual school picnic in the
park ended the activities
of the school year. The picnic
attended, despite the fact
that the farmers were
bringing their corn and so did
not have time off to come to the
picnic, there were quite
a number of farm families present.

Game between Garner and
Klemme schools was played at
the diamond after the picnic
and was won by Garner 11

Party Held For
Etchen Family

Evening all of the rela-
tives of the Albert and Mary
Etchen family came and held a farewell
party for Mrs. John Etchen
who is moving to
St. Louis next week to be
employed by the Ordnance plant.
Time was enjoyed and
refreshments were served.

Our Men In The Service

MRS. LOWELL MAU WITH HER
HUSBAND IN TEXAS

The Times is in receipt of a card
from Mrs. Lowell Mau, wife of Pvt
Lowell Mau. She states they are en-
joying nice Texas weather and that
everything is sure pretty there.
Pvt and Mrs. Mau reside at 2315
28th St., Lubbock, Texas. Lowell's
army address is:

Pvt Lowell C. Mau,
U. S. Army Air Forces,
109 9th G. Sqdn.
South Plains Army Air Field,
Lubbock, Texas

SEAMAN EVERT BARZ HAS
APPENDICITIS ATTACK

Mrs. Evert Barz has received
word that her husband is confined
to a Navy hospital suffering with
an attack of appendicitis. Mr. Barz
is stationed at a submarine base on
the east coast and has been taking
special work on submarines.

His condition was reported as not
serious.

RECEIVES PROMOTION

Alfred Lau, U. S. N., son of Mr.
and Mrs. William Lau of Garner,
and grandson of Mrs. Henry Lau
and Mr. and Mrs. Tom Blank of
Klemme, has been promoted to the
rank of First Class Radioman. He
is stationed at a naval base at Bos-
ton, Mass.

CASH, CIGARS, CIGARETS
STOLEN FROM SERVICE
STATION AT GOODELL

The service station operated by
Ira Langlitz at Goodell was broken
into Saturday night and \$45 in cash
and a quantity of cigars, candy and
cigarettes were taken. Entrance was
gained by breaking the glass in the
workshop window.

WIGTON, BRITT, SELLS
FUNERAL HOME TO
JOE OSMAN

Britt News-Tribune:
A deal was consummated last Wed-
nesday, whereby Mr. Joseph Os-
man, mortician, takes over the
business of the Wighton Funeral
Home. He took possession im-
mediately.

Mr. Osman comes from Eagle
Grove, here he has followed his
profession for many years. He is
also associated with the Wellemey-
er undertaking business at Klem-
me.

Who Has The Money For 2nd War Loan?

"Where is all the money com-
ing from to meet the 13 billion
dollars of the Second War Loan
goal?" is a question heard on
many sides. It will come out of
the 45-billion dollar surplus
earnings of 1943, according to
statistics reported by Treasury
experts.

During 1941 personal savings
of individuals amounted to 9
billion dollars. During 1942 this
surplus or prospective savings
will increase by 36 billion dol-
lars over 1941 when consumer
goods were easy to get.

Now that prices are high,
thrifty people will make their
goods last longer and place
more money in War Bonds.

War Not To Affect Traditional Iowa Threshing Dinners

FARMERS MAY GET EXTRA
FOOD STAMPS FOR THEIR
THRESHING DINNERS

OPA Explains Food Rationing As
Applied To Extra Farm Help

The Des Moines district Office of
Price Administration today released
an explanation of food rationing
rules as applied to extra farm help
and regular farm employees, fol-
lowing a flood of inquiries to local
boards from Iowa farmers as to the
proper procedure.

Under rationing regulations, the
farm employees are divided into 3
classifications:

- 1 Extra help hired for periods of
less than thirty days
- 2 The farm hand who lives in
town and goes home for the week-
end
- 3 The farm hand who lives con-
tinuously at the farm of his em-
ployer.

Farmers who employ extra help
for a period of less than 30 days
may go to their ration boards and
apply for extra food rations to
serve those employees on a basis of
three meals a day. The farmer is
not permitted to collect ration
stamps from such employees.

If a farm hand works six days a
week at the farm and then goes to
his own home in town for over Sun-
day, he is not considered under the
OPA regulations as a permanent
boarder at the farm. In other words
there is no rule requiring the farm
hand to give up his ration book to
his employer in such cases. OPA,
however, suggests that in a spirit of
fair play, the farm hand offer his
employer a sufficient number of ra-
tion stamps to "pay" for his meals.
Such an agreement is strictly be-
tween the employer and the em-
ployee, the OPA stresses, and no
federal regulations apply to force
such an adjustment of rationing.

The farm hand who lives seven
days a week at the farm where he
is employed, is required under the
OPA regulations to turn over his
ration book to his employer.

Food For Threshing

Farm wives who have been wor-
rying about how they are going to
get enough ration points to feed
the neighbors when they come over
to help at threshing time may go
ahead and plan the usual big dinner
without stripping their own ration
books.

The OPA has ruled as "extra
help" this typical Iowa plan of ex-
changing work at threshing time.
This means that the farm wife may
go to her ration board and secure
enough extra points to purchase
the necessary supplies to feed those
hungry threshers.

SUGGEST SYSTEM OF PRIORI-
TIES IN FEEDING AVAIL-
ABLE PROTEINS

The supply of proteins for feed
still remains inadequate for de-
mands in most areas. Processors
contracted early for available crops
and so many farmers who normal-
ly buy standard feeds have been
compelled to buy mixed feeds or
do without.

Certain kinds of livestock should
get first call on the supplies avail-
able for each individual farm, ac-
cording to County Extension Direc-
tor Paul Henderson.

Small chickens and pigs, heavy
laying hens and little calves need
protein the most and should get
priority. High producing milk
cows and hogs over 80 pounds in
weight follow. Cattle and lambs on
feed, especially the younger stock
come next, and also any cattle and
lambs which are not receiving a
supply of good legume hay. Horses
and breeding herds of cattle are at
the bottom of the list.

Scarce animal proteins are es-
sential at all stages of growth and
may be replaced by vegetable pro-
teins with nursing pigs if the sow
is well fed, and also for the period
after the pigs weigh 80 to 100 lbs.
This holds true also with chickens
for market that have reached ma-
turity, but growing chickens and
pigs from weaning to 80 pounds in
weight need animal protein urgent-
ly.

The tight protein feed situation
this year has prompted specialists at
Iowa State College to recommend
that each farm grow a few extra
acres of soybeans for protein feed
for home needs, thus putting each
producer on practically self-sus-
taining basis so far as balancing
feed supplies and livestock num-
bers is concerned. This acreage
would be in addition to the war
production goal for soybeans on
each particular farm.

A rough rule in Iowa would be
an acre of beans for every 10 acres
of corn to be used as livestock
feed, with this proportion cut down
accordingly if part of the protein
supplies are available from outside
sources.

FENCING IS NOW
AVAILABLE

Fencing of all types has been re-
moved from the list of rationed
products by the federal Depart-
ment of Agriculture. The action
was taken because of inability of
many local agricultural war boards
to act promptly upon applications,
and because of WPB regulations al-
lowing sales to others than farmers.
The WPB has granted permission
for the manufacture of a wide style
of poultry netting not previously
permitted under regulations.

Services Held Tuesday For Mrs. Reemstma

IOWA RATIONING
CALENDAR

Tires:

Class A Ration: Second in-
spection deadline Sept. 30.

Class B Ration: Second in-
spection deadline June 30.

edible fats, cheese, canned fish,) valid through May 31.

H Red stamp valid May 16
through May 31.

J Red stamp valid May 23
through May 31.

NEW RULING ON CANNING
SUGAR ISSUED SATURDAY

OPA officials in Washington an-
nounced a change in the original
plan of distribution of sugar for
canning purposes. The new plan
went into effect last Saturday as
some rationing boards began the
granting of canning sugar applica-
tions.

Under the revised plan, a
maximum of only 15 pounds
per person, instead of 25 lbs.,
can be allotted by local boards,
after proper showing has been
made by applicants on the bas-
is of one pound of sugar for
every four quarts of fruit to be
canned.

Later on the OPA has announced
it plans to designate an unused
stamp in War Ration Book No. 1 as
good for 10 additional pounds of sug-
ar for canning. Housewives who
only need a small amount of sugar
for canning purposes could then ob-
tain a sufficient amount without
applying to the rationing board.
The OPA said persons buying on
this plan would only be required to
make a declaration to their grocer
that the 10 pounds of sugar was to
be used for canning purposes.

Families who need large quanti-
ties of sugar for canning would be
able to secure the 25 pound maxi-
mum originally set by OPA. Sugar
used for putting up jams, jellies and
preserves is included in the 25 lb.
limit.

COUNTY RURAL YOUNG
PEOPLES OFFICERS
MEET

Hancock County Rural Young
Peoples officers met Friday even-
ing, May 14, in the conference
room of the Central States building
at Britt. Miss Winifred Martin from
the Rural Sociology department of
the Iowa State extension service
was present and discussed with the
group, plans for future programs.
Many problems which face rural
young people at the present time
and as farmers of the present and
future were suggested and will re-
ceive serious consideration in the
program plans of the group.

The officers of this group are:
Lillian McDermott, President, of
Britt; Claude Huling, Vice-Presi-
dent, Britt; Inez Eckels, Secretary,
Britt; Walter Anderson, Treasurer,
Woden, and Lawrence Guernsey,
Reporter, Woden.

GARNER WOMAN DIED AT A
MASON CITY HOSPITAL
SATURDAY MORNING

Funeral Services Held At Garner
Methodist, Burial At Mason City
Mrs. Bena Reemstma, 50, wife of
Mr. Ben Reemstma, prominent Gar-
ner auctioneer, died at a Mason
City hospital early Saturday morn-
ing.

Funeral services were held at the
Methodist Church at Garner Tues-
day afternoon at 2:00 o'clock with
the Rev. Carl Sentman of the Radio
Chapel in Mason City and the Rev.
E. F. Broberg, pastor of the Garner
Methodist church, in charge. Burial
was made in the Memorial Park
cemetery west of Mason City.

Bena Lindeman, the daughter of
H. B. Lindeman, was born at
Wellsburg, Iowa, on September 20,
1893. She was united in marriage
to Mr. Ben Reemstma on February
5, 1917, at Waterloo, Iowa.

Surviving are two daughters,
Mrs. John Abele, and Beverly, both
of Garner; one brother, H. H. Lin-
deman, of Aplington; five sisters,
Mrs. Richard Tack and Mrs. M. D.
Niehaus of Wellsburg, Mrs. George
Tjaden of Winnebago, Minn., Mrs.
Robert Barr of Waterloo, and Mrs.
J. A. Brechwald of Fort Dodge.

One sister, Mrs. Fred Spieker of
Aplington, preceded her in death.
Mr. and Mrs. Reemstma lived in
Klemme a number of years ago,
moving to a farm in Liberty town-
ship and later to a farm near Ven-
tura and more recently to a small
farm on the outskirts of Garner.

Mr. Reemstma began his career
as an auctioneer while living in
Klemme about twenty years ago.

LIBERTY FARM BUREAU
HELD MEETING

About fifty persons attended an
interesting township Farm Bureau
meeting at Liberty No. 3 district
school house on Wednesday, May
12th.

The meeting was called to order
by the township chairman, Art Up-
meyer, followed by community
singing. Aaron Stomer, township
director, gave a report of the busi-
ness transacted at the last county
board meeting. Miss Hazel Grimes,
county extension home economist,
announced several events, among
them the canning demonstrations
ad gave out from three schools,
districts number 2, 3 and 5 under
the direction of their teachers, Miss
Lois Riemer, Mrs. Elanor Truitt,
and Miss Eva Schluter. Each pre-
sented several numbers on the pro-
gram which were very much enjoy-
ed. The John Buzicky family sang
several songs to the accompaniment
of Mr. Buzicky's guitar. Refresh-
ments and a social time followed.

UNANNOUNCED ALERT AND
BLACKOUT HELD IN COUNTY
TUESDAY EVENING

With only a short warning re-
layed from headquarters at Britt,
Klemme Civilian Defense officials
and Air Raid Wardens were called
upon to stage a surprise blackout
Tuesday night which began at ap-
proximately 10:00 o'clock and lasted for ap-
proximately twenty minutes.

An experiment was tried by us-
ing the outside loud speakers at the
Methodist Church to broadcast the
alert and blackout warning.

Officials were well satisfied with
the results and found nearly one
hundred percent blackout within a
few minutes after the warning was
sent out over the loud speakers.

People are warned to be "on the
alert" for further blackouts.

MRS. WATERMAN HOSTESS
TO U-DELT-EM CLUB

Mrs. C. G. Waterman was hostess
to the U-Delt-Em club at her home
last Thursday afternoon.

Mrs. Fred J. Arnold won the high
score in contract bridge; Mrs. R. A.
Jorgenson, second, and Mrs. P. M.
Wilson, third.

Lynn Chambers' Point-Saving Luncheon Menu
*Tulip-Tomato Salad
Brown Bread-Cream Cheese Sandwiches
Lemon Sherbet Tea
*Recipe Given

Combine cottage cheese, pine-apple juice and sugar. Add salt to taste. Place a mound of cheese on top of each slice of pineapple, then garnish with diamond shapes from green and red pepper. Serve on crisp lettuce with dressing.

A dark brown bread, fruity and tasty is excellent to serve with salad luncheons. If your salad does not include cheese, serve its fragrant slices spread thinly with cream cheese and jam or make dainty little sandwiches with butter spread thinly, add a bit of lettuce for crispness.

Baked Brown Bread.
(Makes 1 14x9x2-inch loaf)
1½ cups sifted all-purpose flour
2½ teaspoons soda
1½ teaspoons salt
½ cup sugar
2 cups graham or whole wheat flour
¼ cup shortening
1 cup seedless raisins
2 eggs, beaten
2 cups sour milk
½ cup molasses
Sift flour, salt, soda and sugar together. Add graham or whole wheat flour, mix well. Cut in shortening until mixture is like meal. Add raisins and mix. Beat eggs, add sour milk and molasses. Add dry ingredients and blend together thoroughly. Pour batter into a well-greased pan. Bake in a moderate (350-degree) oven.

A lot of good quality protein, vitamins and minerals come in that neat little package, the egg! Right now you'll be finding they're plentiful, so make good use of them:

Eggs Creole.
(Serves 4)
2½ cups tomatoes
1 small onion, chopped fine
½ green pepper, chopped
1 teaspoon green pepper
¾ cup fine bread crumbs
½ cup celery
4 eggs
¼ cup grated American cheese
½ teaspoon salt
½ teaspoon pepper
1 bay leaf
Cook tomatoes, pepper, onion, celery and seasonings together with bay leaf for 10 minutes. Strain, add bread crumbs. Place sauce in individual casserole dishes. Break eggs on top and sprinkle with salt, pepper and grated cheese. Bake in a moderate oven until eggs have set and cheese is melted.

Oatmeal puts plenty of vitamin B₁ into diets and keeps you stepping with pep and energy the day long. Try these delicious cookies:

Honey Oatmeal Hermits.
1½ cups honey
2 eggs
¾ cup lard or other fat
½ cup warm water
2 cups quick-cooking oatmeal
3 cups flour
1 teaspoon soda
2 teaspoons baking powder
½ teaspoon salt
1 cup raisins or chopped dates
Cream honey and fat until smooth and creamy. Add well beaten eggs and oatmeal. Add sifted dry ingredients alternately with warm water, saving only a small amount of flour to dredge raisins or dates. Blend in fruit and mix thoroughly. Drop by spoonfuls, 3 inches apart on a greased baking sheet. Bake 15 minutes in a moderate (350-degree) oven for 15 minutes.

Lynn Chambers welcomes you to submit your household queries to her problem clinic. Send your letters to her at Western Newspaper Union, 210 South Desplaines Street, Chicago, Ill. Don't forget to enclose a stamped, self-addressed envelope for your reply.

Released by Western Newspaper Union.

Tales of the Town:

When the editors and publishers were in town for their annual convention several of them were talking shop . . . One recalled the time when Heywood Broun was a cub and he was instructed to come in very early one Christmas morn . . .

When Broun arrived—the empty city room depressed him. The desks were littered with remnants of the previous night's tale clippings, bare spikes, curled up cheese sandwiches and beer containers . . . Suddenly, off in a corner, a telegraph instrument started to click . . . Tobacco tins were jammed against the telegraph "bugs" to make them louder . . . One after the other joined in the monotonous chorus—all chirping the same message . . . He could tell, he said later, that they were trying to report something important happening somewhere, but he couldn't understand a word they were tapping . . . Finally, in came a sleepy telegrapher . . . Broun said: "Please tell me what is happening. They are all clicking madly. Maybe a liner has been sunk or a king assassinated or an earthquake" I'm sure it's a big story, and our paper is being scooped!"

The veteran listened—to one after the other—and then smiled . . . "This is Christmas, son," said the old-timer, "they are all saying the same thing. A Child is born—a Child is born—a Child is born!"

In the days when most of the papers were on Park Row, a certain editor was nicknamed Simon Legree because of the way he kicked around some of the staff . . . One night, and this is journalistic history, a staffer couldn't stand the abuse any longer . . . He threw the editor down a flight of stairs . . . The next night when he came in—the staff presented the reporter with a gold watch inscribed: "For the Best Journalism in 1928."

One night some of us were privileged to meet Sgt. Al Schmid, the Philadelphia boy who was decorated at Guadalcanal for erasing over 200 Japs until one of their grenades blinded him . . . Al, who is Dutch-Irish, has a different slant on the war . . . He talked a lot about two of his buddies, one Rivers, a Protestant, who died there, and one lad named Diamond from Brooklyn, a Jewish chap . . . "They say," said Al, "that I killed 200 Japs. I don't know how true that is. I never said that. I was told so by people who read it in the papers" . . . And he kept talking about the others—or wishing hard that he could do something about "waking up the people back home!"

When the G-Men collared the last big bunch of Nazi spies (just before we entered the war) some of the prisoners revealed the following . . . That after the advance men had been smuggled in and had made all the most elaborate preparations (laying the ground work with secret radio stations and all the other standbys) the Nazis sent over their very best agent . . . He was a man who had worked all over the world, and he had never failed on any assignment . . . There was just nothing this bloke didn't know about the noble art of espionage . . . And he was sent here to take charge of matters . . . On his first day in New York the other Nazi spies gathered to meet him—where he planned to give them their instructions . . . On his way to the rendezvous, however, something went wrong with the script . . . Even the higher-ups in Berlin never figured to coach him in a most important detail . . . How to cross the street at Times Square.

The great spy was killed trying to get out of the way of a cab.

The Big Show:

Sallies in Our Alley: Dick Himber heard Colonel Romulo (he helped rescue MacArthur) tell it at a party. "It was the one joke," said Romulo, "that kept us laughing on Bataan until the end. A mamma rabbit and a daddy rabbit were in the woods when they saw a pack of wolves. They hid in a cave. 'How long will we hide here?' asked the mamma rabbit . . . 'Until,' was the reply, 'we outnumber 'em!'"

The Front Pages: The most important problem for some newspapers was reported by United Press from Providence, R. I. The State Senate, it appears, passed a measure that would make it mandatory for Rhode Island newspapers to print names and addresses of all writers of editorials—and ditto for those whose letters are published under the Letters to the Editor col-yums.

Quotation Marksmanship: G. Martin: True generosity is the ability to accept ingratitude . . . The Alabama Times: Show courtesy to others not because they are gentlemen, ers not because you are . . . Eugene O'Neill: The censorship which begins by banning a strip tease show always finishes by condemning as treason a play which hints that Washington might not have chopped down that tree . . . Anon: He is a Clark Gable-bodied young man . . . Schopenhauer: Life is a business that does not pay expenses.

ITALY AND INVASION
ETIQUETTE

("Pamphlets urging Italians to be polite to invaders have been circulated in Italy."—News item.)

Italy doesn't want any misunderstanding about this invasion. She knows the danger she faces if it is slowed up too much.

She wants the invaders to feel at home. This is one of the most important invasions any country ever faced. And no country ever had more reason to want it to come off all right and with all possible smoothness.

"I've got some inside lines in Italy," said Elmer Twitchell today, "and my sources of information tell me the Italians want our invasion to be a 100 per cent success. They don't want any half-hearted welcomes. They hold that any Italian with the best interests of his country at heart will show the invaders every courtesy, and throw in a few flowers."

"After a country has had the Nazis around a few weeks it will welcome any change, however unusual," he continued. "There are thousands of Italians learning the words and music of 'Yankee Doodle Dandy' right now so they will be able to sing and play it when we are sighted anywhere near shore. They're so sick of what Hitler has done to their country that even Mussolini is getting impatient at the Allies for holding off so long."

Twitchell may be right. There are some signs of it. This department has just received a report that rules of Invasion Etiquette are being circulated all over Italy, the purpose being to see that no Italian does or says anything that might give an invading party the notion its arrival is not fully appreciated.

We hear the following rules have been adopted:

1. Blocking streets or sidewalks to invaders must be avoided.
2. All persons near any dock or beach when invaders appear shall bow respectfully, give a cheery greeting and step to one side in order not to interfere with the speed invasion.
3. All questions by invaders shall be answered politely. Italians asked for directions should, whenever possible, not only give them fully, but accompany the invaders to the desired point.
4. It shall be considered good etiquette to invite an invader into the house.
5. Italians observing any attempt by Nazis to slow up the invaders shall oppose such attempts.
6. In rushing to the waterfront to welcome invasion all slow moving natives shall keep to the right in order to permit swifter moving people to pass.

The baseball season is on. Broadcasts will be made to troops all over the world. And fighting morale is certain to be built up. There will be more than one case where a Yank, after making some heroic charge and capturing a bunch of Heinites against great odds will be asked, "How did you do it? What did you think of as you went over the top?"

And the answer will be, "I was thinking about that lousy decision the ump made against the Yanks in the ninth and it made me sore."

There is no question of the influence of baseball at the front. The yen of every American soldier is to strike Hitler out, nab Mussolini off first and get Tojo trying to steal home with the bases full.

BROADWAY STUFF

An outdoor circus is being opened in the heart of Broadway, which considers itself the center of sophistication. This department predicts that it will be a sensational success and make its promoter rich. Mazda Lane makes a pose of pretending that it has outgrown country tastes, thrown off the corny appetite and become hard-boiled and blase. But the hay is thicker in its hair than in any similar area on earth.

The chance to go for pink lemonade, popcorn, jumbo peanuts, balloons and a small-town circus atmosphere right off the Main Stem will be irresistible. Gangway for the boys who have outgrown all that sort of thing!

NO PRIVATION

Today I cheer the OPA
And all its busy groups,
For now it doesn't take the book
To get a few canned soups.

Tomato now is cut in half—
Let huzzas fill the air!
For I can get along on that
When all the cupboard's bare.

Add Similes: As difficult as getting any scrap meat for the dog under that recent OPA ruling that it would be allowable.

Americans are urged not to go far for vacations this summer. But don't let this encourage you to swing a hammock too near the home garden.

Elmer Twitchell thinks the height of surprise is being surprised at the discovery that the Japs do uncivilized things.

PATTERNS
SEWING CIRCLE

8207-C
3-8 yrs.

Her Own Bolero

IT'S true, not every little girl can boast a bolero dress of her own! This one is something very special with its heart-shaped neck, huge pockets and bow-tied belt. The bolero itself might be worn with other dresses.

Pattern No. 8207c is in sizes 3, 4, 5, 6, 7 and 8 years. Size 4 bolero and dress take 2½ yards 35-inch material; 4 yards rick-rack.

Due to an unusually large demand and current war conditions, slightly more time is required in filling orders for a few of the most popular pattern numbers. Send your order to.

Hitless Ball Games

Of the more than 27,000 major league baseball games played since 1920, only 21 were hitless and only one man, Vander Meer, pitched two, and both in the same week for the Cincinnati Reds, says Collier's. The first was against Boston on June 11, 1938, and the second was against Brooklyn four days later.

School News

SCHOOL NOTES LEFT OUT LAST WEEK

NEWS AROUND THE HIGH SCHOOL

Senior tests were given Thurs-
day and on Friday all books and
make-up work were checked.

There are twenty-six Seniors,
one of the largest classes to be
graduated from the new building.
This class is the first class to
spend four years in the present
building.

The baseball team went to Le-
land to play in the sectional tour-
nament Saturday and won against
Joice 6 to 0.

Klemme defeated Garner last
Thursday 1 to 0 at Garner.

Commencement will be held on
Thursday evening of this week at
8:00 o'clock in the school gym. Rev.
A. N. Rogness of Mason City will
be the speaker.

Garner will play ball here on
Friday. The school picnic will be
held on the same day.

SEVENTH AND EIGHTH GRADE NEWS Clara Smith, Teacher

Friday we wrote State Tests
with Seventh and Eighth Graders
from nearby rural schools. Nine-
teen rural students were present,
making a total of forty-five who
wrote the tests.

We are proud of our total in-
vestment in War Bonds and
Stamps for the school year.
Our room has a total of \$1,-
759.55 worth!

Spelling Honor Roll
Perfect scores in Spelling were
earned this week by

Carol, Roger B., Peggy Lou,
Dean, Marcelle, Lois Ann, Reg-
ger R., Edward, Billy, Harold,
and Helen S.

In our Class Progress Chart, the
Eighth Grade has only received one
grade below good. We have re-
ceived two excellent during the
year.

FIFTH AND SIXTH GRADE NEWS Esther Bolles, Teacher Spelling Honor Roll

Maurice Trumbell Willis Bock
Robert Baack Norma Early
Dorance Baack Luella Priebe
Marvin Schmidt Iris Rosendahl
Merlin Brinkman Larry Ramsay
Marjorie Lau

Dorance, De Vera and Merlin
came back to school last week.

Miss Bolles is reading "Freddy
the Detective" to us.

We are reviewing for tests.

THIRD AND FOURTH GRADE NEWS Evelyn Guelff, Teacher

Maralee treated us to candy last
Thursday afternoon. Her birthday
is the 13th of May, but since there
is no school that day she treated
us early.

We are reading "Hester and Tim-
othy" now. It is a pioneer story.

We finished making our bird
books last week. They are very
pretty.

We learned the poem "If I were
a One-Legged Pirate"

Spelling Honor Roll

The following received perfect
scores in Spelling last week:

Jimmy Maxine
Sondra Jo Ann
La Nelle Audra

Ruth and Beverly
We went over our quota a-
gain last week. We set \$15.00
as our goal but we bought \$19.-
50 worth of War Stamps.

PRIMARY ROOM NEWS Virgie Hardcopf, Teacher

(Mrs. Patterson, Substitute)

Miss Hardcopf has been gone
since last Tuesday. We hope she
feels much better now, and likes the
gift we got for her.

Mrs. Patterson taught us some
Chinese nursery rhymes.

We are still reading "Dot and
Dash." It is very exciting.

We bought \$4.60 worth of
War Stamps last week.

Spelling Honor Roll

First Grade Denny, Lois Ann,
Tommy, Janice, Roger, Richard,
and Bonnie

Second Grade Elaine, Sharon,
La Vern, Garry, and Billy.

Hall of Statuary Has Famous Personages' Bust

The national hall of statuary in
the Capitol building at Washington,
D. C., was formerly the hall of the
United States house of representa-
tives. It was established by con-
gress July 2, 1864. Each state was
invited to contribute a marble or
bronze statue of its most distin-
guished deceased citizen. In place
are: Alabama, Gen. Joe Wheeler;
Arkansas, Uriah M. Rose; Arizona,
John Campbell Greenway; Califor-
nia, Junipero Serra; Connecticut,
Roger Sherman; Delaware, Caesar
Rodney; Florida, John Gorrie; Geor-
gia, Alexander H. Stephens; Idaho,
George L. Shoup; Illinois, Frances
E. Willard; Indiana, Gen. Lew Wal-
lace; Iowa, S. J. Kirkwood; Kansas,
John J. Ingalls; Kentucky, Henry
Clay; Maine, Hannibal Hamlin;
Maryland, Charles Carroll; Mas-
sachusetts, Samuel Adams; Michi-
gan, Lewis Cass; Minnesota, Henry
M. Rice; Mississippi, Jefferson Da-
vis; Missouri, Thomas H. Benton;
New Hampshire, Daniel Webster;
New Jersey, Richard Stockton; New
York, Robert R. Livingston; North
Carolina, Zebulon B. Vance; Ohio,
William Allen; Oklahoma, Sequoyah;
Pennsylvania, Robert Fulton; Rhode
Island, Roger Williams; South Car-
olina, John C. Calhoun; Tennessee,
John Sevier; Texas, Samuel Hous-
ton; Vermont, Ethan Allen; Virginia,
Robert E. Lee; West Virginia, Fran-
cis H. Pierpont; Wisconsin, Robert
M. LaFollette. Statues which were
formerly in statuary hall have been
placed in other parts of the Capitol.

Old Indian Training Being Used for Cadets

The American Indian has con-
tributed an idea which army phys-
ical education instructors at Kelly
Field's giant replacement center
have borrowed and made a neces-
sary step in the training program
of the future flying officers of the
U. S. air corps.

One day a week these aviation
cadets jog around a 2 1/2 mile course
in a gait known as the "Indian Trot."
After clicking off a few hundred
yards in a race-horse pace, the in-
structor slows his charges to a wel-
come walk, but the length of the
run is gradually increased until at
the end of the allotted five weeks
each fledgling is expected to click
off the course at a fast pace.

This run—a takeback to the days
when Indian chieftains stressed fit-
ness for their young warriors—is
only a cog in the fitness program.
After assembly at 9.15 a. m., the
cadet or student goes through a 10-
minute warming-up exercise to loos-
en his muscles. For the next 15
minutes he is put through a brisk co-
ordination drill. Streamed up now
and rarin' to go, the future airmen
are divided into teams for volley
ball, touch football and basketball.
Others compete in high jumping,
tossing the shot, and broad jumping
events.

These calisthenics and the games
that follow last approximately one
hour and 15 minutes, five days a
week—just a few of the things that
"keeps 'em flying."

Iconoclast

The perfect antithesis of an icon-
oclast—that's what du Pont Cornelius
is, and literally. An iconoclast is a
fellow who goes around breaking
icons. Cornelius, young artist on
the University of Pittsburgh library
staff, builds them up, using a bi-
zarre assortment of equipment
ranging from an insecticide to cot-
tage cheese. He has just finished
restoring a group of 18 highly valu-
able centuries-old Rumanian icons,
or sacred images, which the Ru-
manian government gave to Pitt for
eventual incorporation in one of the
nationalist rooms at the Cathedral
of Learning. These portrait images
of the saints, stylized peasant-
Byzantine paintings executed on
wood in egg tempera and gold leaf,
were included in the Rumanian
pavilion exhibit at the New York
World's fair, but when they arrived
at the university in December of
1940 they were in bad shape.

World of Color Varies

The world of color varies widely
over the animal kingdom. Many
lower animals see objects in varying
shades of gray. Dogs, it is believed,
have little or no color vision. Some
zoologists say that fish cannot dis-
tinguish colors. However, certain
insects have eyes that are sensi-
tive to light rays in the infra-red
and ultra-violet fields that are in-
visible to human eyes. Even in hu-
man eyes there is considerable vari-
ation in color vision, continues the
institute, adding that in the United
States there are several million per-
sons who are color-blind. Such per-
sons have worlds of color that are
different from those of their com-
panions.

Salt Does the Work

Tests with burning magnesium, in
solid form and in shavings, showed
that salt was highly efficient as a
smothering agent. Relatively small
quantities of salt sufficed to
bring the intense magnesium fire
under control by smothering it. When
water was thrown on the metal
buried in the salt the fire recom-
menced, proving that potential re-
sidual fire had been smothered by
salt.

Other chemicals added to salt with
the idea of increasing its efficiency
as an extinguishing agent proved
practically worthless.

This Should Settle Your Doubts on Fence Posts

Which lasts longer? Round or split
fence posts? is a question frequen-
tly asked of the United States forest
service.

When fence posts are untreated it
is not a question of selecting round
or splits posts, say scientists of the
forest service. Several years' re-
search at the forest products lab-
oratory in Wisconsin show that gen-
erally it is the amount and kind
of heartwood that really determines
how long a post lasts.

Such trees as the Osage orange,
cedar, black locust, or chestnut
make good fence posts because they
have plenty of durable heartwood.
Douglas fir and southern yellow pine
make fairly good posts but the heart-
wood is not so lasting. On the other
hand, the amount of heartwood in
the cottonwood, basswood, spruce,
and hemlock is not important as
neither sapwood nor heartwood is
lasting. They make poor posts ei-
ther split or round.

From a practical standpoint an
untreated split post may be better
than an untreated round post. If
the round post has a great deal of
sapwood around the heartwood, then
the staples may not reach the heart-
wood. Split posts may be set so
that the staples may be driven direct-
ly into the heartwood where they will
hold long after the sapwood has rot-
ted away.

Rural Folk Should Try The Spirit of Scientists

"If at first you don't succeed, try,
try again," is a policy U. S. depart-
ment of agriculture scientists have
found essential in seeking and test-
ing new chemicals for use against
insect pests. The maxim applies in
several ways. Try first one part of
a plant and then another. The leaves
and flowers of the weed, devil's shoe-
string, are worthless, but the roots
yield rotenone, an effective poison.

Try a poison, first on one insect,
and then on others. Roark advises
the chemists and entomologists who
are working on these poison prob-
lems. If nicotine is used on house-
flies in the same way that pyreth-
rum sprays are used, the only ef-
fect is to make the flies walk back-
ward, yet nicotine is highly effec-
tive against aphids, and farmers and
gardeners use about 1,000,000 pounds
of nicotine alkaloid a year. If nicot-
ine had been tested only against
houseflies it would have been dis-
carded.

Again, says Roark, test the materi-
als with various methods of extrac-
tion, and with various methods of
application. Rotenone is almost in-
soluble in alcohol, but highly soluble
in chloroform. Discovery of the
possibilities of devil's shoe string
was delayed because early investi-
gators did not use the right solvent.

Oregon Grow Rubber?

Promising rubber-producing plants
that might possibly be adapted for
growing in Oregon will be tested
there as soon as they are available,
reported G. R. Hyslop, head of the
Plant Industries division, Oregon
State college. Professor Hyslop re-
cently returned from Washington,
D. C., where he conferred with fed-
eral officials on this subject. Inter-
est in such plants was increased re-
cently with the announcement by
the National Farm Chemurgic coun-
cil that a form of dandelion known
as Kok-sagyz is grown in Russia as
a source of rubber. The suggestion
was made that this plant could be
grown in the Midwest and possibly
on the Coast. In Oregon arrange-
ments have been made to have cer-
tain milky juice plants that grow
readily assayed for their rubber
as soon as plants are available.
At certain stages in the lives of
these plants the rubber content is
rather low but as maturity is ap-
proached some of these shorter-lived
plants show an increase in rubber
content that may be of economic
importance, says Professor Hyslop.
A number of new milky juice annu-
als and perennials will be sent there
for testing.

New Style Cast Iron Sinks

Fitting today's low cost market of
military, naval and defense hous-
ing, plumbing manufacturers have
designed new styles of enameled
cast iron flat-rim sinks.

These new sinks range in length
from 24 to 60 inches. All are 21
inches wide for building into metal
or wood cabinets. The length of the
sink is determined by the style.
The 60-inch model has two basins
and two drainboards; the 24-inch
fixture is a single compartment
flat rim model for building in. These
new low price sinks made their
debut with two other types: the
single compartment double drain-
board style, and the single compart-
ment single drainboard.

Through to China

A new mining machine, which
theoretically could bore a hole to
the center of the earth or tunnel
clear through, was reported to the
American Institute of Mining and
Metallurgical engineers.

It works like a burrowing insect.
With only one man driving, it goes
ahead under its own power. It al-
ready has bored down 1,125 feet in
California, through much hard rock.

The "bug" is metal. It has jaws
and body, each about 15 feet long
and five feet in diameter. The body
houses an electric motor and "legs."
The legs are screw jacks to hold
position against the sides of the hole
being drilled.

War Brings America Knowledge of How To Eat Properly; Once Lowly Vitamin Now Important Item in Balanced Diet

U. S. Finds It's Protein and Not Meat That Counts; Most Nutritive Cuts Once Scorned By Housewives; Heavy Meals Necessary for Workers.

By AL JEDLICKA

Released by Western Newspaper Union.

Time was not so very long ago when all of this nutritive and vitamin talk sounded kind of silly.

That was the time when almost everybody thought that vitamins were something that came in capsules or pills; when women figured that they knew all of the tricks of the culinary trade, and when we all liked food for its taste and gave little consideration to its minerals, proteins, carbohydrates, etc.

Plates were heaped with potatoes and meat; if there were any kids around, few vegetables were served because they didn't like them; and then more potatoes and more meat, and finally a great big slug of pie, was put down to top off a good meal.

If the Little Woman came home from some cooking school all worked up about the science of food and its preparation, the head man dampened her enthusiasm by gently but firmly advising her that all that vitamin and mineral stuff was the bunk, and meat and potatoes were good enough to keep the world going.

In fact, the head man argued invincibly, hadn't the world been living on potatoes and meat, etc., since man's memory runneth, and hadn't she, as well as he, been raised on the old standbys—and, what was wrong with them? Nothing! of course.

But that was before December 7, 1941. A lot of things have happened since then and one of them is Mr. and Mrs. America's attitude toward the vitamin and its entourage. Meat and other rationing have thrown us on the defensive and it is now a question of stretching foods, finding substitutes and all of the time seeking to maintain nutritive values.

The upshot of the whole thing is that we might emerge from the war with a more intelligent knowledge of food, of the purpose of its varieties, and consequently be in a position to guide our healthy growth by exact standards.

If we were to be awfully enthusiastic about the situation, we might say that scientific nutrition may be the one big development following the war, just like the automobile came into its own in 1919. But a lot of people who will find it hard to reform their old eating habits probably would argue to the death that we were wrong, because the airplane will be the thing with peace.

Must Find Proteins.

Since meat rationing came along, food experts have been pointing out the necessity of seeking other sources of protein. In so doing, they have consoled us no end by their reminder that, after all, it's not the

economical in production. It has been estimated that the same amount of protein as in meat can be raised from soybeans at about one-tenth the cost.

Other high protein foods include white, navy and kidney beans; black peas, peanuts and peanut butter. Peanuts never have been taken very seriously except at ball games maybe, but with the emphasis on their decided food value and the industrial use for their oil, they have come into extensive cultivation in the South.

Nutritionists have been careful not to put all of their eggs in one basket, however.

While pointing out the food value of vegetables, one expert explains: "Ersatz dishes of beans, peas, lentils and the like are foods having a lower biologic value than meat itself. They are sometimes referred to as meat substitutes, and they are useful, but one should make certain that milk, eggs and cheese are included in the menu to furnish biologic values similar to meat, chicken and fish."

To obtain a balance in diet for necessary nutrition, another expert steps to the head of the class with the suggestion that milk, leafy green or yellow vegetables, potatoes, citrus fruits, tomatoes, whole grain or enriched cereals, meat or meat alternates and occasionally an egg be included in the day's meals.

Meats Also Have Vitamins.

This expert had in mind the fact that besides protein, meats also possess vitamins and minerals; so that in finding protein substitutes, it is also necessary to supply vitamin supplements.

Vitamin B1 and vitamins B2 and G are present in meat, chiefly in pork. To make up for any losses, whole wheat bread, enriched bread or cereals and milk may be eaten instead.

Some nutritionists believe that

Study food on nutrition basis.

Americans have never known how to shop for meat. One says that the most nutritious parts of every carcass are seldom chosen at all, but go into making fertilizer or feed.

Blood, lungs, stomach, pancreas, kidney, brain, sweetbreads and hearts—these are among the items which the housewife passed up with untroubled conscience on her shopping tours.

One nutritionist remarked that the meat packers who knew the peculiarities of the people, put choice tidbits like those mentioned above into their canned dog food. As a result, he says, much dog food was superior in nutritive value to some of the meat canned for human consumption.

"There is one thing we shall do well to remember," the nutritionist declares, "and that is there is no evidence to support the theory that when we buy expensive cuts of meat we are buying more or better protein than the cheaper cuts would provide us."

"Generally speaking, American habits of choosing, buying, preparing and serving meats have been wasteful of both food value and money. Americans in the main have scorned the animal organs and the cheaper cuts of muscle meat, tasteful and nutritious though these may be. Many people habitually spurn fat meats. On the other hand, we rush to buy the cuts which include a large proportion of bone and gristle, which represents waste."

Find Adequate Diets.

The National Research council in a recent report on nutrition asserted that inadequate diets and malnutrition in varying degrees occur frequently in all parts of the country.

Diets of many industrial workers appeared to be below the level of what is required for optimum nutrition—and all because foods are not chosen wisely!

Nutritionists figure that the noon meal must include approximately one-third of the day's requirements of protein, minerals, vitamins and calories for heavy workers.

Good breakfasts are essential and between-meal lunches are helpful in overcoming fatigue during the day. Between-meal lunches of foods providing minerals and vitamins and about one ounce of easily digested carbohydrates are the most beneficial.

If the housewife has received one, she probably has received a thousand suggestions on how to get the most out of food these days. But when these suggestions are considered from both nutritive as well as economical viewpoints, it will be

Vegetables rich in proteins.

considered that most of them have something on the ball.

For instance:

It's the style to eat potato skins. Baked potatoes or potatoes cooked in their jackets have a lot of good minerals just beneath the skin, so when they're thrown away we're not getting the greatest nutritive value for our money. And this brings up the subject of eating the greens under salads. Valuable minerals and vitamins are stored there to be had for the eating.

The sugar supply should go farther now because it's considered good manners to stir tea and coffee vigorously after adding sugar, so we can get its full sweetening value. This will be even more important when iced tea days appear—if we have the iced tea.

We used to eat bread and gravy when we ate alone, or put aside our "Sunday" manners, but now it's the style to eat gravy on hot biscuits, muffins and bread. Every homemaker is being asked to save all drippings and to serve them as gravy to extend the good meat flavor and add nutritive value to the meal.

Everyone likes to eat around the bone of a juicy broiled lamb chop or a piece of fried chicken, and now we're not only told that it's permissible from the standpoint of manners, but we're encouraged to follow this procedure because it's the trend in the style toward patriotic eating. Every particle of meat is precious these days.

Learn to Carve.

Not the very least of the suggestions is one directed toward the head man as well as the little woman. Nowadays, if Papa does the carving at the table, Papa is advised to learn how to carve.

It seems there's more to carving than merely wearing the badge of authority; indeed, good carving avoids waste, assures uniform slicings (important to the preservation of harmony in every home) and affords extra servings.

Perfectly elementary in itself is the fact that a sharp knife is essential to a good carver. And equally elementary, a good carver should take enough interest in his tool to assure its care. Thus, knives should not be let loose in a drawer where other metal can dull or nick the blade. A properly sharpened knife can be kept keen for a long time by a dozen strokes with a steel before use.

In carving any cut of meat, it is desirable to understand the anatomy of bone structure of the cut to be carved and to remember that meat should always be carved across the grain. Steak, because it is tender and the meat fibers are already relatively short, is an exception to the rule.

HERE'S WAY TO BUY BONDS—GET MORE SLEEP!

An extra hour's sleep in "the near side" of the evening was recommended as a war thrift measure by the National Thrift committee. With small wage earners facing the necessity of buying more and more war bonds, the National Thrift committee issues the warning that drastic economies on the home front are inescapable. Health-giving sleep will automatically curtail many extravagances, in the opinion of the committee.

Spring cleaning of budgets is recommended by the committee as an aid to the purchase of more bonds by every family. Recognizing that most budgets are as full of old habits at this time of year as closets are cluttered with clothes, the committee suggests a family conference upon items to be discarded for simplified living, with consequent saving. Out-moded budgets, the committee says, are unpatriotic in war time, and the fact that certain things

have always been in them, is no estimate of their value. A serious family conclave over expenditures of the first quarter of the year is sure to result in discovery of ways to save money.

"The first thing that clutters up a budget," says the committee, "is debt. Loans, installment payments, charge accounts and delinquent bills are a heavy tax on any income. Obviously, the only way to get clear is to pay off."

Washington Digest

U. S. Army Is 'On Alert' For Chemical Warfare

Many Developments in Gas Warfare Date From World War I; America Thought to Have Greatest Potential Gas Offensive.

By BAUKHAGE

News Analyst and Commentator.

WNU Service, Union Trust Building, Washington, D. C.

Some days ago the British short wave radio, beamed on Germany, was telling the German people, who dared to listen to the forbidden words, that if their armies used gas against the Russians, the British would retaliate and paralyze the German cities with gas bombs from the air. Just about that same hour, I was entering the Army and Navy club in Washington with a short, vigorous, bright-eyed general, whose mental agility makes up for his lack of length. It was no coincidence. I was there to learn something more about chemical warfare and I knew of no better way than to pump Brig. Gen. Alden H. Waitt of the chemical warfare service and whose book "Gas Warfare" has sold out twice in Washington book stores.

There was, however, a coincidence connected with that visit, for as we walked into the great, crowded din-

Soldiers stationed at Camp San Luis Obispo, Calif., outfitted with new type training gas masks.

ing room of the club, Waitt paused to speak to a gray-haired man in civilian clothes with a ribbon in his buttonhole. I recognized a once-familiar figure—Amos Fries, first general of the chemical warfare service. He, of course, is retired now.

I recalled that shortly after the First World War, the activities of General Fries got under some people's skins. He was a hyper-enthusiast over his specialty, and in the reaction against all things military which comes after a war, the cynics used to joke about the stenographer who transcribed her symbols so that a letter was sent addressed to the "comical" warfare service.

New Emphasis

But Fries persisted and managed to preserve his unit in a tight little independent group instead of having its activities scattered all over the other services. As far as the public goes, very little attention has been paid to this arm of our military offense and defense. It may, however, become very prominent before the war is over and some people say that day is "imminent."

If gas comes, the United States will be prepared for it. From an organization with 94 officers in the thirties, the chemical warfare service has grown until its officer personnel numbers "many thousands" (I can't reveal the figure) and many of them are with combat troops today where they are responsible for the use of smoke screens and for incendiaries—the fire bombs and the flame throwers.

I have witnessed demonstrations at the Edgewood arsenal near Baltimore, and although I cannot report the details, I can say that some of the effects were remarkable. You ought to see a steel tank or a concrete pillbox go up in flames when it is "lighted" by a flame thrower. It is unbelievable to watch.

There have been, of course, many developments in this little-discussed weapon of warfare since gas was first used in World War I by the Germans and used so successfully and yet so stupidly. The attack took the British and French colonial troops utterly by surprise and caused what amounted to a rout. If the Germans had had the sense to follow it up, they could have broken through the lines and reached Calais.

That was not the first use of gas in warfare—the first recorded use was some time earlier—in fact, just 2,445 years earlier—at the siege of Plataea, when the Spartans burned wood saturated with pitch and sulphur under the walls. It failed because a rain came up. Five years later a similar "gas attack" was a complete success at the siege of Delium where the fumes drove the defenders from the city's walls in a panic.

Recent Developments

The most recent developments in gas warfare has just been revealed. The Allies have known for some time that the Germans had a new powerful gas which it is almost impossible to detect by smell. It can now be stated that this gas is nitrogen-mustard, a relative of the deadly, burning mustard gas of the last war but far more volatile and that much more effective, for it enters the lungs in greater quantities. It can also now be stated that the Americans are able to manufacture this gas rapidly and in quantity, if necessary. Our experts are thoroughly familiar with its characteristics.

The other development which will greatly increase the efficiency of the use of gas, if it is used today, is the new method of spraying it from low flying planes. This makes it possible to contaminate an area containing troops almost without warning.

However, it is believed that the United States is not only prepared with the best protection but probably has the most effective potential gas offensive weapons of any of the armies.

What are the arguments in favor of the use of this weapon which, so far, has not been used? Let me quote Brigadier General Waitt:

"Every sensible man is agreed that war should be resorted to only when all peaceful methods have failed. When, in order to sustain its policies, a nation has no other choice but to use force to gain its ends, it should do this with as little loss as possible. Not only should there be little loss to the nation itself but unnecessary loss to its enemy should be avoided. Victory depends on the amount of loss. The smaller the loss to both sides, the greater the victory to the victor. This may be strange doctrine but it is sound."

Unusual Outlook

"War," Waitt believes, "is not carried on to kill or destroy but rather to enforce a policy, and if possible, the enforcement should be accomplished without loss of life or property."

We can work toward this end by the use of gas. He points to these facts for his argument: There were 275,000 American casualties in the American ranks in the last war. More than one-fourth were caused by gas. Of the gas casualties, only about 2 per cent died. In other words, the men wounded by gas had about 12 times the chance to live as those wounded by other weapons.

To urge the use of gas sounds strange, indeed. I recall how surprised I was when a young Chinese captain, who had fought through most of the campaigns against Japan, said to me: "Gas is a kindly weapon." Of course, he had never met it himself but he had seen plenty of men blown apart by shrapnel and high explosive and he was very positive in his statement.

What about civilians if gas is used? In the first place, America, of course, is in less danger than Britain because of distance but not out of danger. There has been much contradictory opinion expressed as to the possibility of gassing cities. One view is that it would be utterly ineffective, the other is that whole populations could be blotted out. Waitt says both extreme views are wrong. That there is a middle ground, that gas can be used against industrial and political centers of importance for its disorganizing and demoralizing effect but that the chief targets will be strategic points such as railway stations, power and light plants and the like. Gas will not wipe out populations, he believes, it will not entirely supplant explosives. But it will be an effective weapon. The most important defense, aside from material means of protection which Waitt describes in detail, is education and discipline.

The Washington MERRY-GO-ROUND

Washington

AIR PRISONERS IN GERMANY
The fate of American fliers Doolittle raid has raised question: What happens to our go down over Europe? He answer from an officer of the bomber command in England.

If fliers bail out and are safely over France, Belgium, occupied Europe, their chances of getting back to England are good. They become prisoners of war, but in the course of exchange prisoners, they may soon get home.

If they bail out over Germany there's not much chance of back. But so far as we know, treatment of air prisoners is to that of other prisoners, and according to rank.

There is one incident, that damns the German record story of Paddy Finucane. Multiple suppose that the famous ace lost his life because he crashed into the channel after hit over France.

The truth is—though this has never been published—that as Finucane was falling, he was strafed by a machine gun, and he was already dead when he hit the water. Thus a new meaning comes to Finucane's famous phrase, "It, chaps."

TOUGH JOB

When you sift down all the baloo about Elmer Davis as Chief of War Information, the valid criticism you can make is the drawing Hoosier is that working too hard. The last weeks when he went on the job was so exhausted he had a stroke alongside ready to take up his life if he collapsed.

Davis works far into the night to read all that his voluminous office produces, sees almost one who wants to see him.

But given a tough situation, Davis has done a good job. He has Nevada's McCarran, whose aggressive systems are always posing their political outlook, make a face at Davis. But Wheeler McCarran are always demanding more facts and inside facts. Davis has been fighting them in keeping the American public informed.

Most of Davis' fight is against news, squeezing it out of government bureaus which don't want to make the army and navy facts which show up their misdeeds with Czar rubber Jefferson cause his estimates on tires are rosy.

When Davis stepped down from his well-paying radio job to come to government information, even envied him his job, thought he was soft. But the job of digging accurate news, unpleasant news of the government is not soft. It is not popular.

Davis is a good newsman. He is not popular, never will be in some quarters.

Note: Davis did his best to lease the story on bombing Tokyo long ago. Several times he was told the White House that the American public should know the facts. When the Japs released a picture of U. S. fliers supposedly captured in the Tokyo raid, Davis tried to point out the truth, namely these were naval fliers, not Doolittle's. They had been captured in a naval battle. This explanation broadcast to foreign countries O.W.I., but Davis, through no fault of his, was not permitted to tell it at home.

FDR'S CONGRESSMAN

As commander-in-chief, the President has supreme powers in the conduct of the war, but he is just another citizen on the books of Hyde Park, N. Y., rationing board.

At a recent White House meeting the President was telling three congressmen, Gale, Republican of Minnesota, Jackson, Democrat of Alabama, and Manasco, Democrat of Alabama, about the "red tape" involved in buying meat and groceries on his trips home to Hyde Park.

"I have my problems with rationing the same as you fellows grinned."

"Why don't you write your congressman?" suggested Representative Gale.

The President reflected briefly then threw up his hands and roared with laughter.

"Oh, no," he exclaimed, "that!"

The man who represents the Hyde Park district in congress is Hamilton Fish, one of the most vitriolic, superlative foes the President has in congress.

MERRY-GO-ROUND

A high ranking army officer, back from a U. S. tour, makes observation: "High morale may be lowered by too much talk of war planning, which makes the show is almost over."

If the Japs were still in the Washington embassy, they could see their clocks by lanky Will Clayton, astute deputy to Jesse Jones, who walks three miles to work every morning. He passes the defunct embassy precisely at eight.

BRIEFS . . . by Baukhage

Polish saboteurs killed or wounded 424 Nazis, damaged 17 German trains and destroyed seven oil wells within one month.

The famous German military magazine, Militaerwocheblatt, has suspended after 127 years of publication, the London radio said in a broadcast recently reported by United States government monitors.

A farmer who sells butter, lard or any other food rationed under the meats and fats program to a retailer now must collect ration points for the sale.

If you are having trouble with the point rationing system, go to your Red Cross chapter. A nutrition expert will gladly explain point rationing to you.

Mr. and Mrs. Walter Kimball of Boone, spent Sunday and Monday in Klemme packing their household goods and getting ready to move to Boone.

Mr. and Mrs. Harry Avery of Emmetsburg came Saturday afternoon and visited until Sunday evening at the E. C. Buntentbach home.

BETTER IOWA GARDENS

A special column prepared for The Klemme Times by Iowa State College Specialists

Tender vegetables that may be planted now are both bush and pole snap beans, lima beans, edible soybeans and sweet corn. It is well to wait until after May 15 to plant cucumbers, muskmelons, tomatoes, squash, pumpkins, eggplant and peppers. Be sure to sow just a fraction of the amount of bush beans and sweet corn on hand. Wait about 3 weeks after the first sowing then make successive sowings at 10 to 15 day intervals until July 15.

Protect newly set plants from winds and sun by placing drainage tiles, berry boxes or some other objects over the plants. When the plants have recovered from the shock of transplanting, the protectors should be removed.

Cultivate between rows of early planted vegetables. Gardeners not having wheel hoes to do the job will find that the ordinary rake will be a time saver and that they can rake between the rows to keep down the weeds. Do not let the weeds get a start, however, or the hoe will have to be used instead of the rake. Keep the soil stirred regularly with the rake and the weed seeds that keep on germinating will not have a chance.

The best object for pole beans to climb upon is a stake at least 7 feet in length. A fence may be used. If there is nothing handy for pole beans to climb upon, then a tall variety of sunflower can be planted as a last resort. Let the plants get a start, then sow several pole bean seeds at the base of each plant. As the sunflower grows, the pole beans grow up with it.

Thousands of gardeners have been purchasing new spades, hoes, and other garden equipment. Gardening takes work but there is no need to make the work harder than need be. It is suggested that the paint be removed from the metal part of spades and other tools having their tillage part painted. By sandpapering the part until the metal is shiny, work with the tool will be ever so much easier. Keep garden tools sharp. The hoe in particular should be sharpened frequently to make hoeing an easy task instead of a hard one. Hold the hoe blade pointing towards you; use the file at an angle and shove it away from you to do the best job.

Soil should not be hilled up around potato plants on light soils. Yields will be reduced because hilling increases the soil temperature and retards formation of tubers, thus reducing yields. On heavy soils slight hilling of the soil to make a gentle slope towards the center of the row is important to shed surface water.

ALBERT CHRISTIE FORMER GOODELL MAN DIES

Mrs. Fred Bachman, of Belmond, received word that her brother, Albert Christie, 51, died last Wednesday at his home in Lincoln, Nebr.

Mr. Christie was born at Goodell and at the age of two years he moved with his parents to Mason City, where he attended school and graduated from the Mason City high school. Later he accompanied his parents to Canada.

His wife died several years ago and he is survived by one daughter. His sister, Nora Christie of New York City, a registered nurse, cared for him during his recent illness.

REGISTER FOR CANNING SUGAR AT COMMUNITY HALL

Wednesday, May 19:
1:00 to 5:00 and 7:00 to 9:00 p. m.
Thursday, May 20:
9:00 to 11:00 a. m. and 1:00 to 5:00 p. m.
Bring War Ration Book No. 1.

MARALEE RIDDER HONORED AT BIRTHDAY PARTY

Maralee, daughter of Mr. and Mrs. Levi Ridder, was nine years old on Thursday, May 13th, and in honor of the event her mother had a birthday party for her and her little friends.

Games were played after which a delicious lunch was served to the kiddies. Maralee received many nice gifts from her friends.

Local Happenings

Klemme and Vicinity

DRS. COLBY & HAYDEN, DENTISTS, FOREST CITY, IOWA. OFFICE PHONE 374, RES. 189.

Have you registered for your allotment of canning sugar?

A number of the young married couples enjoyed a dance at the Community Hall Friday evening.

Rev. and Mrs. Herschel Harvey and daughter, La Nell, were Mason City visitors Thursday afternoon.

Miss Eunice Larsen went to Humboldt last Friday evening for a week's visit with Barbara Johnson.

Mrs. Everett Barz has rented the Dr. Dulmes apartment vacated by the Patterson family.

Mr. and Mrs. C. A. Larsen leave Thursday for Kansas City on business.

Kenneth Gast and family of near Garner were Klemme visitors Tuesday afternoon.

Miss Irene Harms, who teaches at Newton, Iowa, is home to spend her summer vacation at the James C. Thomas home.

Mrs. Art Wellemeyer and Mrs. Martha Bredbenner will serve at the meeting of the Dorcas Society at the Methodist Church Thursday.

Mr. and Mrs. Wayne Pavey and daughter, Carol, and Mrs. John Clements were Mason City visitors Thursday.

Bruce Arthold, student at Iowa State College, spent the week end visiting with his parents, Mr. and Mrs. E. J. Arnold.

Mr. and Mrs. Ed. J. Thompson drove to Iowa City Sunday where Ed went for a check-up. They returned home today, Wednesday.

Mrs. Wesley Patterson and baby daughter, Paige, spent the week end visiting at the Patterson home near Bancroft.

Mr. and Mrs. R. A. Jorgenson were dinner guests Sunday at the Lyle Liebendorfer home at Forest City.

Mrs. C. F. Keraus, who has been staying with Mrs. Rose Mitchell at Swea City, visited over the week end in Klemme.

Masons in this community are invited to attend Bethel Lodge at Garner on Thursday evening of this week. There will be work in the third degree.

Most of the north Iowa corn was planted this past week and Saturday found most farmers with the job completed or only a few more acres left to plant.

Elwood Harvey began full-time work at the Klemme Times shop Monday. Elwood seems to have the required qualifications for the printing art. He will work in the shop throughout the summer.

The Misses Marie Schmidt and Bernadine Spangler left Thursday evening for San Antonio, Texas via train for a visit with Pfc. Luther Schmidt who is stationed at Camp Swift, near San Antonio.

Mr. and Mrs. J. M. Neuberger entertained the Ax families for dinner Sunday. In the afternoon they drove to Mason City and had a family picture taken at the Russell Studio.

Carol Larson and family have moved back to Klemme from Des Moines where Carol has been working in the Ankeny plant. Mr. Larson will again open his Service Station just west of Klemme.

Mr. and Mrs. John Micklick and small son Bobbie are moving to Hanlontown the first of next week. In discussing their prospective new home Bobbie listened and the question was brought up about getting milk. Bobbie solved the problem in a hurry when he said, "We'll just have Ralph Elder bring us milk."

Mrs. Naska Bock entertained her children and families to dinner at her home Sunday. Present were Mr. and Mrs. Mitchell Bock of Klemme; Mr. and Mrs. Edwin Bock and daughters, Mary Margaret and Virginia of Garner; and Mrs. Lyle Burr and children, Carolyn and Bobbie of Mitchellville.

Mrs. Martha Bredbenner and Miss Evelyn Arnold drove to Allison Sunday to bring Miss Novella Bredbenner home for the summer vacation. Miss Bredbenner has taught school at Allison for several years.

Mr. and Mrs. E. C. Buntentbach plan to go to Northfield, Minnesota Saturday to attend the May Fete of Carleton College. Miss Lorraine Buntentbach, a freshman, will appear in the program which will be held on an island near the city.

Marvin "Slim" Brinkman suffered an injury to his eye while working at Arnold's shop Thursday. A nut flew off from a bolt striking and cutting one eye. The eye is healing and his sight may not be impaired by the accident.
